Graduate Nurse Residency Programs: Bridging the Knowledge – Practice Gap
Elissa Harmon, RN, MSN, Program Coordinator
Department of Nursing Education, Thomas Jefferson University Hospitals, Philadelphia, PA

Program Goals
- Develop effective decision-making skills related to clinical judgment and performance
- Provide clinical nursing leadership at the point of care
- Incorporate research-based evidence linked to outcomes into practice
- Provide support for the Graduate Nurses during their first position as they develop in their professional roles
- Formulate an Individualized Development Plan related to their new clinical role

Program Objectives
- Improve communication skills
- Promote critical thinking
- Develop autonomy at the bedside
- Integrate evidence-based practices into patient care
- Positively affect the retention of Graduate Nurses

Method
- Implementation of the Graduate Nurse Residency Program provides:
  - Peer support for Graduate Nurse
  - Standardized curriculum
  - Application-based learning activities
  - Program input from participants

Conclusion
- The Graduate Nurse Residency Program is beneficial to the Graduate Nurse and the employer.
- The program:
  - Promotes better patient outcomes
  - Improves nurse satisfaction
  - Decreases Graduate Nurse turnover rates

Program Background/Concept
- Thomas Jefferson University Hospitals’ Post-Baccalaureate Graduate Nurse Residency Program is based on the University HealthSystem Consortium (UHC) & American Association of Colleges of Nursing (AACN) nationally standardized curriculum. The program maintains an evidence-based foundation.
- The Graduate Nurse Residency Program is a result of the partnership between Thomas Jefferson University Hospitals and the Jefferson School of Nursing to support the Graduate Nurse (GN) through the transition into his/her first professional role.
- Program framework is based on Benner’s model of Skill Acquisition.

Program Goals
- Develop effective decision-making skills related to clinical judgment and performance
- Provide clinical nursing leadership at the point of care
- Incorporate research-based evidence linked to outcomes into practice
- Provide support for the Graduate Nurses during their first position as they develop in their professional roles
- Formulate an Individualized Development Plan related to their new clinical role

Program Objectives
- Improve communication skills
- Promote critical thinking
- Develop autonomy at the bedside
- Integrate evidence-based practices into patient care
- Positively affect the retention of Graduate Nurses

Method
- Implementation of the Graduate Nurse Residency Program provides:
  - Peer support for Graduate Nurse
  - Standardized curriculum
  - Application-based learning activities
  - Program input from participants

Conclusion
- The Graduate Nurse Residency Program is beneficial to the Graduate Nurse and the employer.
- The program:
  - Promotes better patient outcomes
  - Improves nurse satisfaction
  - Decreases Graduate Nurse turnover rates
