This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's [Center for Teaching and Learning \(CTL\)](#). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Department of Surgery, Faculty Development Sessions by an authorized administrator of the Jefferson Digital Commons. For more information, please contact: [JeffersonDigitalCommons@jefferson.edu](mailto:JeffersonDigitalCommons@jefferson.edu).

A PHILANTHROPY  
PILLAR PROGRAM

# Section 1

## Philanthropy Basics

# Academic Medical Center: Four Pillar Model

# New Math: Research Dollars

## NIH funding, FY 1950–2019

in thousands of constant 2013 BRDPI adjusted dollars

Source: NIH funding figures through FY 2014 are based on total budget authority. Projected NIH funding figures for FY 2015 through FY 2019 are based on data from the Congressional Budget Office.

# U.S. Philanthropic Pie

Total 2014 Contributions: \$358.38 billion

Contributions by Recipient Category

# U.S. Philanthropic Pie

**Total 2014 Contributions: \$358.38 billion**

**Contributions by Source**

**Foundations and  
Corporations  
accounted for  
almost **\$72**  
**BILLION** in 2014**

# Jefferson's 10-Year Fundraising Performance

## Dollar Trends by Gift Bands

- On average, Jefferson raised **\$35M\*** annually for the last ten years
- Investment in fundraising has been flat during that time, with an average Fundraising Cost of \$5.4M annually
- The strongest years have been a result of mega gifts in 2005 and 2014

NOTE: FY2016 budget is based on May 2016 Finance report; final fiscal year report not presently available.

Excluded from the average are three principal gifts. In FY2005, a \$25 million pledge from Mrs. Dorrance Hamilton for the Hamilton Building and a \$17 million estate gift from the Estate of Dorothy H. Rector were received. In FY2014, a gift of \$110 million was received from Mr. Sidney Kimmel.

# Section 2

## Fundraising for Research

# Corporate and Foundation Relations Team

**Molly Gerber**  
AVP & Chief Strategy Officer

**Emma DelVecchio,**  
Assistant Director

**Erin Morton,**  
Associate Director

**Dana Marcus,**  
Assistant Director

## Corporate and Foundation Relations

- The Corporate and Foundation Relations (CFR) team offers services for Jefferson clinicians, researchers and administrators who seek external funding from ***non-federal*** sources including, corporations with philanthropic intent, charitable foundations and associations.
- Our team maintains relationships with local and national corporations and foundations to keep them abreast of the work being done by Jefferson researchers and scientists.

## What We Do: Making the Match

- Cultivate and maintain relationships with foundation, association and corporate partners
- Meet with researchers to gather information about their research in order to send targeted funding opportunities directly
- Research potential funders and funding mechanisms based on identified needs/interests
- CRISP Model: Making connections between clinicians and researchers on and off campus

## **What We Do:**

# **Identify & Disseminate Research and Program Funding Opportunities**

- Research and inform faculty of current RFP & LOI opportunities:
  - Directly through our gift officer network
  - Through department chairs
  - Publishing online on the TJU Research web page

# Surgery Development Team

**Lara Goldstein**  
AVP Development, Surgery

**Kelly Austin**  
Associate Director of  
Development, Surgery

**Meg Ratchford**  
Assistant Director of  
Development, Surgery

## Department of Surgery Targeted Funding List

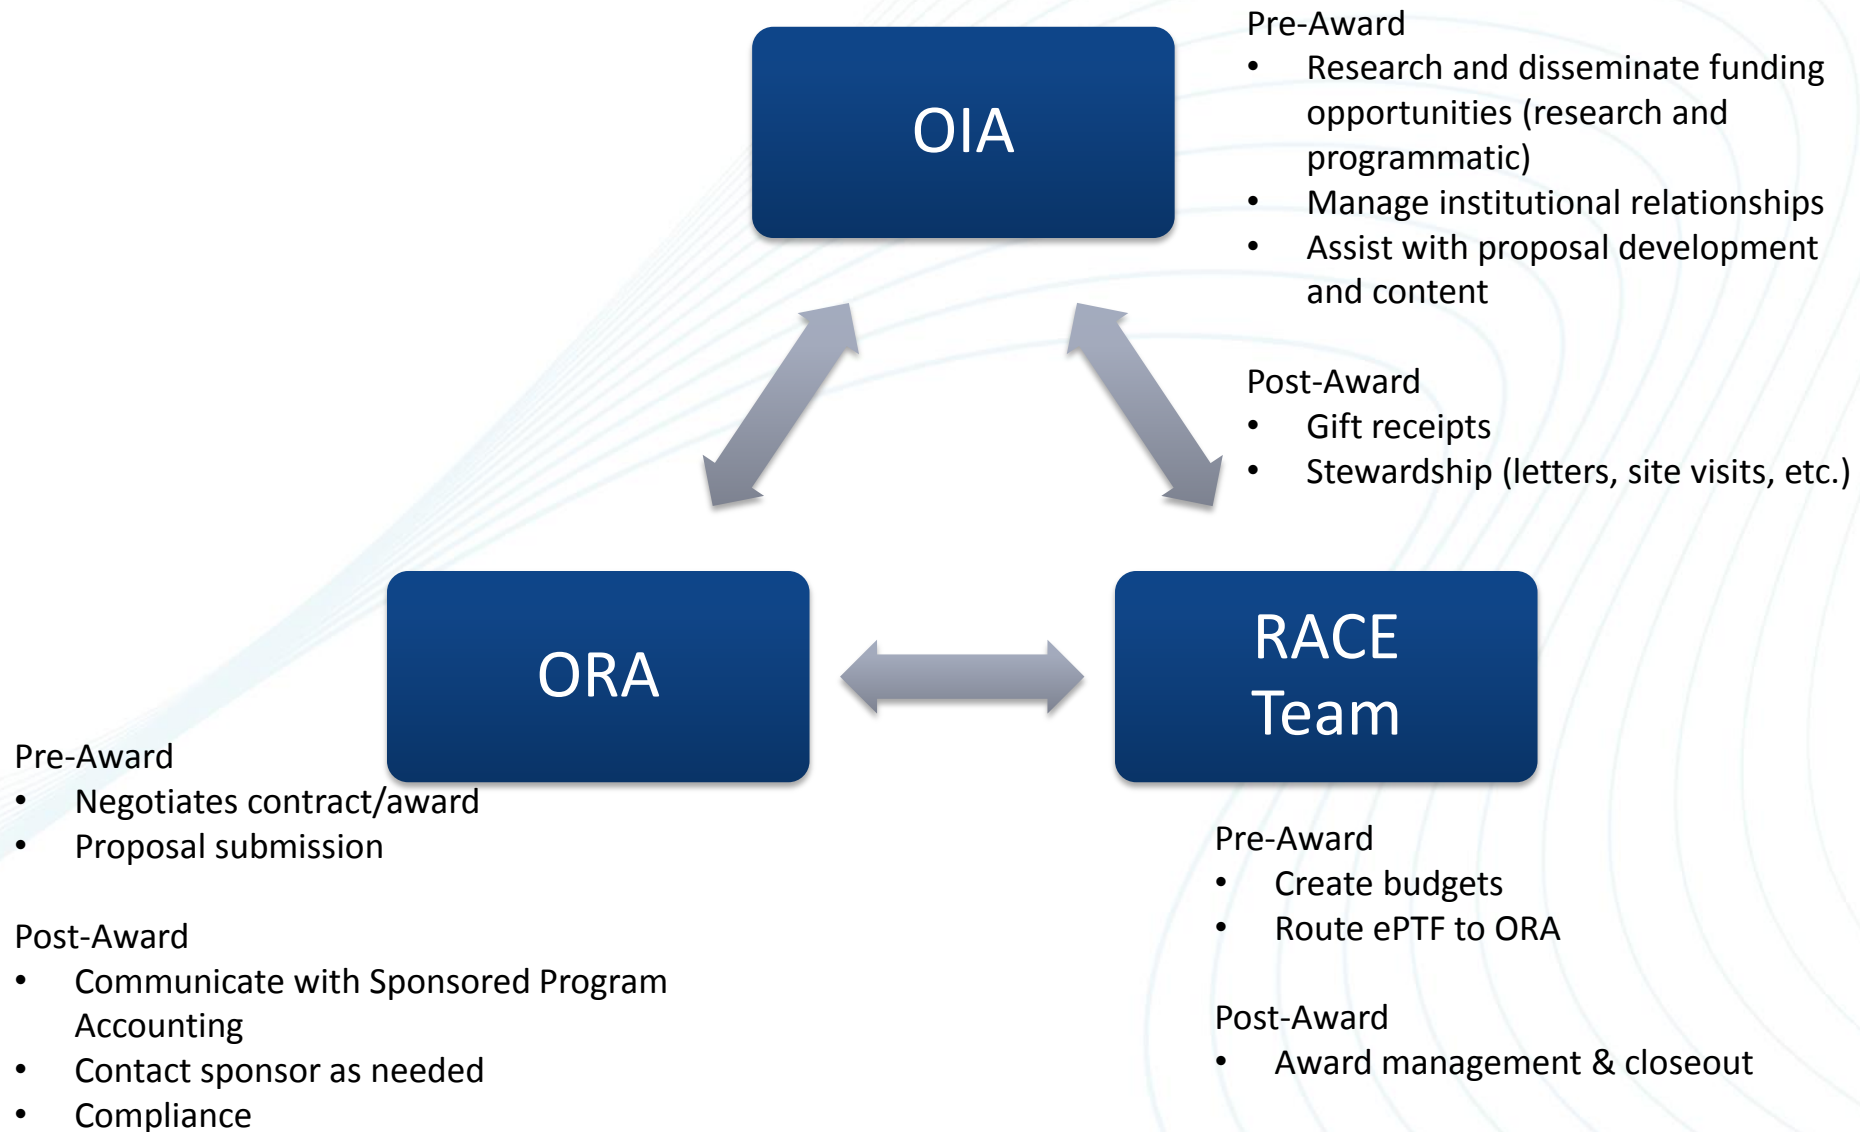

- AACR
- ACS
- Thrombosis Research Institute
- Pancreatic Cancer Research Fund
- American Society of Transplant Surgeons
- American Society of Transplantation
- American Pain Society
- Shock Society
- Association for Surgical Education Foundation
- Plastic Surgery Foundation
- American Association for Thoracic Surgery
- Paralyzed Veterans of America
- American Society of Colon and Rectal Surgeons

## What CFR Can Do: Preparing Submissions

- Review, revise, draft and edit LOIs and proposal materials
- Draft cover letters for President, Dean(s), and/or Department Chair
- Provide necessary Jefferson materials:
  - Board lists, IRS documentation, boilerplate Jefferson information, audited financial statements, etc...
- Ensure that researchers are working through the appropriate RACE and ORA channels throughout the application process

# The Philanthropic Grant Funding Cycle

# Competitive Grants

- Some foundations limit the number of applicants per institution. An internal competition will be managed through a subcommittee of Jefferson's Committee on Research (JCoR) to select the Jefferson applicant for each.
- Please DO NOT apply directly — unsolicited applications may disqualify Jefferson from future competitions.
- Limitations vary from foundation to foundation. Please wait for JCoR to release each opportunity announcement for application and funding details and instructions.
  - These notices are distributed by [OIAFundingOpportunities@jefferson.edu](mailto:OIAFundingOpportunities@jefferson.edu) through the FT-Faculty, Chairman, and Dept-Admin list-servs. If you are not on one of these three distribution lists, please contact [Dana.Marcus@jefferson.edu](mailto:Dana.Marcus@jefferson.edu)

## Funding Opportunities

Information on a broad spectrum of funding sources that support research projects is provided here, both intramural and extramural. These grant opportunities include ones funded through the Provost's office (DTSA, Programmatic Initiative Grants), through NIH, DOD, NSF and other federal funding sources, and through foundations including limited submission opportunities that are selected through the Office of Institutional Advancement in collaboration with JCOR. Also provided is a link to Pivot, a searchable grants database, as well as useful links for preparing NIH grant applications.

▶ INTRAMURAL

▶ EXTRAMURAL

# Extramural > Non-Federal Funding Opportunities

## Non-Federal Resources, including Foundations, Disease-Specific Associations and Institutionally Limited Funding Opportunities

Jefferson's Office of Institutional Advancement's Corporate and Foundation Relations (CFR) team offers services for Jefferson clinicians, researchers and administrators who seek external funding from non-federal sources including, corporations with philanthropic intent, charitable foundations and associations. CFR staff members are available to work with clinicians, researchers and others to identify funding priorities and potential philanthropic partners as well as to support the development of letters of intent (LOIs) and proposals. CFR team members serve as the point of contact for foundation, association, and corporate partners, and are available to identify funding opportunities.

Active funding opportunities are updated regularly. Please refer to this page to see the most up to date funding notices monthly.

## Failure to Rescue as a Quality Improvement Approach in Transplantation: A First Effort to Evaluate This Tool in Pediatric Liver Transplantation

Shannon L. Cramm, BS,<sup>1</sup> Seth A. Waits, MD,<sup>1</sup> Simon P. Horslen, MB ChB,<sup>3</sup> George V. Mazariegos, MD,<sup>1</sup> and John C. Magee, MD<sup>1</sup>

**Background.** Significant intercenter variation in failure to rescue (FTR, death after a major complication) is a quality improvement issue. This study is the first effort to investigate the relationship between FTR and quality improvement. **Methods.** Using the Studies of Pediatric Liver Transplantation (SPLIT) database, we evaluated primary liver transplants at 21 centers. Centers were stratified by mortality, complications, and FTR across tertiles. High mortality tertiles ( $P < 0.01$ ). The low mortality tertiles ( $P < 0.01$ ) as well as FTR (4.6% vs 9.9% and 14.4%). Our results demonstrate that although centers with high mortality inhibit 3-fold the rate of FTR. Efforts to standardize transplantation recipients. This preliminary study indicates that transplantation and warrants further investigation. (Transplantation 2016;100: 801–807)

provement tools in the field of transplantation; future work is necessary to characterize these measures in the adult population, which may be facilitated by the expansion of the data we collect in our national registries.

### ACKNOWLEDGMENTS

These data were provided by the Studies of Pediatric Liver Transplantation group. Funding for this project was in part from the American Society of Transplant Surgeons Presidential Student Mentorship Grant.

### ASTS Student Mentor Grant (ASTS Presidential Student Mentor Grant)

Opp ID: 132297 | Research | Last edited on 05 Apr 2016

Full Details

Website <http://asts.org/grants-and-research/grants>

Sponsor **American Society of Transplant Surgeons (ASTS)**

Amount **\$3,500 usd**  
The grant provides \$3,500 paid in one installment to the awardee's institution. The funds are for stipend/salary support.  
There are four grants available annually.

Applicant Type Graduate Student

Citizenship or Residency Unrestricted

Activity location Unrestricted

Abstract  
ASTS is dedicated to providing exposure to the field of transplantation to medical students by supporting summer mentorship opportunities under the guidance of an ASTS member.  
  
The proposed research project must be **transplant** related (clinical or basic science) and performed under the direction of an ASTS member.  
« less

Eligibility Medical students with an interest in transplantation are eligible to apply.

Keywords Clinical Research or Studies Organ Transplantation
