ANNOUNCEMENT.

THE Forty-Fifth course of Lectures in this Institution will begin on the Second Monday of October, 1869, being the 13th, with a General Introductory Lecture, by Professor Pancoast. The regular series of lectures will be entered upon on the next day, and continued until the end of February, 1870.

The Commencement for conferring Degrees will be held early in March.

Preliminary Lectures will be given by Professors Gross, Wallace, and Rand, and Drs. Da Costa, W. H. Pancoast, J. H. Brinton, R. J. Levis, F. F. Maury, W. W. Keen, and S. W. Gross, beginning on Monday, September 6th, and continuing until October.

These will be free to all. The Dissecting-room will be open under the superintendence of the Professor and Demonstrator of Anatomy during the same period.

Clinical instruction will be given daily at the College, the Surgical Department being conducted by Professors Gross and Pancoast; the Departments of Diseases of Women and Children by Professor Wallace; and the General Medical Clinique, by Dr. J. M. Da Costa, Lecturer on Clinical Medicine.

Besides the College Cliniques the opportunities for practical study afforded by the city of Philadelphia cannot be excelled. With a population of over 800,000, it furnishes material for the study of every variety of disease and injury, acute and chronic. The passage of the Anatomy Act legalizing dissection has rendered available a vast amount of material formerly inaccessible.

Philadelphia contains, besides its College Cliniques, seventeen hospitals, seven dispensaries, and thirty-eight other charitable institutions. It may be most truly said that the opportunities for the student are only limited by the time at his disposal.

Notwithstanding its large population, the city is so situated as to admit of indefinite expansion, and is not crowded. Hence rents in the business portion of the town are not high, and board is abundant and cheap. The price ranges from \$5 to \$7 per week, which is at least thirty per cent. below that of most of the large cities.

To students who wish to remain during the summer especial advantages are offered. They are enabled to go through the wards of the Philadelphia and Pennsylvania Hospitals, and have the opportunity of attending the summer course of lectures.

The Summer Course of 1869 began on Monday April 6th, and will continue until the 26th of June. Besides the Clinical Instruction at the College, the Philadelphia and Pennsylvania Hospitals, the Course on Ophthalmic and Aural Surgery is illustrated at the Wills Hospital, by Dr. Levis.

The Lectureships are constituted as follows :—

Clinical Surgery	By Professor GROSS.
“ Obstetrics	“ Professor WALLACE.
Medical Jurisprudence and Toxicology	“ Professor RAND.
Materia Medica and Therapeutics	“ Professor BIDDLE.
Clinical Medicine	“ Dr. J. M. DA COSTA.
Visceral and Surgical Anatomy	“ Dr. W. H. PANCOAST.
Operative and Minor Surgery	“ Dr. J. H. BRINTON.
Ophthalmic and Aural Surgery	“ Dr. R. J. LEVIS.
Venereal and Cutaneous Diseases	“ Dr. F. F. MAURY.
Pathological Anatomy	“ Dr. W. W. KEEN.
Surgical Diseases of the Genito-Urinary Organs	“ Dr. S. W. GROSS.

Clinical lectures are delivered by Prof. Meigs in the Pennsylvania Hospital, and by Drs. Maury and Brinton, at the Philadelphia Hospital, during the months of May, June, and July.

Attendance upon this course, as well as upon the preliminary lectures, is allowed as office instruction, but the course does not count as a “Session” of lectures.

Students who may desire instruction in special branches will find every facility. Private courses include the following among other subjects :—

- Clinical Midwifery, with Cases.
- Diseases of Women and Children, with Cases.
- Ophthalmic and Aural Surgery.
- Minor and Operative Surgery.
- Laryngoscopy and Diseases of the Chest.
- Diseases of the Genito-Urinary Organs.
- Microscopy and Chemical Analysis.

It should be borne in mind that there are openings for graduates in the hospitals and charitable institutions of the city, where they may spend a year or more, without expense for board, as “Internes.” The Assistants to the Clinical Professors at the College are appointed from among the graduates of the school annually in April.

Since the last Annual Announcement the Faculty have had to deplore the loss of PROFESSOR ROBLEY DUNGLISON. Increasing infirmities compelled the withdrawal of Professor Dungleison from the active duties of his chair previous to the last session. His death took place on the 1st of April. The following resolutions, adopted by the Faculty on the 2d April, 1869, express their sense of the loss sustained by them.

WHEREAS, It has pleased Almighty God to remove from among us, in the evening of his life, and in fruition of a world-wide reputation, our friend and late associate, Dr. ROBLEY DUNGLISON, Emeritus Professor of the Institutes of Medicine in the Jefferson Medical College, and late Dean of this Faculty ;

AND WHEREAS, He was warmly endeared to us by his high social qualities, his stern integrity of character, his unceasing devotion to his official duties, his uniform urbanity and kindness, and the great purity of his life ;

AND WHEREAS, In his death the medical profession has lost one of its most learned, zealous, and exemplary members, medical literature one of its most able promoters, medical science one of its most successful cultivators, and medical philosophy one of its most faithful interpreters ; therefore,

Resolved, That this Faculty will attend the funeral of their late friend and colleague in a body, and that one of their number be appointed to deliver, at the opening of the next session of the College, a discourse upon his life and character.

REGULATIONS.

The Session commences on the second Monday of October.

The examinations are so arranged as to permit the Commencement for conferring Degrees to be held as early in March as is practicable. There is likewise an examination of candidates for graduation during the first week of July. The degrees are conferred on the candidates who are successful at this examination at the Annual Commencement following.

The candidate must be of good moral character, and at least twenty-one years of age. He must have attended at least two full sessions of lectures in some regular and respectable medical school, one of which, the last, shall have been in this College; and must exhibit his tickets, or other adequate evidence thereof, to the Dean of the Faculty.

He must have studied medicine for not less than three years, and have attended at least one course of clinical instruction in an institution approved by the Faculty. He must present to the Dean of the Faculty a thesis of his own composition, correctly written, and in his own handwriting, on some medical subject; and exhibit to the Faculty, at his examination, satisfactory evidence of his professional attainments.

The degree will not be conferred upon any candidate, who absents himself from the public commencement, without the special permission of the Faculty.

The hours of attendance at the clinics of the College, held during the winter, spring, and autumn, are so arranged as to permit the students to attend the clinics at the Pennsylvania Hospital and the Philadelphia Hospital.

FEE to each Professor, \$20—in all \$140. Matriculation Fee \$5, to be paid once only. The Graduation Fee is \$30.
