This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's [Center for Teaching and Learning \(CTL\)](#). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Jefferson Digital Commons Reports by an authorized administrator of the Jefferson Digital Commons. For more information, please contact: JeffersonDigitalCommons@jefferson.edu.

Jefferson Digital Commons Quarterly Report: July-September 2019

Fall is officially here and with it is a time to reflect on the summer months. Over July, August, and September the Jefferson Digital Commons had:

- **123,466** downloads
- **194** total works posted
- **198** countries visit the site
- **6,258** institutions access content

In this Issue

What People are Saying About the Jefferson Digital Commons

New Collection Alert: East Falls Oral Histories

Stan Gorski, Director of the Gutman Library, retired this September after more than thirty years of service. Throughout his tenure he held numerous positions within the Library, established the campus's Archives & Special Collections, and became a resident expert on the School's history. This summer he sat down with librarian Kelsey Duinkerken to talk about the history of the East Falls campus, focusing on its institutional history (from Philadelphia Textile School to Philadelphia Textile Institute, Philadelphia College of Textiles and Science, Philadelphia University, and eventually Thomas Jefferson University), building expansion, library development, and special collections growth. All four conversations are now available under the [East Falls Oral History](#) section, both in audio and written form.

Posters:

- Evidence Based Solutions: Creating Specialty Units
- Pharmacokinetics of intraperitoneal vancomycin in patients on automated peritoneal dialysis
- Experiential Learning and Injury Prevention: A Win-Win
- Characterizing Smoking-related Litter in Public Parks in Philadelphia
- Impact of Palliative Care Consultation on End of Life Care Measures: A Retrospective Analysis of Patients in the Oncology Care Model
- The Role of Diagnostic Bronchoscopy in Refractory Asthma Management
- Incidence rates of critical low glucoses (<40 mg>/dL) by POCT before and after new policies for treatment of clinically significant hypoglycemia (<54 mg>/dL): A comparison between two hospitals
- Improving NICU Discharge Readiness Through Standardization of Preparatory Practices

What People are Saying About the Jefferson Digital Commons:

Name: Carl Decker
Country: US

Role: faculty

Resource URL: <https://jdc.jefferson.edu/radiologyfp/8/>

Comments: Great paper that provides an easy way to generate standardized method of liver measurement. As a practicing radiologist I use it 2-3 times per week.

Name: Karen

Country: US

Role: inventor

Resource URL: <https://jdc.jefferson.edu/jss/vol4/iss2/7/>

Comments: I stumbled upon this article by Dr. Holland while trying to put together my next invention of the Photon light because Photon Herbal Pets is my company name. I got the herbal part of the name by creating Tumorid, but I am still missing the Photon part of the equation. This is amazing that frequency and music can change the cells and microorganisms. Great.
