CTL RESEARCH SUPPORT NEWSLETTER
CENTER FOR TEACHING & LEARNING

Welcome to the first edition of the Center for Teaching and Learning's (CTL) research support newsletter! This semi-annual report will introduce you to tools to assist with your research, highlight support available at every stage of the process, and invite you to events related to research and publishing. The resources outlined in this newsletter are available to all Center City and East Falls faculty, clinicians, students, and staff through a site-wide license paid for by the Jefferson Libraries. Visit the Scott Memorial Library website and the CTL website to access these tools and support.
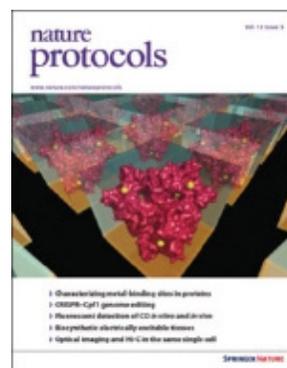

New Resources

EndNote -
EndNote is a citation management program that lets you import citations from numerous literature databases into one place. Save references from databases and websites, organize sources with tags and folders, and create in-text citations and bibliographies within Microsoft Word.

Nature Protocols -
Nature Protocols is an online publication that presents peer-to-peer protocols in biological and biomedical sciences. The resource offers step-by-step descriptions of procedures which you can take to the lab and immediately apply to your research.

Grants & Funding

Let Jefferson cover your Article Processing Charges (APC) with the **Open Access Publishing Fund!** This fund offers financial support to Jefferson faculty, students, and staff who wish to publish in Open Access journals. Jefferson will contribute up to $2,500 per article. (See the application for complete details.) Since the fund began in October 2018, 17 articles have been supported and published in Open Access journals. Funds for the 2019-2020 Academic Year will be available in July. Visit library.jefferson.edu/openaccessfund to apply.

Pivot is a database that helps you find **global and local funding opportunities.** It also identifies research expertise from within and outside of Jefferson, connecting you to funding and people quickly and easily. Currently, there are over $64B in funding opportunities listed on the Pivot website (*right*).

Never miss a deadline again! Pivot recently added tools to help you keep track of grant application deadlines. Download dates to your desktop or access via the Pivot Calendar.

Learn more and start using Pivot here.

Citation Tools

Perhaps the most painful part of research and publishing, citation management can be time-consuming and tedious. Utilize **EndNote**, **F1000**, or **RefWorks** to make this part of the process a breeze.

Learn about these tools, and find which is right for you [here](.).

Statistical Tools

NVivo stores, organizes, analyzes, and helps visualize qualitative data. Find themes, auto code, and build reports with the tool. Learn more and download NVivo [here](.).

Use **SPSS** for statistical analysis, data management, and data documentation. Quickly and easily discover new insights, test hypotheses, and build predictive models. Download SPSS [here](.).

Need more help? Contact the **Division of Biostatistics,** which provides statistical assistance with study design and data analysis. Visit their [website](.) or call (215) 955-4999 to learn more.

Support

The CTL offers support to faculty, staff, and students conducting research and writing for publication:

Librarians can assist with your research questions. From free consultations on using library resources and lit or funding searches, to fee-based systematic reviews, visit the [SML website](.) or email AskALibrarian@jefferson.edu to get started.

The Office for Professional Writing, Publishing, and Communication provides FREE feedback on writing and helps you present and share your research in the best way possible. Visit them [online](.) to learn more.

The CTL's expert photographers, graphic designers, and videographers can translate your research into visually engaging presentations. Visit the [CTL website](.) for a complete list of services.

The Jefferson Digital Commons (JDC) serves as Jefferson's open access institutional repository. It's a great resource to share your scholarly work and find that of other faculty, staff, and students. Visit the [JDC](.) to check it out.

Events

LabArchives for Beginners: Professional Edition (Virtual)
Friday, June 14
12 - 1 p.m.

An overview of the features of the LabArchives Professional Edition.
[Register here.](.)

LabArchives for Beginners: Classroom Edition (Virtual)
 Friday, June 14
 1 - 2 p.m.

A brief overview of the features of the LabArchives Classroom Edition.
[Register here.](.)

Roadmap to Clinical Research
Tuesday, June 18
8 a.m. - 12:30 p.m.

Join the Jefferson Clinical Research Institute for a half-day course to learn the prerequisites for conducting research at Jefferson. Visit [MyJeffHub](.) to register.
