
Challenges and Opportunities for Medical Institutional Repositories

November 1, 2011
On Twitter: #medir11

Who Are We?

- **Dan Kipnis, MSI**

Manager, Jefferson Digital Commons and Senior Education Services Librarian, Thomas Jefferson University

- **Ann Koopman, AM**

Founder, Jefferson Digital Commons and JEFFLINE Editor, Thomas Jefferson University

- **Lisa Palmer, MSLS, AHIP**

Institutional Repository Librarian, Lamar Soutter Library, University of Massachusetts Medical School

Who Are You?

- Question #1: Who already has an institutional repository?
 - Question #2: What is of most interest to you today?
-

Jefferson

- Historic, founded 1824
- Private
- ~3500 students
- All health sciences, all the time

UMMS

- Modern, founded 1962
 - Public
 - ~1040 students
 - One of 5 UMass campuses
-

eScholarship@UMMS is a digital archive offering worldwide access to the research and scholarly output of the University of Massachusetts Medical School community. The goal is to bring together all of the University's research under one umbrella, in full text whenever possible, in order to preserve, promote, and provide access to that research. eScholarship is administered by the Lamar Soutter Library.

Protocols - JDC

<http://jdc.jefferson.edu/cim/>

Our core approach to treating cancer is to care for each individual patient, and support his or her vitality in a comprehensive way. Nutrition, lifestyle change, mind-body skills, constitutional treatments, and psychospiritual support are all essential features of our program. Graphically this can be represented by the following figure:

Abstract

This Issue Brief examines the impact and stressors for police officers of responding to completed suicide calls. The authors present findings from a study of over 225 Massachusetts police officers and offer training recommendations to address mental health needs within the law enforcement community.

2011 Clinical and Translational Science Research Retreat

Friday, May 20, 2011

Hoagland Pincus Conference Center
Shrewsbury, Mass.

The 2nd Annual Clinical and Translational Science Research Retreat, "Creating Science Collaborations across the Commonwealth: Translating the Life Science Moment," highlighted the ongoing work being done at UMass Medical School, clinical partner UMass Memorial Health Care, other UMass campuses, and other participating institutions to fulfill the mission of the UMass Center for Clinical and Translational Science ([UMCCTS](#)).

The retreat was jointly sponsored by the UMass Center for Clinical and Translational Science, and the UMass Medical School Office of Continuing Medical Education.

This website features a collection of [presentations](#) and [posters](#) from the retreat contributed by speakers and presenters.

PSYCHIATRY

The Department of Psychiatry at the University of Massachusetts Medical School is the best integrated department of psychiatry in the sector psychiatry. Our mission is to provide research, training, and community services to patients in Massachusetts and beyond. We are a team of over 300 faculty and 2000 students. We offer a wide range of educational and training programs, and are the best integrated department of psychiatry in the sector psychiatry.

Sigma Xi Student Research Day 2008 Poster Abstracts

- 94) Ret/PTC 3 Induction of NF κ B in Inflammation and Cancer. Neely, Robert J., Rothstein, Jay L., *May, Michael J., Department of Immunology and Microbial Pathogenesis, Thomas Jefferson University, and Department of Animal Biology, University of Pennsylvania

Field Topic:

Physiology and Immunology

The expression of the oncogenic fusion protein Ret/PTC 3 (RP3) has been found in both Hashimoto's thyroiditis and in the differentiated thyroid malignancy, papillary thyroid carcinoma (PTC). RP3 is an oncogene formed from a translocation involving the N-terminal portion of RFG and the C-terminal kinase domain of the receptor tyrosine kinase c-RET. The full length c-RET receptor, once activated by ligand binding and autophosphorylation of its kinase domain, signals via the ras/raf/MAPK and PI3-K/AKT pathways. This signaling has been reported to be important in the activation of NF κ B. Intriguingly, it was recently shown that the c-RET receptor plays a role in Peyer's patch development which has been reported to be dependant on the non-cannonical NF κ B pathway. However, the RP3 fusion protein does not contain the transmembrane portion of the full-length receptor and only 20% of expressed RP3 has been observed to be membrane bound. These findings therefore leave in question the signaling mechanisms induced by RP3 that underlie its pro-inflammatory function. To address this question, we have generated epithelial cell lines stably expressing RP3 and found that the classical NF- κ B pathway is robustly activated in these cells. Furthermore, RP3 expression enhances p100 processing to p52 in the RP3 expressing cells. We are currently delineating the mechanisms of RP3's activation of the NF κ B pathways as understanding these may lead to the development of potential novel therapeutic targets.

Redundancy

The screenshot shows a PubMed article page for "Genomic Biomarkers for Molecular Imaging: Predicting the future" by M.L. Thakur, PhD. The article is an author manuscript accepted for publication in a peer-reviewed journal. The page includes navigation links, search options, and a sidebar with a vertical label "NIH-PA Author Manuscript". The article title is repeated in a large font at the bottom of the page, illustrating redundancy.

Open Access and Research Data

- IRs can be part of the solution
- Institutional open access mandates
- Dataset storage: NSF requirement; student dissertations; journal articles

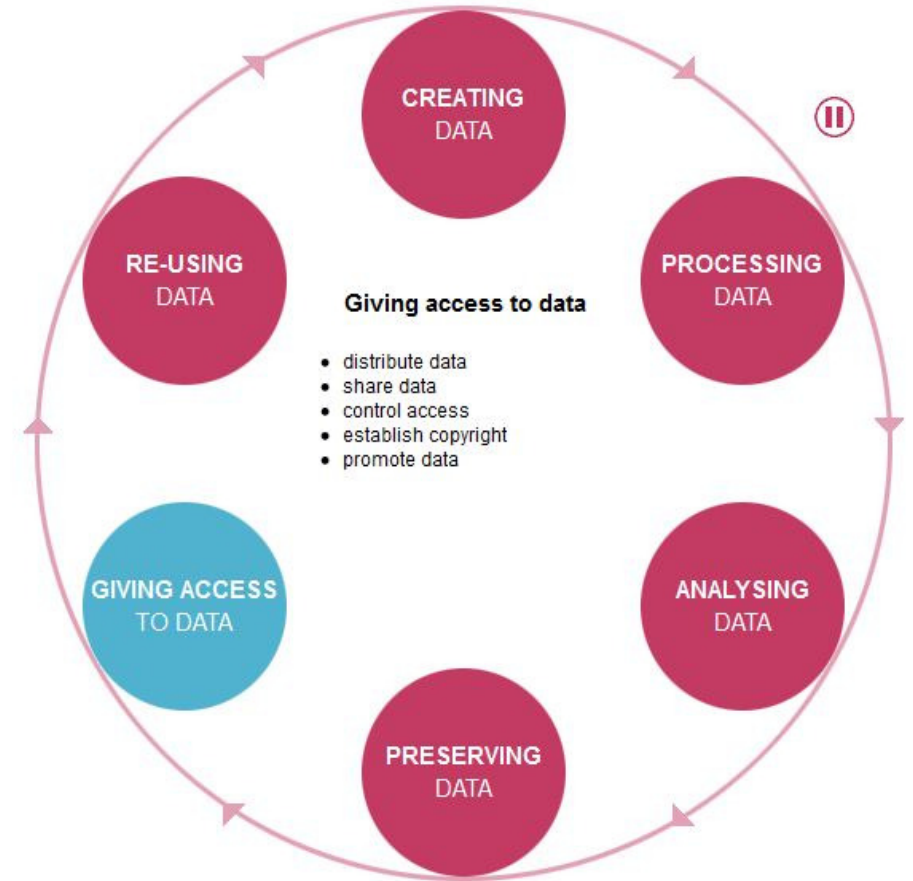

Photo credits:

Looking Ahead

<http://www.flickr.com/photos/11213608@N03/1319877384/>

Future Challenges

- Broadening outreach to new populations, such as retired faculty
 - Finding ways to autopopulate the IR
 - Incorporating research data
 - Use of Wikipedia links to generate traffic
 - Collaboration with Public Relations department on promotions and alerts
 - Application of Google Analytics for additional data on site use
-
