

AC RESEARCH SUPPORT NEWSLETTER

THE ACADEMIC COMMONS

Spring 2023

Welcome to The Academic Commons research support newsletter! This report introduces you to tools to assist with your research, highlights support available at every stage of the process, and invites you to events related to research and publishing. The resources outlined in this newsletter are available to all Center City and East Falls faculty, clinicians, students, and staff through a site-wide license paid for by the Thomas Jefferson University Libraries (Jefferson Libraries). Visit the [Jefferson Libraries websites](#) and the [Academic Commons website](#) to access these tools and support.

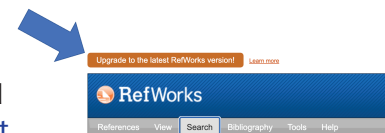

New Resources

There's a new tool for immunology research – **FlowJo!** FlowJo helps with viewing and analyzing flow cytometric data. FlowJo creates publication-worthy graphics, models for advanced data analysis, and more. [Create a new FlowJo account](#) from the Jefferson Libraries website. If your lab has an existing FlowJo account, continue to use that account until it expires, and request a Jefferson account when your license is close to expiring. [Learn more about FlowJo and get started now.](#)

Citation Tools

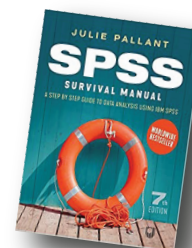

If you use the Legacy version of **RefWorks** (orange interface), update your account to the current version (blue interface) by June 30, 2023. The Legacy version will no longer be accessible at that time. [Read this library article](#) for instructions to back up your account and upgrade to the current version. Questions? See the [Jefferson Libraries Citation Management Guide](#) for more info about RefWorks and other citation management tools.

Statistical Tools

SAS is software for statistical analysis, operations research and project management, application development, data warehousing, and more. Download the [latest version of SAS](#) and learn [what's new in version 9.4](#).

Check out the [SPSS Survival Manual](#), which takes you through the entire research process using SPSS - helping you choose the right data analysis technique, design your study, and report the results. [Download SPSS via the library website.](#)

Grants & Funding

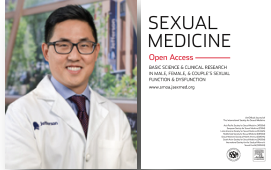

Open access publishing at Jefferson has never been more exciting! Jefferson Libraries entered into institutional open access agreements with ACS (American Chemical Society) and Wiley, two major scholarly publishers. Article Processing Charges (APC) are now waived for authors publishing in these journals.

Formally known as Transformative Agreements, these new licenses provide unlimited electronic access to all Wiley, Hindawi, and ACS journals, along with no-fee open access publishing for Jefferson authors. Jefferson Libraries will pay these publishers an additional annual license fee to participate in these Agreements.

Visit the Jefferson Libraries [Open Access Guide](#) for complete details on these new agreements and the Open Access Publishing Fund, another means of financial support for authors.

Spotlight on Open Access Authors

Congratulations to Wiley Open Access pioneers **Dr. Jun Li**, Assistant Professor, Medical Physics, and **Dr. Rani Anne**, Director of Clinical Operations, Department of Radiation Oncology and Professor. The authors are the first at Jefferson to utilize this new Transformative Agreement and published their article "[Evaluation of Atlas-based auto-segmentation of liver in MR images for Yttrium-90 selective internal radiation therapy](#)" in the *Journal of Applied Clinical Medical Physics* last month.

Congratulations to **Dr. Paul Chung**, Assistant Professor, Urology, for recently publishing his paper "[Genitourinary and Sexual Symptoms and Treatments in Transfeminine Individuals: A Qualitative Exploration of Patients' Needs](#)" in *Sexual Medicine* in October 2022 using funds from the Open Access Publishing Fund.

Congratulations to **Dr. Marie-Christine Potvin**, Director of the Post-Professional Occupational Therapy Doctoral Program and Director of GOALS² for recently publishing her paper "[I Could Really Use This: Occupational Therapy Students' Perceptions of Learning to Coach](#)" in *Occupational Therapy International* in October 2022 with support from the Open Access Publishing Fund.

The NIH now requires [Data Management and Sharing plans](#) in grant applications. Jefferson single sign-on (SSO), sample plans, funder templates, and Jefferson-specific guidance are available in the [DMPTool](#), which will help you build your plan.

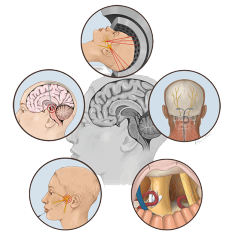

Publishing & Communication

Consult the **Office for Professional Writing, Publishing, and Communication (OPWPC)** for editing support and assistance at any stage of your writing, publishing, or presentation development process. [Email Pamela Walter](#), Director of the OPWPC, to sign up for a one-on-one consultation.

Congratulations to **Dr. Malachy J. Clancy**, Assistant Professor, Doctor of Occupational Therapy, who published his paper "[Rehabilitation for COVID-19 Lung Transplant](#)" in the *Physical Therapy & Rehabilitation Journal* in March 2023 with help from the OPWPC.

If you need help with poster design and printing for an upcoming conference or presentation, our **Graphics & Medical Illustration Department** can help. We can also create illustrations and drawings for publications. [Email us](#) to learn how we can help you best communicate your research.

Support

Librarians can assist with your research questions. Contact us for consultations on using library resources, literature or funding searches, or systematic reviews. To get started, contact: AskALibrarian@jefferson.edu (Center City/Scott & Horsham/Dixon) or AskGutman@jefferson.edu (East Falls/Gutman)
