THE OATH OF HIPPOCRATES

I do solemnly swear by that which I hold most sacred:

That I will be loyal to the profession of medicine,
just to its members, and generous to its institutions;

That I will lead my life and practice my art in
uprightness and honor;

That I will give respect and gratitude to those who
have taught me this art;

That into whatsoever house I shall enter, it shall be
for the good of the sick to the utmost of my power,
I holding myself aloof from wrong, from corruption,
from the tempting of others to vice;

That I will exercise my art for the best care of my
patients,
and I will give no drug, perform no operation for
a criminal purpose, even if solicited far less
suggest it;

That whatsoever I shall see or hear of the lives of
my patients which is not fitting to be spoken,
I will keep inviolably secret.

These things I do promise upon my honor.

DOCTOR OF HUMANE LETTERS—WILLIAM BENNETT BEAN

William Bennett Bean was born in Manila, the Philippines, in 1909. He received his Bachelor of Arts degree in 1932 and his Doctor of Medicine degree in 1935 from the University of Virginia, Charlottesville, where his father was Professor of Anatomy. During the next three years he took post-graduate training at Johns Hopkins, Boston City, and Cincinnati General Hospitals. His scholarship was manifested by proficiency in Latin and Greek and election to the Phi Beta Kappa and Alpha Omega Alpha honor societies.

Most notable in Doctor Bean's academic career was his chairmanship of the Department of Internal Medicine at the University of Iowa College of Medicine from 1948 to 1970, during which time he also served as Physician-in-Chief at the University Hospitals. He was made Sir William Osler Professor of Medicine in 1970. From 1974 to 1980 he was Director of the Institute for the Medical Humanities and Kempner Professor of the Humanities in Medicine at the University of Texas Medical Branch, Galveston.

In World War II, Doctor Bean held the rank of Colonel, received a Commendation Ribbon, and later served as consultant to the Surgeon General of the Army on nutrition.

The research interests of Doctor Bean have been in nutrition, rare diseases, and myocardial infarction. His numerous articles on medical history have especially highlighted the lives of Sir William Osler, Walter Reed, and Robley Dunglison, all of whom are directly or indirectly related to Jefferson Medical College.

The literary contributions of Doctor Bean include authorship of more than five hundred papers, one hundred and fifteen books or book chapters, approximately seven hundred reviews (mostly in the *Archives of Internal Medicine*), and eight hundred speeches, one of which was the Hobart Amory Hare Oration at Jefferson on "Medicine in Philadelphia in the 19th Century."

Doctor Bean has been chief editor, consulting editor or on the editorial advisory boards of at least forty publications, including the *Journal of the American Medical Association*, *Archives of Internal Medicine*, *Stedman's Medical Dictionary*, and the *Encyclopedia Britannica*. He belongs to at least eighty organizations, local, national and international, in many of which he was a founder, president, or honorary fellow.

DOCTOR OF SCIENCE—W. PAUL HAVENS, JR.

W. Paul Havens, Jr. was born in Farmingdale, New Jersey on December 20, 1911. He received both his baccalaureate and medical degrees from Harvard and interned at the Lankenau Hospital in Philadelphia. He was the first resident in Internal Medicine at the Jefferson Medical College Hospital, after which he was honored with a fellowship at the Rockefeller Institute for Medical Research in New York.

Doctor Havens served in the United States Army Medical Corps. from 1942 to 1946. It was there that he gained international recognition for his research on the etiology of viral hepatitis. He was among the first to realize that there were different types of hepatitis, each caused by a different virus, and he directed his efforts toward the isolation and cultivation of these agents. In 1946, he was awarded the Army Commendation Ribbon for research in viral hepatitis.

Doctor Havens then returned to Jefferson to continue his research, during which time he also distinguished himself both as clinician and teacher, rising to the rank of Professor of Medicine and Microbiology. He served as Attending Physician and Chief of Infectious Diseases at the Jefferson Medical College Hospital and at the Pennsylvania Hospital. Some of his many honors include Consultant to the Surgeon General, member of the Armed Forces Epidemiologic Board on Liver, Viral and Rickettsial Diseases, and member of the World Health Organization on Viral Hepatitis.

He has made numerous contributions to the medical literature on hepatology and infectious disease and was editor of the *History of Internal Medicine in World War II*.

Doctor Havens holds membership in many prestigious medical societies and has been awarded an honorary degree of Doctor of Science by Ursinus College and an honorary Professor of Medicine by the University of Chile.

Doctor Havens is married to the former Ida Markle Hessenbruch and is the father of five children who have attained prominence in the worlds of business and nursing.

THE ACADEMIC COSTUME

The wearing of academic dress dates back to the early days of the oldest universities in the world. In the American Council on Education's book entitled "American University and Colleges" it is suggested that "gowns may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head . . ."

Throughout the years European universities have continued to show great diversity in their academic dress. American universities, on the other hand, when they decided to adopt academic dress in 1895, immediately established a code of regulations which today is followed by almost all American institutions. The establishment of this code has made it possible to distinguish the Associates, Bachelors, Masters, and Doctors and at the same time recognize the university which has given them the degree. Revisions to the code have occurred from time to time.

The Associate in Arts and Bachelor's gowns have pointed sleeves and are worn closed. The Master's gown has oblong sleeves, open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cut away, and is worn open or closed. The Doctor's gown has bell-shaped sleeves. It is worn opened or closed. Cotton poplin or similar material is used for the Associate's, Bachelor's and Master's degrees, and rayon or silk ribbed material is used for the Doctor's degree. The majority of gowns are black but a number of institutions have adopted other colors to identify special programs or groups within the institution.

The hoods vary in length: 48 inches for the Doctor's degree, 42 inches for the Master's, and 36 inches for the Bachelor's and Associate's. All hoods are lined in silk in the academic color or colors of the institution conferring the degree. If the institution has more than one color, the colors are shown in divisions using chevrons. The binding or edge of the Doctor's, Master's and Bachelor's hoods are usually made of velvet in the color designating the subject in which the degree was granted. The Associate of Arts hood has no velvet border. The outside is black.

Black mortarboards are most commonly worn; six-sided tams of various colors may be used.

Some of the colors in the bindings of the hoods are:

white	Arts and Letters	green	Medicine
tan	Business	apricot	Nursing
lilac	Dentistry	dark blue	Philosophy
light blue	Education	salmon pink	Public Health
purple	Law	golden yellow	Science

The colors of the linings of the hoods for some Philadelphia academic health institutions are:

black and blue	Thomas Jefferson University	silver gray and scarlet	The Medical College of Pennsylvania
red and blue	University of Pennsylvania	white and cherry	Temple University
blue and gold	Hahnemann University		

THE JEFFERSON PROCESSIONAL

The Jefferson Processional was commissioned by the Alumni Association of Jefferson Medical College and played for the first time on November 15, 1974, at the Sesquicentennial Celebration of Jefferson Medical College of Thomas Jefferson University. This piece was presented to Thomas Jefferson University by the President of the Alumni Association of Jefferson Medical College, Doctor John J. Gartland. The composition was composed by Burle Marx.

THE PRESIDENTIAL BADGE OF THOMAS JEFFERSON UNIVERSITY

The President's Badge was created for the Inauguration of Lewis W. Bluemle, Jr., M.D., the third President of Thomas Jefferson University, on September 7, 1977. It consists of four official corporate seals of Thomas Jefferson University and the predecessor corporation, The Jefferson Medical College of Philadelphia. These seals were used to mark diplomas, certificates, and other official documents and have been gold-plated to form the Presidential Badge.

The medallion on the President's right is the corporate seal of Thomas Jefferson University today and was created in 1969 when Jefferson Medical College became Thomas Jefferson University. It carries a contemporary likeness of Thomas Jefferson.

The other three medallions are the various seals that were used in Jefferson Medical College for many years. The oldest marked every diploma that was issued by the College from 1839 to 1967. This seal carries a traditional likeness of a young Thomas Jefferson and the founding date of the College as 1826. Prior to 1839 the diploma of Jefferson Medical College carried the seal of the Jefferson College in Canonsburg, Pennsylvania — the parent institution.

Another seal was developed in 1967 as a result of research done by the late Edward L. Bauer, Emeritus Professor of Pediatrics, who determined that the founding year of Jefferson Medical College was 1824 rather than 1826. This seal is identical to the present corporate seal except the words "Thomas Jefferson University" replace "Jefferson Medical College". It was used for only two years — from 1967 to 1969.

The Presidential Badge is on permanent display in the Scott Library and is used at all convocations of the University.
