#### DOCTOR OF LETTERS-KATHARINE BOUCOT STURGIS

Katharine Boucot Sturgis was born in Philadelphia, reared in Philadelphia, spent most of her professional life in Philadelphia, and has become one of Philadelphia's best known and outstanding physicians.

Dr. Sturgis received her preliminary education in the Philadelphia school system, attended the University of Pennsylvania and Pennsylvania State College, and received her Doctor of Medicine from the Woman's Medical College in Pennsylvania in 1942 (now the Medical College of Pennsylvania) where she was a member of AOA. Early in her career, she developed an intense interest in pulmonary disease, particularly tuberculosis, and trained at the Herman Kiefer Hospital in Detroit, Michigan, and at the Trudeau School of Tuberculosis. In 1954 she earned the Master of Public Health Degree at the Johns Hopkins School of Hygiene and Public Health and shortly thereafter was certified by the American Board of Preventive Medicine.

Dr. Sturgis' reputation as a teacher, clinician, and researcher in pulmonary disease is internationally known. She has held active and consulting appointments in the Philadelphia General Hospital, the Philadelphia Veterans Administration Hospital, the Hospital of the Woman's Medical College, and for a number of years was a consultant to the Barton Memorial Hospital and the White Haven Sanitarium of The Jefferson Medical College. She has also served as a special consultant in pulmonary diseases to the City of Philadelphia, the National Cancer Institute, and the Milton S. Hershey Medical Center.

Her membership and activities in medical and professional societies are well known. Most importantly, she has been elected and served as President of the College of Physicians of Philadelphia, the Philadelphia County Medical Society, the American College of Preventive Medicine, the Pennsylvania Thoracic Society, the Laennec Society of Philadelphia, and the Pennsylvania Chapter of the American College of Chest Physicians. In addition, she has served as the Vice President of the Association of Teachers of Preventive Medicine and of the American Thoracic Society.

Katharine Sturgis' interest and participation in community affairs are legion. She has served as the President of the Philadelphia Tuberculosis and Health Association, is a member of the Board of Directors of the William B. Lake Foundation, the William Skelton Harrison Fund, the Joseph Priestley House, and the Delaware Valley Citizens Council for Clean Air. She also is a member of the Board of Trustees of Beaver College, the Moore College of Art, and the National Jewish Hospital and Research Center.

During her entire career she has been closely associated with the Woman's Medical College rising through the academic ranks to Professor and Chairman of the Department of Preventive Medicine in 1952 and to Emeritus Professor of Preventive Medicine in 1968. She has also served on the faculty of the Graduate School of Medicine of the University of Pennsylvania for many years.

The Woman's Medical College of Pennsylvania conferred the honorary degree of Doctor of Medical Sciences on her in 1969. She has received numerous other honors and awards including the Philadelphia Gimbel Award, the Strittmatter Award of the Philadelphia County Medical Society, the Poor Richard Club of Philadelphia Award, the Trudeau Medal of the National Tuberculosis and Respiratory Disease Association, the Alumnae Achievement Award of the National College the Respiratory Environment Hardth Award the Distingtonia College the Respiratory Disease Association and Respiratory Disease Association and the Distingtonia College the Respiratory Disease Association and Respiratory Disease Associatio of the Woman's Medical College, the Pennsylvania State Environmental Health Award, the Distinguished Award of the American College of Preventive Medicine and the Elizabeth Blackwell Citation of the New York Infirmary. She was named a Distinguished Daughter of Pennsylvania and the Penn State Woman of the Year and has received honorary degrees from Keuka College and Beaver College.

Dr. Sturgis has contributed over 120 articles to the medical literature and served as the Chief Editor of the American Medical Association Archives of Environmental Health for 11 years. Dr. Sturgis is married to a physician and is the mother of two children, a geologist and a physician.

#### DOCTOR OF HUMANE LETTERS-MAXWELL FINLAND

Maxwell Finland was born in Russia and received his schooling in the United States. He graduated from Harvard College in 1922 and Harvard Medical School in 1926. Since that time, he has been associated with Harvard and its famous research and teaching institute, the Thorndike Memorial Laboratory at the Boston City Hospital.

As a Thorndike Resident and a Peabody Fellow, he became deeply involved in the care of the numerous pneumonia patients provided by the overcrowded tenements in South Boston. He developed and tested pneumococcal vaccines, and in 1932 he began to compare their effectiveness with the newly introduced sulfonamides. In numerous subsequent studies, he methodically continued to compare effectiveness of newly developed antibacterial and antiviral agents with those of known activity. The number of his publications in this field exceed one thousand.

He has always, first and foremost, been a clinical investigator, collecting, recording, and analyzing observations made on sick patients. Every epidemic or catastrophe occurring in South Boston was reflected in admissions to the Boston City Hospital and presented Dr. Finland with an opportunity to learn, record, and teach. For example, the Coconut Grove Fire which cost the lives of 500 people, led to the admission of hundreds of burn victims with severe respiratory injuries. Dr. Finland stayed with them night and day, relieving pain, treating complications, teaching house staff, and gathering information which led to memorable papers in Medicine.

Most of his work consists of systematic and methodical studies of the comparative effect of new antibiotics. His judicious and fair conclusions are highly regarded by the professional community and an adverse rating, although not always heeded, usually spelled trouble. Dr. Finland fought vigorously and successfully against the introduction of fixed combinations of antibiotics and less successfully against the unnecessary and improper use of antibiotics. especially their use in disease prevention.

Dr. Finland is a gifted teacher, at the bedside, in the laboratory, and in his little administrative office. Hundreds of fellows went through Thorndike on their way to prominent academic positions and many have vivid memories of their contact with Max. He challenged them, teased them, and was enormously proud of their achievements. He discussed the latest political and cultural events with them and was the incomparable bar tender at the annual Thorndike gathering at Chalfonte-Haddon Hall in Atlantic City. Thorndike was, for him, the cradle of academic medicine in the United States, and his fellows came to share this opinion to a large extent because of his influence.

Maxwell Finland retired as the Director of Thorndike in 1968, but continued his association with the Boston City Hospital and is also a distinguished physician for the Veterans Administration Hospital. He has held numerous national and international positions on editorial boards as a member of consultative teams, presidential committees, and consultative agencies. He has received equally numerous honors and awards such as the Modern Medicine Award, Bristol Award, and recently, the Kober Medal of the Association of the American Physicians.

#### DOCTOR OF SCIENCE-FRANZ XAVER HAUSBERGER

A native of Bavaria, Germany, Franz Xaver Hausberger attended the University of Munich Medical School, interned at Munich Medical School Hospital and, upon presenting his thesis, received the doctor of medicine degree, summa cum laude, in 1935. He was appointed Assistant in Anatomy at the University of Munich and after one year received the honor of a Notgemeinschaft Deutscher Wissenschaften Fellowship for scientific studies and accepted a residency in Internal Medicine at Gertrauden-Krankenhaus in Berlin. After Board Certification in Internal Medicine in 1939 he was called to Salem Hospital in Koeslin, Germany, as Head of the Department of Internal Medicine. He then moved to the University Hospital in Erlangen as Head of the Division of Endocrinology. The years following his studentship at Munich were spent in clinical medicine and research but upon coming to the United States in 1949 he devoted his entire attention to a new career in academic medicine proper—teaching and research.

Dr. Hausberger joined the faculty of the Department of Anatomy of Jefferson Medical College in 1950 and immediately gained support for his research program from the National Institutes of Health. As Professor of Anatomy, he served as Head of the Division of Gross Anatomy from 1960 until his retirement in 1975 when he received the title of Emeritus Professor of Anatomy.

A uniquely gifted and devoted teacher, he has by example and precept strongly influenced the young lives of nearly five thousand Jefferson medical students who, in appreciation, bestowed upon him their two highest honors: The Christian R. and Mary F. Lindback Award for Distinguished Teaching (1965), and the graduating class of 1967 commissioned the painting of his portrait for presentation to Jefferson Medical College.

Initiated while still a medical student, Dr. Hausberger's basic research program on adipose tissue has led an entire field of investigators in the quest for better understanding of the structure, development, and function of fatty tissues in both health and disease, including diabetes. In universal recognition of his eminent role in this significant and sustained research, the American Physiological Society dedicated to him their 1965 Year Book, Volume V, on "Adipose Tissue", distinguishing him as the "founding father of adipose tissue research". His scientific contributions have occasioned many high honors as well as membership in scientific societies dedicated to excellence in creative scholarship, including the American Physiological Society, the Endocrine Society, the American Diabetes Association, the American Association of Anatomists, the American Association of the Advancement of Science, and the Philadelphia Endocrine Society. In Germany, the University of Dusseldorf offered an honorary degree.

Following retirement from Jefferson, Dr. Hausberger joined the faculty of Temple University where he continues his research and teaching activities as Clinical Professor of Anatomy.

In 1949, Dr. Hausberger and the former Brigitte C. Nichols, nee Landauer, were married. Mrs. Hausberger soon joined her husband as co-worker and investigator. The Hausbergers have two sons—Mike Nichols, well known actor, director, and producer of the theater and motion pictures, and Robert A. Nichols, a physician and an alumnus of Jefferson Medical College, Class of 1960.

#### THE ACADEMIC COSTUME

The wearing of academic dress dates back to the early days of the oldest universities in the world. In the American Council on Education's book entitled "American Universities and Colleges" it is suggested that "gowns may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head ..."

Throughout the years European universities have continued to show great diversity in their academic dress. American universities, on the other hand, when they decided to adopt academic dress about sixty years ago, immediately established a code of regulations which today is followed by almost all American institutions. The establishment of this code has made it possible to distinguish the Associates, Bachelors, Masters, and Doctors and at the same time recognize the university which has given them the degree.

The Associate in Arts and Bachelor's gowns have pointed sleeves and are worn closed. The Master's gown has oblong sleeves, open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cut away, and is worn open or closed. The Doctor's gown has bell-shaped sleeves. It is worn opened or closed. Cotton poplin or similar material is used for the Associate's, Bachelor's and Master's degrees, and rayon or silk ribbed material is used for the Doctor's degree. All gowns are black except for the Associates in Arts degree which is gray.

The hoods vary in length: 48 inches for the Doctor's degree, 42 inches for the Master's, and 36 inches for the Bachelor's and Associate's. All hoods are lined in silk in the academic color or colors of the institution conferring the degree. If the institution has more than one color, the colors are shown in divisions using chevrons. The binding or edge of the Doctor's, Master's and Bachelor's hoods are usually made of velvet in the color designating the subject in which the degree was granted. The Associate of Arts hood has no velvet border. The outside is black.

Black mortarboards are worn for all degrees.

#### THE JEFFERSON PROCESSIONAL

The Jefferson Processional was commissioned by the Alumni Association of Jefferson Medical College and played for the first time on November 15, 1974, at the Sesquicentennial Celebration of Jefferson Medical College of Thomas Jefferson University. This piece was presented to Thomas Jefferson University by the President of the Alumni Association of Jefferson Medical College, Dr. John J. Gartland. The composition was composed by Burle Marx.

#### THE PRESIDENTIAL BADGE OF THOMAS JEFFERSON UNIVERSITY

The President's Badge was created for the Inauguration of Lewis W. Bluemle, Jr., M.D., the third President of Thomas Jefferson University, on September 7, 1977. It consists of four official corporate seals of Thomas Jefferson University and the predecessor corporation, The Jefferson Medical College of Philadelphia. These seals were used to mark diplomas, certificates, and other official documents and have been gold-plated to form the Presidential Badge.

The medallion on the President's right is the corporate seal of Thomas Jefferson University today and was created in 1969 when Jefferson Medical College became Thomas Jefferson University. It carries a contemporary likeness of Thomas Jefferson. The other three medallions are the various seals that were used in Jefferson Medical College for many

The other three medallions are the various seals that were used in Jefferson Medical College for many years. The oldest marked every diploma that was issued by the College from 1839 to 1967. This seal carries a traditional likeness of a young Thomas Jefferson and the founding date of the College as 1826. Prior to 1839 the diploma of Jefferson Medical College carried the seal of the Jefferson College in Canonsburg, Pennsylvania—the parent institution.

Another seal was developed in 1967 as a result of research done by the late Edward L. Bauer, Emeritus Professor of Pediatrics, who determined that the founding year of Jefferson Medical College was 1824 rather than 1826. This seal is identical to the present corporate seal except the words "Thomas Jefferson University" replace "Jefferson Medical College". It was used for only two years—from 1967 to 1969.
