Innovative Interprofessional Collaboration: Addressing the Need for Education for Community Health Center Workers around Patients’ Sexual Orientation and Gender Identity

Alysia Carcieri\(^1\), Alyssa Falleni\(^2\), Linda Gatewood, M.Ed., OTR/L\(^{1,4}\), Marie Rodriguez\(^2\), Phillip Clark, ScD.\(^{1,3}\), Barbara Sweeney, MSW, MPH, CFLE\(^{1,3}\) University of Rhode Island: \(^1\)Human Development and Family Studies, \(^2\)Pharmacy, \(^3\)Interprofessional Education and Practice Initiative (IPEPI) Community College of Rhode Island: \(^4\) Occupational Therapy

Partial funding for this project was provided by the RI Executive Office of Health and Human Services, with support from the URI Institute for Integrated Health and Innovation and the Academic Health Collaborative
PARTICIPANTS
- 4 University of Rhode Island students
- Wood River Health Services staff and administration

PURPOSE
- Address barriers to collection of patient SOGI data
- Expose students to IPE and practice

ACTION
- Collaboration
- Informal survey
- Narrated training tool
- Resource manual
OBJECTIVES

1. PROVIDE
   Opportunity to apply interdisciplinary theory to solve a concern for a healthcare partner

2. ASSESS
   Staff needs, attitudes, and knowledge related to SOGI and health care

3. CREATE
   A training tool to facilitate patient comfort in disclosing SOGI-related information
METHODS

- Coordination between students, administration, and Diversity Team
- Informal survey explored staff SOGI-related attitudes and knowledge
- Training presentation design to view as needed, when convenient, and for staff and for new staff orientation

Survey themes incorporated into training presentation:
- how to support health care needs of patients with diverse SOGI backgrounds
- the unique health care needs of LGBTQ+ patients
- strategies to create a LGBTQ+ welcoming environment
OUTCOMES

STUDENTS
• Improved teamwork skills
• Identified SOGI and LGBTQ+ knowledge gaps
• Met WRHS staff SOGI training needs

WRHS STAFF
• Increased knowledge of SOGI terminology and health disparities
• Better able to address LGBTQ+ patient needs

CHALLENGES AND ADJUSTMENTS
• COVID-19 prevented onsite staff training
• Complex student schedules
• Deadlines related to course and WRHS
• Student disciplines were not represented at WRHS
CONCLUSIONS

IP experience facilitates understanding and appreciation of roles of healthcare professions

Informational presentations are useful to facilitate improved staff comfort related to SOGI topics

Community resources can contribute to cost-effective solutions to address health care and educational challenges

ACKNOWLEDGEMENTS The authors thank the staff of Wood River Health Services, especially Alison Croke and Helen Bell, for their collaboration and support, and Dr. Dara LoBuono for her input on data analysis and presentation design.
