Half Past Ten O'clock

The Academy of Music

THE OATH OF HIPPOCRATES

I do solemnly swear by that which I hold most sacred:

That I will be loyal to the profession of medicine,
just to its members, and generous to its institutions;

That I will lead my life and practice my art in
uprightness and honor;

That I will give respect and gratitude to those who
have taught me this art;

That into whatsoever house I shall enter, it shall be
for the good of the sick to the utmost of my power,
I holding myself aloof from wrong, from corruption,
from the tempting of others to vice;

That I will exercise my art for the best care of my
patients,
and I will give no drug, perform no operation for
a criminal purpose, even if solicited far less
suggest it;

That whatsoever I shall see or hear of the lives of
my patients which is not fitting to be spoken,
I will keep inviolably secret.

These things I do promise upon my honor.

THE UNIVERSITY MACE

The Thomas Jefferson University Mace, carried for the first time in these 1986 Commencement Ceremonies by Grand Marshal Robert J. Mandle, Ph.D., Professor of Microbiology, was designed by Howard Serlick, member of the Guild of Mastercraftsmen, Winterthur Scholar, and Chief Conservator (Gilding) of the Historical Society of Pennsylvania. It was crafted by silversmith Eugene Zweigle and woodturner Michael Copeland.

The four-foot long, fourteen-pound Mace is made of ebony highlighted with lapis lazuli to reflect Jefferson's colors (black and blue). It features a miniature of Henry Mitchell's sculpture, *The Winged Ox*, symbol of Saint Luke the Physician, the original of which stands beside the Scott Building on Walnut Street. The miniature was cast in silver by Mister Zweigle, who also fabricated the University seal, the profile of Thomas Jefferson, mounted at the base of the staff. The J. E. Caldwell Company coordinated the project.

Mister Mitchell's original statue of *The Winged Ox*, adopted by the University in 1976 as its symbol of clinical excellence, is mounted on a column containing the names of fifty medical scientists who have most advanced the art of healing. It also reflects the historical evolution of Thomas Jefferson University from its beginnings as Jefferson Medical College in 1824 to its current status as an academic health center comprising the Medical College, the College of Allied Health Sciences, the College of Graduate Studies, and the Jefferson Hospital.

The Mace, a grand emblem of the University's heritage, will be carried at the head of all formal academic processions.

DOCTOR OF LETTERS — HILARY KOPROWSKI

Hilary Koprowski was born in Warsaw, Poland. Following graduation from the University of Warsaw, he became a member of the Rockefeller Foundation research team that was studying the mosquito-borne disease, yellow fever, in Brazil. Four years later, he joined the Lederle Laboratories where he continued his research on viral diseases. He pioneered research in an oral vaccine for poliomyelitis before the Sabin vaccine became available. His belief in the efficacy of this vaccine was so strong that his two sons were among the first to whom the experimental vaccine was given.

The Wistar Institute of Anatomy and Biology lured him to Philadelphia in 1957. He sparked a growth in the research programs of this venerable Philadelphia institution and made it the center for research on many viral-caused diseases of humans. The work that he has directed has led to an international reputation in basic virology and immunology for the Wistar Institute as well as himself. One of his most noteworthy accomplishments has been his research in rabies which has resulted in the first proven effective vaccine that can prevent this dread disease in people bitten by rabid animals.

Today, at an age when most scholars would have retired to less strenuous pursuits, Doctor Koprowski continues to be an acknowledged leader in the field of rabies research. In addition, he is successful in competing for and obtaining funding to continue his work in this and other areas of research. He is the principal investigator in productive research programs involving studies on multiple sclerosis, basic virology and immunology.

His outstanding contributions to viral research have resulted in his being asked to serve as a consultant to our government and foreign nations as well. He is a member of many prestigious scientific societies. He has been honored by membership in the American Academy of Arts and Sciences, the National Academy of Sciences and as a foreign member of the Yugoslav Academy of Arts and Sciences. In addition, he has received five honorary degrees, including those from Uppsala and Helsinki Universities, as well as our neighboring Widener College. Many other national and international prizes and honors have been awarded to him.

As abundant and consuming as his scientific life is, Doctor Koprowski has maintained his interest in music and is a concert-quality pianist and interpreter of the works of Chopin. He is married to Irena Koprowska who is also a physician. They have two sons who have followed their parents' example and are now practicing medicine.

DOCTOR OF SCIENCE — CAROL M. McCARTHY

Carol M. McCarthy, Ph.D., assumed the position of President of the American Hospital Association (AHA) this June. Among her activities as head of this important Chicago-based national association, Doctor McCarthy represents the nation's hospitals and presents their needs and concerns in federal legislative and regulatory forums. She and her organization work with and facilitate communication between numerous health-related agencies, professional associations, and business coalitions.

Previously, in Philadelphia, Doctor McCarthy served for seven years, beginning in 1978, as President of the Delaware Valley Hospital Council. During this period, she was involved in the founding of, and became first President of, the Delaware Valley Health Education and Research Foundation, which serves not-for-profit hospitals in southeastern Pennsylvania and southern New Jersey. She was formerly Executive Vice President and Chief Executive Officer of the association of hospitals on Long Island in New York State. Prior to her current position, Doctor McCarthy was President of the Massachusetts Hospital Association.

Doctor McCarthy's distinguished academic achievements include a law degree earned from Temple University School of Law and a Doctor of Philosophy degree, with concentration in health care economics, from New York University in 1978. She received her Bachelor of Arts degree at Trinity College and her Master of Science degree in Health Services Administration at State University of New York, where she was valedictorian in 1974.

Disseminating information to the public and professionals on health care issues and trends has become an increasingly important function of the associations that Doctor McCarthy has led. She, herself, is an authority in the areas of health care administration, planning and finance. As author of numerous articles on health and hospital services and a contributing author to *Health Care in the United States*, a textbook on the health care delivery system, she continues to benefit the field with her expertise.

Doctor McCarthy is a member of the Council for Medical Affairs and a member of the board of directors of the National Center for Health Education. Her insight into the implications of regulation aimed at controlling health care competition and costs will influence decisions on a national scale.

Carol McCarthy has worked in health care for over twenty years and is now an essential leader, advocate, and representative of the field.

THE ACADEMIC COSTUME

The wearing of academic dress dates back to the early days of the oldest universities in the world. In the American Council on Education's book entitled "American University and Colleges" it is suggested that "gowns may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head . . ."

Throughout the years European universities have continued to show great diversity in their academic dress. American universities, on the other hand, when they decided to adopt academic dress in 1895, immediately established a code of regulations which today is followed by almost all American institutions. The establishment of this code has made it possible to distinguish the Associates, Bachelors, Masters, and Doctors and at the same time recognize the university which has given them the degree. Revisions to the code have occurred from time to time.

The Associate in Arts and Bachelor's gowns have pointed sleeves and are worn closed. The Master's gown has oblong sleeves, open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cut away, and is worn open or closed. The Doctor's gown has bell-shaped sleeves. It is worn opened or closed. Cotton poplin or similar material is used for the Associate's, Bachelor's and Master's degrees, and rayon or silk ribbed material is used for the Doctor's degree. The majority of gowns are black but a number of institutions have adopted other colors to identify special programs or groups within the institution.

The hoods vary in length: 48 inches for the Doctor's degree, 42 inches for the Master's, and 36 inches for the Bachelor's and Associate's. All hoods are lined in silk in the academic color or colors of the institution conferring the degree. If the institution has more than one color, the colors are shown in divisions using chevrons. The binding or edge of the Doctor's, Master's and Bachelor's hoods are usually made of velvet in the color designating the subject in which the degree was granted. The Associate of Arts hood has no velvet border. The outside is black.

Black mortarboards are most commonly worn; six-sided tams of various colors may be used.

Some of the colors in the bindings of the hoods are:

white	Arts and Letters	green	Medicine
tan	Business	apricot	Nursing
lilac	Dentistry	dark blue	Philosophy
light blue	Education	salmon pink	Public Health
purple	Law	golden yellow	Science

The colors of the linings of the hoods for some Philadelphia academic health institutions are:

black and blue	Thomas Jefferson University	silver gray and scarlet	The Medical College of Pennsylvania
red and blue	University of Pennsylvania		
blue and gold	Hahnemann University	white and cherry	Temple University

THE JEFFERSON PROCESSIONAL

The Jefferson Processional was commissioned by the Alumni Association of Jefferson Medical College and played for the first time on November 15, 1974, at the Sesquicentennial Celebration of Jefferson Medical College of Thomas Jefferson University. This piece was presented to Thomas Jefferson University by the President of the Alumni Association of Jefferson Medical College, Doctor John J. Gartland. The composition was composed by Burle Marx.

THE PRESIDENTIAL BADGE OF THOMAS JEFFERSON UNIVERSITY

The President's Badge was created for the Inauguration of Lewis W. Bluemle, Jr., M.D., the third President of Thomas Jefferson University, on September 7, 1977. It consists of four official corporate seals of Thomas Jefferson University and the predecessor corporation, The Jefferson Medical College of Philadelphia. These seals were used to mark diplomas, certificates, and other official documents and have been gold-plated to form the Presidential Badge.

The medallion on the President's right is the corporate seal of Thomas Jefferson University today and was created in 1969 when Jefferson Medical College became Thomas Jefferson University. It carries a contemporary likeness of Thomas Jefferson.

The other three medallions are the various seals that were used in Jefferson Medical College for many years. The oldest marked every diploma that was issued by the College from 1839 to 1967. This seal carries a traditional likeness of a young Thomas Jefferson and the founding date of the College as 1826. Prior to 1839 the diploma of Jefferson Medical College carried the seal of the Jefferson College in Canonsburg, Pennsylvania — the parent institution.

Another seal was developed in 1967 as a result of research done by the late Edward L. Bauer, Professor Emeritus of Pediatrics, who determined that the founding year of Jefferson Medical College was 1824 rather than 1826. This seal is identical to the present corporate seal except the words "Thomas Jefferson University" replace "Jefferson Medical College". It was used for only two years — from 1967 to 1969.

The Presidential Badge is on permanent display in the Scott Library and is used at all convocations of the University.
