Center for Value in Healthcare: Translating Research Into Policy and Practice

January 11, 2012

The winter Forum season opened with an opportunity for attendees to become acquainted with the programs of the Center for Value in Healthcare, a new research entity within the School of Population Health. The Center focuses on research designed to examine performance measurement and improvement strategies that will increase the capacity of the US healthcare system to deliver higher quality, and more cost-effective care.

Hosted and moderated by the Center's director, Mark Legnini, DrPH, this Forum featured innovative projects, presented by a panel of the Center's faculty and staff:

Evaluating the Impact of Pennsylvania's Medicaid Aging Waiver Reform
Albert Crawford, PhD, MBA, MSIS

Tobacco Use in Philadelphia: Philadelphia's Clean Indoor Air Worker Protection Law and Trends in Inpatient Admission
Robert Simmons, DrPH, MPH, CHES, CPH
Albert Crawford, PhD, MBA, MSIS

National Quality Measure Development and Implementation
Valerie Pracilio, MPH
Bettina Berman, RN, BS, CNOR, CPHQ

Physician Profiling in Emilia-Romagna Italy: A Tool for Quality Improvement
Vittorio Maio, PharmD, MS, MPH

Sponsor Involvement in Quality Improvement: How, Why, and When
Robert Lieberthal, PhD

Using a Novel Statewide Health Data System to Improve Care
Joseph Couto, PharmD, MBA

The projects discussed revealed a diverse range of content areas, with collaborations that spanned from local and state governments to physician practices abroad. The Center for Value in Healthcare has the capacity to expand its reach and foster the development of important quality initiatives affecting meaningful change.

If you are interested in collaborating with the Center, or you would like more information about a specific project, contact Mark Legnini, DrPH, at 215-955-0427 or mark.legnini@jefferson.edu.
