BUILDINGS OF THE JEFFERSON MEDICAL COLLEGE.

John H. Mason

By those who have had the privilege of his teaching

To the Surgeon, Philosopher
Friend and Patriot

To Major John Heysham Gibbon

M. D., M. R. C., U. S. A.

This Book is affectionately inscribed

Major John H. Gibbon, M.D., M.R.C., U.S.A.

DR. JOHN H. GIBBON was born in Charlotte, North Carolina, March 16, 1871. He comes of a distinctly medical family, his great-grandfather, his grandfather, father and only brother, being physicians.

His great-grandfather, Dr. John H. Gibbons, graduated from the University of Edinburg in 1786, and, on his return to Philadelphia, for a number of years delivered a course of lectures on the Theory and Practice of Medicine. He was one of the charter members of the College of Physicians of Philadelphia. He died at the early age of 36, leaving one son, also John H., who later dropped the "s" from the name. He graduated in Arts and in Medicine at the University of Pennsylvania. He never practiced medicine, but devoted himself largely to scientific pursuits, especially mineralogy. He moved his family to Charlotte, North Carolina, in 1838, where he held the position of Assayer in the United States Mint.

His second son, Robert, the father of the subject of this sketch, was graduated in Medicine at Jefferson in 1848, and practiced Medicine in Charlotte until his death in 1898. He devoted himself particularly to Surgery and had a large surgical practice in North Carolina. He was Brigadier-Surgeon in the Confederate service during the Civil War. It will be seen that Dr. Gibbon represents the fourth generation in Medicine in a direct line and that he is the third John H. His brother, Dr. Robert L. Gibbon, of Charlotte, North Carolina, graduated at Jefferson in 1888, and is now Professor of Surgery in the North Carolina Medical College.

Another medical ancestor of Dr. Gibbon was Dr. John Lardner, of London, whose son, Lynford Lardner, came to America about 1740 and was soon made one of the Provincial Counsellors of Pennsylvania, largely through the influence of his brother-in-law, Richard Penn, the youngest son of William Penn, who had married his sister, Hannah Lardner.

Dr. Gibbon received his preliminary education at the Macon School in Charlotte, N. C., and was graduated at Jefferson in 1891. Upon his graduation in Medicine he was elected Resident Physician in the Polyclinic Hospital and served for one year. During the next year a large part of his time was spent in substituting as Resident Physician at the Pennsylvania Hospital. He was elected a resident for the regular term at this institution in April, 1893, and completed it in February, 1895, when he began the practice of Medicine in Philadelphia. He was soon made Assistant Demonstrator of Anatomy in Jefferson College, and later Demonstrator of Osteology, a position which he held for several years. In December, 1896, he was elected Surgeon in the Out-

Patient Department of the Pennsylvania Hospital. In 1899 he was elected Chief of the Surgical Clinic at Jefferson Hospital, which position he held for three years, resigning when he was elected Professor of Surgery at the Philadelphia Polyclinic in 1901. In 1903 he was elected Surgeon to the Pennsylvania Hospital to succeed the late Thomas G. Morton. In 1903 he was also made Associate Professor of Surgery in Jefferson Medical College, a position which he held until elected to the full professorship of Surgery in 1907. In 1900 he was elected Surgeon to the Bryn Mawr Hospital, and for some years he was on the Surgical Dispensary Staff of the Children's Hospital. During the Spanish-American War he was First Lieutenant and Assistant Surgeon in the Third United States Volunteer Engineers. This position he held for three months, resigning to take up his work in Philadelphia. Dr. Gibbon's present positions are Professor of Surgery, Jefferson Medical College, Surgeon to the Pennsylvania, Jefferson, and Bryn Mawr Hospitals, and Consulting Surgeon to the Woman's Hospital. He is also Surgeon in the Medical Reserve Corps of the United States Army. Dr. Gibbon is a Fellow of the College of Physicians of Philadelphia, the Philadelphia Academy of Surgery, and the American Surgical Association (secretary), and is a member of the Clinical Society of Surgery, the Philadelphia County and the Pennsylvania State Medical Societies, the Tri-State (Virginia, North Carolina and South Carolina) Medical Society, and the American Medical Association.

On September 2, 1901, Dr. Gibbon was married in San Francisco, Cal., to Miss Marjorie G. Young, the daughter of Lieutenant-General S. B. M. Young, of the United States Army. Since then there have been born to them four children, one girl and three boys.

Since completing his hospital service, Dr. Gibbon has made continual contributions to surgical literature. For a number of years he edited with Dr. Da Costa the general portion of Saunders' "Year Book of Surgery." He wrote the section on "Compression of Arteries" in Buck's "Reference Handbook of the Medical Sciences," and also the portion on "Operative Technique" in Keen's "Surgery."

On April 11, 1917, he was commissioned as Major, M. R. C. of the United States Army, as Surgeon-in-Chief to Base Hospital No. 10. He sailed May 18, 1917, and has since been in active service in France, and is now attached to General Pershing's Staff as Consulting Surgeon to the American Army in France.

The following are some of Dr. Gibbon's contributions to surgical literature:—

"Cecal Hernia with a Classification of Sixty-three Cases." (*Journal of the American Medical Association*, June 11, 1898.)

"Rupture of the Plantaris Muscle." (*Philadelphia Medical Journal*, 1900.)

"Left Cæcal Hernia, with a Report of Two Cases." (*Annals of Surgery*, July 1901.)

"Gangrenous Cholecystitis, with a Report of a Case in which a Successful Cholecystectomy was Done." (*American Journal of Medical Sciences*, April, 1903.)

"Report of a Case of Painless Amputation of the Leg after Intraneural Injection of Cocaine." (*Philadelphia Medical Journal*, 1903.)

"Obstruction of the Bowels and Peritonitis Due to a Strangulated Meckel Diverticulum." (*American Journal of Medical Sciences*, November, 1903.)

"Perforated Gastric and Duodenal Ulcers; with a Report of Four Cases Operated Upon." (*American Medicine*, December 19, 1903.)

"Successful Suture of a Penetrating Wound of the Heart." (*Journal of the American Medical Association*, February 10, 1906.)

"The Operative Treatment of Fractures of the Patella." (*New York Medical Journal*, May 26, 1906.)

"The Treatment of Tuberculous Glands of the Neck." (*Surgery, Gynecology and Obstetrics*, November, 1906.)

"Post-Operative Treatment." (*Annals of Surgery*, August, 1907.)

"Endo-aneurysmorrhaphy (Matas)." (*Annals of Surgery*, September, 1907.)

"Ureteral Calculi, with a Further Report of the Combined Intra- and Extra-peritoneal Uretero-lithotomy." (*Surgery, Gynecology and Obstetrics*, May, 1908.)

"Melanotic Neoplasms, with a Report of Cases, including one of Melanotic Sarcoma of Rectum." (*International Clinics*, Vol. III, Eighteenth Series.)

"Some of the Recent Improvements in Operations for Tumors of the Breast." (*Pennsylvania State Medical Journal*, 1909.)

"The Surgical Treatment of Visceroptosis." (Practical Treatment, Musser and Kelly.)

"Post-operative Treatment." (Surgical Diagnosis and Treatment, Oschner.)

"The Treatment of Gall-bladder Infections." (*American Medical Association*, June 13, 1914.)

"Typhoid Perforation with a Study of 139 Cases and 16 Supposed Cases Occurring in the Pennsylvania Hospital." (*Annals of Surgery*, October and November, 1915.)

"The Treatment of Undescended Testicle." (*Pennsylvania Medical Journal*, May, 1916.)

"The Technic of Nephro-, Pyelo, and Uretro-lithotomy." (*Annals of Surgery*, August 1916.)

"Errors of Diagnosis in Gall-bladder Disease from a Surgical Point of View." (Medical Communications of the Massachusetts Medical Society, Vol. XXIV, 1913.)

ARTHUR E. BILLINGS, M.D.

Preface

BY their works, ye shall know them." This book is our work. In its preparation our spirits have undergone many peculiar transformations. At times we have been elated; at others, depressed, and even apprehensive. But now the job is done, and here it is.

We have prepared this book, not for a cursory perusal, not as a useless ornament of bookshelves, but as a sort of memento in years to come, of the good old days at Jefferson.

We have tried to refrain from introducing anything that may in the slightest cast reflection upon the reputation or character of any member of the Class. The work was intended as a biographical *multum in parvo*, and, as such, we hope it may be found.

This volume is as complete as we could make it, and this was only possible by the hearty co-operation of the Class as a whole. In conclusion, those, to whom its publication was entrusted, beg to extend to all who have so courteously and kindly helped their heartfelt appreciation.

A. B. Univ. of Louisville, Ky., 1865; A. M. 1868. M. D. Jefferson Medical College, 1868; Sc. D. 1913.

Professor in Medical Dept. Univ. of Louisville, 1872-85. Professor of Medical Chemistry and Toxicology Jefferson Medical College, 1885-1912. Emeritus since 1912. Dean of the Faculty, 1887-1916.

Visiting Physician to Louisville City Hospital, 1882-85.

President of Ky. State Medical Society, 1883. Member of: Ky. Board of Health, 1879-81; College of Physicians, Philadelphia; American Philosophical Society, Council of Medical Education A. M. A., 1907-1917.

Editor of Louisville Medical News, 1880. Author of: Diet for the Sick, 1880. Common Poisons and the Urine, 1887. Chapter on "Mineral Poisons" in Saunders' Text-book of Toxicology and Medical Jurisprudence. Text-book of Medical Chemistry and Toxicology, 1905; 4th edition, 1915.

Ross V. Patterson, M. D.

M.D. Jefferson Medical College, 1904.
 Sub-dean of Jefferson, 1906-1916, Dean since
 1916. Also Assistant Prof. of Medicine in
 same.
 Jefferson Hospital. Philadelphia General Hos-
 pital.

Hobart A. Hare, B. Sc., M. D.

B.Sc., M.D. U. of Pa., 1884, M. D. Jefferson Med-
 ical College, 1893.

Instructor of Physical Diagnosis, Demonstrat-
 or of Experimental Therapeutics, Lecturer
 on Physiology in the Department of Biology,
 Clinical Prof. of the Diseases of Children in
 the U. of Pa., up to 1891. Prof of Thera-
 peutics and Diagnosis Jeff. Med. College,
 1891 to date.

Physician to the Children's Out-patient De-
 partment, Univ. Hosp. and the Children's
 Hosp.; Visiting Physician to the St. Agnes'
 Hosp., 1892. Attending Physician to the Jef-
 ferson Hosp. since 1891.

Author of Fiske Fund Prize Essay, Rhode
 Island Medical Society, 1885, 1886, 1890,
 Boylston Prize Essay Harvard University,
 1890. Cartwright Prize Essay, College of
 Phys. and Surg. of New York, 1889. Warren
 Triennial Prize Essays, Mass. Gen. Hosp.,
 1889. Fothergillian Prize Essay, Medical So-
 ciety of London, 1888. Prize Essay Royal
 Academy of Medicine in Belgium, 1889. Text-
 book on Practical Therapeutics, 16th edition,
 Diagnosis in the Office and at the Bedside,
 7th edition. Textbook of Practice of Med-
 icine, 3rd edition. A system of Therapeutics,
 three volumes, 3rd edition. National Stand-
 ard Dispensatory, Hare, Rusby and Caspari,
 3rd edition. Medical Complications and
 Sequelae of Typhoid Fever and the Other
 Exanthemata, 1911, 2nd edition. Editor Uni-
 versity Medical Magazine, 1888-89; Philadel-
 phia Medical News, 1889-91; Therapeutic
 Gazette, 1891 to date; Progressive Medicine,
 1898 to date.

E. E. Montgomery, A.M., M.D., LL.D.

B.S. Dennison University, 1871. M.D. Jefferson Medical College, 1874. A.M. Dennison University, 1877; LL.D., 1901. A.M. Bethany College, 1903.

Taught private classes at the Women's Medical Hospital in Operative Surgery, 1880. Prof. of Gynecology at Medico-Chi College, 1886-91. Prof. of Obstetrics and Gyn., 1891-92. Prof. of Clinical Gynecology at Jefferson, 1892-98; Prof. of Gynecology, 1898-1917.

One of the Founders and Fellows of the American College of Surgeons. Has been President of the following: Northern Medical Society, Phila. Obstetrical Soc., County Medical Soc., Alumni of Jefferson, Medical Club, Pennsylvania State Society of Obstetricians and Gynecologists. Vice-Pres. of American Medical Society and on its Board of Trustees for 15 years.

Contributing author to Keating and Coe's American Text-book of Gynecology, and to Keen's Surgery. Author of Montgomery's Practical Gynecology (4 editions).

Surgeon to the Women's Medical Hosp. 6 yrs. Obstetrician to the Phila. Hosp. 15 yrs. Gynecologist to St. Joseph's Hosp. since 1890; Gynecologist to Medico-Chi. 1886-92. Gynecologist to Jefferson since 1892. Consultant to Jewish Hosp., Kensington Hosp. for Women, Lying-in Charity Hosp. and Northwestern Hosp.

Major W. M. L. Coplin, M. D., M. R. C., U. S. A.

M.D. Jefferson Medical College, 1886.

Professor of Pathology and Bacteriology at Jefferson since 1896.

Pathologist to Philadelphia Hospital since 1892. Director of Department of Public Health and Charities, Philadelphia, 1905-07. Medical Director of Jefferson Hospital, 1907-12.

Author of Manual Pathology (5th edition), 1911. Text-book of Practical Hygiene (2nd edition).

Medical Director Base Hospital No. 38, U. S. A.

Edward P. Davis, A. M., M. D.

A.M. Princeton. M.D. Rush Medical College.
M.D. Jefferson Medical College.

Prof. of Obstetrics Jefferson Medical College.

Attending Obstetrician Jefferson Hosp. At-
tending Obstetrician and Gynecologist Phila.
Gen. Hosp. Consultant to Preston Retreat.

President of American Gynecological Society,
Philadelphia Obstetrical Society, Section on
Gynecology of College of Physicians, Phila.
Delegate sent by U. S. Government to meet-
ing of International Society of Obstetrics
and Gynecology, Petersburg, Russia, 1910.
Honorary member of Virginia State Medical
Society, Chicago Gynecological Society,
Surgical Society of Bucharest, Roumania,
Ophthalmological Society of Egypt.

Author of Manual of Obstetrics; also various
original papers and contributions to ob-
stetrics and gynecology.

F. X. Dercum, M. D., Ph. D.

M.D. University of Pennsylvania, 1877. Ph.D.
University of Pennsylvania, 1877. A.M. Cen-
tral High School, 1878.

Clinical Prof. of Nervous and Mental Diseases
Jefferson Med. College, 1892-97. Prof. of
Nervous and Mental Diseases Jefferson Med.
College since 1897.

Consulting Neurologist to the Philadelphia
General Hosp.; to the Asylum for the Chronic
Insane at Wernersville, Pa.; to the Jewish
Hos.; to the State Hospital at Norristown,
Pa.; Penna. Training School for Feeble-
minded Children, Elwyn, Pa.; to the Hosp.
for the Criminal Insane at Farview; of the
Eastern Pa. State Institution for the Feeble-
minded and Epileptic, Pennhurst, Pa., etc.

Elected foreign corresponding member of the
Neurological Society of Paris, 1908; Royal
Medical Society of Budapest, 1909; Neuro-
logical and Pyschiatric Society of Vienna,
1911.

Editor of Nervous Diseases by American Au-
thors. Author of Rest, Mental Therapeutics
and Suggestion. Clinical Manual of Mental
Diseases. Hysteria and Accident Compensa-
tion.

J. Chalmers DaCosta, B. S., M. D.

B.S. Univ. of Pa., 1882. M.D. Jefferson Med. College, 1885.

Assistant Demonstrator of Anatomy Jefferson, 1887. Demonstrator of Surgery, 1898. Professor of Surgery, 1900.

Assistant Physician to Insane Dept. of Phila. Gen. Hosp., 1886-87. Assistant Surgeon Jefferson Hosp., 1887. Surgeon to Jefferson Hosp. since 1900; to Phila. Gen. Hosp. since 1895; to St. Joseph's Hosp. since 1896.

Associate member of Society of Gynecology and Surgery of Bucharest.

Author of A Manual of Modern Surgery (7 editions). Edited English edition of Zuckerkandl's Operative Surgery, 1899; Gray's Anatomy, 1905.

Howard F. Hansell, A. M., M. D.

A.B. Brown University, 1877. A.M. Brown University, 1880. M.D. Jefferson Medical College, 1879.

Professor of Ophthalmology Jefferson Medical College. Emeritus Professor Diseases of the Eye. Philadelphia Polyclinic and College for Graduates in Medicine.

Attending Ophthalmic Surgeon Jefferson Med. College Hosp. Attending Ophthalmic Surgeon Phila. General Hosp. Consulting Ophthalmic Surgeon Frederick Douglas Memorial Hosp. Consulting Ophthalmic Surgeon, Chester County Hosp.

Hansel & Sweet, Text-book of Diseases of the Eye. Hansell & Reber, Muscular Anomalies of the Eye. Contributor to Ophthalmic Operations (C. A. Wood). Contributor to Encyclopedia of Ophthalmology (C. A. Wood).

Henry W. Stelwagon, B.S., M.D., Ph.D.

B.S. Andalusia College, 1872. M.D. U. of Pa., 1875. Ph.D. U. of Pa., 1875.

Instructor in Dermatology in U. of Pa., 1885-90. Clinical Prof. of Dermatology in Women's Med. College, 1888-1907. Lecturer, later Clinical Prof. and later Prof. of Dermatology in Jefferson Med. College since 1890.

Assistant Dermatologist to and Chief of the Skin Dispensary of the Hosp. of the U. of Pa., 1885-90. Dermatologist to the Howard Hosp., 1885-1912, and Consultant Dermatologist to same since 1912. Dermatologist to the Phila. General Hosp., 1888-1915. Physician to the Phila. Skin Dispensary, 1888-90. Physician to the Skin Service of the Northern Dispensary, 1882-90. Consultant Dermatologist to the Jefferson Hosp. since 1890.

Chairman of Section in Dermatology of the A. M. A. in 1901. President of the American Dermatological Association in 1900. Made Honorary Fellow of the Society of Dermatology and Syphilography of Italy, 1902. Associate Fellow of the Society of Dermatology and Syphilography of France, 1903. Associate Fellow of the Society of Dermatology of Vienna, 1908. Associate Fellow of the Society of Dermatology of Berlin, 1910.

Author of Essentials of Diseases of the Skin, 1890; 7th edition, 1907. Treatise on Diseases of the Skin, 1901; 8th edition, 1916.

H. Augustus Wilson, A. M., M. D.

M.D. Jefferson Medical College, 1879. A.M. Honorary. Ursinus College, 1894.

Lecturer in Phila. School of Anatomy, 1879-82. Prof. of General and Orthopedic Surgery, Phila. Polyclinic, 1885-97. Emeritus since 1897. Clinical Prof. of Orthopedic Surgery Women's Medical College, 1889. Clinical lecturer of Orthopedic Surgery Jefferson, 1891. Clinical Prof. of same, 1892. Prof. of same since 1904.

Ophthalmic Surgeon to St. Mary's Hosp., 1879. Pathologist to Presbyterian Hosp., 1880. Consulting Orthopedic Surgeon to the Kensington Hosp. for Women, 1890; to the Phila. Lying-in Charity, 1890. Orthopedic Surgeon to Phila. Gen. Hosp., 1900; to St. Agnes' Hosp., 1906; to Jefferson Hosp., since 1904.

Assistant Surgeon 1st Regt., N. G. P., 1885. President of the American Orthopedic Association, 1901. Fellow of American College of Surgeons, Phila. Academy of Surgery, Phila. College of Physicians. Member of Phila. County Medical Society, Pennsylvania Medical Society, A. M. A. Historical Society of Pa.

Contributions to American Text-book of Surgery, W. W. Keen and J. W. White; Modern Surgery, J. Chalmers DaCosta. Orthopedic Editor of New York Medical Journal.

Edwin E. Graham, A. B., M. D.

A. B. Harvard University. M. D. Jefferson Medical College.

Professor of Pediatrics in Jefferson Medical College since 1892.

Pediatrician to Jefferson Hospital; to Phila. General Hospital. Consultant to the Training School for Feeble-minded at Vineland, N. J.

Author of diseases of Children.

S. MacCuen Smith, M. D.

M. D. Jefferson Medical College, 1884.

Prof. of Otology Jefferson Medical College since 1904.

Otologist to Jefferson Hosp., Germantown Hosp., Jewish Hosp.

Editor of Bruhl-Politzer Atlas and Epitome of Otology, Chapter on Otology in Hare's Modern Treatment by American and English Authorities. Chapter on Diseases of Ear in Sajous' Analytic Cyclopaedia of Practical Medicine.

Solomon Solis Cohen, M. D.

A. M. C. H. S., Philadelphia, 1877. M.D. Jefferson Med. College, 1883.

Lecturer Special Therapeutics, Jefferson, 1885-90. Lecturer Clinical Medicine, Jefferson, 1888-1902. Senior Assistant Prof. Clinical Medicine, Jefferson, 1902-04. Prof. Clinical Medicine, Jefferson, 1904. Demonstrator Pathology and Microscopy, Philadelphia Polyclinic, 1883-87. Prof. Medicine and Therapeutics, Phila. Polyclinic, 1887-1902 (since Emeritus Professor). Lecturer Therapeutics, Dartmouth (summer course), 1890-92.

Consulting Physician State Hosp. for the Insane, Norristown, Pa.; Lebanon Hosp., Pa. Attending Physician Phila. General Hosp., Jefferson Hosp., Rush Hosp., Jewish Hosp., Philadelphia.

Member Executive Committee of Revision U. S. Pharmacopoeia, 1910. Chairman Therapeutic Section, A. M. A., 1901. President Phila. County Med. Society, 1898-99. Fellow College of Physicians of Phila.; American Ass'n for Advancement of Science; American Academy of Medicine. Honorary member Medical and Chirurgical Faculty of Maryland; Washington Academy of Science.

Author Essentials of Diagnosis, 1892-1900. Editor and contributing author System Physiologic Therapeutics, 11 volumes, 1900-05. Contributing Editor to many medical periodicals.

Albert P. Brubaker, M. D., A. M.

M.D. Jefferson Medical College, 1874. A.M. Franklin and Marshall College, 1887.

Demonstrator of Physiology and Pathology in Pennsylvania College of Dental Surgery, 1880-1885; Professor of same 1885-1907. Lecturer on Physiology and Hygiene in Drexel Institute of Science, Art and Industry, 1891-1914. Adjunct Prof. of Physiology and Hygiene in Jefferson, 1897-1909. Prof. of Physiology and Medical Jurisprudence in same since 1909.

Author of Compend. of Human Physiology (14th edition). Laboratory Manual of Physiologic Exercises. Text-book of Physiology (5th edition).

**Major John H. Gibbon, M. D., M. R.
C., U. S. A.**

M.D. Jefferson Medical College, 1891.

Demonstrator of Anatomy and later of Osteology in Jefferson. Chief of Surgical Clinic in Jefferson, 1898-1902. Prof. of Surgery at Phila. Polyclinic, 1902-1903. Associate Prof. of Surgery in Jefferson, 1903-07. Prof. of same since 1907.

Jefferson Hospital, Pennsylvania Hospital, Consulting Surgeon to the Women's Hospital, Bryn Mawr Hospital.

Author of chapter in Saunders' Year Book of Surgery, Buck's Reference Handbook of the Medical Sciences, Keen's Surgery and others.

In active service in France with Base Hospital No. 10 since May, 1917.

Randle C. Rosenberger, M. D.

M.D. Jefferson Medical College, 1894.

Assistant Demonstrator of Histology, 1894-95. Assistant Demonstrator of Histology and Pathology, 1895-96. Demonstrator in Histology and Bacteriology, 1897. Demonstrator of Morbid Anatomy and Bacteriology, 1898-99. Demonstrator of Bacteriology, 1900. Associate in Bacteriology, 1903. Assistant Prof. of same, 1904 to '08, and Professor of Hygiene and Bacteriology since 1910.

Assistant Pathologist to Phila. Gen. Hosp., 1898-1901. Pathologist to St. Joseph's Hosp., 1901. Director of Clinical Laboratory of Phila. Gen. Hosp. since 1903.

Francis T. Stewart, M. D.

M.D. Jefferson Medical College, 1896.
 Professor of Clinical Surgery Jefferson Medical College.
 Hospital staffs: Jefferson, Pennsylvania, Germantown.
 Author of Manual Surgery.

Thomas McCrae, A. B., M. D.

A.B. University of Toronto, 1891. M.B. University of Toronto, 1895. M.D. University of Toronto, 1903. M.R.C.S. England, 1900. M.R.C.P. London, 1901.

Fellow in Biology, University of Toronto, 1892-1894. Instructor in Medicine, Johns Hopkins University, 1899. Associate Professor in Medicine, Johns Hopkins University, 1905. Prof. of Medicine, the Jefferson Med. College, 1912.

Physician to the Jefferson and Pennsylvania Hospitals.

Fellow of the Royal College of Physicians (London), 1907.

Author of Carcinoma of the Stomach (with William Osler). Co-Editor Modern Medicine. Assistant Author Osler's Text-book of Medicine.

Hiram R. Loux, M. D.

M.D. Jefferson Medical College, 1882.
 Professor of Genito-Urinary Surgery,
 Jefferson Hospital. Phila. General Hospital.

Philip B. Hawk, M. S., Ph. D.

B.S. Wesleyan University, 1898. M.S. Yale University, 1902. Ph.D. Columbia University, 1903.

Assistant to Prof. W. O. Atwater, Wesleyan University, 1898-1900. Assistant in Physiological Chemistry, College of Physicians and Surgeons (New York), 1900-1903. Demonstrator of Physiological Chemistry, U. of Pa., School of Medicine, 1903-1907. Prof. of Physiological Chemistry, University of Illinois, 1907-1912. Prof. of Physiological Chemistry and Toxicology, Jeff. Med. College, since 1912.

Physiological Chemist to Jefferson Hospital.

Member of American Committee to the International Congress of Alimentary Hygiene, Brussels, 1910. Member of Committee on Physiological Chemistry, Eighth International Congress of Applied Chemistry, 1912. Honorary President Columbia University Biochemical Association, 1913. Chairman of Illinois Section of American Chemical Society, 1912. Member of Executive Committee of Philadelphia Section of American Chemical Society, 1913.

Author of Practical Physiological Chemistry, first published in 1907; fifth edition 1916. Section on General Considerations of Metabolism, in Vol. II, second edition of Modern Medicine (Osler and McCrae), 1914. Chapter on Animal Acids (revision) in supplementary volume of Allen's Organic Analyses, 1917.

J. Parsons Schaeffer, A. M., M. D.

M.D. University of Pennsylvania, 1907. A.M., 1909. Ph.D. Cornell University, 1911. M.A. Yale University, 1912.

Instructor Anatomy, Assistant Prof. of Anatomy Cornell University, 1907-11. Assistant Prof. Anatomy, Prof. of Anatomy Yale University, 1911-14. Prof. of Anatomy and Director of the Daniel Baugh Institute of Anatomy of the Jefferson Med. College, 1914.

Sigma Xi Honorary Society, 1908. Fellow American Ass'n for Advancement of Science, 1912. Master of Arts (honorary), Yale University, 1912.

Author of *The Cavum Nasi in Man*, 1910. *Outlines and Directions for the Dissection of the Human Body*, 1911.

Chevalier Jackson, M. D.

M.D. Jefferson Medical College, 1886.

Professor of Laryngology, University of Pittsburgh, 1909-1916. Professor of Bronchoscopy and Esophagoscopy in the New York Post-Graduate Med. School, 1916. Prof. of Laryngology in Jefferson Med. College, 1916.

Author of *Peroral Endoscopy and Laryngeal Surgery*, 1914. Laryngeal Bronchoscopic and Esophagoscopy sections in many Systems of Medicine and Surgery.

Laryngologist Jefferson Medical College Hosp. Bronchoscopist and Esophagoscopist New York Post-Graduate Medical School Hosp. Laryngologist University of Pittsburgh Hosp. Consulting Laryngologist, Bronchoscopist, Esophagoscopist and Gastroscopist Western Penna. Hosp. Laryngologist Presbyterian Hosp. Laryngologist Eye and Ear Hosp. Consulting Laryngologist Western Penna. Hosp. for the Insane. Consulting Laryngologist, Bronchoscopist, Esophagoscopist and Gastroscopist Montefiore Hosp. Consulting Laryngologist, Bronchoscopist, Esophagoscopist and Gastroscopist St. Francis' Hosp. Consulting Laryngologist, Bronchoscopist, Esophagoscopist and Gastroscopist Passavant Hosp. Bronchoscopist and Esophagoscopist Allegheny General Hosp., Pittsburgh Hosp. for Children. Consulting Laryngologist Tuberculosis League, Pittsburgh, Pa.

President of American Laryngological, Rhinological and Otological Society, 1911. Chairman of Laryngologic Section, American Med. Association, 1913. Honorary member Berlin Laryngological Society, 1912.

William M. Sweet, M. D.

Clinical Professor of Ophthalmology.

**Major Willis F. Manges, M. D., M. R.
C., U. S. A.**

Clinical Professor of Roentgenology.
Entered service in 1917.

J. Solis-Cohen, M. D., LL. D.
Honorary Professor of Larynology.

Aller G. Ellis, M. D.
Associate Professor of Pathology.

John M. Fisher, M. D.

Associate Professor of Gynecology.

**Captain George E. Price, M. D., M. R.
C., U. S. A.**

Associate Professor of Mental and Nervous
Diseases.

Entered service in 1917.

John C. DaCosta, Jr., M. D.

Associate Professor of Medicine.

E. Quin Thornton, M. D.

Assistant Professor of Materia Medica.

Stricker Coles, M. D.

M.D. Jefferson, 1892.
Assistant Professor Obstetrics Jefferson, 1908.
Philadelphia General, Jefferson Hospital. As-
sistant Visiting Obstetrician Philadelphia
Lying-in Charity.

**Major Charles F. Nassau, M. D.,
LL. D., M. R. C., U. S. A.**

M.D. University of Pennsylvania, 1891. M.D.
Jefferson Medical College, 1906. LL. D. Villa
Nova, 1912.

Assistant Professor of Surgery in Jefferson
Medical College.

Author of various articles in medical journals.

Surgeon to St. Joseph's Hospital. Chief
Surgeon Frankford Hospital. Assistant
Surgeon Jefferson.

Entered service in 1917. Attached to Base Hos-
pital No. 10, U. S. A.

H. E. Radasch, M. Sc., M. D.

Assistant Professor of Histology.

William H. Wells, M. D.

Assistant Professor of Obstetrics.

R. Max Goepf, M. D.

M.D. University of Pennsylvania.

Professor of Clinical Medicine at Philadelphia Polyclinic Hospital, 1903. Assistant Professor of Clinical Medicine at Jefferson Hospital, 1915.

Author of Medical State Board Questions. Dental State Board Questions.

Visiting Physician to Phila. Polyclinic. Assistant Visiting Physician to Jefferson. Dean of the Faculty of Philadelphia Polyclinic.

P. Brooke Bland, M. D.

Assistant Professor of Gynecology.

**Major E. J. G. Beardsley, M. D.,
M. R. C., U. S. A.**

Assistant Professor of Medicine.
Entered service in 1917.

Thomas C. Stellwagon, Jr., M. D.
Assistant Professor of Genito-Urinary Surgery.

George W. Spencer, M. D.
Associate in Surgery.

J. Coles Brick, M. D.
Associate in Diseases of the Rectum.

Alfred Heineberg, M. D., P. D.

P.D. Philadelphia College of Pharmacy, 1899.
M.D. Jefferson Medical College, 1902.

Associate in Gynecology in Jefferson Medical
College.

Associate in Gynecology Jefferson Hospital.

Assistant Gynecologist St. Agnes' and Mt. Sinai
Hospitals. Obstetrician to Jewish Maternity
Hospital of Philadelphia.

Fielding O. Lewis, M. D.

Associate in Laryngology.

Ralph L. Engle, M. D.

Associate in Pediatrics.

Henry K. Gaskill, M. D.

Assistant Professor of Dermatology.

**Captain John A. Roddy, M. D.,
M. R. C., U. S. A.**

M.D. Jefferson Medical College, 1907.

Demonstrator of Bacteriology Jefferson Medical College, 1910-1915. Demonstrator of Medicine Jefferson Medical College, 1912-1917. Associate in Hygiene and Bacteriology Jefferson Medical College, 1915-1917.

Author of Hygiene, Bacteriology and Serology, Jefferson Medical College Hospital.

Entered service in 1917.

Arthur J. Davidson, M. D.

M.D. Jefferson Medical College, 1907.

Associate in Orthopedic Surgery Jefferson Medical College.

Assistant Orthopedic Surgeon Jefferson Medical College Hospital. Chief Out-patient Orthopedic Department Jefferson Medical College Hospital. Consulting Orthopedic Surgeon Hebrew Orphans' Home of Germantown. Consulting Orthopedic Surgeon North American Sanatorium, Atlantic City. Orthopedic Surgeon Lebanon Hospital, Philadelphia. Associate American Hospital for Diseases of the Stomach, Philadelphia.

Editorial Staff American Journal of Orthopedic Surgery. New York Medical Journal. Surgery, Gynecology and Obstetrics.

J. Clarence Keeler, M. D.

Associate in Otology.

S. F. Gilpin, M. D.

Associate in Nervous and Mental Diseases.

Lucius Tuttle, B. A., M. D.

B.A. Yale, 1901. M.D. Johns Hopkins, 1907.
Assistant Instructor in Pathology at University of Pennsylvania, 1908-1910. Demonstrator of Physiology Jefferson Medical College, 1910-1914. Associate in Physiology Jefferson Medical College, 1914. Associate in Physics Jefferson Medical College, 1913-1916. Microscopist to University of Pennsylvania Hospital, 1907-1909.
Author of an Introduction to Laboratory Physics.

Melvin A. Saylor, M. D.

M.D. Jefferson Medical College, 1915.
Demonstrator of Chemistry Jefferson Medical College, 1906-1915. Associate in Chemistry and Toxicology in Jefferson Medical College since 1915.

Assistant Demonstrators

- F. C. ABBOTT, M.D., Assistant Demonstrator of Surgery.
 F. C. ABBOTT, M.D., Assistant Demonstrator of Anatomy.
 J. LESLIE DAVIS, M.D., Assistant Demonstrator of Anatomy.
 GEORGE W. MILLER, M.D., Assistant Demonstrator of Anatomy.
 C. M. STIMSON, M.D., Assistant Demonstrator of Gynecology.
 WARREN B. DAVIS, M.D., Assistant Demonstrator of Anatomy.
 HARRY L. MERSCHER, M.D., Assistant Demonstrator of Pharmacy and Materia Medica.
 JOHN B. LOWNES, M.D., Assistant Demonstrator of Genito-Urinary Surgery.
 JOHN F. GORMAN, M.D., Assistant Demonstrator of Genito-Urinary Surgery.
 FRANK B. SWALLOW, M.D., Assistant Demonstrator of Genito-Urinary Surgery.
 F. R. WIDDOWSON, M.D., Assistant Demonstrator of Gynecology.
 FRANK R. HUSTEAD, M.D., Assistant Demonstrator of Gynecology.
 JOHN DeCARLO, M.D., Assistant Demonstrator of Anatomy.
 A. STRAUSS, M.D., Assistant Demonstrator of Dermatology.
 CLARENCE HOFFMAN, M.D., Anatomical Technician and Assistant Demonstrator of
 Anatomy.
 HENRY L. BERNARDY, M.D., Assistant Demonstrator of Surgery.
 GEORGE H. CLAPP, M. D., Assistant Demonstrator of Medicine.
 NATHAN BLUMBERG, M.D. Assistant Demonstrator of Medicine.
 BENJAMIN LIPSHUTZ, M.D., Assistant Demonstrator of Anatomy and CORINNA BORDEN
 KEEN Research Fellow.
 LEONARD D. FRESCOLN, M.D., Assistant Demonstrator of Anatomy.
 JOHN B. FLICK, M.D., Assistant Demonstrator of Fracture Dressings.
 WALTER A. YEAKLE, M.D., Assistant Demonstrator of Anatomy.
 S. S. GREENBAUM, M.D., Assistant Demonstrator of Medicine.
 A. J. GORDON, M.D., Assistant Demonstrator of Clinical Medicine.

Instructors

LEIGHTON F. APPLEMAN, M.D., Instructor in Theapeutics.
 PHILIP H. MOORE, M.D., Instructor in Ophthalmoscopy.
 L. STROUSSE, M.D., Instructor in Clinical Obstetrics.

Class History

"The moving finger writes; and having writ,
Moves on: nor all your piety nor wit
Shall lure it back to cancel half a line,
Nor all your tears wash out a word of it."

PERIOD OF ANCIENT HISTORY.

N the mellow days of late September, 1913, the last of such days to be seen by a world at peace for some time, there assembled in the Quaker City from all parts of the United States some fifty-four young gentlemen bent upon becoming, after a certain time, practitioners in the ancient and honorable art of medicine. Secretly they were, without exception, going to specialize in Surgery, but that information did not come to light until later.

Upon arrival and matriculation, there followed the process of separating the tares from the wheat.

The trying ordeal that followed before this separation was complete is stamped indelibly on the memory of those who participated.

With the characteristic thoroughness for which she is noted "Old Jeff" lost no time in starting the tares, or Pre-Meds as we shall now call them, to work.

PRE-MEDICAL YEAR.

The fifty-four callow youths who were to comprise this baby class in Medicine had not as yet become as intimately acquainted with each other as they are now.

I have said, they were callow. That is, a large majority were, but there are two notable exceptions. One young man from somewhere in Massachusetts had been to New York and knew all about large cities, the other hailing from somewhere near Terre Haute, had been to Chicago and couldn't be fooled in a village like Philadelphia.

Be that as it may, they were all more or less of that hue that is used to describe the color of grass that grows in the spring. As yet they hadn't met the great levelling influence of the Physics course.

After the first lecture in Physics the men in their great sorrow were drawn together. Instinct is strong in the human to have an audience when he gives vent to his feelings, so he needs must get on better terms with his classmates to do so.

At first the Class listened with polite attention, then with forced attention, and then in downright amazement. When it was over and mandibles had been raised from sternums and the exophthalmos had faded, every one wanted to talk at once. Everyone felt himself in hearty accord with his neighbor. The man from New England almost had apoplexy trying to ask what Chauvenet's Criterion had to do with medicine. The man from the South couldn't understand the gosh-hanged foolishness of spinning a multi-colored top that resembled the coat of one Joseph, late of Egypt, to determine the colors of the spectrum. Then the Class met Dr. Radasch. Of course, the upper classmen had told you that you would be better able to define the word "work" after hearing him. The men knew, however, that upper-classmen were just jesting. Hadn't the Pre-meds had Biology in high school? Didn't they have Latin for four years? Biology, bah! It was a cinch. That, however, was before you got the classification of the Protozoa to learn. After that you wondered why you didn't take up electrical engineering or something easy.

When Dr. Rosenberger came in they thought he looked like a regular fellow. After it was over they were certain of it. Classmate hit classmate upon the back and called each other Doctor and decided to defer the trip back to Ypsilante for another week.

Then came that pleasant hour with Dr. Blechschmidt. The Class was to take Medical German, whatever that was. When a Premed ventured to ask a learned Senior, "Why take Medical German?" said Senior informed him that all great works in Medicine were written in German, hence a knowledge of that language. Now, as a matter of fact, all great works are not written in German, but in English right here at Jefferson by the faculty, but they didn't know how great until the Sophomore year, when they met Dr. Coplin's Pathology.

Then the Class met the instructor in Chemistry, not large in stature, but with a voice that could cut like a whip-lash. At first the Class resented this gentleman, but later learned he was a blessing in disguise, because through his efforts the men buckled down to Chemistry and were quite prepared for the more difficult work of the Freshman and Sophomore years.

Pretty soon the Class decided to hold an election. Not because an administration was necessary, as they were now quite capable of taking care of their affairs, but because it was customary.

The first president was no more than a figurehead. A modest and retiring young man who was president in name only and whose administration was not fraught with any difficulties as was the administration of other Class presidents. By this time the eighty-seven days which had been so carefully counted had narrowed down to about a week and now began the preparation for the Christmas vacation.

The official closing was set for December 20th, but some of the men had been gone for a week. Eakin had figured out just how many classes he would

miss and had been gone since the latter part of October.

The Christmas holidays over, the Class came back for the long period from January to May.

The Class as a whole was now a studious lot and began in January to prepare for finals.

This was the last time the Class began preparation for finals that early.

Each succeeding year the preparation is shorter until in the Senior year notes are read over the evening before examination.

Before the Class realized it those vague things known as finals were just around the corner.

At last the day was at hand when the Class was to get its introduction to the blue books which were to play such an important part throughout the coming four years.

Finals being over, the Class dispersed for the summer vacation. Of that we are not here concerned. Suffice it to say that they carried home with them a multitude of technical names which they sprung on the unsuspecting laity.

FRESHMAN YEAR.

With increased vigor and eagerness and perhaps a slightly enlarged *EGO* the Class gathered from the summer vacation. True, they were Freshmen, but how different from ordinary Freshmen. The College and the city were both familiar to the Class. Indeed, there was almost that air about them that speaks of the Sophomore.

A new vision opened to them. No more Biology, Physics, and Medical German. Now they could delve into the mysteries of real medicine—Anatomy, Materia Medica and Etiology. An unquenchable thirst for medical knowledge was theirs. Which thirst was destined to be satiated, yea, even satisfied when they came to the constant draught of Histology and Embryology and one or more studies ending in "ology."

Very soon the Freshman discovered that the Pre-Medical year was a cinch compared with the Freshman year.

Those first days in the dissecting laboratory will linger long in the memory of the men of 1918.

During the preceding summer the faculty had elected to the chair of Anatomy, Dr. J. Parsons Schaeffer, of Yale University.

Now, Dr. Schaeffer had the most disconcerting frown and the most business-like manner with which the Class had yet come in contact. He insisted that the men wear clean, white gowns and that they abolish the time-honored custom of wooing Milady Nicotine while in the dissecting room.

Furthermore, when the Freshman Class filed into the dissecting room for the first time Dr. Schaeffer was on hand to meet the men, and in his best authoritative tone enjoined them to find their tables and get to work. This

last was somewhat unexpected and met with a rather aggrieved disapproval. The men had decided to themselves that the first day they would go in, look around, sort of get-acquainted, so to speak, and call it a day.

Those of you who can hark back to the days before the automobile replaced the horse-drawn vehicle may recall what happened when a piece of paper blew out into the roadway in front of your favorite driving horse. I believe the popular expression was that the horse shied. Well, a similar occurrence took place when these young men first removed the covers from the anatomical subject.

Even the most hardened took a long time opening instrument cases. But there was that relentless figure in the black gown hovering in the back ground so there was no alternative but to commence the dissection. Finally, after much preliminary preparation the initial incision was made and simultaneously seventy-six diaphragms contracted as one. And then came the concerted exodus for ozone not confined within the four walls of the dissecting room. Faint? No. Nauseated? Oh, No! Sentimental reasons? Not at all, but you know how it is a fellow ought to be given a little time to adjust himself to conditions and, besides, he wanted to smoke.

As time wore on the incidence of *mal de dissecting room* steadily declined and the course in Anatomy pursued the even tenure of its way, punctuated from time to time by the practical examination of Dr. Schaeffer.

Then there was that delightful hour from five to six on Monday evening when the class met Dr. Thornton. Dr. Thornton possessed the power of making the subject very interesting and, consequently, there was always a large attendance due in part to Dr. Thornton's pleasing way of presenting the subject and partly because he always addressed a student as Doctor.

Organic Chemistry was approached with fear and trembling.

Every man in the class knew that he never would be able to grasp what was meant by an hexagonal figure that resembled a view of a battle ship deck from the fighting top.

I say they thought they never would be able to grasp what it meant.

They thought so until Dr. Hawk had lectured once or twice and then they became imbued with the idea that it behooved them to grasp it and grasp it quick.

Again the class met Dr. Rosenberger, and, although the majority of the old Pre-Med. class had passed off Etiology, they still attended the lectures because they were very fond of Etiology.

Early in the year the faculty gave its annual reception to the Freshman class.

A very pleasant program had been arranged. Speeches from the Dean, Mr. Potter, Chairman of the Board of Trustees, and members of the faculty interspersed with music made the evening a most enjoyable one.

When Dr. Patterson made his now-famous remark that the class of 1918 was the best class that had ever entered Jefferson the class showed quite well the high esteem in which it held itself by prolonged applause. At a late hour (10 o'clock or thereabouts) the reception came to a close and Leach conducted the party on a tour through the city.

Before we realized it, the Christmas holidays were upon us. The days had not been counted this year because there wasn't time. Back from the Christmas vacation the class started to work with renewed vigor.

The class had held the class election before the holidays and elected Mr. Myers, the gentleman from Illinois, as class President.

The files are not open to prying eyes so the historian is unable to state how much the high honor cost him. We have never seen a copy of his election expenses.

Many men of note joined the Class at the beginning of the Freshman year. Chief among them being Mr. Duncan Waldo Holt of North Carolina, of most amiable and distinguished bearing. Mr. Holt is an intellectual giant and a brilliant conversationalist and a great asset to the class.

The long winter months with their constant application to study came to a close at last and once more the enthralling music of the hurdy-gurdy warned that blue book time was drawing near. For the second time the class went into seclusion and read over notes that sounded foreign but must have been taken during the year, because they bore the date of that year.

SOPHOMORE YEAR

The year of Pathology, Physiology, Chemistry, and Physical Diagnosis.

The much heralded year of the Medical course, the hardest year of the five. So the class started with the intention of fulfilling the promise it had made at examination time last spring. "If I only get through this year, I am going to study next year throughout the year."

Then the setback we got when Dr. McCrae showed us how observing we were when we could look at a patient for half an hour and when the patient was rolled out, couldn't tell whether he possessed a moustache or not.

There was sufficient time for recovery, however, during Dr. Coplin's hour, when the members tried all sorts of recumbent positions and finally listened to the lecture with eyes closed.

Physiology proved to be a most engaging subject. None other than Dr. Brubaker would have been capable of making it so engaging, but with his method of teaching, the class managed to gain a knowledge of a vast but very important subject.

Then there was the Physiology Laboratory in charge of Dr. Tuttle. Here one learned to kill a frog in the most humane manner. If a man, on completing this course, wasn't qualified for a draftsman or cartoonist it was his own fault.

Afterwards, there was the section in Physical Diagnosis. Stethoscopes put in their appearance for the first time. They were unusually carried in sight in the outside coat pocket with about half of the instrument protruding from the pocket.

The Christmas holidays came and went the way of passing days.

The hardest year of all was drawing to a close, the only bright spot in the entire year being the course in Bacteriology under Dr. Rosenberger where you learned on one day what grew on litmus-lactose agar and promptly forgot it at the quiz next morning to the chagrin of Dr. Rosenberger, who was surprised and astonished that you couldn't remember what the pneumococcus looked like after five minutes had elapsed.

JUNIOR YEAR

The Class now was one hundred and five. The somewhat depleted ranks had been filled by the contingent from the South. A certain number of men from Southern schools join the Junior class every year and the class of 1918 got the usual quota. Little need be said of these men from the South, because it is common knowledge the kind of men the South has represented the profession of Medicine.

Early in the year a sort of Hague peace conference took place among the fraternities. (We said Hague peace conference, not Haig and Haig). Some of the idealists among the various fraternities had been working for some time to bring about an agreement among fraternities as to the pledging of new men and the governing of fraternity affairs in general. Their efforts were crowned with success at last when the Pan-Hellenic banquet was held at the Continental Hotel.

Two men from each fraternity were present as well as a faculty member of each fraternity and the officers of the Pan-Hellenic council. For the first time in four years all the fraternities in the school were of one accord on one particular issue.

Dr. Hare met the men of 1918 for the first time in the Junior year. Dr. Hare, called by the men of the Class the "Gloom Dispeller," was the one man who was capable of making Therapeutics interesting.

In the Junior year Dr. Gibbon gave the class the lectures in Surgery. Always genial and with a full understanding of medical students, coupled with the fact that he was a teacher, it was with genuine sorrow and appreciation of its loss that the class bade him "au revoir" when he was called to the colors.

Dr. Gibbon has been serving as a Major in the Medical Corps in France for almost a year and it is the hope of many of the men in the class that they may serve with him when they go "over there."

The election this year was of unusual interest because to a large measure the success of this campaign was an indication as to the result in the Senior

year. After a very hard battle the Class elected Papa Joseph Stites McDaniel of Dover, Delaware, President.

There was some difficulty in the first election. Through an error there were more votes cast than there were voters, so the first election was declared null and void.

It was during this year that the college had succeeded in securing that eminent Laryngologist, Dr. Chevalier Jackson, to occupy the chair left vacant by the death of Dr. Kyle who had been professor of Laryngology for many years.

This year went the way of the preceding, only a trifle faster, and all too soon the class was dispersing for the summer.

THE SENIOR YEAR

And now the last lap of the journey was at hand.

Those oft wished for days when they would don the white coats and fare forth to the wards were no longer the products of fancy. They were now reality.

They were now 102, the smallest graduating class that Jefferson had seen in years.

At the outset of the year the world war was brought home to the class in no uncertain manner.

During the summer preceding, the Selective Draft Bill had been put in force and several of the members of the class had been drawn for the National Army.

Indeed, when the 93d session of the College opened, there were several prospective seniors doing "Squads Right About" at training camps somewhere in America.

In those early days of the draft no provision had been made for medical students, especially those men who had reason to expect that they had but one more year in their medical course. It was at this juncture that the Dean, Dr. Patterson, proved his resourcefulness, and, due in a large measure to his unceasing and untiring efforts, the Enlisted Medical Reserve Corps came into existence.

This measure provided exemption for medical students until the completion of their course. Inasmuch as they, by enlisting in the Reserve Corps were in the service of the United States, they could not be drafted into the National Army.

To a man the Class enlisted, excepting, of course, those of the Class who were physically unfit or who were citizens of neutral countries.

Thirteen men showed their preference for water by enlisting in the Navy, the others chose the iron hats and the khaki.

Just as soon as the special posters had been posted and deciphered (special rosters are prepared to give the Class a course in mental gymnastics; they

don't get enough mental exercise in the regular medical course) little groups of men in white coats were to be seen conversing in the hall in rather a furtive manner.

After a month's electioneering and several caucuses, the election was held on the evening of November 14th, with the following results:—viz.,

PRESIDENT	F. E. EAKIN
VICE-PRESIDENT	D. W. HOLT
SECRETARY	T. E. DOUGLAS
TREASURER	W. C. DORASAVAGE
EDITOR-IN-CHIEF	A. W. JAMES
POET	W. T. LEACH
HISTORIAN	P. A. SHOAFF
DONORS	E. J. BERTIN AND R. H. DIXON
ORATOR	H. K. SEELAUS

Time flies faster than ever when men are Seniors, and so with studious application, interspersed with Dr. Montgomery's delightful section examination, December twentieth had arrived scarcely before anyone realized it.

Most of the men stayed right up until the date set by the faculty for the beginning of the Christmas holidays. That is most of them stayed. Eakin had been gone for two weeks prior as usual.

When the class next assembled in Philadelphia those numerals 1918, that had seemed so distant way back in 1913, were now in the ascendancy.

For the first time finals were mentioned seriously and that thrill that comes once in a life time, viz., the selection of a hospital, was indulged in to the utmost.

Toward the latter part of January, Combs started to attend the Wednesday morning quiz in Medicine. Ordinarily, that would have been the signal for a drive on medical books, but about that time the coal shortage descended upon the East and it was found to be a difficult task studying in a cold room. Accordingly, therefore, many of the men took their books and notes to the various roof gardens to study. Of course, the music interfered somewhat, but on the whole, the men got a lot of work done because the environment was so conducive to intensive study.

One fraternity house fared so badly during the coal shortage from frozen water pipes that it was necessary for the members to perform their ablutions at the Walton. This was so distasteful to some men that they preferred to waive the morning lavage until the pipes were repaired.

The monotony of February was broken by a delightful meeting of the Graham Society at Dr. Graham's home, and those in the Class who are fond of the fleshpots never tire of telling how much they enjoyed the affair.

In March there were affairs of the same sort, notable among which were those of Dr. Loux and Dr. Dercum at the Art Club. Oratory abounded at both

events and Mr. Myers, as toastmaster of the Loux Banquet, very cleverly gave a resume of everything that has occurred since the time of Augustus Caesar.

With April came the preparations for the great "Spring Drive" on the faculty. Minor, Fisher, Blackmon and several of the grinds had been studying since, but the delinquents didn't begin to study for the finals in earnest until about the first of April. Laurence got a late start; he didn't commence to study until about the first of November.

Reisinger had, after five years of untiring effort, succeeded in raising a moustache, visible at ten paces, so having accomplished his object and having nothing to detract him, he was able to give his undivided attention to studying about the second day of May.

When in the course of human events one hundred and two men retire immediately after dinner to their respective apartments on balmy spring evenings, you may speculate that one hundred and two men have but a single thought. When the haunts that knew them for seven months out of the year know them no more, you may surmise that a crisis is approaching.

When one hundred and two men go into seclusion for a month you may know that final examinations are close at hand and everything else is forgotten.

Therefore, it is fitting and proper that with the preparation for their degree of Doctor of Medicine FINIS be written to their school history.

Henceforth, the history of these men shall be recorded by a greater historian than I. It shall be written alongside of those who are making the world safe for Democracy.

P. A. SHOAF.

President's Address

RIENDS and Relatives:—It is my good fortune as President of the class of 1918, to bid you a most hearty welcome to the exercises this afternoon, which mark, in a measure, the completion of our course at Jefferson. And not only a welcome do we offer, but, in addition, if mere words could express it, we would have you accept our grateful appreciation of the honor and interest you have shown by gracing us with your presence. An honor, indeed, it is, when we think for a moment of the trials and toils, of the sorrows and sacrifices, which those dear fathers and mothers of ours have made and undergone gladly that in the end we might stand before them as representatives of that noble profession which has for its object the healing of the sick and wounded. Then, again, we would not, for an instant, forget those dear ones who through some turn in the hand of fate, are unable to be with us today to see the fulfillment of their hopes, the graduation day of their sons. And so, through all our thankfulness and happiness, there runs a trace of sadness that some of our number are unable to count among those present the loving faces of their fathers and mothers or other near ones. For all that, we must not be downcast on such a day as this, but instead, be filled with a spirit of joy and good-will that we have now reached that great plane in our careers which seemed a few years back almost unattainable. So, with these few words, allow me to take you back a few years.

It is not my duty nor my intention to take you over the history of the Class of 1918, nor to attempt to prophesy the great deeds and achievements that the various members will perform in years to come, as all of those things will be capably dealt with by others who will follow me.

But let us turn back our memories to September, in the fall of 1914. On that day, as for ages past, the great mill of this universe of ours was slowly and steadily grinding on, never ceasing for an instant in its task of finishing and turning out those products that were to serve for various purposes in this wonderful world. Material for all this, garnered in by the hand of Providence, who recognized no creed, race, or religion, was gathered from all parts of the earth, assembled in divers places, and finally run through that portion of the mill that would prepare the product for its certain task. Many products there are, yet, just as many tasks for them to perform.

Among the various functions, those duties, which when properly performed, go to make up a vital thing, there is one that has for its ultimate end the caring for the sick and dying. And to that one purpose has this

body of young men been dedicated. Thus, today, we stand in that great doorway which looks out upon those vast and undiscovered plains of the future. To no avail do we conjure to ourselves those bright and promising things to be found there, when Time alone has shown us that the future is the accomplishment of deeds and not of fancies or dreams. But has there ever been a time when greater opportunities have been offered in this one particular profession? Going on now on the fields of Europe is the most terrible war of all times; a war in which all leading nations of the earth are engaged; a war that must be won that Democracy may live, and whose living depends upon one thing, namely: man-power, and man-power in the trenches. So, the responsibility of keeping those men in a sound, healthy condition, the responsibility of keeping the workers at home free from sickness and disease, rests full upon the shoulders of the medical profession of today. Then, I must ask again, has there ever been a time when opportunities so afforded the possibilities of so bright and wonderful a future?

In spite of all those things that lie before us, there is one other that will be the most difficult of all to accomplish by way of words, and that is an expression of our gratitude and thankfulness to those highly capable members of the medical profession who comprise the faculty here at Jefferson. Our debt to them is one that we can never hope to pay. During these past four years, their trials and troubles have been most severe and tiresome, but through it all they have shown the greatest patience and kindness toward us, as we made our many mistakes and blunders. At the same time, guiding us this way and that, as their experience had taught them, and imparting to us valuable teachings and ideas that they had gained through many long years of study. Whatever things we build in years to come shall be upon that foundation so carefully laid and prepared by those masters of ours. Now they have finished their work and are sending us before the people to distribute among them the fruits of their work. And so, in closing, dear friends, may I present the Class of 1918, first, to you and the great public, secondly, since they are each and everyone enlisted men in the service of their government, may I also present them to the Allies to do with them as they deem best.

F. E. EAKIN

SENIORS.

Class Roll

JAMES EDWARD ANDREWS, $\Phi P \Sigma$

"J. E."

Age, 24.

Residence, Creswell, N. C.

Condition on Admission, Long in stature and in talk. Well-nourished individual with a mania for attending school. B. S. degree from Wake Forest College.

Progress, Drawl of speech has not improved. Never cut a class or missed a skin clinic. Some reputation as a ladies' man. Member of Davis Society, Academy, and Southern Club.

Diagnosis, His scanning speech makes us think of insular sclerosis.

Treatment, Prophylactic only. Patient needs observation.

Prognosis, Very favorable. Will become a leading physician of the South.

Referred to, Philadelphia General Hospital, Philadelphia, Pa.

FURMAN ANGEL, $K \Psi$

Age, 22.

"Angel"

Residence, Franklin, N. C.

Condition on Admission, So recent that history and physical examination have not been made. Franklin High School, University of North Carolina, Emory University.

Progress, Most remarkable and unexpected. Davis and Graham Societies, Southern Club.

Diagnosis, A healthy, robust individual who for some unknown reason occasionally answers incorrectly.

Treatment, For the flatus, carminatives.

Prognosis, The Osler of the South.

Referred to, French Hospital, San Francisco, Cal.

WALTER THOMAS ANNON, A K K

"Annon"

Age, 25.

Residence, Philadelphia, Pa.

Condition on Admission, Unobtrusive and unassuming, the subject of this sketch entered Jeff in the fall of 1916 fully determined to end his medical studies in a "blaze of glory." Anoka High School, Anoka, Minnesota. University of Minnesota. Medical Department two years.

Progress, His progress along all medical lines has been in keeping with the type of man that he is, therefore it must have been the very acme of perfection. He is also one of the many benedicts of the class, having acquired his "better half" in the far, far west. Member of Ptolemy.

Treatment, One year's service at the Jefferson Hospital is "good" enough treatment for anyone.

Prognosis, The world is waiting for just such men as he.

Referred to, Jefferson Hospital, Philadelphia, Pa.

WALLACE HAROLD BARNES, Φ Α Σ

"Barney," "Whitey," "Sylvius"

Age, 24.

Residence, San Francisco, Cal.

Condition on Admission, Hit the East on the crest of a Texas cyclone and immediately began to brag about the big trees of California. We now know that red-wood trees produce nuts, or else how account for "Barney's" antics.

Progress, In the Freshman year, intending to put "In God We Trust" on his examination paper, he wrote "E Pluribus Unum." Developed an acute attack of Holt's Disease, which soon became chronic, complicated by a cynical, critical, bombastic, ironical, sarcastic temperament. Member of Hawk, Loux, and Dercum Societies. Honorary Adviser of Southern Club.

Diagnosis, We have studied his condition for four years and can only offer the suggestion of Wallerian Degeneration Cerebri Totalis.

Treatment, Third Cervical Sympathetic Ganglionectomy to overcome the exophthalmos; thyroid extract grains five, t. i. d.; residence in the South.

Prognosis, Will be Chief of the Department of Psychiatry, Leland Stanford University.

Referred to, French Hospital, San Francisco, Cal.

Explanatory Note, Barnes is Personal Editor of this book.

This write-up is the work of the Committee of Retaliation.

JENARO BARRERAS ALMODOVAR, ΦΧΔ, ΑΩΑ
Age, 23.

Residence, Juncos, Porto Rico.

Condition on Admission, Very bashful and apprehensive, especially with the opposite sex. Keystone Academy, Factoryville, Pa. Central High School, Porto Rico. University of Pennsylvania. Pre-medical course in Jefferson Medical College.

Progress, His skill and talent won him a place among the first of his class. Secretary of the class in the Junior year. Graham Pediatrical Society.

Diagnosis, His ambitions are not yet determined. Requires further study.

Treatment, Keep away from the ladies and stick to your old principles.

Prognosis, Babinski in Paris; Dercum in Philadelphia; Barreras in Porto Rico.

Referred to, St. Agnes Hospital, Philadelphia, Pa.

ALBERT RUDOLPH BELLERUE, ΑΚΚ
"Al" "Bell"

Age, 26.

Residence, LaCrosse, Wisconsin.

Condition on Admission, A typical wild and woolly Westerner with an inherent tendency to be pugnacious. LaCrosse High School, University of Chicago.

Progress, Member of Loux, Keen, and Ptolemy Societies. Has developed wonderfully well, but acquired that one bad habit of "boosting" the West. He also succumbed to the wiles of Cupid's arrows.

Diagnosis, Hypertrophic myositis, especial of the right arm.

Treatment, About two years on a ranch will fix him up.

Prognosis, Grave—unless sudden change.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

ELMER JOHN BERTIN

"Bertin"

Age, 23.

Residence, Williamsport, Pa.

Condition on Admission, A lengthy, precocious, garrulous individual, who early developed a furunculosis of adolescence—same has persisted. South Williamsport High School.

Progress, Secretary of Graham Society. Chummed with Griffith, hence, the exciting etiological factor of his peculiarities.

Diagnosis, One of the subjects of McCrae's "Carriers' Problem"—spreading furunculosis.

Treatment, Actual cautery to neck. Remove from Adam's Argood Candy Shop.

Prognosis, Will immortalize the name of Jefferson in Uncle Sam's Navy.

CHARLES WARD BETHUNE, N 2 N

"Bettie"

Age, 25.

Residence, Wilkinsburg, Pa.

Condition on Admission, After taking his pre-medical work at the University of Pittsburgh, decided to come to a real school. While in the "Smoky City" he became addicted to the stogie habit.

Progress, Grumbles about the scarcity of the original Pittsburg stogies. "Bettie" stages many arguments with Epright about the improvements needed on the Nu Sigma Nu house, contending that the rear of the house should not be painted. Member of Ptolemy, Keen, Graham, and Coplin Societies, the latter of which he is the President.

Diagnosis, A pleasing personality bordering on euphoria.

Treatment, Become better acquainted with the advantages of the U. S. Navy.

Prognosis, We expect to hear much from him in surgical circles.

Referred to, Western Pennsylvania Hospital, Pittsburgh, Pa.

STONEWALL JACKSON BLACKMON, Φ P Σ

"Black"

Age, 24.

Residence, Kershaw, S. C.

Condition on Admission, Typical picture of Prof. McCrae's description of Uncinariasis. Had a B.S. degree from Wake Forrest College.

Progress, Too close association with Minor injured his physiognomy. His name misled him into the delusion that his head was harder than the pavement. Member of Davis, Graham, and Academy Societies.

Diagnosis, Ankylostoma duodenalis.

Treatment, Thymol, Oil of Chenopodium, and Magnesium Sulphate.

Prognosis, A credit to the Class of 1918,

Referred to, Philadelphia General Hospital, Philadelphia, Pa.

JOHN PATRICK BRENNAN, Α K K, Φ Δ Θ

"John" "Jack"

Age, 24.

Residence, Poultney, Vermont.

Condition on Admission, Troy Conference Academy, Poultney, Vt. University of Vermont. Degree of Ph.B. Medical Department two years, Burlington, Vt. Having absorbed all the learning of that venerable institution, the University of Vermont, John decided upon further fields of conquest and entered Jeff in the fall of 1916.

Progress, Member of Academy, Wilson, Graham and Der-cum Societies. Through the intrigue of O'Hannesian, John met his fate in the form of a girl and on one occasion with the above girl had the most delightful pleasure of being the only "Irish attendant" at a "Jewish Ball."

Diagnosis, A very conscientious and energetic young man with an envitable reputation.

Treatment, Mostly prophylactic. Let him remain as he is. Prognosis, Consulting Gynecologist to the Poultney Lying-in Hospital.

Referred to, St. Joseph's Hospital, Philadelphia, Pa.

DAVID ROE BREWER, K Ψ

"Dave"

Age, 24.

Residence, Woodbury, N. J.

Condition on Admission, Handicapped by a misleading name, he came to us from William Penn Charter School. His expression is due to the fact he came from New Jersey.

Progress, Seldom seen and never heard. Quiet and unassuming critter, whose case should never develop into any form of Mania. Member of Graham Pediatric Society.

Diagnosis, A problem for medical psychology.

Treatment, Fresh air, good food, rest, moderate exercise, medicaments as indicated.

Prognosis, A ray of light in the distant future.

Referred to, Cooper Hospital, Camden, N. J.

CHARLES OLIVER BRISTOW, N Σ N

"Charlie"

Age, 23.

Residence, McColl, S. C.

Condition on Admission, Entered Jefferson with a worldly-wise expression and a determination that was inspiring. Previous education at Wake Forest College and University of Maryland.

Progress, Made an enviable host of friends. Never talked much about the Blease reign in South Carolina. Member of Graham, Keen, and Coplin Societies.

Diagnosis, A conscientious worker, a friend, and a good fellow.

Treatment, An uninterrupted period of absolute rest after the Senior exams.

Prognosis, A general practitioner with an enormous clientele.

Referred to, Kings County Hospital, Brooklyn, N. Y.

GEORGE MARTIN BROOKS, Π K Φ, Φ X

"George"

Age, 28.

Residence, Sunbury, N. C.

Condition on Admission, After spending two years at Trinity College, Durham, N. C., and two years in the Medical Department of the University of North Carolina, George came to us with a world wise, "I'm worked to death" expression. His baby blue eyes and evident distaste for work made this camouflage evident.

Progress, George has shown symptoms of becoming a great Bacteriologist and will probably write a treatise on the infected waters of Wilkes-Barre. Member of Coplin, Dercum Societies and Southern Club.

Diagnosis, Melancholia. The characteristic symptom of self-blame is present.

Treatment, Carrel-Dakin treatment and familiar hunting grounds further South.

Prognosis, Good if the treatment is carried out. If he stays in the North he will learn much.

Referred to, St. Timothy's Hospital, Roxborough, Philadelphia, Pa.

WILLIAM ADAM BURKE, K Ψ

"Cupid"

Age, 23.

Residence, Minersville, Pa.

Condition on Admission, Hale, hearty, husky, and even Section "G" could not spoil his velvety manner. A marked idiosyncrasy to chronic "quizzers" and professor-chasers. Minersville High School and New York University.

Progress, Self-evident. Can hear the faintest murmur, enjoys a thrill and lately has been investigating the origin of the rustles of skirts.

Diagnosis, Delayed union with worldly delights. A lover of pretzels.

Treatment, Advised to keep away from that wild and woolly section of the city known as Kensington.

Prognosis, A man who will do things and do them well, for "Love" is ever the inspiration of knowledge.

PEDRO JUAN CARRERAS, Φ X Δ

Age, 26.

Residence, Juana Diaz, Porto Rico.

Condition on Admission. A foreign birth and speech makes him an *unknown* among his classmates. Pages could be written about this unique personage. A lover of politics since childhood, later a public school teacher, and finally the poet of Ponce High School—is the synthetic previous history of this ambitious patient.

Progress. In the city of Camden there is something that has wonderfully attracted his attention. His only problem was how to cross the river and to keep six cents for the ferry.

Diagnosis. Abnormal gastric contractions calling for coffee and "corn muffins."

Treatment. Take once again a trip to "Mount Olympus."

Prognosis. A great politician of a very small country.

Referred to, St. Agnes Hospital, Philadelphia, Pa.

GAIL ELLSWORTH CHANDLER, A K K, Θ N E

"Gail"

Age, 24.

Residence, Dallas City, Illinois.

Condition on Admission. Dallas City High School. Pre-medical work Jefferson Medical College. Unostentatious, affable, and courteous, he came to us in order to advance his already large storehouse of knowledge.

Progress. Has developed into an all around good fellow and student. Has developed a mania for West Philadelphia. Member of Loux Society and Ptolemy.

Diagnosis. Auricular fibrillation, especially in the presence of the gentler sex.

Treatment. Remove cause.

Prognosis. Uninterrupted recovery, if he can refrain from a certain part of West Philadelphia.

Referred to, Jefferson Hospital, Philadelphia, Pa.

HOWARD JOHNSON COMBS, Φ X
"Jack"

Age, 23.

Residence, Columbia, N. C.

Condition on Admission. After graduating from Warrenton High School and spending two years at the University of North Carolina, Jack decided to leave the "bone dry" state in order to seek better medical advantages in Philadelphia.

Progress. He has worked constantly at 30 and 30 with Harmon and others. A winning personality has done more for Jack than midnight oil has for some of us. Member of Hare, Davis, Coplin, Loux, Hawk, Der-cum and Graham Societies, President of the Southern Club, Vice President of the Pan-Hellenic Council.

Diagnosis. The visitor from Harvard who forgot to return Jack's shoes, shirt and suit case and the man who stole his Buick six, made a correct diagnosis.

Prognosis. A second Canfield.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

HENRY LILLY COOK, JR., Σ X, K Ψ

"Pedro"

Age, 25.

Residence, Fayetteville, N. C.

Condition on Admission. Arrived from the sunny South-land two years ago, apparently in good condition. stricken with diplomatic aphasia. Fayetteville High School and University of North Carolina.

Progress. A hard student who can dream between lines from Fayetteville High School and University of North Carolina. Wilson and Graham Societies.

Diagnosis. Hypersensitiveness to duty.

Treatment. Symptomatic. Free doses of conscience liberator and a few modern magazines.

Prognosis. Good for ultimate recovery from his lethargic state.

Referred to, St. Joseph's Hospital, Philadelphia, Pa.

WILLIAM RUSSELL COOPER, Φ X
"Coop"

Age, 26.

Residence, Brockwayville, Pa.

Condition on Admission, Coop came to us with the fire of determination in his eyes and the map of the farm on his face. Beechwoods High School, Pa., and Grove City College, Pa.

Progress, After a short time the homesickness melted away before the irresistible influence of civilization. He is a most popular man, a hard student and has made a host of firm friends. Member of Coplin Society.

Diagnosis, Arteriosclerosis with a blood pressure of four thousand.

Prognosis, Apoplexy under some slight provocation.

Treatment, The soothing influence of a wife and a large family.

Referred to, St. Margaret's Hospital, Pittsburgh, Pa.

WILLIAM MAURICE COPPRIDGE, Φ X

"Bill"

Age, 24.

Residence,

Condition on Admission, After absorbing Billy McNider's theories on Renal Function, Bill entered Jefferson in the Junior year. He spent two years at Belmont College, N. C., and two years in the Medical Department of the University of North Carolina.

Progress, Besides proving himself a student in the true sense of the word his inclination has been to pay special attention to Serology and G. U. His ambition is to write an original treatise on Incontinence, laying stress on some of the important etiological factors. Member of Coplin, Davis, Loux, Dercum, Graham Societies and Southern Club.

Diagnosis, "Ladies man" in an emergency.

Treatment, A quiet moonlight evening somewhere in the Valley of Virginia.

Prognosis, Bill's good looks will ruin him.

Referred to, Polyclinic Hospital, Philadelphia, Pa.

JAMIE WILLIAM DICKIE, $\Phi A \Sigma$

"Dickie"

Age, 24.

Residence, Henderson, N. C.

Condition on Admission, Came to us in the Senior year, fickle Dame Fortune having decreed that he should build up his health for the past two years. B. S. from Wake Forrest.

Progress, Has carefully mothered a supralabial soup-strainer, which, in spite of the best of care, has persistently refused to develop. Member of the Academy and the Southern Club.

Diagnosis, Some affectation with Kalteyer. Lord, they are loving.

Treatment, One prolonged exposure to the bracing effects of the North Atlantic air.

Prognosis, Guarded, if the lights of the big city don't blind him.

RUFUS HERBERT DIXON, $K \Psi$

Age, 34.

"Dick" "Baldy"

Residence, Bishopville, South Carolina.

Condition on Admission, A belated dainty he was a year ago with an exquisitiveness that would hide itself, had not our keener observations told us that neither man's virtue nor his vices are his own. Bishopville High School and University of North Carolina.

Progress, Phenomenal to say the least. Idiosyncrasy for water; has to pay a visit to the wharves or a visit with a friend to encounter some schooners. Graham Society.

Diagnosis, A case for study, suggestive, however of myocardial degeneration, due to pigmentary infiltration from a love bomb that exploded in the left ventricle.

Treatment, Try Glover's Mange Cure and a visit to a matrimonial bureau.

Prognosis, Bad for recovery from alopecia totalis, good otherwise.

JUSTIN MATTHEW DONNELLY, A K K, Θ N E
"Red" "Justin"

Age, 23.

Residence, Napoleon, Ohio.

Condition on Admission, St. John's University, Toledo, Ohio; University of Michigan Literary Department 3 years, Medical Department 1 year. "Red" joined our forces in the fall of 1915, just about as meek as any bushman could, and with an inherent desire to chase felines at any and all hours of the night.

Progress, Member of Keen and Loux Societies. His success has almost been phenomenal, especially, considering that overwhelming desire to run down all cats had a tendency to impede his progress.

Diagnosis, An all around good fellow.

Treatment, Remove him from McCarthy and Lane.

Prognosis, Favorable, if the above treatment is carried out.

Referred to, St. Vincent's Hospital, Toledo, Ohio.

WILLIAM CHARLES DORASAVAGE, K Ψ, Α Ω Α
"Dorrie"

Age, 24.

Residence, Shenandoah, Pa.

Condition on Admission, Paralysis agitans during a recitation. Books and boxing are his pleasures.

Progress, To make up for the loss of his appendix, joined the Benedicts. Schaeffer Anatomic League, Hare and Davis Societies.

Diagnosis, Rendered difficult on account of his speechless condition.

Treatment, Teach him catch-words, then administer cannabis to the point of talkative delirium.

Prognosis, Foremost ophthalmologist of the Shenandoah Valley.

Referred to, Philadelphia General Hospital, Philadelphia, Pa.

THOMAS EDMUND DOUGLAS, JR., Φ Β Π
"Dug"

Age, 27.

Residence, Seattle, Washington.

Condition on Admission, A breezy Westerner, determined to convince the Easterners that the West is God's country. State College of Washington, University of Washington.

Progress, Regard for the West (West Philadelphia) increasing. Hare, Davis, and Graham Societies. Secretary of the Senior Class.

Diagnosis, An ardent wooer, a good fellow, and an enthusiastic pediatricist.

Treatment, Marriage.

Prognosis, A famous Western physician.

Referred to, Presbyterian Hospital, Philadelphia, Pa.

GEORGE DURBIN, Ω Τ Φ

"George"

Age, 24.

Residence, Rochester, N. Y.

Condition on Admission, A quiet and unassuming chap, who was always telling us about Rochester. Had some reputation as a ball player.

Progress, Became the champion bowler and billiard expert of South Philadelphia. Never missed a ball game. Member of Graham and Wilson Societies.

Diagnosis, A mental blackboard—Ask him about his notebook.

Treatment, Give up Medicine and join the "Athletics."

Prognosis, Will be the Athletic Adviser to the Philadelphia Athletic Club.

FRANCIS EARL EAKIN, ΦΡΣ, ΘΝΕ

"Earl"

Age, 23.

Residence, New Castle, Pa.

Condition on Admission, Hailed from New Castle High School and entered Pre-Med. at Jeff. From the moment of his entrance he has been the "acme of popularity" among his fellows. Endowed with the personality, appearance and disposition of a gentleman and a scholar.

Progress, Became a member of Hare, Davis, and Graham Societies and later became President of the Senior Class, a position which he only justly deserves.

Diagnosis, Every inch a king and monarch of all he surveys.

Treatment, Companions of his own kind and an active field to work in.

Prognosis, Exceedingly favorable. He will be in a class of his own wherever he decides to locate.

Referred to, Philadelphia General Hospital, Philadelphia, Pa.

PAUL ALONZA EPRIGHT, ΚΨ

"Eppie" "Speed"

Age, 24.

Residence, Altoona, Pa.

Condition on Admission, Came to us from Bellefonte Academy with individual and eccentric ideas. Smooth talker, convincing, and appealing.

Progress, "Ep" has made wonderful strides. Writer, poet, lecturer, student, and Sunday School Teacher—can you imagine it? A book could be written about this individual. Member of Hawk, Schaeffer, Coplin, Hare, and Graham Societies.

Diagnosis, Get-Rich-Quick Wallingford's understudy. Have you seen the financial report of the Picture Committee?

Treatment, If left to a vote of the Senior Class, he would be imprisoned for thirty years for his picture contract with Sarony.

Prognosis, Will become the Medical Adviser and Scientific Writer for all of the Elbert Hubbard publications.

Referred to, Altoona Hospital, Altoona, Pa.

ETHELBURT FAIRBANKS

"Bert"

Age, 26.

Residence, Payson, Utah.

Condition on Admission, With a smile that won't come off. Attended Raymond and Latter Day Saints High Schools and the University of Utah; B. S. degree in 1916.

Progress, By his engaging personality has endeared himself to all his colleagues. Member of the Graham Society and the Academy.

Diagnosis, Pseudo-Paget's disease.

Treatment, Join the cavalry branch of the service.

Prognosis, After his experiences at Jeff., Utah's pet orthopedist.

Referred to, Philadelphia General Hospital.

GREGORY FAVIS

Age, 24.

Residence, Vigam, Phillipine Islands.

Condition on Admission, A. B. Ateneo of Manila. His perfumes and fashionable outfit were no doubt imported from Paris.

Progress, A medical education and a wife acquired in five years is something that very few men can accomplish in such a short time.

Diagnosis, A young man who has a walk all his own.

Treatment, In the list of expenses cut down the amount assigned to neckties and perfumes.

Prognosis, In sunny "Filipinas" a restful but productive life waits for this gentle son of the Orient.

ABRAHAM FISHER, $\Phi \Delta \Theta$

"Abe"

Age, 23

Residence, McKeesport, Pa.

Condition on Admission, An unsophisticated lad, fresh from McKeesport High School. With J. E. Fisher and "Rosie," "Abe" threw in his stakes and now see—

Progress, He is able to look a girl straight in the face without blushing. (For authenticity of this statement, see Rosenblatt.)

Diagnosis, A lover of theatres.

Treatment, Palliative only. Treat symptoms as they arise. Should go back to McKeesport.

Prognosis, Under ordinary circumstances we should be inclined to question it.

Referred to, McKeesport Hospital, McKeesport, Pa.

JACOB EDGAR FISHER, $\Phi \Delta \Theta$

"J. E."

Age, 25.

Residence, Canton, Ohio.

Condition on Admission, Entered from Canton High School and Ohio State University. Still studious on his admission to Jefferson.

Progress, A small, still voice hath it that he has developed an idiosyncrasy to the wiles of Cupid.

Diagnosis, A hard working student who will get what is coming to him.

Treatment, Mental relaxation. Don't try to learn it all at once.

Prognosis, Good, if he takes up Obstetrics or Gynecology.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

JAMES LEE FISHER, Φ P Σ

"Bud"

Age, 22.

Residence, Youngstown, Ohio.

Condition on Admission. Entered from the Newcastle High School. Formed close associations with Eakin and Shoaff, and we knew very little of him the first year.

Progress. Gradually "Bud" emerged from his shell; first, to tell us a funny story; then, to delve into class politics. Finally, in the Senior year, he, like all the crafty ones, landed a graft as chairman of the Invitation Committee. Member of the Schaeffer, Graham, Hare, and Davis Societies.

Diagnosis. The philosophical attitude of a medical student—there is a way out of everything.

Treatment. In this day of conservation, why expend energy when unnecessary?

Prognosis. Will be heard from in the Middle West as a leading physician.

Referred to, Youngstown Hospital, Youngstown, Ohio.

VICTOR MANUEL FLORES, Φ X Δ

"Vic" "Slender"

Age, 24.

Residence, Heredia, Costa Rica.

Condition on Admission. With an exceptional ability for the art of drawing from the Lyceum of Heredia. A. B. St. Joseph's Seminary and the Costa Rica College of Pharmacy.

Progress. Has developed a very powerful imagination. Sees and imagines things yet undiscovered. Graham Pediatrical Society. E. P. Davis Obstetrical Society. Hare Medical Society.

Diagnosis. Rapidly progressing delusions of grandeur.

Treatment. A big Ben alarm clock especially adapted for Wednesday mornings.

Prognosis. Director of the Board of Health of his native country.

Referred to, Methodist Episcopal Hospital, Philadelphia, Pa.

JOHN MEREDITH FLUDE, N Σ N, Δ Σ Π

"Jawn"

Age, 25.

Residence, Wilkinsburg, Pa.

Condition on Admission, A young man with a military carriage developed in the Staunton Military and East Liberty Academies. Graduate of the Wilkinsburg High School.

Progress, Rapidly ingratiated himself with Professor Coplin and became an assistant in the Department of Pathology. Member of Ptolemy, Coplin, Keen, and Graham Societies.

Diagnosis, One of Prof. Da Costa's most attentive scholars.

Treatment, Isolation from Bethune.

Prognosis, One of the few scientific practitioners of his district.

Referred to, Jefferson Hospital, Philadelphia, Pa.

WILLIAM BURNSIDE FORT, A K K

"Bill" "Burnside"

Age, 24.

Residence, Millville, N. J.

Condition on Admission, After fighting those Jersey "skeeters" for 19 years, "Bill" decided to enter the pre-medical course at Jeff., and from then until now he has not lost that inherent art because he has been battling and arguing with the faculty the advisability of giving him a diploma. Millville High School.

Progress, Realizing the "emptiness" of his life, he called his versatile art of persuasion into play, and induced the "flower of his heart" to become Mrs. Fort. Has old Dan Webster backed off the map when an argument is in progress. Also has a great fondness for "Binocular" field glasses. Member of Keen and Graham Societies; President of Pan-Hellenic Council.

Diagnosis, Caterer for "Student Jim."

Treatment, Special train to Millville every Saturday.

Prognosis, Guarded—there is no telling what will happen.

CLYDE CALVIN FOX, $\Phi A \Sigma$

"Cal"

*Age, 25.**Residence, Wilkes-Barre, Pa.**Condition on Admission, A gaunt, husky athlete fresh from the University of Maine, weighted down with track laurels. Attended Wyoming Seminary.**Progress, Quiet and unobtrusive he made his way. Spent his summers in the Maine woods. Member of Shaeffer and Hawk Societies. President of Pan-Hellenic Council.**Diagnosis, The track man of the Class of 1918.**Treatment, Needs the inspiration and association of one in Providence, Ohio.**Referred to, Germantown Hospital, Philadelphia, Pa.*CHARLES REUBEN FOX, $K \Psi$

"C. R."

*Age, 26.**Residence, Metztown, Pennsylvania.**Condition on Admission, Overlength and underweight. Had disturbances of sympathetic and autonomic nervous systems around meal times. Attended Keystone Normal School.**Progress, His appetite kept pace with his brains. A Pennsylvania Dutch farmer who early learned to leave the bone dust on the fields at home.**Diagnosis, A human sort of a fellow. Says little, but makes friends easily.**Treatment, Remove superior labial fungus. Intensive course at the "Troc."**Prognosis, Bound to make good. Will be heard from in Gynecology.*

JOHN BRYAN FULLMER, K Σ

"B. B." "Fats"

Age, 29.

Residence, Renovo, Pa.

Condition on Admission, A protuberant abdomen which with measured and stately tread propelled itself into the college office and was duly registered. Came from Washington and Jefferson.

Progress, Brain capacity increased in direct proportion to his expanding waist-line.

Diagnosis, The conspicuous exception to the saying, "Nobody loves a fat man."

Prognosis, Good provided he subjects himself to a prolonged anti-fat regime.

Treatment, Massive doses of thyroid extract.

Referred to, Philadelphia General Hospital, Philadelphia, Pa.

JAMES WILSON GIBBON, K A, F F, Φ A Σ

"Gib"

Age, 24.

Residence, Charlotte, N. C.

Condition on Admission, Quiet and unassuming, Gibbon entered with a B. S. from Davidson College, and immediately set out to capture all the laurels of the medical curriculum at Jefferson. Had some reputation as an athlete.

Progress, Spent his time in the Y. M. C. A., laboratory of Physiology, and at home working, hence, we saw very little of him. Made quite a reputation as an anatomist from his research on the kidney. Also developed some new ideas regarding the spleen. Member of Schaeffer and Academy Societies.

Diagnosis, A personality untainted by his association with his classmates.

Treatment, Become closer associated with the *hoi polloi*. Cut out the high life.

Prognosis, Will some day be known as an eminent bacteriologist.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

REYNOLD STEPHEN GRIFFITH, KΨ
"Griff"

Age, 24.

Residence, Nesquehoning, Pa.

Condition on Admission, Poor—was handicapped three weeks until they located his place of birth, but has blossomed with our sunshine and lived with our love. Stroudsburg Normal School.

Progress, After the initial pressure his expansion was "Hydraulic like," socially as well as personal. Davis, Hare, Ptolemy and Graham Societies.

Diagnosis, Rendered difficult due to his hysterical bilateral facial paralysis. To be differentiated from Hydrophobia and Necropsy Facies.

Treatment, Palliative. Nurses' training school of his own.

Prognosis, Encouraging when you know him personally.

JOEL HANSON, A K K

"Joel"

Age, 25.

Residence, Eau Claire, Wisconsin.

Condition on Admission, Eau Claire High School; B. A. University of Wisconsin; Medical Department, Univ. of Wisconsin two years. This "neurotic kid" joined our band two years ago from the far West. He is very quiet and unassuming.

Progress, He frequents the various places of amusements in Philadelphia. Can be seen almost at any time tripping the "light fantastic." Has developed a very neurotic temperament. Keen Surgical, Academy, Loux Urological Societies.

Diagnosis, Hypochondriasis, Gastric Ulcer, Neurasthenia, possibly with a certain element of Psychasthenia, etc., etc., etc.

Treatment, Rest cure, wet sheets to spine, and lumbar puncture.

Prognosis, Good, if he can keep from developing all the diseases in the dictionary.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

JAMES CARLISLE HARMON, KΣ, AKK, ΘNE
"Sticks"

Age, 24.

Residence, McCormick, S. C.

Condition on Admission, After graduating from Wofford College, "Sticks" came up to see the World Series. He liked the atmosphere of Tenth and Walnut so well that he decided to study medicine.

Progress, Has been remarkable. "Sticks" often instructed Reisinger, Mendel, Wickert, Klugh, and Heinitsh in the favorite pastime of "looking 'em over." Member of Wilson, Loux, and Graham Societies; Academy and Southern Club.

Diagnosis, The original gloom dispeller.

Treatment, Three cokes, a dram of caffeine, and four alarm clocks.

Prognosis, The rag-time obstetrician of Cole L. Blease's realm.

Referred to, Methodist Hospital, Philadelphia, Pa.

JAMES HAWFIELD, Φ X

"Jim"

Age, 24.

Residence, Mathews, N. C.

Condition on Admission, Jim spent two years at Trinity College, Durham, N. C., and two years at the Medical Department of the University of North Carolina. He came to us in his Junior year with a great craving for knowledge of the Parasitic skin diseases.

Progress, His constant search for knowledge and the depth of his mentality is evidenced by his famous questions—"What makes a ring worm round and how must potassium iodide be given where the iodides are contraindicated?" Member of Davis, Coplin, Dercum Societies, and Southern Club.

Diagnosis, Tinea Psychosis and Achondroplasia complicated by honesty, a soft Southern dialect and a charming personality.

Treatment, Experience in the ways of the world.

Prognosis, Favorable if he refrains from exploiting his views on Dermatology.

Referred to, Episcopal Hospital, Philadelphia, Pa.

ROY WASHINGTON HAYWORTH, Ω Τ Φ

"Doctor"

Age, 23.

Residence, Asheboro, N. C.

Condition on Admission, One of those peculiar individuals who is interested in no one except himself. University of North Carolina.

Progress, Patient has not increased in height, but oh! how he has grown in his own estimation. Graham and Wilson Societies.

Diagnosis, Acquired hydrocephalus immediately after appointment as interne to Jefferson Hospital.

Treatment, To be handed over to any Senior desperado who shall administer the necessary therapy.

Prognosis, Obstetrician to the Zanzibar Maternity.

Referred to, Jefferson Hospital, Philadelphia, Pa.

HARRY ERNEST HEINITSH, Α Κ Κ, Α Ω Α, Κ Σ

"Ike" "Harry"

Age, 23.

Residence, Spartanburg, S. C.

Condition on Admission, Hastoc High School, Spartanburg, S. C. Wofford College, A. B., Spartanburg, S. C. Verdant almost to an extreme, yet with the desire for knowledge burning within his soul. Ike came to Philadelphia to imbibe in all of the learning that Jefferson could afford.

Progress, He drank deep of the learning afforded him as is shown by his record. Member of Schaeffer, Keen, Wilson, Graham Societies, Academy, Southern Club and Ptolemy. His one great drawback is, "Let's go in and look 'em over."

Diagnosis, A great tactician who gets what he goes after.

Treatment, Purely symptomatic.

Prognosis, Good, if Brennan prescribes. Consulting Obstetrician to the Spartanburg City Hospital.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

VONNIE MONROE HICKS, $\Phi \Lambda \Sigma$

"Vinnie"

Age, 23.

Residence, Greensboro, N. C.

Condition on Admission, A conspicuous member of the transfers from below the Mason-Dixon line, with pronounced proclivities for driving and spreading at the same time.

Progress, Vide minutes of Loux and Dercum banquets. Member of Dercum, Loux, Graham Societies and the Southern Club.

Diagnosis, "And still they gazed and still their wonder grew, that one small head could carry all he knew."

Treatment, A long posterior splint to keep his hands quiet, and a Jennings mouth-gag.

Prognosis, With his fertile flow of bovinum effluvium should have an extensive female practice.

Referred to, Jefferson Hospital, Philadelphia, Pa.

JAMES DAcOSTA HIGHSMITH, X Z X

"Hi"

Age, 27.

Residence, Fayetteville, N. C.

Condition on Admission, A distinguished-looking, serious-minded Southerner with no time for the fickle mannerisms of the North.

Progress, Developed Prof. McCrae's walk and a thirst-for-knowledge look. Member of Coplin and Graham Societies.

Diagnosis, Leontiasis ossium.

Treatment, Get an alarm clock that will get you in on time.

Prognosis, Foremost surgeon of the South.

Referred to, Protestant Episcopal Hospital, Philadelphia, Pa.

ERNEST REED HIRST

Age, 25.

Residence, Camden, N. J.

Condition on Admission, Hailed from Camden High School. Small, neat, distinguished looking.

Progress, Kidding "Walker."

Diagnosis, A good fellow who ought to make good if he gets out of Camden.

Referred to, Cooper Hospital, Camden, N. J.

DUNCAN WALDO HOLT, Φ A Σ

"Dave"

Age, 27.

Condition on Admission, A Southern gentleman bound and determined to put McLeansville, N. C. on the map and not to cultivate any more Northern ways than was necessary. Carried an A. B. from Trinity College.

Progress, Class correspondent for the Jeffersonian 1914-16. Vice President of the Class 1917-1918, Local Editor of the Jeffersonian 1916-1917. Member of the Academy, Southern Club, Schaeffer, Graham and Loux Societies. Has "bulled" for four years and still has the "systematized delusion" that the South is "God's Country."

Diagnosis, A Southerner in every sense of the word.

Treatment, If four years in the North won't change him, how in — will anything?

Prognosis, A bear in his own home town.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

ARCH JOHN HOOD, ΦΒΠ, ΘΝΕ

"Dutch"

Age, 26.

Residence, Milwaukee, Wisconsin.

Condition on Admission, Confident, well-informed Westerner. University of Wisconsin, Marquette University, Medical Department.

Progress, Confidence increasing. Member of Hare, Graham, Dercum Societies.

Diagnosis, An authority on any subject.

Treatment, Hydrotherapy—cold.

Prognosis, Professor of Gynecology at Marquette in 1920.

Referred to, St. Agnes' Hospital, Philadelphia, Pa.

FREDERICK CECIL HUBBARD

Age, 24.

Residence, Wilkesboro, N. C.

Condition on Admission, After spending three years at University of North Carolina, he, like all the rest, entertained the belief that he could learn something in the North, so he came here a slow, quiet, religious-looking young man.

Progress, Still quiet and pious looking. Member of the Southern Club.

Diagnosis, An earnest, clean cut fellow.

Treatment, A little worldly experience.

Prognosis, Favorable.

ALBERT WARREN JAMES, ΦΑΣ, ΘΝΕ, ΑΩΑ
"Albert" "A. W."

Age, 23.

Residence, Laurinburg, N. C.

Condition on Admission, Tall, hungry-looking individual with the facies and speech of a thinker and the attitude of a gentleman. Received his A.B. degree from the University of North Carolina.

Progress, After leading his class as a student for three years, he was granted the Appleton Prize at the end of the Junior year. A man who proved the adage that "all work and no play makes Jack a dull boy." Editor-in-chief of this book. Member of Hawk (Pres.), Dercum and Loux Societies. Also Academy and Southern Club.

Diagnosis, A practical thinker, a gentleman in every sense of the word, a man who can adapt himself to any environment.

Treatment, Continuation of happy matrimony.

Prognosis, A success wherever he goes.

Referred to, Jefferson Hospital, Philadelphia, Pa.

HERBERT HALPENNY JAMES, ΦΧ

"Bert"

Age, 27.

Residence, Grand Forks, N. D.

Condition on Admission, Bathgate High School, N. D. North Dakota University. James came to Jefferson in his Junior year a worshiper at the shrine of matrimony. He has won the respect of all men who know him.

Progress, Uneventful. He has been a good student and a popular man. Member of Davis, Hare and Dercum Societies.

Diagnosis, A man to be depended on.

Treatment, He needs none.

Prognosis, Excellent for life, happiness and success.

Referred to, Murray Hospital, Butte, Mont.

JERRY M. JAMES, A K K

"Jerry"

Age, 25.

Residence, Windber, Pa.

Condition on Admission, Windber High School. Spending his early youth in and around the famous coal mining region of Windber, he decided to try his luck with medicine. Although handicapped to some extent by an acquired anthracosis, his success has been all that one could wish.

Progress, Well along certain lines. When you hear him shout, "Go get him, Kelly," you had better look out. Hasn't missed a prize fight since he entered Jefferson, Loux Urological Society, Keen Surgical.

Diagnosis, A fighter from start to finish.

Treatment, Ringside seat at the Willard-Fulten bout.

Prognosis, Favorable, if he severs relationship with a few friends.

Referred to, Abington Memorial Hospital, Philadelphia, Pa.

JOHN McFARLAND JAMISON, A O A

Age, 30.

Residence, Beaver Falls, Pa.

Condition on Admission, A quiet, well-behaved young man ably upholding the dignity of the flourishing little town he calls home. Received his B. S. degree from Geneva College.

Progress, Developed into one of the shining lights of the class. Member of the Academy, Hare, Keen, and Graham Societies.

Diagnosis, Difficult to make because he presents nothing abnormal.

Treatment, Advised to hit the high spots before withdrawing to the seclusion of Beaver Falls.

Prognosis, Continuance of his record at College and will blossom out as an honored physician of the community.

Referred to, Western Pennsylvania Hospital, Pittsburgh, Pa.

FELIX ANDREW JAWORSKI, A K K

"Jawiki" "Felix"

Age, 25.

Residence, Glassport, Pa.

Condition on Admission, Marquette Academy and Marquette University, Medical Department, Milwaukee, Wisconsin. Felix joined our ranks in the fall of 1916 with the grim determination to do or die; in all of the undertakings that he has thus far attempted, he has always emerged victoriously.

Progress, Although hampered to some extent by the fact that he comes from a town that wasn't "made famous" by Marquette University, nevertheless, this son of the Middle West has, by means of his unbounding enthusiasm and his mighty store of energy, made a record for himself of which he should be proud. Start an argument and Felix will take his part, especially if "Terry" Jones attempts to make a rebuttal. Member of Keen and Graham Societies.

Diagnosis, Rhinophyma.

Treatment, Leave him alone, he will get well.

Prognosis, That all depends. If sedentary mode is adopted, then prognosis is good.

Referred to, McKeesport Hospital, McKeesport, Pa.

FLORENTINE BARKER JONES, JR., A K K, A Ω A

"Turp" "Flo"

Age, 26.

Residence, Johnstown, Pa.

Condition on Admission, Johnstown High School, Johnstown, Pa. A small but tightly compact piece of protoplasm. A giant for work and very brilliant. Made a remarkable record as basketball player for Johnstown High.

Progress, If "Turp" would show you some of his reports you would wonder and likewise marvel how one so small could store up such a large amount of learning. His one failing is his tendency to nocturnal emigration to Uber Street.

Diagnosis, A human dynamo.

Treatment, Needs none.

Prognosis, World renowned laboratory man.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

HAROLD CHARLES KELLEY, K Ψ, Θ Ν Ε

"Hal"

Age, 22.

Residence, Luverne, Minnesota.

Condition on Admission, Show an early anaphylaxis, due to class asthenia. Immediately was crowned the athletic doper of Jefferson. Member of the Ford Peace Party.

Progress, Has been wonderful. Developed an argumentative mood that no one can surpass. Member of Schaefer, Hawk, Coplin, Davis, Hare, and Graham Societies. Is the Business Manager of this publication.

Diagnosis, By the direct method, remembering the Emerald Isle—John McCormack and Grand Opera.

Treatment, Fistic massage, if you can locate patient during school hours. Remove all front rows from the movies.

Prognosis, Questionable. He will survive, but is in need of the consolation of a woman's love.

Referred to, Episcopal Hospital, Philadelphia, Pa.

WALTER GRAY KLUGH, A K K, K Σ

"Walter" "Klug"

Age, 22.

Residence, Greenwood, S. C.

Condition on Admission, Hastoc High School, Spartanburg, S. C. Wofford College, Spartanburg, S. C. Rather awkward, but nevertheless a highly ambitious youth with spasmodic flights of fancy.

Progress, Wilson, Keen, Dercum Societies and Southern Club. Suddenly developed failing compensation of the heart and the only stimulant of any value was a wife. He also has a tendency to "look 'em over."

Diagnosis, A man's a man for a' that.

Treatment, Liquid diet will tend to check the adiposity about to overtake him.

Prognosis, Deferred.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

JOHN WILLIAM LANE, Φ P Σ, Θ N E

Age, 26.

Residence, Madison, Wisconsin.

Condition on Admission. Hailed from Marquette University, a wild and woolly Westerner with a decided love for Southerners.

Progress. Met McCarthy, and then, of course, things were all wrong. But his room mate, Jones, took care of him and used him as a subject for a "paper" which he lately wrote. Became a member of the Hare, Davis, and Graham societies and elected Honorary Member of the Southern Club.

Diagnosis, A good fellow.

Treatment, "Isolation from Southerners."

Prognosis. Favorable if he can survive a year's internship with Holt and Lawrence.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

CARL LARSON

"Larson"

Age, 27.

Residence, Monroe, Utah.

Condition on Admission. A tall, lanky, light-haired chap from the widely known Salt Lake State. Entered Jefferson in the Junior year. Graduated from the Monroe High School; B. S. degree from the University of Utah, first two years of medicine *ibid.*

Progress. Made quite an impression, as evidenced by his appointment as resident physician to the College Hospital.

Diagnosis, A clean cut, conscientious, hard working youth.

Treatment, One good dose of mixing with his associates.

Prognosis, The leading medical man of Utah.

Referred to, Jefferson Hospital, Philadelphia, Pa.

HENRY GRADY LASSITER, K Ψ

"Sleepy"

Age, 26.

Residence, Weldon, N. C.

Condition on Admission, Entered quietly and slowly, well nourished, and had the ability to acquire knowledge while asleep. University of North Carolina.

Progress, Has been constant, that is, his sleep. Graham Society.

Diagnosis, A quiet condition which threatens to become stuporous—possibly Sleeping Sickness.

Treatment, Curb recently developed yearning for a social career. Morphia for pain during study. Caffeine for stupor.

Prognosis, Shall snore his way to fame.

BENJAMIN JONES LAWRENCE, Φ Α Σ

"Bennie"

Age, 25.

Residence, Fuquay Springs, N. C.

Condition on Admission, Three snorts, a bustle, a vision of red hair, and "Bennie" was in our midst as a Junior, fairly glistening with the verdance of three years at the University of North Carolina.

Progress, Exhibited an insatiable thirst for knowledge, which midnight oil failed to quench. Became a member of the Southern Club and Wilson Medical Society. "Bennie" has developed some queer ideas regarding the application of the moral law to the practice of Obstetrics.

Diagnosis, A highly specialized development of the center of social uplift.

Treatment, Twelve months at the Pennsylvania Hospital and then transferred to the Philippine Islands for research work in the psychology of the anthropoids.

Prognosis, Favorable, if he does not take up Obstetrics.

Referred to, Pennsylvania Hospital, Philadelphia, Pa.

WILLIAM THOMAS LEACH, $\Phi P \Sigma$, $\Lambda \Omega \Lambda$

"Willie"

Age, 22.

Residence, Shenandoah, Pa.

Condition on Admission, Diminutive in size, but endowed with the dialect of the "Emerald Isle" and the brains of an Oliver Cromwell.

Progress, Along his path of the past four years are milestones of good fellowship and success in all his various studies. President of Davis Society. Member of Hare Society.

Diagnosis, Alpha Omega Alphaitis.

Treatment, Isolation from Minor and Blackmon. Fresh air, exercise and internal hydrotherapy.

Prognosis, Good. He bids fair to rise.

Referred to, Fountain Springs State Hospital, Ashland, Pa.

CHARLES LEASUM, $\Phi B \Pi$

"Chuck"

Age, 23.

Residence, Milwaukee, Wis.

Condition on Admission, Marquette University, Milwaukee.

Progress, Edwin E. Graham Pediatrical Society. "Chuck" has changed his ideas about religion lately, rather enjoys bobbing up and down at the Episcopal service, all due to a co-ed.

Diagnosis, Palpitation of heart.

Treatment, Take unto thee a wedded wife.

Prognosis, A leading Gynecologist of Milwaukee.

Referred to, St. Joseph's Hospital, Philadelphia, Pa.

ROBERT NELS LEASUM, ΦΒΠ

"Nels"

Age, 26.

Residence, Milwaukee, Wis.

Condition on Admission, Marquette University, Milwaukee.

Progress, Member of Graham Society. "Nels" has developed into a true all around good fellow, but has never acquired the habit of drinking, smoking or chewing, but the fair, fair damsels are driving him mad.

Diagnosis, Insomnia.

Treatment, Cupid's arrow.

Prognosis, Consultant on Genito-Urinary Disease.

Referred to, St. Joseph's Hospital, Philadelphia, Pa.

JOSE D. LIMQUICO

"Lim"

Age, 24.

Residence, Philippine Islands.

Condition on Admission, Doubtful as to his native origin.

A very irritable, gray-headed fellow, imported from the Pacific Islands. A. B., Ateneo de Manila, Manila, P. I.

Progress, A laboratory man. His research work on the Parathyroids won him a name in the Anatomical Department. Member of Keen and Davis Societies.

Diagnosis, Multiple. Rhinoscleroma and Premature Sensitivity. Atrophy of the centre for articulate speech.

Treatment, A careful and systematic study of the books of Samuel Smiles.

Prognosis, Following the treatment, the prognosis is still hopeful.

CHIN WEN LOW, A O A

"Low"

Age, 24.

Residence, Shanghai, China.

Condition on Admission, A tall, mysterious Oriental, who said few words, but soon his work attracted our attention.

Progress, One of the most pleasant fellow-students it has been our good fortune to number among our acquaintances. Member of the Schaeffer, Hawk, and Keen Societies. He also wears an A. O. A. key.

Diagnosis, Still waters run deep.

Treatment, Symptomatic only. So far he has shown no symptoms.

Prognosis, Physician-in-chief to the government of China.

Referred to, Jefferson Hospital, Philadelphia, Pa.

CHARLES PRESTON MANGUM, Σ N, Κ Ψ

"Charlie"

Age, 25.

Residence, Kinston, North Carolina.

Condition on Admission, He joined us in the Junior year from the University of North Carolina. Showed enviable attainments and a smooth disposition. An artist of no mean ability.

Progress, None of us has been able to follow his tracks or tricks. Had nothing to conceal and nothing to fear. Member of Wilson and Graham Societies and Southern Club. "Charlie" is the Class Book Artist.

Diagnosis, "If in doubt, isolate and observe," says McCrae. It holds true here.

Treatment, One guitar and a mellow moon—he will immediately come into his element.

Prognosis, Excellent, for he has many virtues other than his knowledge of medicine.

JAMES HENRY MASON, 3RD, Φ Α Σ, Θ Ν Ε, Α Ω Α

"Jimmie" "Chief"

Age, 24.

Residence, Atlantic City, N. J.

Condition on Admission. Entered from the Atlantic City High School with a well developed case of hyperesthesia of the sacral plexus. Immediately forgot his athletic abilities, and as the muscular atrophy from disuse developed, there was a corresponding hyperplasia cerebri.

Progress. "Chief" soon became the source of supply for "notes" when we cut classes. Incidentally, he made a good record as a student. Was Vice President in the Junior year and member of the Schaeffer, Hawk, and Davis Societies. Always spent his week ends at Atlantic City, for reasons we can not divulge.

Diagnosis. Jimmie roomed with Holt three years—flip a coin and see which dementia he has.

Treatment. A mellow moon, an isolated nook, the one girl, and listen to what the wild waves are saying.

Prognosis. Depends on the subsequent behavior of the patient.

Referred to, Protestant Episcopal Hospital, Philadelphia, Pa.

JUSTIN A. McCARTHY, Ω Τ Φ

"Aloysius," "Mac"

Age, 25.

Residence, Lawrence, Mass.

Condition on Admission. A walking advertisement for "Boston Baked Beans." Had difficulty in learning English pronunciation of laugh, bath, half, calf, etc.

Progress. Rapid in gaining knowledge of Medicine, becoming a good fellow with the "Hole-in-the-Wall Gang." Still had difficulty with English pronunciation.

Diagnosis. Acne Rosacea (a disease not common among theological students).

Treatment. Hydrotherapy, especially internally.

Prognosis. Chief clinical assistant to Pediatricist Holt.

JOSEPH STITES McDANIEL, K Ψ, Α Ω Α

"Mac," "Pop"

Age, 29.

Residence, Dover, Delaware.

Condition on Admission, Slightly water-logged, having blown in from the State of two counties at high tide. This kept him on the move and he has been restless ever since. "Pop's" married. Dover High School and Delaware College.

Progress, President, Junior Class. Early realized to drop the piano and study Medicine, showed early evidence of becoming a modern, moderately enlightened individual who could and would revolutionize science. Coplin, Hare, Davis and Ptolemy Societies.

Diagnosis, One requiring repeated examination. Don't let his laughs and likes mislead you.

Treatment, Traction on left limb with Buck's Extension Apparatus. Raise price of admission to Trocadero and Casino.

Prognosis, Excellent, but too big a proposition for Delaware to handle.

Referred to, Jefferson Hospital, Philadelphia.

BURRUS BOYD MCGUIRE

"Mac"

Age, 23.

Residence, Norton, N. C.

Condition on Admission, Entered in the Junior year from the University of North Carolina. Formerly a student at Higdonville High School and Iotla High School. Was confined to Spruce street under observation.

Progress, From the way "Mac" left his room-mate post-haste, we are inclined to believe he is somewhat of a Quaker and moves when the spirit prompts. Gained considerable reputation as a clinical gynecologist.

Diagnosis, Kyphosis and exostosis of the tuberosities of the ischia.

Treatment, Abbott jacket, and a location far from the din and turmoil of the city.

Prognosis, Good, provided he does not develop cholelithiasis from lack of exercise.

JAMES HAROLD MENDEL, A K K
"Pete" "Harold" "Head"

Age, 23.

Residence, Philadelphia, Pa.

Condition on Admission, Unheralded, yea even unheard of, this verdant youth emigrated from Wheeling, W. Va., and came to try his fortune in the big city. Owing to his "jewdicious" name and tendency, "Pete" got an invitation to join a certain Fraternity, a mistake he has never wholly recovered from. Wheeling, W. Va., High School.

Progress, By skillful manouvering, "Pete" has endeared himself into the good graces of Uncle Bill, therefore his progress has been unimpeded. His associates have not been all that could be expected from such a promising youth, nevertheless he has managed to survive in spite of them. "What do you say," "Going up or going out?" Using his powers of persuasion, hence unknown, he persuaded the "sweetest girl in the world" to walk up the aisle with him. Member of Wilson, Loux, Hawk Societies and Southern Club. "Knight of the Round Table."

Diagnosis, Impossible.

Treatment, Isolation, especially from Reisinger. One "coke."

Prognosis, Good—if put in the right direction.

Referred to, Jefferson Hospital, Philadelphia, Pa.

ROBERT SYLVESTER MILLIGAN

"Bob"

Age, 28.

Residence, Pittsburgh, Pa.

Condition on Admission, At first we mistook him for Ichabod Crane en camouflage, but a careful examination revealed our error. A pronounced tendency to alopecia, probably from previous experiences. Attended Perkiomen Seminary and Syracuse University before joining us in the Sophomore Year.

Progress, In addition to the few hours' work at Tenth and Walnut, "Bob" was ambitious enough to learn the mercantile business.

Diagnosis, An earnest, hard-working student of the type that produces lasting results.

Treatment, Endocrinous glandular therapy indicated for his alopecia.

Prognosis, Consulting obstetrician of Western Pennsylvania.

Referred to, Cooper Hospital, Camden, N. J.

AUSTIN JOSEPH MINOR, Φ P Σ

Age, 27.

Residence, Hazleton, Pa.

Condition on Admission, Came to us from Hazelton High School and St. Mary's College. Became a member of the Eakin, Shoaff, and Leach Gang.

Progress, Seldom seen, seldom heard, this lad went his way. Developed aphasia in one of the ward classes.

Diagnosis, Quiet in the open, but a bear in the dark.

Treatment, Remove patient to a warm, equable climate, far from the cares that are.

Prognosis, Will become a general practitioner.

Referred to, Hazleton State Hospital, Hazleton, Pa.

PASTOR MOLINA

Age, 24.

Residence, Merida, Mexico.

Condition on Admission, A cute little angel who never failed to go to church on Sundays. A. B. St. Idelfonso College of Merida, Mexico.

Progress, A very active member of various local religious congregations. All his troubles were how to understand the difference between the single and double flap amputation of the cervix.

Diagnosis, A good friend, a diligent student and a perfect citizen, who is an honor to his country.

Treatment, Physical culture directed to improvement in height.

Prognosis, He is one of those on whose shoulders rests the responsibility of restoring the peace of his country.

Referred to, St. Mary's Hospital, Brooklyn, N. Y.

EDWIN LELAND MOTT, Φ X

"Ed"

Age, 24.

Residence, Fort Edward, N. Y.

Condition on Admission, Came to us from Keeseville High School and the University of Vermont, with great ideas of his own. He soon forgot he was a regular New Yorker and formed intimate association with Lott and Combs.

Progress, Under Ohannesian's gentle guidance Ed has shown marked development. Possibly there was another destiny that shaped his end, for he joined the St. Benedict's Club in his Senior Year. Member of Coplin, Hawk, Hare, and Dercum Societies.

Diagnosis, A sincere fellow with an adaptability to his environment.

Treatment, Weir Mitchell rest cure.

Prognosis, Good, provided he will shed his cocoon of self-satisfaction.

Referred to, St. Joseph's Hospital Philadelphia, Pa.

ASA LEE MYERS, Φ A Σ, Θ N E

"Ace"

Age, 24.

Residence, Paris, Illinois.

Condition on Admission, Breezed into the "City of Brotherly Love" with ideas of making living at the Bellevue-Stratford compatible with the study of medicine. Graduated from Paris High School, "went through" the University of Illinois, and landed ker-flop at Jefferson.

Progress, President of Class in Freshman Year, President of Loux Society, President of Theta Nu Epsilon—there's a reason; ask Kinney. Also member of Dercum, Davis, and Graham Societies. "Ace" disgraced T. N. E. the night of the banquet when he drank buttermilk (A. W. J. for particulars).

Diagnosis, An uncorking good fellow whose only regret is that he did not join the Navy.

Treatment, Referred to Prof. Stewart for an autogenous transplant from the beard to the scalp.

Prognosis, Judging from his name, it is a "three to one" shot that he will get there with bells on.

Referred to, Protestant Episcopal Hospital, Philadelphia, Pa.

FRANK O'HANNESIAN, A K K

"Frank"

Age, 26.

Residence, Fresno, California.

Condition on Admission, Fresno High School, University of Southern California. This quiet and bashful youth, but with a slight tendency to enteroptosis, entered Jefferson so meekly that it took months to know that he was really here. Still talks about California and her oranges. "A Regular Romeo."

Progress, Has been steadily upward. Developed a fungoid mass on upper lip which he can twist and curve like any nobleman. His affection for Mott resembles that of Damon and Pythias. Ask Frank about the Xmas party 1917. Member of Schaeffer, Hawk, Wilson, Keen, Graham and Dercum Societies.

Diagnosis, A corpulent, trustworthy and upright youth.

Treatment, An abdominal binder.

Prognosis, Recovery slow, unless active and vigorous treatment instituted. Isolate from Brennan.

Referred to, French Hospital, San Francisco, Cal.

MOSBY HALL PAYNE

Age, 26.

Residence, Boston, Mass.

Condition on Admission, After leaving Harvard (?) and spending two years at Virginia, he decided to spend a few years here at Jefferson. On admission he presented ideas of grandeur and enjoyed being alone. Took weekly trips to New York to see his bankers.

Progress, Too busy with his "wealth" and studies to consider any of the societies.

Diagnosis, Dementia paranoides.

Treatment, Decompression of the skull, currettement of its contents, and isolation until he becomes an ordinary person.

Prognosis, Bad.

Referred to, St. Luke's Hospital, New York, N. Y.

HENRY HARRIS PERLMAN, Aleph Yod He
Age, 23.

Residence, Philadelphia, Pa.

Condition on Admission, All you could see was a big grin covered anteriorly by a little dark "moustache." Carried a P. D. degree from Philadelphia College of Pharmacy.

Progress, Worked hard, took all words in each lecture by a little stub pencil, knowing no one but himself could ever translate it. Member of Aesculapius Medical Society.

Diagnosis, A hard working little fellow with more than his share of handicaps to overcome, but his "grin" is sure to get him somewhere.

Treatment, Physical culture exercise—cabarets and women.

Prognosis, Guardedly favorable.

Referred to, Jefferson Hospital, Philadelphia, Pa.

PAUL BRYSON REISINGER, N 2 N
"P. B.," "R. I."

Age, 23.

Residence, Uniontown, Pa.

Condition on Admission, Entered in the pre-medical year from Uniontown High School, in the role of innocence personified. Was persuaded to have a hysterectomy performed, but the surgeon declined.

Progress, Frequently "entertained" the boys in the gentle pastime of looking 'em over. Was voted the most popular man in the class—isn't that enough? Member of Coplin and Keen Societies.

Diagnosis, Ask Wickert—he has been trying to figure him out for four years.

Treatment, Separate from Harmon, Wickert, Jerry James, Mendel, Klugh, and Heinitsh—a word to the wise is sufficient.

Prognosis, Will be the leading politician in his home town medical society.

Referred to, Jefferson Hospital, Philadelphia.

JUAN C. RODRIGUEZ

Age, 24.

Residence, Bayamon, Porto Rico.

Condition on Admission, An almost imperceptible dwarf with the ideas and the will of a giant. Central High School, San Juan, P. R. Pre-medical course in the Jefferson Medical College.

Progress, Snap-shot diagnostician. No surgical operation is beyond the reach of his imagination.

Diagnosis, Very favorable. A man that thinks and works and does not care.

Treatment, Think, work, study and forget the charming qualities of your brown eyes.

Prognosis, A society doctor in a well-known summer resort.

SIDNEY ROSENBLATT, Φ Δ Ε

"Rosie"

Age, 24.

Residence, Atlantic City, N. J.

Condition on Admission, Entered from Atlantic City High School, an earnest protege of Jimmie Mason.

Progress, "Rosie" has gained medical knowledge out of all proportion to his height. Was an assistant surgeon of the Atlantic City Beach Patrol last summer.

Diagnosis, A poor, politician.

Treatment, Several summers' vacation in the first aid tents on the beach, provided he develops the political ingenuity to land the job.

Prognosis, Will succeed Nathan Blumberg in the Pine Street Department.

Referred to, Jewish Hospital, Philadelphia, Pa.

HENRY KAJETAN SEELAUS, Φ P Σ, Α Ω Α

"Henry" "Sheriff"

Age, 22.

Residence, Philadelphia, Pa.

Condition on Admission, Graduate of Catholic High School.

Modest in appearance, reserved in opinions and actions, "Sheriff" manifested his presence by mastering the courses and then quizzing us poor unfortunates in order that we could pass the exams.

Progress, Became a friend to all who knew him. Was soon looked upon as the "shark" of the class. "Sheriff" is the only fellow who ever dared to sit in the back row and kid "Monty." President of Alpha Omega Alpha. Member of Schaeffer, Loux, Graham, and Davis Societies. Associate Editor of Class Book.

Diagnosis, An ordinary looking individual with the brains of a genius.

Treatment, Isolate from Myers (Can an object be separated from its shadow?) and his rise will be by leaps and bounds.

Prognosis, In future years when the orators say, "Among Jefferson's greatest are Gross, Keen, DaCosta, and Seelaus," the reference will be to none other than "Sheriff."

Referred to, Jefferson Hospital, Philadelphia, Pa.

PARIS ALEXANDER SHOAFF, Φ P Σ

"Handsome"

Age, 24.

Residence, Newcastle, Penna.

Condition on Admission, A young man with a decidedly Semitic cast of countenance. Was the leading light at Newcastle High School.

Progress, President, Hare Society; President, Pre-Medical Class; Member Davis, Loux, and Graham Societies. After four months at West Point, a sociable sort of chap.

Diagnosis, Tibial periostitis due to barking his shins during his career at West Point. (????)

Treatment, Join the Navy, where there are no concrete steps to injure his shins.

Prognosis, May practice Medicine, but will make a better soldier.

Referred to, Youngstown Hospital, Youngstown, Ohio.

MARCUS EBEN STITES, K Ψ

"Marc"

Age, 24.

Residence, Port Norris, N. J.

Condition on Admission, Never admitted. Gained entrance while in a confused state, due to the effects of the clammy air of Port Norris High School and Pennington Preparatory School.

Progress, Became foremost critic of our "400." Neatest fussy man in the class.

Diagnosis, In doubt. In these masters of the pianoforte we must always isolate the "strain."

Treatment, Free tickets to all teas, balls, theatres, and cabarets.

Prognosis, Chiropracist to all the leading actresses.

LESLIE OGBURN STONE

Age, 22.

Residence, Kittrell, N. C.

Condition on Admission, A long, lean, hungry-looking Southerner, who has the "still growing out of his clothes" appearance. Hailed from University of North Carolina.

Progress, Of course, he joined the Southern Club. His chief difficulty was a comfortable sitting position during lectures.

Diagnosis, Undernourished, but energetic burner of the midnight oil.

Treatment, A thorough and complete course in tailoring styles of worldly wisdom.

Prognosis, A social bear when the railroad comes into his home town.

LOUIS LEO THERIAULT, ΦΒΠ

"Terry" "French"

Age, 24.

Residence, Van Buren, Maine.

Condition on Admission, St. Mary's University, Van Buren, Maine. He was meek and quiet, but strong on any argument for purchasing sheep.

Progress, Hare and Graham Societies. "Terry" succeeded in evading the "Maine embargo act," after a strenuous night's labor—"Nuff sed?"

Diagnosis, French, hard worker, sober and congenial.

Treatment, Remove the embargo.

Prognosis, Authority on Cardiac Diseases.

Referred to, St. Joseph's Hospital, Philadelphia, Pa.

HARRY ELIJAH THOMISON

"Tommie"

Age, 27.

Residence, Laurel, Delaware.

Condition on Admission, Characteristic appearance of a tide-ducking resident of a certain water-logged state. Graduate of the Laurel High School.

Progress, Marked increase in subcutaneous fat, and in the Senior year swelled the ranks of the Benedicts by taking unto himself a wife. Member of Graham and Davis Societies.

Diagnosis, A walking advertisement of any well-known eating establishment.

Treatment, A good stiff dose of intensive military training to reduce his gluteal adiposity.

Prognosis, Good, provided he does not succumb to camp life at Fort Oglethorpe.

JAMES McCLURE TYSON

"Ty" "Jake" "Mac"

Age, 23.

Residence, Big Run, Pa.

Condition on Admission, Big Run High School, Big Run, Pa. Mercersburg Academy. Revelling in the sights of all that Philadelphia could afford from Front Street to West Philadelphia, Ty was finally persuaded to matriculate at Jefferson for his pre-Medic work. Slightly bombastic in his language, due to the effects of his training at Mercersburg.

Progress, Due to a more or less lack of judgment of picking room-mates in his first year here, "Jake's" progress was slow that year, but finally throwing off that stone from around his neck he showed the good stuff that is in him. Member of Keen, Loux, Wilson, and Graham Societies. Ptolemy. Ask him about his name of "Jake."

Diagnosis, An extreme blonde with a tendency to shuffle his pedal extremities when an orchestra starts.

Treatment, Hydro-Therapy.

Prognosis, Favorable, if the one girl says "yes."

Referred to, Jefferson Hospital, Philadelphia, Pa.

ARTHUR RAYMOND VAUGHN, K Ψ

"Vaughn"

Age, 26.

Residence, Palmyra, N. J.

Condition on Admission, Graduate of Palmyra High School. A modest, retiring youth, but a worker from dawn 'till midnight.

Progress, Was always on the move, never loitering, especially while playing the violin at those delightful parties which Dr. Montgomery so kindly gave to the sections in Gynecology.

Diagnosis, Hypopituitism.

Treatment, Pituitary extract and isolation from the "graduates."

Referred to, Jefferson Hospital, Philadelphia, Pa.

JAMES ARNOT WALKER

"Walk"

Age, 29.

Residence, New Galilee, Pa.*Condition on Admission*, Slipped in from Slippery Rock State Normal and Geneva College and maintained an air of dignified silence.*Progress*, Developed a wonderfully sweet disposition, in spite of all the kidding he received. Member of the Hare, Graham, and Davis Societies. Rumor hath it that Walker is a lion among the fair sex.*Diagnosis*, Premature senile cachexia.*Treatment*, For the alopecia:

Unguenti bovis, 1 ounce

Meconii, 1 ounce

Misce.

Sig. Apply locally as directed.

Prognosis, Will be the medical director of Slippery Rock Municipal Hospital.*Referred to*, Cooper Hospital, Camden, N. J.

CHARLES WALLIS, N S N

"Buck"

Age, 27.

Residence, Arkadelphia, Ark.*Condition on Admission*, A highly disappointed young man because the campus of Jefferson had no facilities for playing baseball. Graduate of the Arkadelphia High School and Onachita College; A. B. degree.*Progress*, Became infected with a common condition—desire to develop a presentable superior labial chin-chilla. Member of the Academy and Keen Surgical Society.*Diagnosis*, Hail fellow, well met, all wool, and a yard wide.*Treatment*, Shave that hair-lip, and organize a ball team at the Episcopal Hospital.*Prognosis*, Surgeon-General of the U. S. A.*Referred to*, Episcopal Hospital, Philadelphia, Pa.

WALTER WILLIAM WERLEY, K Ψ

"Walt"

Age, 23.

Residence, Reading, Pa.

Condition on Admission, "Smallest, cutest thing in town." Bantam-weight in body, but not in mind. Keystone State Normal.

Progress, Not noticed, but felt. The master of argumentation. Recently giving evidence of recovery from years of wakefulness. With proper sleep, at last an earnest and successful student. Ptolemy Society.

Diagnosis, By indirect method, excluding first, openness to conviction; second, privilege of thinking on women's rights.

Treatment, Iron pills, cold baths. Keep running fifteen hours a day to prevent passive congestion.

Diagnosis, Doubling his hidden genius with consistent work, no man could ever do better.

Referred to, Allentown Hospital, Allentown, Pa.

STANLEY QUAY WEST, Φ Α Σ

"Red"

Age, 24.

Residence, Kemblesville, Pa.

Condition on Admission, "Red" entered in the pre-medical year, fresh from the halls of wisdom of Newark High School and West Chester Normal. Immediately set forth to acquire an unlimited knowledge of medicine, with no regard for how much midnight oil he burned.

Progress, Practiced medicine at Atlantic City between his Freshman and Sophomore years, managed a hotel in the meanwhile, led the class scraps, engineered class politics for five years, took seven quizzes, never missed a class, and was a member of the Schaeffer, Hawk, Wilson, Dercum, Loux, and Graham Societies. Rather a cosmopolitan sort of chap, eh?

Diagnosis, A genial good fellow with a friendship worth acquiring.

Treatment, "Red" needs only a better half to share his success.

Prognosis, He will make a decided success, particularly in Obstetrics.

Referred to, Germantown Hospital, Philadelphia, Pa.

JAMES HARTWICK WHEELER

Age, 23.

Residence, Holly Springs, N. C.

Condition on Admission, Typical build and facies of a North Carolinian. Attended Trinity College and the University of North Carolina.

Progress, Uneventful until Prof. Montgomery's clinical conferences began and all his latent abilities became manifest. Member of Southern Club.

Diagnosis, An inordinate and abnormal satisfaction in going into the gynecological pit.

Treatment, Practice the art of gentle examination and manipulation, especially of your female patients.

Prognosis, Consulting gynecologist to the Old Ladies' Home.

CLIFFORD JOHN WICKERT

"Wick" "Prince Rupprecht"

Age, 25.

Residence, Milford Square, Pa.

Condition on Admission, A wild-eyed, boisterous, bushy-haired individual with a mustache like the Kaiser and a determination to get the stuff.

Progress, Continued noisy, fulfilled his determination, became chummy with Holt, and incidentally attempted to learn the game of looking 'em over nonchalantly. Also found time to clear up matters of obscurity in the Schaeffer and Graham Societies. Was never known to argue.

Diagnosis, Always think of two or more conditions, hence, we have to think of a walking Encyclopedia Britannica and Paranoia (expansive stage).

Treatment, Hair cut, shave the mustache (to remove the possible foci of infection), cerebral decompression, and absolute rest in bed for twenty years, restrained if necessary.

Prognosis, Will become a famous medico-legal expert.

Referred to, Jefferson Hospital, Philadelphia, Pa.

DENNIS ROSCOE WOLFF, ΦΑΣ, ΑΩΑ

"Rabbit"

Age, 21.

Residence, Rural Hall, N. C.

Condition on Admission, This specimen of anomalous anatomy blew in under the door in the Junior year with a reputation as a student extending from the University of North Carolina to Tenth and Walnut. Examination disclosed the fact that he had other reputations as well (*vide* Southern Club requisites for membership).

Progress, Was the first transfer to ever win an ΑΩΑ key. "Rabbit" summoned courage enough to venture to the Continental on rare occasions. Member of the Southern Club.

Diagnosis, Hyperplasia of the descending gyrus of the hippocampus.

Treatment, R Tabellae thyroidae siccae gr. v. Mitte No. XLVIII. Sig. Cap. unam tabellam T. I. D. P. C. et A. D. ex paro aqua until adiposity is diminished.

Prognosis, Some day we will hear of Wolff's Method of Homogenous Heart Transplantation.

Referred to, Allegheny General Hospital, Pittsburgh, Pa.

WALTER JAMES McCULLOUGH, ΩΤΦ

"Mac"

Age, 33.

Residence, Brooklyn, N. Y.

Condition on Admission, A typical Manhattanite with the usual brogue and Metropolitan ideas. Attended New York Preparatory School.

Progress, Acquired Philadelphia ways, idiosyncrasies to lectures, and a decided tendency to depart to the realms of Morpheus on all occasions. Member of Graham and Schaeffer Societies.

Diagnosis, The Ed Wynn of the Senior Class.

Treatment, Strychnia, atropine, ammonia and caffeine—use freely for effect, until patient develops insomnia.

Prognosis, "Mac" will be the leading obstetrician of the Lower East Side.

Referred to, St. John's Hospital, Long Island.

Oration

Class Oration

R. PRESIDENT, Honored Members of the Board of Trustees, Esteemed Members of the Faculty, Fellow-members of the Graduating Class, Relatives and Friends:

In the fulness of time, all things come to pass. When we first began the study of medicine, the completion of our course seemed a long way off, but to-morrow marks the end of our studies. But is it the end? Is it not rather, as the title of to-morrow's function indicates, the Commencement or beginning of our labors? No longer are we to listen to the lectures of our respected teachers; no longer to pore night after night over our text-books; no longer to undergo those interesting, instructive and at times amusing tests of our knowledge, euphoniouly called "quizzes"; and no longer to wait with a certain fear and trembling, those milestones of our progress, the final examinations.

Up to this time, in the performance of our daily tasks, we have been guided and affectionately helped by our parents and teachers, but now we are to be sent out to face alone the battles of the future. Now we are to make practical application of the principles we have been taught.

There are two subjects to which I shall confine my remarks to you to-day. I want to speak to you, first, about the physician in civil life, and, second, about the physician in military life.

So much has already been said about the various activities of the doctor, that it is almost impossible for any one to touch upon all of his manifold duties in a single address. There are some thoughts, however, in connection therewith, that I feel we should review together before we separate into our widely scattered spheres of influence. It is easy to picture the physician in his routine; it is not so easy, however, to analyze his real importance, not only to the community which he may serve, but as well his larger relation to his State and country.

One attribute, however, seems to me to stand out pre-eminently as the most necessary one for the real physician, and that attribute, gentlemen, is character. What then is character? It is the inward and spiritual grace of which the estimate attached to the individual by the community is the outward and visible sign. It cannot be made over night, but like the sturdy oak must be of slow growth to withstand the storms and temptations of modern life. And especially so, in these days of materialism, fellow-classmates, we must dismiss from our thoughts and purposes the acquisition of a fortune, if it is to be done at the expense of character. We must regard faithfully the trivial details of life.

The satisfaction of daily duties faithfully performed, fills a noble heart with a glow far beyond an expanding bank balance or a growing hoard of stocks and bonds. Put your heart into your daily duties, and the lowest drudgery becomes the highest service.

“Count that day lost whose low descending sun
Views from thy hand no noble action done.”

Is it any wonder, then, that no other calling, except perhaps the ministry, has ever had the multitude of unselfish, unknown, silent martyrs as the profession of which we are about to become duly constituted members. Imagine the physician in the lowly home of poverty, battling with death, exposed to the poison of a dread infection. No beating of drums, no blare of trumpets, no shouts of multitudes proclaim his victory. He must go it alone, and may himself fall in the encounter, a victim of his sense of duty to his patient. And here, gentlemen, is the reward. Is it money? No, he lives in grateful hearts, unknown perhaps in the pages of history but esteemed, nay, adored by those whom he has rescued from their sufferings and pain.

The Good Book says: “The laborer is worthy of his hire.” But in the case of the physician this proper maxim is honored more in the breach, than in the observance. It is extremely doubtful if there be another profession in which so much labor and help to the community is given without pecuniary reward, as in the medical profession. But its gains cannot be measured merely in dollars and cents; the physician secures a mental growth, a better judgment and a better mind. He promotes the general welfare of his neighbors, he adds to the prosperity of the community in which he lives, by directly diminishing the loss of time and money to the wage earner. As Emeritus Professor Keen has, in one of his addresses to one of Jefferson’s Graduating Classes, so splendidly said:

“You restore the sick mother to the charge of her household, the disabled father to his family—nay, in not a few cases you save life itself. And how much a single life may mean to a man’s wife, his children, his business, his friends, his church, his community, his nation. Even if you cannot save life, you lessen suffering, and bring cheer into the sick-room, and you smooth the pillow of death itself.”

The medical man in a community must of necessity be a teacher and a guardian. To him is entrusted the duty of pointing out to the laity the evils of dirt, of filthy streets, of foul-sewers, of impure water, of diseased meat and milk, of overcrowded population, of errors in food and drink, and a host of other enemies to human health and happiness. And as guardian he must help those who suffer from these defects, who have through ignorance violated the laws of nature, and whom accordingly he must restore again to health. Is it necessary that all children must be sick? Is it not, in preventive medicine, that

the doctor of to-day should find his most productive field? Is it too much to hope that the physician of the future should have only two functions to perform? To assist at human birth and to sign death certificates of centenarians.

What I have been saying has been so often said and re-said, that I will not bore you by too much repetition. I do wish, however, to add one word more, in closing this portion of my talk, by asking you fellow-members of the graduating Class, not to permit the sordid examples of modern profiteers to influence you. Money is a grand thing in many ways, for its possession enables the possessor to gratify most of his ambitions and desires. But money is not the only thing in life; it is merely a means to an end. Let us therefore resolve to so mould our destinies, so far as lies in our power, that with the help of the Almighty we may prove ourselves worthy disciples of our teachers, that we may be examples of rectitude in the communities in which we live, honored for the good we have done and are doing, and, finally, when the last call comes, and we are placed at rest, may we live in the memories of those whom we have helped.

“For they need no prayers and no mourning bell

They were tombed in true hearts that knew them well.”

And now we shall consider the physician in military life. Let us contrast for a moment the doctor in civil and the doctor in military life. In the former he has or is easily able to secure any assistance he may need. If he wishes laboratory tests of any kind, they are made for him; if he needs a specialist in any of the many subdivisions of the art, the telephone is at his service, and he can generally quickly secure what he is after; if his patient's condition demands an operation, the facilities of well-equipped hospitals and competent surgeons are at his disposal. But the military physician must embody the science of the laboratory man, the knowledge of the medical man, the skill and dexterity of the practical operating surgeon, the foresight of the hygienist and, last but by no means least, the bravery of the soldier.

Who of us has not read the descriptions of the wars of the ancients, and who does not recall the immense losses by disease and pestilence that followed in their wake, not only among the armies that took part in the action, but amongst the civil population as well. This is explainable through the fact that the physician as such was not an integral part of the equipment. He was either merely a volunteer, or perhaps was placed on the job as a matter of convenience. Not until the nineteenth century was there any organized medical department of the army, but since then the importance of this branch of the service has been recognized more and more.

Homer referred in the Iliad to the great value of the services rendered by the sons of Æsculapius in the Grecian army, and the kings of Persia and Mace-

donia had Greek physicians to look after the health of their armies in their various campaigns. In all ancient states the duty of bearing arms was incumbent on all the citizens, including the medical men, so there were always some with the armies. Even in the days of Alexander we find records that the physician had to suffer from the transgression of the laws of hygiene by his patients. Alexander condemned the physician, Claucus, to death because a certain friend of his, who had been kept on a restricted diet, feasted on chicken and wine and died therefrom while the physician was at the theatre.

But look at the situation to-day. Is it necessary for me to mention the casualty clearing stations, the field hospitals, the evacuation hospitals, the base hospitals, the convalescent camps, the ambulance corps, the Red Cross activities or any of the manifold medical and surgical helps that are extended not only to the component parts of the fighting units, but also to the civilians. I have been told that in the present war, whenever a town or village is occupied by the military, the army doctor not only concerns himself with the soldiers, but also attends the non-combatants. Is not even the common soldier himself instructed in first aid and self-medication, until the proper medical assistance arrives? Need I remind you of the wonderful progress that has been made, particularly during the present war, not only in the quick attention that is given to the injured, but also of the large percentage of complete recoveries that are continually taking place. It is assuredly a remarkable fact that in the great fight now going on with millions of men on both sides, under conditions that have never existed before, that after nearly four years of war, no serious epidemic, either among the civil or military population, has broken out. To whom can thanks for this condition be given? Undoubtedly only to the medical profession, who have so nobly responded to the emergency, in the first place by rejecting those physically unfit for martial service; by teaching proper sanitation, by widespread publication of the dangers of infection, and by proper suggestions as to prevention and remedies, and by their insistence on specific applications in regard to smallpox, typhoid, para-typhoid and tetanus. In connection with the typhoid and para-typhoid infections, it is of interest to note the splendid vindication the medical profession has obtained through preventive inoculation.

In an address before the Clinical Congress of Surgeons, Sir Berkley Moynihan said that 98 per cent. of English soldiers have been voluntarily inoculated against typhoid, with the result that they have had only 292 deaths from that disease and only 6,022 cases altogether in an army of more than 3,000,000 men, whereas in the South African War they had 57,684 cases with over 8,000 deaths in an army of little over 300,000 men, although the present army is living under much more difficult circumstances. This marvelous improvement would have been impossible without antecedent animal experimentation in the laboratory.

To us, then, in a measure is entrusted the duty of carrying on the splendid work of those noble men who have gone before; to maintain unsullied the bright

shield of the medical profession; to persist in developing a good moral character, good manners, perseverance and studiousness, qualities without which there can be no success.

Let us therefore resolve to seek an honorable career; let us not succumb to the materialistic tendencies of the age; let us strive to remain true to the traditions of our noble calling. We have seen the doctor in his daily life; we have seen him as a teacher in the community in which he lives; we have seen him devote his time to the relief of those who have gone to the front to offer themselves on the altar of freedom; we have seen him accompany them into that cauldron of hell, where the ordinary ailments of life pale into insignificance; we have seen him rescue the wounded from the jaws of death and here as a soldier he may be called upon to make the same supreme sacrifice as those whom he has tried to help.

“They have no place in storied page,
No rest in marble shrine;
They are past and gone with a vanished age,
They died and ‘made no sign.’
But work that shall find its wages yet,
And deeds that their God did not forget,
Done for their love divine—
These were the mourners, and these shall be
The crowns of their immortality.”

Senior Superlatives

PRESENTATION!

Presentations

"Receive without knocking, for we give the same way"

LADIES AND GENTLEMEN, FRIENDS, RELATIVES, SWEETHEARTS, ACQUAINTANCES
AND FELLOW CLASS-MATES:

It is a time honored custom at the Jefferson Class-Day Exercises of each graduating class to make certain suggestive presentations to its members, in order to reveal to those unsuspecting ones back home some of the recent characteristics of thought, and qualities of disposition, that their "dear ones" have acquired during their four years' "rampage" in Philadelphia, and their occasional attendance at Jefferson College; and upon us this pleasant task and revengeful opportunity has fallen. Neither space nor time will permit of a complete resume of all the pranks and faulty hobbies of these quacks, so let it be sufficient to demonstrate this worthless mass of hoodlums by submitting to you a few most typical examples. It is not our purpose, however, to lessen in the slightest degree your high opinion of their character, or the magnitude of their accomplishment, as represented to you by various forms of "camouflage" which they have resorted to; but because they have succeeded in having you believe that the highbrows and wiseheads of Jefferson have seen stamped upon them the mark of genius in this raw material, and have now after four years of moulding and manipulation turned out the "fine" and "finished" product, is no reason why we should not do our duty, and attempt to disillusion your minds. Unfortunately, however, despite the abundant amount of convincing material we could offer, only a comparatively small part of it can with propriety be spoken of so publicly, and we regret most deeply and strongly suspect that our purpose may in great part be defeated, or at least less readily accomplished by this unfair and scrupulous limitation; and we, therefore, trust you will appreciate that the many attractions, the constant temptation, and the evil and irresistible influences to which these "larval" M. D.'s have been subjected, are of far more serious consequences and of a graver significance than we are wont to express. However, now after having made these several brief preliminary remarks, we shall proceed to call forward for your own conviction and personal observation, some rare and curious types, yet the least deadly of the species.

Would first just like to say a few words of warning to the single ladies, that you please refrain from showing any form or expression of familiarity when the first gentlemen make their appearance on the stage. They are very sensitive and timid, and besides they are already hopelessly infatuated,

so any such attempt could only be in vain. It has been observed, especially during that past year, that "Myers" has been an invariable occupant of the front row in practically all of the "clinics." This served him a two-fold purpose; firstly, to give to the demonstrator the erroneous impression that he was deeply interested in the "Clinical Case," and secondly, and a much more potent reason and purpose, that he could exchange "smiles" and "make eyes" more conveniently, from his seat of vantage, with the nice little nurses that so oft accompanied the "clinical" case. There are two others, in this anemic aggregation of "pill peddlars," who are affected equally as badly as in Myers. For quite some time Coppridge and Brennan were often observed to take leave from their room-mates early in the evenings, and not return until in the "wee" hours of the morning. Their objects of "detraction" remained a mystery for a long time, but recently it has been discovered that they consisted of two nurses from the "Polyclinic Hospital." Will this "fussing" trio kindly arrange your hair and neckties, button your coats, and make your appearance in the "limelight" for a brief survey, and to accept these photos of each of your respective "interests," who have asked us to present them.

HENRY GRADY LASSITER

Now if someone will kindly awaken "Lassiter," we will show you our champion perambulating "somnambulist." He is able to get about quite readily without a cane (even tho' his eyes are closed), but he simply can't remain awake during an entire lecture. Clear the way, and let him come forward and receive the very much coveted pillow of "Joel Hjalmar Hanson," so that his plights with Morpheus shall hereafter be more comfortable than upon the hard and narrow benches at Jefferson.

BENJAMIN JONES LAWRENCE DUNCAN WALDO HOLT

Let us now call your attention for a few moments to two most handsome and very attractive young gentlemen from the Sunny South. They are possessed of high ideals, and absurd ambitions, eager to learn, but unwilling to expend their precious energies to do so, having had a past and no doubt shall have a future. We refer to Benjamin Jones Lawrence, and Duncan Waldo Holt. If these two men will favor us with a bit of their valuable time and bring their graceful selves in this vicinity, we shall all feel greatly indebted to them, and express our appreciation by presenting to them unhesitatingly, and unconditionally, the title to, and justly deserved right to govern in its entirety, the "Pennsylvania Hospital," and send along with you "intellectual giants," a message to the Medical and Nursing Staffs, the warning admonition that "they may as well surrender without a struggle."

HICKS AND KELLEY

Athletics have had for some years past no place at Jefferson. Football, baseball, etc., have long since been abolished, but for a time during this past it seemed as tho' another and quite different form of sport was to be introduced. We have with us this afternoon the gentlemen who were most actively engaged, and who so enthusiastically advocated the introduction of "pugilism." We speak of no lesser nor less prominent men than "Kid Hicks" and "Battling Kelley." Now, Kelley and Hicks, please this audience by assuming the erect posture, throw your phthisical chests eastward, and allow your spastic gaits to bring you forward to accept this pair of boxing gloves.

BARRERAS, CARRERAS, FAVIS, FLORES, MOLINA, RODRIGUES, LOW, LIMQUICO

Next we shall have occupy this platform some of our imported specimens. These were brought over before the war, and are now very hard to obtain. These species do not grow in this country unless by some very recent invention, about which we have no knowledge. We call upon the following "forms" to demonstrate your mode of locomotion, and find your way to front: Barreras, Carreras, Favis, Flores' Molina, Low, Rodrigues, and Limquico. This cosmopolitan array of alient talent, we classify for convenience together and so that they do not misunderstand us we give them a much needed self-pronouncing English Dictionary.

CHARLES R. FOX

By the very serious nature of, and strenuous duties incurred in the study of "Medicine," it becomes almost necessary to resort to some form of recreation and relaxation at varying intervals, as an occasional dance, show, movie, etc. We have in our midst, however, one who regularly, and with little or no regard for his scholastic duties, and at very short intervals seeks diversion, and relaxation when they are not indicated. He boasted, not long since, that he goes to the "Casino" every week, and gets a "ring side seat," so he can "look 'em over." There can be no doubt that to frequent this theatre is the equivalent of a special and beautiful course in gross and topographical anatomy, but we would not recommend it to the exclusion of other and more important but less attractive subjects. We allude to C. R. Fox. If this unique individual and admirer of "fine art" will locate himself in this arena, we shall show you as an example to discourage any such special courses in anatomy to the succeeding classes, and we ask of you to accept, with best wishes from the class, these flowers, which you may give to the "feature dancer" in the next bill at your favorite (?) theatre.

REYOLD STEPHEN GRIFFITH

Here, now, we have something interesting (?) to show you. It is not "coal," but it comes from the same place, MAUCH CHUNK. Why this never-before-heard-of "spot," occupying a few square acres in the coal mining region of Pennsylvania, should contribute a candidate for a degree in Medicine we cannot explain, but the fact remains that it has contributed R. S. Griffith to the Jefferson quota of candidates. He has had the same advantages, sat on the same benches, smoked the same cigarettes, as have "us regular city fellows." Wine, Woman, nor Song, had any place in his busy college days; oh, he did sing "Keep the Home Fires Burning" occasionally, or parade on Chestnut Street on Saturday nights, and take a few drinks with the boys at times, but he always knew when he had enough. Some one page Dr. Griffith, please. Favor us with a minute of your time, and let "military physique" adorn this stage, so that it may be the object upon which the optics of the audience may rest and their attention center. Fearing that there may be a friend of yours from Mauch Chunk in this audience, we will not dare give you what we had proposed; regret very much, "Dave," but under these circumstances we feel it our duty to give you "only" a bottle of Nifty Ben's special, Coca Cola.

HENRY LILLY COOK, JR.

Diagnosis has always been the "bug-bear" in Medicine. This statement has been well substantiated by a rather rare and puzzling condition which developed in one of our class, which for a time had even Professor Jackson guessing, and which with only a hasty clinical, and a superficial laboratory examination, might easily have been missed. Fortunately, this obscure condition proved to be "only" Vincent's Angina, much to our comfort and relief, and developed in Henry Lilly Cook. We refer not, however, to the "lily" which toils not, nor spins, and which vies with Solomon as to the beauty of its raiment, but our own "Pete" Cook, the recent victim of the Spirillum of Vincent. If this stately gentleman will rise and start his person moving this way, mount the steps and come hither, we will gladly give you this "immunizing serum" and the "tip," that "anti-osculation" is an excellent and very efficient prophylactic measure against the ravages of the Vincent Virus.

REISINGER, HARMON, J. M. JAMES, DONNELLY, MINOR, J. L. FISHER

There are among these prospective licensed homicidal geniuses, as there are in other similar groups, some whom you might designate as being "grinds." That is those who devote practically every available minute to their

studies, or some collateral Medical literature, to the complete exclusion of all other literature, current events, the various forms of sport and amusements. They would sit, buried and absorbed in their studies, hour after hour, night after night, and week after week, during the entire four years at Jefferson; and at the end of each year you can rest assured that they could approach "the final exams" with confidence, a clear and heavily laden store of knowledge, and with a calm and tranquil conscience that they have at least done their best. Clear the passages so that the following dignified and studious, industrious and ambitious humble embryos can wend their way to the front, and make their appearance on this elevation: Reisinger, Harmon, J. M. James, Donnelly, Minor, and J. L. Fisher. As an expression of respect, and gratefulness of the Class of '18 we present you with a ten-year lease to the "HOLE IN THE WALL," which we have obtained through the kindness of the proprietor, STONEWALL JACKSON BLACKMON, who personally will be at your service to assist you in any research work, or any series of experiments, that you may feel inclined to undertake while in "his laboratory."

PAUL ALONZA EPRIGHT

This next one about to hold your attention, we are convinced has no equal, and is a rare and an anomalous curiosity. "He" consists of a slight amount of intellect, and a trifling admixture of moral and spiritual ingredients, these latter qualities, indeed, being in barely sufficient measure to keep him from walking on all-fours. He possesses no power of thought, no depth of feeling, no troublesome sensibilities, nothing in short but a few common-place instincts. This same curious individual was seized, during the past winter, by a severe form of conjunctivitis, commonly known as "pink eye," which when investigated was found to have been due to frequent and excessively prolonged exposure of his sensitive conjunctivae to the bright and penetrating rays of light, which are reflected so abundantly from the garments of the student nurses, upon which his eyes incessantly and untiringly fed. Now EPRIGHT, we grant you the Privilege to bring your little waxed mustache upon this stage, and lest you be annoyed by a recurrence of the pink eye, and the embarrassing etiology of the condition becomes generally known, we give you this pair of smoked eye-glasses, to be worn continuously when on duty in the Altoona Hospital, suggest by way of prophylaxis that you let your eyes feed more on "White" nurses; and further, since your eyes seem to have a peculiar idiosyncrasy to "color," we strongly advise that you discontinue your social activities at the "Green Dragon," where you are terribly exposed to "Black" eye.

DOUGLAS, HUBBARD, DORASAVAGE, ANNON, A. W. JAMES, H. H. JAMES, KLUGH,
LEACH, MCDANIEL, MENDEL, MILLIGAN, MOTT, BELLERUE,
THOMISON, FORT, and FAVIS

As you would expect, there are always a number in every class who assume the responsibilities of a husband prematurely, and before they have proved themselves worthy. This class is anything but an exception to this rule and those who have signed the "unto death certificate," found their pleasures and freedom more or less limited. Of course, for those whose "beloved ones" did not live in Philly it was dead easy, and there was nothing to interfere with their social affairs during their college days. But on the other hand, those whose wives refused to trust them in a big city alone met with difficulties and restricted liberty. These were overcome to a great degree, at least, under the disguise of false and pretentious imaginary Society Meetings, Quizzes, Special Lectures, Fraternity Affairs, etc. We do not deem it proper for us to dwell on this subject at length, but, really, wives, we could fill books; we can here only tip you to watch them more closely. Will the orchestra kindly play "The Dead March" and the following venerable old gentlemen let their rheumatic, gouty, sclerosed, feeble, and tottering structures be carried on their spastic limbs in step with the music: Douglas, Bellerue, Hubbard, Dorasavage, Annon, A. W. James, H. H. James, Klugh, Leach, McDaniels, Mendel, Milligan, Mott, Thomison, Fort, and Favis. To you who succumbed early in your career to the wiles and charms of the gentler sex, we extend our most sincere and heartfelt sympathies, and we all hope that in spite of this handicap, you may still live to see and win success.

Those members of the class about whom nothing has been said are only those whose conduct and character during their student days have been so disreputable that it would be quite unfair to disclose them. Our remarks have been confined to those who are not yet beyond redemption, and who under some restraint on the part of their parents, or better under the strict and irresistible supervision of a senior medical officer on the Western Front, may finally, in spite of themselves and their irresponsible tendencies, be of some assistance in conquering "Kaiser Bill" and later be of some service to humanity. . . . If any of the above jungle of words has been so recklessly arranged as to have caused a single unpleasant or even a serious thought we beg of you your pardon and ascribe the accident to our inability to perform this nonsensical function successfully.

Now that the space allotted to us has been filled and your patience almost, if not entirely exhausted, we gladly surrender our place in favor of that which is to follow.

THE POEM

One night I gazed in the lamp-light,
 'Till my eyes did weary grow,
Sleep dropped her shroud about me,
 As the heaven drops its snow ;
As she carried me off to Dream-land,
 I must have whispered a prayer.
For lo! there stood just before me,
 A form in the lamp's bright flare.

"I am the spirit of the lamp
 Sent in answer to your plea,
To aid you," quoth the precious muse,
 Is not a task for me ;
But let's hie to old Dame History,
 Who will help you with your rhyme,
And take you back through the centuries,
 To the earliest days of time."

So, back through the long dusty ages,
 As I took Dame History's hand,
She led me swift as a meteor,
 To an ancient Grecian land ;
There ,on the highest mountain peak,
 O'erlooking all the sea,
She opened the Book of Ages,
 And gave it then to me.

I remembered I'd oft been thinking
 Of, how our art began,
I held the key to the mystery,
 As the olden book I scanned ;
"And The Lord was the first doctor,
 He was the first to operate,
When he took a rib from Adam's side,
 And with it did Eve create."

The chapters that followed after
 Were dark as Stygian gloom,
 With here and there a ray of light
 Fashioned, on Tradition's loom;
 But let us take sweet Fancy's brush
 To turn the dust away,
 And we find that "Mother Nature
 Was the doctor in that day."

I turned those darkened pages
 'Till I saw in letters gold,
 With the clear blue sky as back-ground,
 A name we'd oft' heard told;
 Son of the great Apollo,
 He of the healing art,
 Who vanquished plagues and wrought them,
 As his arrows swiftly dart.

There I read a wondrous story
 Of this god, who first did start
 A school at Cos and Criedus
 For the teaching of his art;
 As the learned gathered 'round him,
 The winds bore far his fame,
 He was the noblest of the gods,
 Aesculapius was his name.

It said the spark he'd kindled,
 Was fanned into a flame,
 It was not quenched by selfish thoughts,
 Nor the sordid lust of Cain;
 'Twas carried o'er sea and mountains
 To even the distant lands,
 It left its mark on human heart,
 As hot metal deeply brands.

"Thou First, of the art we have chosen,
 May thy spirit ever guide us,
 Keep aflame the torch of knowledge
 Thou didst light at Cos and Criedus,

In thy temples we would linger,
To find solace for our woe,
But I must haste through years of time,
And read what thou didst sow."

I skim now fast o'er the pages,
'Till I read of one bright morn,
When Nature did outdo Herself,
And Hippocrates was born;
On the isle where still stood the temple
Of his sires gone before;
His veins held the blood of Apollo,
His mind had the healing lore.

"Hail to thee, Physician of Cos,
Tho' your years have long since passed,
The words you wrote on wax and skin
Will never cease to last;
Thou Father of all Medicine,
We'll ever thee acclaim,
Your memory is carved upon our hearts,
In the highest niche of fame."

And next in Alexandria,
Herophiles gained his fame,
The pioneer of anatomy,
Still, the Torcular bears his name.
But here our record's blotted,
And the art bowed first in shame,
Malpractice on King Antiochus,
Caused by one who wished to reign.

When the Roman Empire held its sway,
Superstition held fast on our craft,
But a brave Roman knight named Galen,
Saved the flickering flame from the draft;
Monks carried the spark to England,
Thence to France they brought the flame,
It flourished at Metz and Salernum,
Through the great king Charlemagne.

In the Sixteenth came Eustachius,
 Fallopius, Wirsung, Steno;
 Malphigius and Bartholin
 The Seventeenth did show.
 'Twas here a wise physician
 Harvey, at Court of First King James,
 Found the blood did run in circle,
 Heart, arteries, then the veins.

We read of the great army surgeons,
 As their sires at Ancient Troy,
 Soothing wounds of war's fierce battle
 At Waterloo and Fontenoy;
 Wellington had Sir William Guthrie,
 Napoleon his Baron Larrey,
 We read of the old army doctors
 Who fought our land to free.

And in the Revolution days,
 When we were freed from tyrant's domain,
 Our profession was first to shed the blood,
 When Warren at Bunker was slain.
 Who signed that sheet of freedom?
 We count physicians six,
 Laid their lives on freedom's altars,
 When their names they did affix.

Again, we see a name writ on high,
 A name we place amongst the bless'd,
 It seems to eyes of true "Jeff" men
 To far outshine all the rest;
 McClellan in Eighteen Twenty-Six
 Most a hundred years ago,
 Made the famous drive for Jeff's charter,
 He planted the seed to grow.

And here it grew first a tiny twig,
 It battled with adverse wind;
 Good men did point it sky-ward
 So the tree would not incline;

I read of those who fought the fight
 To guide that fruitful tree,
 That we, their sons from the blossoms,
 Might nectar draw, as the bee.

Then Gross, that name, she marked it well,
 And Pancoast of our proud mien,
 Da Costa followed after them,
 And next, the great surgeon Keen;
 As I read of the men who taught us,
 I wished that on some fair morn,
 From the Class of Nineteen Eighteen,
 A new Hare or Da Costa were born.

And when our country called for them,
 Her call was not in vain,
 From North and South, and East and West,
 They came like drops of rain;
 The legion of the staff of oak,
 With the serpent round entwined,
 Was first to fill its complement,
 Here were patriots, true defined.

The first of the land of freedom
 On that far-flung battle line,
 They are now in sunny Italy,
 And in Flander's mud and slime;
 Oh! where is man so like to God?
 As he succors friends and foes,
 The pain he quells, life's blood he'll staunch,
 As he fights war's deathly blows.

At last, I am brought to the present,
 Dame History can show no more,
 She's dipped her pen in the sun-light,
 And looked the wide world o'er;
 Looked for names that are worthy,
 To be writ by her golden pen,
 I awoke as I gazed o'er her shoulder,
 To see if she'd write Jeff again.

L'ENVOI.

Dear Friends, you've heard
In rhythmic word,
Of our craft and it's age old story;
From first of time,
Down through the line,
It was covered over with glory.

Today a gem
Has come again,
From the mill we hold so dear;
A gem more fine
Yukon's ne'er mined,
Nor Transvaal seen its peer.

Once from the dust,
In each of us
Was born innate the wish to heal;
We followed far
Our fate's bright star,
Now we reap our journey's zeal.

With spirits gay,
This last of May,
We mould our models of fame;
With sunny beams
Of future dreams,
We build huge castles in Spain.

At the rosy dawn
On earth's vast lawn,
Let them meet a kind physician;
And guard their life
In adverse strife,
True kindness, our paramount mission.

For when man will give
His right to live,
As a trust to his doctor's care;
What higher crown,
More true renown,
Could human ever dare.

To us, hearts of poor,
Are like a door
To wealth; and children's laughter
Is like a horn,
Through which is born,
The content that follows after.

Our country's call
Will find us all,
Giving aid to her stricken sons;
We'll fight the fight,
'Gainst Death's dark night,
Midst the roaring of the guns.

We go! farewell,
A long farewell,
To happy moments spent in college;
Through passing year,
As gathered here,
Digging nuggets in mines of knowldge.

The echo clear,
Devoid of fear,
Back to our mother fair;
"We'll ever fight,
For You and Right,
Either here or over there."

—W. T. LEACH.

Class Prophecy

Class Prophecy

IN this time of the world's greatest war, it is a difficult task for any one to prophesy the future of a medical man. I was greatly assisted in this undertaking by an incident which I will relate.

Soon after graduation it was my extreme pleasure to have Uncle Sam call me to a greater task than studying medicine. I received my commission and was ordered to make all haste preparatory to sailing "Over There."

On the fifteenth day of June I embarked from an Atlantic seaport, and in three weeks had landed "somewhere in France." It was not long before I was doing actual duty in a Dressing Station on the front lines. Had I been a man of some medical or surgical experience, I would not have been favored with a position so far front, but being inexperienced and perfectly harmless, Uncle Sam wisely figured that if a piece of shrapnel did happen to separate my head from my body, the loss would be trivial.

The second day while on duty in the front lines, there was a lull in the fighting. I took advantage of this opportunity to inspect the trenches. I entered a rear trench, and after much confusion finally reached the front-line trenches. The first soldier I met in the front trench was looking through what I took to be a periscope. Having read so much of the use of this instrument in the present trench warfare, I asked the guard to permit me to gaze through the periscope in the direction of the German lines.

I had hardly placed my eyes to the periscope when "Fritz" let loose a succession of volleys that struck me as a flash of lightning from a clear sky. The Germans had renewed the attack. Being unaccustomed to this new form of outdoor sport, I unconsciously took a death grip on the periscope. It seemed as if the very gates of hell had been thrown wide open.

But still worse, the Germans had sent over poison gas. This was detected by our men and orders were given to adjust our gas masks. I heard the order, but was so bewildered and excited that I was not successful in getting my mask on and I became a gas victim. While under the influence of this gas and still looking through the periscope across "No Man's Land," I had a vision that revealed to me the futures of the members of the Class of 1918, Jefferson Medical College. In the remaining part of my story I will relate what I saw through the periscope.

MARK STITES is conducting a drug store and dispensing cosmetics to the ladies.

W. R. COOPER is President of the Pennsylvania State Medical Society. Cooper writes that P. ALEXANDER SHOAFF is the best looking member of the society.

W. M. COPPRIDGE has just announced his debut into Society. Bill always was a ladies' man.

C. P. MANGUM gained such a reputation as cartoonist for the year book that he was engaged by Professor J. Parsons Schaeffer to sketch the drawings for his new text book on anatomy.

S. ROSENBLATT, after spending several summers reviving pretty maidens on the beach at Atlantic City, has taken up gynecology as a specialty.

COMBS and REISINGER will long be remembered as charter members of the "Seven Come Eleven" Club. Both of these gentlemen are specializing in Urology, so that it is no longer "7 come 11," but "606."

L. L. THERIAULT made such an impression on his classmates and professors by his inability to talk above a whisper that we never expect to hear from him.

F. E. EAKIN and J. L. FISHER entered Jefferson fully intending to practice medicine after receiving their degrees, but during the Senior year they both decided to take up "broncho-busting" and are now engaged in this business on the prairies out West. It has been rumored that they became jealous of the great "riding" abilities of Professor Kalteyer.

JOHN JAMISON is conducting Lucius Tuttle's Physiology Laboratory and quizzing the Sophomores at Jeff in Physiology. We expect him to eventually succeed Professor Brubaker.

MYERS and DIXON have discovered that dichloramine tea, aside from curing the infection of war wounds, is a specific for alopecia. Think of the many "love taps" on their bald heads they would have missed had they made their discovery while at College.

H. K. SEÉLAUS is Professor of Medicine at Jefferson Medical College. This will not surprise most of us, because the "Sheriff" always was a "shark"—if you do not believe me just ask "Ace" Myers.

"PETE" MENDEL has recently mastered the difficult art of purling and is instructor in Knitting and Fancy Work at the Woman's Medical College.

EPRIGHT accumulated so large a fortune as chairman of the Picture Committee that he retired soon after graduation.

J. M. DONNELLY has reached his ambition. "Red" is now privileged to wear his uniform regularly, being Major Donnelly, U. S. A., with headquarters in Washington, D. C.

HAYWORTH endeavored to become a famous Physiological Chemist, but his old calling got the best of him and he is now first assistant to Dr. Stricker Coles.

C. J. WICKERT was elected Professor of Pediatrics at Temple University following his internship at the Babies' Hospital. "Prince Ruppert" is a firm believer in Raymond Hitchcock's old saying, "The rougher you treat them, the better they like you."

MCDANIÉL, FORT, KLUGH, MILLIGAN, MOTT, HUBBARD, and BELLEVUE point with pride to large families as a potent argument for joining the Benedict's Club early in one's career.

"BILL" LEACH and A. J. MINOR always were possessed of the happy faculty of prospering without working. Leach married a lady of considerable wealth and is busy spending his wife's money. Minor is a politician. Who ever heard of a politician working?

H. E. THOMISON is working 50-50 with his father-in-law, a prominent undertaker in Delaware.

BEN LAWRENCE, when not busy preparing his sermon for Sunday, found time to practice surgery. Unlucky for Ben, his theological work soon came to a sad end when he was detected making use of the U. S. Mail for illegal purposes.

D. R. WOLFF is conducting his own private hospital in Rural Hall, N. C. His specialty is in suturing hearts, which feat could be accomplished only by those with a physiognomy like his and Professor Stewart's.

MCGUIRE's hair is still red, but, thank goodness, some one has taught him how to comb it.

LARSON and FAIRBANKS are conducting a large Maternity Hospital in the State of Utah. Being located among the Mormons, they should enjoy a lucrative practice.

A. R. VAUGHN gives Dr. Despard's annual lecture on anesthesia. Arthur gained quite a reputation as an anesthetist while at College.

D. R. BREWER has prepared a series of diets for guinea pigs. He is now first assistant to Karl in the bacteriological department.

H. L. COOK came North suffering with hook worm disease. Two years later Pedro returned to Fayetteville, N. C., and discovered a method of diagnosing the malady by means of the proctoscope.

CHAS. WALLIS has a monopoly on the sulphur springs in Arkansas. "Buck" writes that he will give his individual attention to all cases sent to him by his classmates. Take notice, all ye syphilographers.

"VIC" FLORES is ruler of Central America. Flores is so busy trying to keep his country out of the present war that he cannot find time to practice medicine.

JAWORSKI is still serving as interne in a Furniture Hospital on North Tenth Street.

JERRY JAMES might have been one of the world's foremost physicians had he not returned to Windber, Pa. But who ever heard from anybody living in Windber?

D. W. HOLT has been appointed Professor of Dermatology at the Philadelphia College of Osteopathy. Holt has substituted scratching for massaging in the treatment of scabies and pediculosis.

J. W. DICKIE is touring the United States in behalf of Woman's Suffrage. Jamie should be a great success, as he is a perfect lady in all respects.

"RED" MCCARTHY, DORASAVAGE, BURKE, and C. R. FOX are practicing among the Pennsylvania Dutch. It takes a lot of nerve for an Irishman from B-a-w-s-t-o-n to mix in with the Dutch.

J. A. WALKER has recently cut his wisdom teeth. What a pity Walker did not cut these teeth years ago.

H. C. KELLEY is editor of the *Journal of the American Medical Association*.

H. H. JAMES has gained the distinction of becoming the champion wrestler of the world in the 135-pound class.

H. E. HEINITSH is President of the Southern Jefferson Alumni Association.

A. J. HOOD, the distinguished gentleman of our Class, has been named Sub-Dean of Jefferson Medical College.

ABE FISHER and J. E. FISHER (no, they are not twins) are conducting Dr. Cohen's Thursday afternoon clinic. The attendance at the last clinic numbered no less than 27 men, representing a class of 130.

G. E. CHANDLER, while touring the world in his Haynes automobile, became marooned on the Sahara Desert and was rescued by the natives. As an expression of his gratitude, Chandler became a medical missionary, with a weakness for gynecology (?).

G. M. BROOKS is salesman for Lydia E. Linkam's Vegetable Compound.

R. S. GRIFFITH is physician to the Trolley Workers' Union of Mauch Chunk, Pa. There being four members in the union, Griff is not overworked.

MOLINA and RODRIGUEZ, after completing their studies at Jefferson, journeyed to Spain and took post-graduate work in Tropical Medicine.

F. ANGEL and H. G. LASSITER, manufacturers of hot air, have invented a machine for pumping hot air into patients afflicted with frost bite.

C. C. FOX is Physical Director and Coach of the athletic teams at the University of Maine.

E. R. HIRST and J. H. WHEELER took their hospital work in a Camden, N. J., hospital. Camden is just across the river from Philadelphia and is about the most unsanitary city in the United States. Hirst and Wheeler are endeavoring to rid the city of its filth by applying the methods taught by Prof. Rosenberger.

J. H. HANSON has invented a vacuum cushion used in the treatment of a fractured coccyx.

G. S. DURBIN is playing second base with the New York Giants and is physician to the team.

F. B. JONES, JR., possessed sufficient gray matter to become a celebrated neurologist.

E. J. BERTIN is in the Navy; J. B. FULLMER, W. W. WERLEY, C. O. BRISTOW, and T. E. DOUGLAS joined the Army soon after graduation and are now holding responsible positions in the United States Army Medical Corps.

JOHN FLUDE aspired to become a surgeon, but found he could not keep the field of operation sterile in the smoky city of Pittsburgh.

W. T. ANNON is not a victim of catatonia. It is just his natural pose.

F. OHANNESIAN is Health Commissioner of the State of California.

J. W. LANE is associated with the Mayo Clinic in Rochester, Minnesota.

C. W. BETHUNE, J. P. BRENNAN, J. HAWFIELD, and J. E. ANDREW are engaged in general practice.

The vision disappeared as suddenly as it had appeared. I was awakened by one of the trench inhabitants, a large rat, which had crawled over my face. The bombardment had ceased and stretcher-bearers were busy carrying the wounded from the trenches. After pulling myself together I made my way to the Dressing Station. To me the event was the experience of a life-time, and I sincerely trust that my classmates will be favored with the good luck and fortune that attended me that day.

JAMES H. MASON, 3RD.

CAMOUFLAGE

Shoaff's complexion—far off—all peaches and cream,
 But remember things are not what they seem,
 Just take a good look, come out of your dream,
 It's Camouflage.

With Combs in the front row; smiles on his face,
 Biting his lips—signs of a pleasant taste.
 His steps of the previous night he never would trace,
 It's Camouflage.

Whenever "Sticks" Harmon leans back in this chair,
 Looks happy and whistles a popular air.
 Why just ask the dealer for all he can spare,
 It's Camouflage.

Whenever Dorasavage goes around a-tearing his hair,
 Saying he has never studied—thinks he'll flunk in despair,
 Looks sad—worried to death—fears for his fare,
 It's Camouflage.

When Fisher, of invitations asks you to buy,
 Then boosts the prices and printer clear to the sky,
 Just say twelve dozen I'll take. Yes—in one eye,
 It's Camouflage.

Highsmith hit the sawdust—settled down they say,
 So he could study, and not be so gay.
 But he was seen—(I'll say nothing)—just yesterday,
 It's Camouflage.

"Red" Donnelly, always a smile on his face,
 Most courteous manner; doing wrong? Not a trace.
 Watch your step, boys, you might meet him some place,
 It's Camouflage.

Red faced—*National* fat—fine physique and hearty,
 Determined always repose a rough sailing party.
 I speak of a young Englishman named McCarthy.
 It's Camouflage.

Oh! The reason we scribble, cut up like an ass,
 Is simply because as Seniors, alas,
 We never got out of the Freshman class.
 It's Camouflage.

CAN YOU IMAGINE

"Sticks" Harmon wearing his own clothes.
 Wickert specializing in Pediatrics.
 Epright handling the picture committee contract for his health, or Flude getting his little share.
 Hansom and McGuire carrying pillows to the clinics without specific reasons.
 Stites as bouncer at the Green Dragon.
 Griffith with a smile before Breakfast.
 Blackman and Kelley rendering a harp and piccolo duet.
 Reisinger—Wickert—Combs—Harmon "*watching*" a poker game.
 Annon, Wheeler, Stone and Brooks as the popular, bubbling, gurgling, joy-producing, sonorous, ragtime quartet.
 McGuire as dancing partner to Mrs. Vernon Castle.
 Full attendance at Coles or Coplin.
 Bertin as an orator.
 Brewer as class rowdy.
 Brooks in the role of "Little Sunshine."
 Burke as missionary to Jerusalem.
 Cooper as an art creation.
 Epright using judgment, telling the truth, or asleep at midnight.
 Low living high.
 Mangum going home Saturday night without that Sunday package.
 Mason untidy.
 O'hannesian without voice in a class meeting.
 Tyson without an alibi.
 Mendel living for his art.
 McCarthy without his rough parties.
 Hayworth being diplomatic.
 Larson as a lady fiend.
 Lassiter awake.
 Rosenblatt reserving an opinion.
 Barnes knocking himself.
 Shoaff with a clear complexion.
 Stone soft.
 Wallis embarrassed or "called."
 Werley wrestling a Boche.
 Walker at the "Art Club" Ball.
 Wheeler as class cheer leader.

THE HOLE IN THE WALL.

THE HOLE IN THE WALL

I

“Haf” a light—“Haf” a light—“Haf” a light always
 From midnight on Sunday—and ofttimes till noonday
 There they cluster, chatter and stall
 At the old rendezvous—“De” Hole in “De” Wall.

II

“Haf” a light—“Haf” a light—“Haf” a light always
 Termed as albumen in urine analysis;
 Freshman a cloud—Sophomore a trace,
 Quite a few Juniors—not a Senior face.

III

“Haf” a light—“Haf” a light—“Haf” a light always,
 Many who did would do otherwise nowadays.
 So as cured models we leave you this thought—
 “Go Headt”—“By gum”—as you please By “Gott.”

LINES FROM EPICTETUS

GLEANED FROM PROFESSOR GILPIN'S SATURDAY CLINICS

Professor Gilpin (addressing “Nut”—“English” not “Wal”)—“How much whiskey do you drink a day?”

“English” Nut—“Well, that is rather a *pinted* question, old fellow.”

Professor Gilpin—“Gentlemen, you have heard the patient tell you that on each shoulder he saw a moon, and on each heel there was a moon, and that in the middle of the back he saw himself—a living run. Now what is your diagnosis?”

W. J. McCullough—“Professor, that man is a lunatic.”

 "Go Headt"—"By gum"—as you please By "Gott."

LINES FROM EPICTETUS

GLEANED FROM PROFESSOR GILPIN'S SATURDAY CLINICS

Professor Gilpin (addressing "Nut"—"English" not "Wal")—"How much whiskey do you drink a day?"

"English" Nut—"Well, that is rather a *pinted* question, old fellow."

Professor Gilpin—"Gentlemen, you have heard the patient tell you that on each shoulder he saw a moon, and on each heel there was a moon, and that in the middle of the back he saw himself—a living run. Now what is your diagnosis?"

W. J. McCullough—"Professor, that man is a lunatic."

Ulrich—"Now, Mason, what is the line of treatment for the normal woman at the second month of gestation."

Jimmie—"Prophylaxis."

It was with fond ANNON that I stepped into my CHANDLER with the HOOD up, the sky overhead storm-threatening and almost as BLACK a MAN as night itself. I made my way once more toward the ancient land of unbridgeable wonders; toward the long historic ruins of FORT RODRIQUEZ, lying between the CARRERAS and BARRERAS ranges; toward the former happy hunting grounds of the DORSAVAGES where slumbers are sweetened to the tunes of the yowling WOLFF'S and the night cries of the FOXES, where life is life and the whims of the city die.

The countryside inundated by the springtime rains made the roads in their almost impassable condition to laugh in mockery at the almost futile attempts of my GIBBON ey non-skid wheels as they sank and spluttered in many places in MYER up to the hubs. More than one moment found me anxious for my safety in places where seemingly a WALKER would hesitate, and I wished many a time for my faithful old MOTTLED DURBIN as my more modern omnibus lunged and plunged along in the darkness.

Once by the COPP BRIDGE over the lower BROOKS I felt that I could continue my homeward journey in comparative safety, but even here the WERLEYING floods threatened the arches of STONE with WICKERT destruction, even though they had been built by the MASONS for the purpose of meeting the summer's floods facing toward the LEASUM.

It was by the frolic of fate that I succeeded without accident in reaching the other side of the canyon. I slackened my pace ANDREW up by the haunted MILL-A-GAIN—there to quench the thirst of my boiling radiator; smoking leisurely and dreaming of the home out there toward the WEST.

It was eventide, dark clouds were lifting and the distant thunder rolled, it seemed, direct into the soul of the HANSOM golden sunset. From far up the distant ravine floated the eventide songs of the Mountain HICKS as they wended homeward their way from the BREWERS FUL MER rily singing their old BETH-TUNES as they were so wont to do in happier days—tunes which now in crudest beauty and my loneliness surpassed even my own beloved MENDEL son in A MINOR—tunes, it seemed, in that muffled stillness as the voice of so many ANGELS. But soon they were gone again, their sweeter message to be replaced by the hum of a driven engine whose progress seemed in LEACH like as I was homeward bound.

'Twas rest ahead—Home. What a wonderful word that was;—what a wonderful message! Years of campaigning had taught me at least that—To Be Home—could wheels and engines not drive me faster to that fairest shanty—to SEE LAUS, my wife, and be with JAM and TOM and TY, my SONS, and share their playtimes with them out there in God's country where cities fail to live.

HAW FIELDS would shine beneath the summer's son in that fair country

remote from the cares of men—fields of waving grain as far as eyes could see, and HAY WORTH all its weight in gold. The isolated tumble-downs with their whispered silent love around, the BARNES groaning beneath the load of food, the cows a BELLERUING in the meadows in the early morn, the early calling of the chanticleer, the guarding bark of DON an ELLY, my faithful dogs. These were the thoughts that bathed my mind and soothed my homesick PAYNES as I drove through the gate of old Mother HUBBARDS Inn for dinner and a hurried rest and from thence to complete my journey on the morrow.

Hurriedly I washed and COMBed, quenched my THIRST, and sat me down to one of those old familiar meals, long since forgotten, prepared by none other than my old friend and DICKIE, COOK HIGH SMITH. A leisurely and filling dinner over, I arose UP RIGHT from the table prepared for the best, and retired to a welcoming lounge in the library by the beaming fire-place. What relaxation; what rest; what joy; years in Europe had taught me this as I settled myself comfortably close by the roaring logs to read the escapades of the JAMES, those thrilling stories which now again, as in my childhood, drew forth my love and admiration. How dead the life would be without the thrills. Eagerly I devoured and followed every word and sentence—my mind, too, grasped a HOLT of their wildst dreams and fancies and soon I, too, galloped away with them in my dreams.

And as I dreamed, before my eyes there passed in steady step the remnants of my Class back there at "Jeff" in '18. How small their ranks had become in ten short years—through all the hellishness of war! How many silent tongues lay there in No Man's Land I could not count, but somehow I felt when I eyed their straight, strange figures in khaki and their muddy boots, battle-worn hats and bronzed faces, packs on their backs, aswinging up the path, that they, too, were going home: Friends and my chums, comrades from the Klondike trail, and cowboys' camp, the battlefields of Europe, and the ink pots, the operating rooms and bedsides, returning, too, each to his land of dreams out there some place.

And when they saw me unceremoniously they broke their ranks, and like a mass play came lurching toward me. Walking on each other's heels, frolicking and pushing—and then I could hear them—" 'member me, Doug, that night at Jeff?—London?—Paris?—Verdun?—Somme? 'Member me?—me? Ho! Doug." And I closed my eyes more lightly to hold back the tears as I heard them frantically calling—"Luck to Pal DOUG-A-LAS—Luck to you—we're going home—we're going home." Their receding cheers did wake me. Startled, I sprang to my feet, rubbed my eyes—could I have dreamed? Before me lay but embers, the rooms had chilled, but from my whispering lips did come this God-send—"Luck to you, Pals, for on the morrow I, too, will be home—where new fires burn—where love is—where cities die—away out there."

THE SENIOR'S SOLILOQUY

Sitting one day with Coplin's Pathology,
 That inspired my soul with showers of thought,
 I recalled all the insults and tear stains
 That my stay at Jeff had brought.
 And they seemed, as I counted them over,
 Far more than the curriculum needs,
 And all they lack is the devil himself
 To make Jeff as a Dante's Idea, indeed.

The autumn brings long, plugging evenings,
 The winter brings brain storms and insane,
 The spring sees you lost in whirlpools,
 Requires all summer to recall your right name.
 Mid-years re-echo the terror,
 Mid-sections just add to your fate;
 Its correction and ridicule always,
 From early morning to evening late.

And I guess students are always kicking,
 He thinks himself spotted and "rode"
 And forgets the joys about him,
 Wondering how he can carry the load.
 Instead of dear old "Monty's" humor,
 He recalls Coplin's nine o'clock class;
 In place of Duncan Despard's jokes,
 He frets how Spencer he's going to pass.

He feels frisk after a call-down from Kalteyer,
 Yet mourns in Blumberg's face;
 Gets fresh, answers funny to Patterson,
 Or never comes near the place.
 Ah! There are joys unnumbered about us,
 As plentiful as hen-teeth they grow,
 And the fault is our own, not the Faculty's,
 If things move wrong in the show.

RUM DUM PUNS

Through one of those many mysterious underground political sewers at "Jeff," it has come to my ears that the Kappa Psi's have sold to the Phi Delta Epsilon's their Victrola, which they had purchased on the installment plan. The money was turned over to Kelly, who, without thinking, purchased \$6.98 worth of new records. Of course, the Kappa Psi's could not use them then, so they have been renting them out to the O. U. Phi's, and turning the money over into a fund with which they propose to purchase a new Edison in 1923.

* * * *

The latest fiscal report issued by the board of directors of the Pennsylvania Hospital disclosed an extra appropriation of \$160. The same was paid to I. P. Green and Company, manufacturers of colored windows. It seems the Phi Alph's had inside information, and beat them to it, and had all their Ninth Street windows frosted. I presume this unforeseen expenditure had indefinitely postponed the centennial painting of their house and the propping up of the glass porch on the second story rear, which for several seasons has been persistent in sliding from its intended articulation. However, only yesterday I was emphatically informed that my deduction was entirely wrong, that the treasury was overflowing in many ways, and that Hicks and Laurence lived in this glass room, and that, in addition, the unanimous voice of the organization was to postpone the painting until Holt "got out" so that things would not be all splashed up.

* * * *

The report that Hoover was watching the A. K. K. house for the excessive expenditure of money for banquets was viciously trapped when it was learned that following the Senior Class election some 14 trays and 6 cases of unknown contents were transported up the alley to the Inasmuch Mission, where that night other unfortunates could stand in line.

* * * *

Not to be outdone by their more settled rivals, all found the O. U. Phi's moved again. Without doubt, this aggregation should be the most proficient at checkers in the school. One never knows what move they are going to make next. Neither they nor the Phi Beta's should worry, however, with such a "good undertaker" close by, should anything happen. We have heard that conjointly they intend employing Shoaff as chief adviser, should the war continue much longer. We would suggest a conference with "Ace" Myers after he settles the Class Book bills with Kelly. The fleeting momentary joy and hope that was so badly crushed when it was learned the Picture Committee had really lost money could thus be compensated.

One could not help but stop, note, and admire the spick and span appearance of Pine Street last September. It later developed that the "Nu Sig" house had fallen in line with the Co-operative Clean-Up Endeavor. Every window had received plate glass and each tiny brick had been carefully painted red and outlined in white—that is, in the front of the house. For embarrassment's sake and the likelihood for unpleasantness to arise in one's mind, you are all cordially invited not to inspect the rear of the house. Later developments have disclosed the fact that the piano, one of Reisinger's neckties, Bethune's hat, two "gobbies," and Flude's Manual of Social Etiquette had suffered from the red-dish tickling of the camel's hair.

ODE TO DIXON

Oh, thou! whose pate is bald and sere,
 And shall be so from year to year,
 I ask, "Pray tell, ere fate, we part,
 Does face leave off or does head start?"

ODE TO LASSITER, WITH APOLOGIES TO HAYWORTH

Here's to the land of the Long Leaf Pine,
 Where they never drink whiskey, commit murder or crime,
 Where names are spotless all long the line;
 By gad, it's because they sleep all the time.

WITH APOLOGIES TO MESSRS. MENDEL, HOOD AND HAYWORTH

Hoorah! Hoorah! We step light as a feather,
 But we are all good fellows when we get together,
 We neither smoke, nor drink, nor chew,
 We are all members of the wrist-watch crew.

Irate Professor—"Epright, do you mean to tell me that you are chewing tobacco and spitting on the floor?"

Eppy—"Yes, sir. I have to in this subject—"

Professor—"Why?"

Eppy—"It don't pay to swallow everything."

Harmon (in the act of auscultating over the precordium for determination of the time of a murmur in the cardiac cycle).

Professor (presumably Kalteyer)—"What time is it?"

Harmon (pulling Ingersoll from his pocket), "It is twelve ten, sir."

Dr. Appleman—"We will, this afternoon, spend the hour in changing apothecary measures into their metric equivalents. Now, Minor, what is the metric equivalent for a pint?"

Minor—"Forty-five cents."

Dr. Patterson—"Mr. Jamison, how long should a man live who has Mitral Insufficiency?"

Mr. Jamison—"A lifetime, at least."

Many of us have heard oft before that old familiar saying, "A brown stone front house is not always what it seems to be"—yet, nevertheless, it catches one figuring when we learn that Eakin and his "wha-who" tribe have presented the library with a beautiful volume of "The Man Without A Country." This inconsistent action begins to throw light on Shoaff's and Leach's traveling in the rain, pushing wheelbarrows containing trunks and clothing, and Minor's enthusiastic inspection of the subway crater. Who knows? They may be again looking for a hole in a wall, some place, sometime, somehow, who knows? Not that we care, but we should remember always that an ugly house is worth two in a bush.

Dr. Kalteyer—"How much milk would you give this patient, Mr. Burke?"

Mr. Burke—"Um! Oh! Er, Ah! About—approximately, eight pints t. i. d.

Dr. Kalteyer—"Be careful, young man, or you'll give your patient a milk-leg."

It has been said that Combs' answers are as direct as six miles of small intestines.

STUDYING ANATOMY

It overtaxed the wits of the deepest thinkers in the entire school enrollment almost half the year before we could figure why the A. K. K.'s were so zealous in maintaining the hanging of the green flag. While I don't know definitely, it came to me through a very direct channel that, notwithstanding the unique and distinct appearance of the house, one night during heatless January, Donnelly, in speaking to Tyson in a well-known place, who also was compensating by the absorption of a readily oxidizable "food," said, in rather latent undertones: "Ty, don't forget the Flag." As soon as we heard it, we understood immediately why so few of their members strayed. The peculiar part of the incident is that during the ensuing week three service flags appeared out of their respective Frat Houses. To get home now you count the stars. A rising vote of thanks to these trail blazers. Personally, I have found the suggestion profitable.

THE VERY IDEA OF—

Wickert trying to talk with a "Bell's Palsy."

Trying to find the Senior Class on a dark night.

Waiting for Eakin to come in.

Gibbon buying a class book.

C. R. Fox and Wolff in tights.

Minor inspecting the subway as a hole.

Fairbanks doing nude pose work.

Durbin dolled up.

Douglas peaceful outside the Graham Society meetings.

Dixon as successor to "Ed Pinaud."

Fisher and Minor conducting the meetings at Inasmuch Mission.
