All regular meetings will be held at Jefferson Hall, 11th & Locust Streets, Philadelphia. Meetings begin at 7:00 P.M. Room number posted in the Lobby.

**THE PRESIDENT'S MESSAGE**

Dear Friends,

What an exciting year for our Alumnae Association!

As of June 1976, the Diploma School of Nursing had its first role student graduate, and I'm happy to announce that the School of Nursing has been accepted into the Alumnae Association as Active Members for the remainder of the year 1976.

The view from my office window shows the rapid progress that is being made on the new hospital. It is almost unbelievable how little the "new life" has been transformed into a caring home for the children. The school will continue to grow and spread. I'm sure many of you would be excited at the physical changes if you were to pay a visit.

Thank you for your confidence in me by re-electing me to serve as your President for another one year. We office staff are proud of what has been accomplished and happy of the officers and Committee, but by each one of you.

To the Officers, Committee Chairpersons and their members, I would like to express my gratitude and thanks for your help and guidance.

Best wishes and good luck to each one of you.

Sincerely yours,

[Signature]

FINANCIAL REPORT
December 31, 1975

Receipts:

Dues ........................................ $ 8,025.00
Annual Luncheon Reservations ................................ 3,091.75
Interest on Savings Accounts ................................... 2,710.33
Sesquicentennial Contributions ................................ 1,008.00
Miscellaneous .............................................. 7,484.73

Annual Giving Contributions:
General Fund ........................................... 3,868.25
Relief Fund .............................................. 182.00
Scholarship Fund .......................................... 272.00

Total Receipts ....................................... $26,692.06

Disbursements:

Annual Luncheon Expenses .................................. $ 2,391.43
Printing, Mailing and Stationery ................................. 6,591.54
Sick Benefits for Members ................................... 3,569.43
Graduation Prizes ........................................... 200.00
Contributions (United Fund, etc.) ......................... 745.00
Sesquicentennial Contributions ................................ 1,558.00
Other Operating Expenses .................................... 4,389.00
Convention Expenses ........................................ 270.00
Scholarships Granted ........................................ 2,000.00
Gifts for Shut-Ins .......................................... 600.00

Total Disbursements ...................................... $22,432.40

Cash Balance as of December 31, 1975:

General Fund: Checking Account .......................... $ 988.41
Savings Account ........................................... 12,141.00
Relief Fund ............................................... 18,008.00
Scholarship Fund .......................................... 13,463.16

Total ......................................................... $44,600.57

PROGRESS
PROGRESS — THOMAS JEFFERSON UNIVERSITY HOSPITAL

The past year has been a very exciting one at Thomas Jefferson University Hospital with many changes and improvements and the culmination of many years of planning for a new Hospital Building. It was a year of accomplishment, of meeting many goals and setting new ones to meet the ever changing needs of both our patients and staff.

During the year most of our former outpatient clinics were physically relocated to Jefferson's new Health Sciences Center at 9th and Sansom Streets, a complete one stop ambulatory patient care center, including supporting diagnostic and ancillary services in an attractive and modern setting. Under construction and soon to be opened within the Health Sciences Center is the Division of Nephrology's new 12 station outpatient dialysis unit and the new Department of Family Medicine's complete Model Family Practice Unit.

Within the Hospital itself, a substantial number of significant changes have also been made. A new Surgical Cardiac Care Unit, an Intensive Care Nursery, and a new Protective Care Unit were opened and a 5 bed Respiratory Intensive Care Unit is nearing completion. Three patient floors of the Thompson Building were completely remodeled and three more are scheduled for the coming year. With support from the Foerderer Foundation, a project to refurbish all patient rooms in the Foerderer Pavilion was also initiated. Hours for visitors were expanded to allow visiting from 11 A.M. to 8 P.M. and the change has been met with great satisfaction of patients and their visitors and has caused little additional problem for the staff.

With a continuing growth in the numbers of patient admissions and days (to 196,469 adult patient days and 12,982 nursery days during fiscal year 1975), a comprehensive study of bed requirements was undertaken by a special task force. As a result of the task force study, beds were reallocated by department according to need. The reallocation has resulted in significant changes in the distribution of the staff and attending physicians.

To continue to meet our responsibilities as a teaching hospital, the numbers of residencies and fellowships were again increased during the past year. Training programs with affiliated hospitals were expanded in several disciplines and a new affiliation agreement was concluded with Magee Memorial Hospital which will greatly enhance training programs in physical and rehabilitation medicine.

The administrative staff of the Hospital was expanded to include a new Assistant Hospital Director for Surgical Programs and more recently, a new Assistant Hospital Director for Diagnostic and Therapeutic Programs. These new positions permit closer coordination and cooperation between administration and the nursing and medical staffs. This closer coordination will be invaluable as we begin to develop and refine the operating protocols necessary for the move to the New Hospital in 1979.

Perhaps the most exciting single event this past year was the beginning of construction of the new Hospital on the square block city between 10th and 11th Streets and Sansom and Chestnut Streets. Following the successful sale of an $81.6 million municipal bond issue in October, 1975, ground was broken in November and construction began shortly thereafter. Occupancy of the new 411 bed clinical teaching facility which will be connected by a bridge over Sansom Street to the Foerderer Pavilion is planned for January 1, 1977.

Over the next three years we shall plan not only for the move to the new Hospital, but also toward the future use of our existing Hospital structures to meet the challenges of new technologies and changing social needs.

Edward L. Taylor
Hospital Director

EDWIN L. TAYLOR
SCHOOL OF NURSING
ANNUAL REPORT TO THE ALUMNI ASSOCIATION

For two hundred years the name Jefferson has been related to significant contributions to our country — first through the authorship of the Declaration of Independence, then as President Mutual United, States, and later as the Medical College bearing his name grew to university status. During this Bicentennial year, the university community has been reminded of its historicity through special lectures, a history course devoted to Thomas Jefferson, a special Bicentennial exhibition located within sight of Independence Hall, and the breaking of ground for the new Thomas Jefferson University Hospital.

Thomas Jefferson was honored on the occasion of his birthday with a biographical lecture entitled, "Mr. Jefferson and Dr. Dunglison," on April 14th, the day following his birthday. A colonial style reception followed.

Twelve institutions of higher learning from the Philadelphia area are participating in "Learning, Revolutions, and Democracy," an area Universities Bicentennial Exhibition. The huge display is housed in the second floor of the McLean College Building at 510 Walnut Street. Each institution has its own display area. Jefferson's display is 22 feet in length and includes several memorabilia.

On November 13, 1975, ground was broken for the 411-bed teaching facility of the Schools of Medicine and Nursing. The cornerstone was laid on the corner of Tenth and Eleventh Streets. It will replace the outdated Main and Thompson buildings which must be razed to make way for the new Foerder Pavilion Building.

The major innovation in the facility will be the treatment of patients and ambulatory patients on an integrated basis. Physicians' offices will be located on alternate floors from inpatient floors. Ambulatory patients will receive care in these offices rather than in the "public clinics" of the past.

Two events occurred during this Bicentennial year which affected the university as well as the school of nursing. On December 31st, 1975, John W. Goldschmidt, M.D., Dean of Colleges, resigned to assume a position as Associate Director of the Rehabilitation Center at Northwestern University. Lawrence Abramson, Associate Dean, was named Acting Dean, effective January 1, 1976. Abruptly, on March 31st, 1976, Dr. Peter Harbur's life came to a close. George M. Norwood, Vice-President for Planning, was named Interim President, effective April 5, 1976. Search committees have now been appointed by the Board of Trustees and are actively seeking the best candidates for appointment to these positions.

The university was surveyed by representatives from the Middle States Association of Colleges and Secondary Schools in December, 1975, and accredited by the Association at its meeting on February 28, 1976. All programs within the university took an active part in this accreditation visit and the diploma program, therefore, was required to submit a rather lengthy report. The director of the program, in conjunction with the directors of the other nursing programs, met with a member of the accreditation team. Among the eleven recommendations forthcoming from Middle States was the recommendation that an Advisory Committee with faculty representation from all nursing programs be formed to consider the development of nursing education in the university. As you know, we have three nursing programs — the Diploma Program from which you all are graduated, the Ray-Anderson Program, and the Practical Nursing Program.

The diploma program continues to have the unquestionable support of the Board of Trustees and the administration of the university. However, the administration and faculty of the school recognizes that, in view of trends in professional nursing education, an in-depth study of the future of nursing education at Jefferson is indicated. Based on the experience that our program has, since its very beginning in 1824, been one of the best and that it has produced graduates well qualified to assume their role as beginning practitioners, we are also aware that our graduates have received preferential consideration in many areas throughout the country. The Philadelphia area is no exception. State Board results continue to be above the state and national means, and we especially pride ourselves of the Class of 1975 whose mean scores in all areas were above 600. We, therefore, will willingly relinquish a program built upon so strong a foundation.

The 83rd commencement for the School of Nursing on June 12, 1976, with 86 students in the graduating class brings the total number of our graduates to 4,658. Dr. Robert B. Wise was the commencement speaker. The exercises were held in the Sheraton Ballroom at 1725 J. F. Kennedy Boulevard.

The major innovation in the facility will be the treatment of patients and ambulatory patients on an integrated basis. Physicians' offices will be located on alternate floors from inpatient floors. Ambulatory patients will receive care in these offices rather than in the "public clinics" of the past.

I believe that the foregoing capsule is a clear indication of why, in this Bicentennial year, the name "Thomas Jefferson" is synonymous with quality education and care and why throughout the remainder of this century it will be an exciting place to be as a student, faculty member, practitioner, administrator, and, if need be, patient.

My best wishes to you for a happy, successful and healthy year ahead!

Doris E. Bowman
Director, School of Nursing 1975-76

DIPLOMA STUDENT ACTIVITIES

The Student Affairs Council of 1975-76 began the year by compiling a student orientation handbook for the incoming freshmen. At the same time a Senior Farewell Party was arranged for the Class of 1975. It was a real success and very much enjoyed.

In September, with the arrival of the new freshmen came orientation. Student Affairs Council officials introduced themselves and their roles to the freshmen at a special meeting, and Residence Hall Council spent time discussing rules and regulations of the dorm. In addition a Student-Faculty get together was held.

The first social event for the entire student body was our Halloween Party on October 30th held in the recreation room of the residence. Refreshments were supplied by Student Affairs Council members. Throughout the remainder of the year there were several other social affairs to celebrate the holidays. At Christmas, a student party was held December 18 as well as a Student-Faculty Party on December 17. In February, Valentine’s Day was brought in with a small gathering for everyone. There was a small Faculty get together of students and faculty on April 14. All of these occasions helped to create an even better relationship between faculty and the student body.

Different projects were sponsored by Student Affairs Council throughout the year. Our favorite project was at Christmas when students sang carols throughout the hospital but mainly on the oncology units. It was enjoyable singing with cards and small gifts to help brighten spirits at this time of year. Other functions included sailing stationery and sponsoring an Open House in the residence.

Individual classes were quite busy raising funds for their yearbooks. The freshmen were very successful in a “T” shirt sale and have a great start towards their goal. Juniors sponsored numerous events such as plant sale, candy, and bake sales. The seniors included bake sales, pretzel sales, a small spaghetti dinner in the Fall and then the Annual Spaghetti Dinner in April.
SEMINAR

A Seminar on Crisis Intervention presented by the Nursing Service Division of Thomas Jefferson University Hospital and the Department of Baccalaureate Nursing, College of Allied Health Sciences, was held on May 7, 1976.

Alumnae, staff from Thomas Jefferson University Hospital and other hospitals, community health agen­cies, faculty, and students attended.

The purpose of the Seminar was to provide seminar participants with knowledge of crisis intervention theory and demonstrate its relevance to the nursing process and to provide opportunity for seminar partici­pants to apply crisis intervention theory in the formu­lation of a nursing care plan based on a videotape demonstration of a potential crisis.

More seminars will be planned for the future.

Charlotte E. Voss, Chairman
Department of Baccalaureate Nursing

THE BACCALAUREATE NURSING PROGRAM

The third class was graduated on June 11, 1976. The Baccalaureate Nursing Program has been an array of many and varied educational and social experiences.

After completing at least two years of undergraduate liberal arts and sciences prerequisites, students enter the program as juniors. They then undertake an intensive program of study and clinical experiences totaling six quarters over a two year period. The bac­calaureate program's philosophy focuses on the holistic concept of man. Individuals are perceived as a whole being greater than the sum of its parts, and are dealt with as such in the clinical areas. The curricu­lum enables the students to work with the people being first in the normal life cycle, i.e., childhood, adolescence, adulthood, and then in abnormal or pathologic states, i.e., illness. Thus the continuity of the human life cycle is preserved throughout the nursing major.

Since its beginning in 1972, the curriculum of the Baccalaureate Program has evolved from a study of health and illness to the present holistic approach. Such revisions are in keeping with the changing roles in nursing and evolving approaches to baccalaureate education. Recently the University was accredited by the Middle States Association of Colleges and Secondary Schools and the Department was accredited by the National League for Nursing.

To an incoming student, the philosophy of the Baccalaureate Program can be quite unusual, especially to one who has been accustomed to the traditional concept of "nursing the sick".

Knowledge of the humanities, various forms of creative expression, and the natural, behavioral and social sciences is essential to understanding of nursing theory. The focus of the program is on maintaining health as well as on providing care during illness. In addition to aiding the students in attaining their academic and professional goals, the program facili­tates students' continued personal and social de­velopment.

The curriculum of the Program certainly lends itself to following these concepts through its use of various clinical experiences, ranging from nursing care in hospital patient units, to out-patient psychiatric clinics, to community health nursing. In the last quarter of the second year each student chooses a clinical nursing elective. The clinical experiences in the elective have proven to be of tremendous value to the students' concepts of nursing in the "real world".

The men and women of this year's graduating class have come from various backgrounds. Many are married, some have several children, and quite a few have re­ceived, in the past, bachelor's degrees in fields other than nursing. The diversity inherent in the group has facilitated the development of rather well-rounded personalities among the students.

At present, the graduating seniors understand that it will be necessary to adjust to their roles in the nursing profession. Hopefully, the future will hold a fulfilling career in service to mankind.

Giovina Whetstone
Class of 1976

SCHOOL OF PRACTICAL NURSING

The School of Practical Nursing is twelve years old in this bicentennial year and continues to provide a vocational nursing education for men and women of many diverse backgrounds. Since September 19, 1970, the 1199 C Union, to which the nursing assistants employed by Thomas Jefferson University Hospital's Nursing Service belong, is now providing the funds to sponsor qualified candidates from that group to be upgraded through our program to become licensed practical nurses.

The faculty of the school now boasts the acquisition of a third person from the School of Nursing Alumnae as a staff member since this program began. It was through the program and the Foundation that this was a means of evaluating the effectiveness of formal teaching in hospitals.
OPERATING ROOM NURSING

The basic goal of operating room nursing is to improve the quality of care given to the patient undergoing surgery.

To accomplish this goal the following steps were taken:

1. To update and implement the team concept
Each nurse and operating room technician was given the privilege of choosing the area of specialty he or she desired to be assigned. These choices were given every consideration. The selection was made according to the individual's ability, potential, need for coverage in the area, and with suggestions from and approval of the surgeons in each discipline.

The staffing levels and the request for the surgical procedures determines the assignment of the team members. Hopefully with the increase in staffing levels and some much needed adjustments of the scheduling system, each team member would routinely be assigned to the discipline of choice.

The team assignments include nurses' aides in two of the surgical specialties.

Additional call personnel have been assigned, not only to weekends for surgical areas that demand such coverage, but also on a daily basis during the evening and night hours.

2. Development of a formal staff development program
A staff development program has been established by assigning a qualified nurse solely to the orientation of new personnel and the continuation of staff development goals. For the orientation personnel, assignment of instructional responsibilities to the experienced nurses and a formal evaluation at the completion of the orientation period has been implemented.

The development of operating room nursing staff has been accomplished by giving each person an opportunity to develop his capabilities individually to provide more coordinated care of the surgical patient.

An informal in-service education program is conducted once a week utilizing physicians, hospital personnel, films and operating room staff. Depending on the daily operating room schedule, the head nurses and unit specialists meet with their staff to discuss and review procedures, techniques and equipment. In order to formalize and expand the existing program, a committee has been selected; however, due to the demands of the daily schedule, the committee has not been able to function.

Mamie Pollee Peace
Director, Operating Room Nursing

NEW SURGICAL CONCEPTS FOR LARYNGEAL CANCER

LESLIE L. PRATT, M.D.
Professor and Chairman of the Dept. of Otolaryngology

Surgery upon the larynx for malignant tumors has undergone dramatic changes in the past ten years. Through the pioneering efforts of Dr. Joseph Ogura, Professor and Chairman, Department of Otolaryngology, Washington University in St. Louis, Missouri, the concept of partial removal of portions of the larynx has become accepted in the medical community.

Prior to the acceptance of partial removal of the larynx, the total larynx was removed, and all patients with cancer of the larynx had a total laryngectomy. The estimates are that 60% of patients who previously had their total larynx removed, may now have their larynx preserved by employing partial laryngectomy procedures.

The partial removal of portions of the larynx referred to as conserving laryngectomy in this article is possible because of the embryologic development of the larynx. Embryologically, the larynx develops from two different areas with a central transition or neutral zone. The lymphatic drainage from these three portions of the larynx are not linked together. Each area has its own separate lymphatic drainage, consequently a tumor in one area will not spread to the other area of the larynx.

Anatomically, if we take the true vocal cords as the area of transition, the area of the true vocal cord, consisting of the epiglottis, the aryepiglottic folds, the arytenoids, and the false vocal cords is called the supraglottis. The area below the true vocal cords is referred to as the subglottis. Any tumor involving the structures in the supraglottis can be effectively removed by what is referred to as a supraglottic laryngectomy. All the structures above the true vocal cords are then attached to the base of the tongue. A tumor of this area can be safely removed, and the true vocal cords and subglottic area may be safely left behind because their lymphatic drainage is separate.

Tumors of the true vocal cords can be successfully removed by performing what is referred to as the hemilaryngectomy. However, many of these tumors can be equally successfully treated through the administration of x-ray treatment.

Tumors involving both the true vocal cords and the subglottic region cannot be removed by any kind of partial laryngectomy surgery. Whenever the true vocal cord is fixed and the subglottic extension of the tumor is greater than 1 cm, below the margin of the true cord, a total laryngectomy is necessary.

Why is it so important to try to conserve the larynx? The larynx is an extremely important physiologic structure. The functions of the larynx are numerous. First of all, it is concerned with communication. Secondly, it is concerned with the cough reflex. Thirdly, it is concerned with lifting, and a person's ability to exhibit strength, and finally, the larynx is associated with swallowing.

The role of the larynx in communication is extremely essential. In our society, everyone communicates with his voice, and the voice is his means of communication. The voice is also the means by which ones can be heard.

One may consider the function of the larynx in the cough reflex as minor. However, there are three mechanisms by which one is able to clean the lungs. The first is the squeezing of the terminal branches of the tracheobronchial tree, which brings some of the secretions up to the other area of the larynx. The second function is the use of the cilia which beats toward the larynx and moves secretions in that direction. The third important function is what is referred to as the "hiccobic blast." If you try to do this yourself, you will see its significance. It is impossible to obtain a good cough unless one is capable of exhaling against a closed larynx. This builds a pressure within the tracheobronchial tree so that when the larynx is opened, a blast of air is produced.

One's ability to lift is also almost impossible without the function of the larynx. Bend over and lift something. Did you notice how your larynx closed, locking the passage of air? If you then attempt to raise the same object without closing the larynx you will experience greater difficulty in producing the same strength as when the larynx was closed.

Finally, the function of the larynx in swallowing prevents food from entering the tracheobronchial tree. During the act of swallowing, the larynx closes. Food passing the larynx in the pharynx is prevented from entering the tracheobronchial tree. Without this function, a patient would choke on each swallow. The treatment of patients with suspected carcinoma of the larynx requires an evaluation or upon the exploration of the larynx by an instrument referred to as the laryngoscope. This instrument is introduced into the larynx and the larynx is examined and biopsies taken. At the time of the laryngoscopic examination, a drawing is prepared to mark the extent of the tumor.

An x-ray study may be helpful in many cases called the tomogram or the laryngogram. These are very helpful in assisting to determine the extent of the tumor in many cases.
Aside from surgical treatment, x-ray therapy can be employed with some types of tumors of the larynx and the use of therapy in conjunction with the surgery has been widely accepted as good treatment practice. It has been the accepted procedure in a patient with carcinoma of the larynx in which a partial laryngectomy type of operation is contemplated, to receive preoperative radiation therapy prior to surgery. Following the preoperative radiation, the larynx is operated upon within a 4-6 week period of time.

Laryngeal lesions are frequently associated with metastasis or spread to the regional lymph glands in the neck. With the increased effectiveness of radiotherapy, many of these glands which are not palpable, but contain tumor, referred to occult lymph node metastasis, can be sterilized very effectively with radiation therapy. No surgery is needed for these metastasis. However, if the lymph glands are 2 cm. or larger, it is felt by many authorities that even though preoperative radiation is administered to the lymph glands, surgery should be performed as well. The neck tissues including the lymph glands are removed at the same time as the larynx.

The postoperative course of patients having partial laryngectomy surgery compared to the total laryngectomy patients, the average total laryngectomy postoperative course is approximately 10 days, while that of the partial laryngectomy is 3 weeks. This is because the type of healing process that is necessary following a partial laryngectomy is much more difficult than that following a total laryngectomy.

In summary, the advancement of partial laryngeal surgery, for removal of only a portion of the larynx containing the cancer, has been a marvelous advancement in the treatment of laryngeal cancer. Most authorities feel that 50% of the laryngeal cancers which previously had to be removed by a total laryngectomy, can now be treated successfully with a combination of radiotherapy and partial laryngectomy.

COMPUTERIZED TRANSAXIAL X-RAY SCANNER

(Revolutionary Changes in X-Ray)

COMPUTERIZED TRANSAXIAL X-RAY SCANNER has been in clinical use for about 2 years. The unit works on the principle of tomography, in which the x-ray tube and film move in opposite directions during the exposure. This procedure blurs all tissue shadows above and below the plane of interest and circumvents the problem of superimposition of body structures. During the scan, the profile of the x-ray transmission is fed through a computer and an instantaneous x-ray image is reconstructed on both black and white and color video monitors. The unit has electronic controls which change the characteristics of the image, and video tape recording capability.

It requires approximately 45 minutes to do the examination. The x-ray exposure is about the same as conventional x-rays.

Diagnostic information is now being obtained which was never before possible. Jefferson's unit is capable of doing all parts of the body, but is used most frequently for studies of the brain. The scanners have had a great impact on the diagnosis of disease, general patient management, and medical economics. Risk-laden, technically complex, and costly diagnostic procedures, sometimes requiring lengthy hospitalization, are in some cases eliminated. The computerized transaxial x-ray scan is simple and safe, and in most cases can be performed on an outpatient basis. Repeated follow-up examinations can be easily accepted by patients, because it is a painless procedure. The entire field of Diagnostic Radiology is on the verge of revolutionary changes due to these scanners.

George H. McAnrlde
Technical Administrator
Department of Radiology
Thomas Jefferson University Hospital

DENTAL HEALTH CENTER

Thomas Jefferson University Hospital dedicated its new facility for the Department of Dentistry in November 1975.

The center, which occupies the entire 11th floor in the University's Health Sciences Center at 9th and Sansom Streets, offers a full range of modern dental services to rich and poor alike.

Its staff includes more than 40 dentists and other health specialists.

Dr. Edward Cherkas, director, says that the center can accommodate approximately 1,500 patients per week.

The orthodontic unit of the center is one of the largest in the area and was named to honor the late Dr. Emerson H. Sausser.

The center will be site for many clinical studios and research, according to Dr. Cherkas, and will continue to serve as the Delaware Valley's prime location for the treatment of oral-surgery patients with hemophilia and head/neck cancer.

The center, which offers a one-fee structure for everyone, will be the training ground for students in Jefferson's dental health education program. The program is expected to be expanded in 1977 to include the offering of dental hygienist degrees, and later, a multiple degree program including advanced degrees in stomatology and dental medicine.

The center, which is attractively decorated and offers comfortable waiting areas, is unique and untypical of traditional dental health facilities.

Patients are treated using the "team approach" in which the doctor is the head of the team.

The center now occupies 78,000 square feet of space but there are immediate plans for expansion of the facility, according to Dr. Cherkas.

THE WINGED OX OF ST. LUKE

On Monday, November 24, 1975, a sculpture of the Winged Ox of Saint Luke was placed atop a column between the Orlowitz Residence and the Scott Building on the Thomas Jefferson University campus. The 18-foot column supporting the Winged Ox carries the names of fifty famous men in medicine throughout the centuries, beginning with Hippocrates end with John H. Gibbon, Jr., inventor of the heart-lung machine, and alumnus of Jefferson Medical College in the class of 1927. The Winged Ox was designed by Mr. Henry Mitchell, American sculptor, whose other works include: "Running Free", Drexel University; "Giraffes", Philadelphia Zoo; "Phillips Fountain", Philadelphia Museum of Art; and "The Sower", Provident National Bank. Mr. Mitchell's design was selected by a committee that judged a competition conducted under the direction of Harbeson, Hough, Livingston, and Larson; architects of the Scott Building.

The winged ox has traditionally been identified with Saint Luke, who was, himself, a physician. In describing the sculpture, Mr. Mitchell stated that, seen from an intermediate distance, the column and winged ox suggest acanthus, a symbol of the physician.

The sculpture was obtained by Thomas Jefferson University and placed in its present location in fulfillment of conditions that accompany the assignment of any property through the Redevelopment Authority of Philadelphia. By law, anyone to whom the Redevelopment Authority assigns property, is obligated to appropriate an amount equal to one percent of the total project cost, to artwork and beautification of the site. This requirement applies to the Scott Building and Orlowitz Residence. The cost of the sculpture was budgeted in 1966, at the time work on the buildings was authorized.
SOCIAL REPORT

On December 9, 1975, the Alumnae held their Annual Christmas Party in the Faculty Club of the Jefferson Alumni Hall. There were 39 guests present. Many thanks to Therese Bushek Poli of 1949 for donation of door prizes.

On March 8, 1976, the Alumnae held a Dinner and Auction Sale in the Jefferson Alumni Hall. There were 37 guests present. Proceeds from the auction sale were placed in the general fund. Auctioneer was Mary Ann Stauffer.

The main event of the year with a Bicentennial theme was the Annual Luncheon held May 8, 1976, in the Crystal Ballroom of the Benjamin Franklin Hotel. There were 357 in attendance.

The Graduation Class of 1976 were guests of the association. There were 30 members present.

The 50th Anniversary Class were the guests of the association. Present were: Martha Boyd, Martha Clark, Laura Cross, Marjorie Workinger, Grace Kunhe, Blanche Chedester, Beatrice Bixler, Emma Schaefer, Margaret Pinkerton, Ernestine Rowe, Mayda Maxwell, Pauline Stil, Eleanor Stewart, Josephine Dickerson, Ruth Davis, Mary Breth, Mary Bonenberger, Mary Peterson.

The guests at the head table were: Miss Doris Bowman — Director of the Diploma School of Nursing, Dr. Charlotte Voss — Chairman, Department of Baccalaureate Degree Nursing, Miss Carol Hutelmyer — Director of Nursing Service.

Flowers were presented to the following alumnae: Miss Elizabeth Heaton 1915, Mrs. Elizabeth Miller 1921, Mrs. Ann Craven 1921, Miss Verne Roberts 1921, Miss Helene Weber 1922, Miss Clara Brunner 1923, Mrs. Julie Canster 1924, Mrs. Edith Ogden 1925, Miss Clara Luckinger 1925, Mrs. Marian Briggs 1925.

The flowers at the head table were given to Mrs. Dorothy Freeman, Mother-in-law of Kathryn Francis Freeman class of 1971, who was hospitalized on the day of the luncheon.

Center piece decorations were made by the Pediatric Department under the supervision of Mrs. Marge Tucker — Physical Therapist.

The Social Committee extends their thanks to all members for their continued support and a special thanks to the members who wore Colonial dress on the day of the Luncheon.

The tentative date for the Annual Spring Luncheon for 1977 will be on Saturday, May 7, 1977.

Janet Hindson 50
Chairman
The Scholarship Committee met two times during the year and recommended the following for scholarships. All were approved.

Dolores Hughes (1969) — Fall term of 1975
Eileen Blum (1971) — Fall term of 1976

Respectfully submitted,
Doris E. Bowman
Director
School of Nursing

SICK AND WELFARE COMMITTEE

During the past year there were Alumna members hospitalized at Thomas Jefferson University Hospital. Cards were sent and visits made to all known members.

Jeanette Pfaaster '51
Chairman

BULLETIN REPORT

Those of us who have visited the Graff House where Thomas Jefferson, age 33, wrote the Declaration of Independence, are privileged people. We have read and reread numerous accounts of those famous days during the hot and humid Philadelphia weather. We are very proud to have graduated from an institution of learning and healing bearing the name of such an important statesman, Mr. William W. Bodine, Jr., a former President of Jefferson and presently Chairman of the Board of Trustees, has presented a bust of Thomas Jefferson to the University. This bust may be seen on the first floor of the Scott Library.

Another piece of sculpture, The Winged Ox of Saint Luke, may be seen between the Orolowitz Residence and the Scott Building. This sculpture carries the name of fifty famous men and ONE WOMAN — FLORENCE NIGHTINGALE.

Instead of going back 200 years, lets just take a glance at more recent happenings in the Diploma School at "Jeff". The newer policies allow Males, Marriages and Maternity — not necessarily in that order, however. For further information — be sure to read Miss Bowman's excellent article.

The Bulletin Committee has endeavored to give our sister alumni members and one brother alumni member — varied articles about Jefferson. We have published most of the articles as written, a few were condensed and several pictures were included. May we remind graduates that colored photos do not show up well in this type of black and white publication.

Evelyn Wilson Frazier '34

RESOURCE COMMITTEE OF THE BOARD OF TRUSTEES

Regular Monthly Meetings are held to discuss and report on the Progress of the Campaign. Phase I is finished and Phase II is now in progress.

There are continued discussions and reports on Bequests and Deferred Gifts and the Foundation and Cooperate Relations Program. The Jefferson Medical College Alumni and Nurses' Alumni Association reports are also given at this time.

Betty Piersol '34
Chairman

YOUR SESQUICENTENNIAL CAMPAIGN

One Hundred Fifty Plus Two

Our accomplishments — 1975 and 1976:

Last year's picture "Demolition of Buildings" is changed in this year to "Building of Buildings". This has been possible only through the work, interest and giving of each one individually, but united in the total picture. This is not only the frame work of the Jefferson look, but the frame work to new education for the improvement of Health care and the advancement of medical science and knowledge. It is also a peak into the twenty-first century, when most of the people entering into the Health Educational Fields today will be offering their services and caring for our lives. It is these students who will be educated here and will take from the frame work the ability and knowledge to cope with the next century's problems. All these things arise only with our basic and continued direction and commitments to make it possible.

The new building north of Locust Street, between 10th and 11th Streets, is finished. It is beautiful. It is also a self-supporting 410 car garage — but more than this — it is a magnificent pedestrian esplanade to connect Jefferson Alumni Hall, the Scott Library, the Martin Nursing Home, and the Orolowitz Residence Pavilion. It is a comfortable open area in which to relax in the center of our University. It is also the foundation on which to build additional stories when needed for educational purposes.
The southeast corner of Walnut Street is the nearly completed university student housing building. It is also self-supporting and consists of efficiency to three-bedroom apartments and adds greatly to the overall appearance of the university.

The great new building arising on the entire city block between 10th and 11th Streets is Jefferson University's new replacement hospital. This nine story complex will feature two enclosed central courts which will bring beauty and country to our patients and to the center of the city. The hospital will be connected to the existing Foerderer Pavilion by bridges at each level. The majority of the rooms will be private, with the remaining rooms semi-private. The traditional nursing stations will be replaced by nursing command posts serving 8 to 16 beds with patient care.

The facility was designed with efficiency as a prime consideration, since with efficiency comes economy. Each in-patient floor is largely self-sufficient — with self contained administrative, diagnostic and medical surgical units. Therefore, patients can be admitted, treated, and released on the same floor.

The new hospital will be headquarters for the clinical education of future students in the Medical College and College of Allied Health Sciences. The goal of the new hospital is to provide a total range of patient care and professional clinical education without requiring the patient, the professional or the student to leave the facility to receive, administer or observe this care.

I wish to again thank all the workers and donors who have given of their time and money to support your hospital and Thomas Jefferson University. Each in-patient bedroom apartments and adds beauty and country to our city. The southeast corner of the building is Jefferson University's new replacement hospital.

This has been another busy year in the Alumni Office. There were 2075 letters mailed to graduates for the Alumni Giving, and the same number for the Annual Luncheon, May 8, 1978. Also approximately the same number of mailings for the University activities for 1975 and spring of 1976.

It is really very important that all graduates send in their change of address and change of name to receive information and the activities of the Alumni Association and University. I wish to thank the anniversary classes for sending addresses of their classmates, that we had no record of for several years, nice to have them back on the Alumni files.

We would like to complete the collection of Graduating Exercises Programs for the Alumni Association records. The Programs missing from the collection: 1941 — 1947 — 1950 — 1964.

We have received programs for 1949-1951. We thank the graduates for sending them to the Alumni Association. We have a special portfolio for the Programs.

If any Alumni has in her Possession one of these Programs and would like to give to the Association, or if you want it returned we will make a copy and return the original to you.

I am in the Alumni Office on Tuesdays, 10 to 4, of each week. The Alumni Office is on the Mezzanine Floor of Jefferson Hall, 11th and Locust Streets, Room M-2, Telephone No. 829-6881.

Martha E. Riland
Clerk-Typist

RESUME OF MINUTES OF ALUMNAE ASSOCIATION MEETINGS

September 9, 1975
14 members present.
1. Recommendation was approved that — Miss Joni Bender, Freshman student nurse be given a Student Scholarship.

October 14, 1975
22 members present.
Recommendations were made and approved as follows:
1. That Deidre Blank represent the Alumnae Association at the P.N.A. Convention.
WAYS AND MEANS COMMITTEE REPORT
May 31, 1975 — May 31, 1976

Thank you once again for your generous giving and continued support to your Alumnae Association. The contributions to the Relief Fund, Scholarship and General Fund brought the total amount to $5,711.00. All contributions received after May 31, 1976 will be acknowledged in the Alumnae Bulletin for 1977.

Following is a list of contributions according to classes:

1909 - $10.00
1914 - $10.00
Marguerite Barnett
1915 - $35.00
Elizabeth Heaton
Mattie Turner
1916 - $10.00
Frances Pangburn
1920 - $25.00
Anna Tiege
1921 - $75.00
Jennie Katz
Mary Hays
1922 - $100.00
Helena Walter
Grace Troutman
1923 - $38.00
Pearl Bausell
Ruth K. Thompson

In the state of California, I feel capable of offering an objective study, and feel it is time that a counterpoint be offered.

There are, I am sure, those facilities which have warranted the published criticism; however, they are few and it is not in the general interested to make blanket remarks and falsely generalize the charges against a few to make them appear to be an indictment of all such health care units.

The public is not aware of the services available in modern convalescent hospitals, which have had a rapid growth in the past decade. Those of us who have been associated with their growth have striven to achieve a high level of professionalism as well as a high quality of patient care. We take pride in this occupation and its accomplishments. Geriatrics is becoming a recognized specialty like pediatrics and orthopedics.

The employees are fully qualified and have had all the same academic background as required for all licensed personnel. Other employees are trained in the care they render to our patients. As in other fields, no one can do a good job if not personally suited and interested in this type of patient care. Therefore, only those who genuinely care are usually found administering to our senior citizens.

All those who have had previous experience with these health care units are aware of these facts, I'm sure. To those who are not, it is hoped that they have not already formed an opinion of what our hospitals are without suitable research.

In past years, most of the patients in these units had been quite terminally ill and beyond any hope of improvement or cure. Not so in recent years. We now see more people accepting these facilities and recognizing the need for them. Consequently patients who are not so ill are more frequently seen as well as those who come for brief periods to convalesce.

The units are prepared to administer skilled nursing care of many types excluding detailed diagnostic work—intensive care-type nursing as well as surgical needs. Nurses work closely with physicians to ensure proper care, and maintain a close relationship with families.

In the last few years, the proper action should follow. But do not damage the fine reputation our facilities now enjoy as well as the sincere people who staff them.

We are proud of the excellent care we administer to our patients. And, happily, society is now accepting our units and recognizing the need for our services.

NEW MEDICAL TRAINING PROGRAM

Debra A. Freeman, a resident of Ridgefield, and a professional representative of Pfizer Laboratories Division, Pfizer, Inc., recently completed a sophisticated medical information program at the company's New York Training Center.

The course represents the final phase of a four phase, 21-week training program which Pfizer created to insure the greatest flow of pharmacological product information to doctor, pharmacists, and other medical personnel.

Pfizer's centralized, self-instruction learning facility in New York features an advanced multi-media system. It permits students to proceed at their own pace in assimilating extensive medical and product information, and speeds learning while significantly enhancing information retention.

According to Ralph Kaufman, Director of Manpower Training and Development. "The new system standardizes the knowledge our professional representatives receive; lets them gain knowledge and skills at their own rate— they all learn regardless of prior training and skills; learning and retention are maximized; and even dry subjects generate high interest because of the nature of the program."

Kaufman also notes: "Based on our experience, retention of knowledge via the new system appears to be greater than that achieved by straight programmed instruction."

Debra Freeman will now join the ranks of Pfizer's nation-wide corps of highly trained professional representatives, which is the primary channel of information between the diversified pharmaceutical company and America's health care team.

IN DEFENSE OF NURSING HOMES

EVENING TRIBUNE—San Diego, Thurs., April 10, 1975

By TERRY LAMBRETH—Class of 1962

In recent months, many articles have been written regarding conditions in convalescent hospitals and other related health facilities.

It is my sincere opinion that these items have a poor connotation and grossly underrate the quality of care which is rendered in these institutions. Without any doubt, it is certain to depict a very grim picture to the public.

Having been professionally involved with these types of institutions for the past eight years, in several areas,
Ontario, to the west by Saskatchewan and lastly to the north by the Northwest Territories. Its name is truly Manitoba, not Manitoba or Manitoba and Winnipeg as some of our United States may think. Yes, it is a long way from home — 1,750 miles from Philadelphia.

The Sunday we left home was a cold, bitter, rainy day. The weather was so bad that we had to stop several times to adjust to the lack of road vision. This was in Pennsylvania, no less; and we were headed for a colder country. The trip lasted for 4½ days with stops in Ohio, Illinois, Minnesota and North Dakota. By the time we had reached Grand Forks, we knew we had chosen one step away from what must be the Arctic! The temperature was well below zero and there was plenty of snow.

Finally, the big day arrived; it was Thursday, January 27, when we reached the border at Emerson, Manitoba. Customs detained us for about 1½ hour, and then we were off for the last 60 miles of our trip.

Gradually, weather conditions changed. The temperature dipped to —30° Celsius (or minus 20°F) and there was four feet of snow on the ground. Most of the snow was blowing quite heavily. We had trouble seeing the road on the way to Winnipeg and there was a deep ravine on either side of the road. Get the picture?

Arriving safely and rolling into the city around noon, a cosmopolitan city lay in front of us blanketed with a white winter covering of snow. The common occurrence of subzero temperatures with additional blankets of snow was a routine sight for the next two months. Long thermal underwear was the fashion rage for this time of the year.

Now that we had reached the city, our first task was to find temporary lodging. We spent the next four days in an efficiency motel. These four days were quite hectic and looking for a suitable apartment, meeting Michael’s boss and just trying to entertain ourselves.

Sunday proved to be fruitful. We had found the apartment which was to be our new home while in Winnipeg. With all the activity and traveling before we left for Canada, it was great to once more have a place to call our own — even if we waited four weeks for our furniture to arrive. Have you ever slept in a sleeping bag for four weeks? I wonder if that’s some kind of record?

Meanwhile back to the reality of work, Michael was adjusting to his new position as a research scientist. The physiology department at the University of Manitoba’s Health Sciences Center is one of the largest and the best of its kind in Canada, and as a result it attracts people from all over the world. We have met people from Australia, Tanzania, Switzerland, Spain, Japan, Germany, China and many other parts of the world. The fun part is tasting the specialty foods from the various countries.

Ethnically, Winnipeg is diverse: Ukrainian, French, Greek, German, Chinese, and native Indian are represented, to name a few. The province of Manitoba reflects a rich, cultural mosaic because of this diversity.

Physically, Winnipeg has a population of over 500,000 people with another 500,000 people comprising the rest of the province. The total population of Manitoba is about one-half the size of Philadelphia. The landscape is comparatively flat. One of the province’s outstanding features is the many and beautiful lakes where fishing is not only a luxury, but also a way of life for many of the northern people.

Because of the various cultures and the expansive terrain of Manitoba, its needs are very unique. Its people are just as unique. Because of this, nursing in such a province is quite diversified. Although the urban areas have their hospitals, much of the nursing in Manitoba is done in northern nursing outposts — a team of one to four nurses with a two to bed unit. Some areas attended by nurses can only be reached by air.

Fortunately, although some customs are different, the principles of nursing here are the same.

1966 Jane Murphy Skurecki, Baby Boy.
1966 Christina Thompson Ford, Baby Boy.
1967 Jane Kazolis Kriebel, Baby Boy.
1967 Joan Heaton Hampf, Baby Boy.
1968 Elizabeth J. Masten Cahall, Baby Girl.
1968 Margaret Brown Kern, Baby Girl.
1968 Dolores Curnlish Brown, Baby Girl.
1969 Margaret Brown Kern, Baby Girl.
1968 Elizabeth J. Masten Cahall, Baby Girl.

In Memoriam

Dr. Peter A. Herbut, President of Thomas Jefferson University, died suddenly March 31 at his home in Rosemont, Pennsylvania. He was 63.

Inaugurated as President of Jefferson Medical College on May 3, 1967, Dr. Herbut announced plans for full university status and saw these come to fruition when Jefferson was reorganized as Thomas Jefferson University on July 1, 1969.

Dr. Herbut devoted the years of his presidency to the growth of Thomas Jefferson University as a health-related, medically-oriented institution, comprising a College of Allied Health Sciences and a College of Graduate Studies in addition to Jefferson Medical College and Thomas Jefferson University Hospital.

An internationally recognized pathologist, Dr. Herbut has written four textbooks in pathology and more than 100 scientific papers.

Born July 6, 1912 in Alberta, Canada, he received his medical degree in McGill University in Montreal in 1937. He completed internships in Montreal and in Wilkes-Barre, and a residency at Medical College of Virginia in 1938-39. He joined the faculty at Jefferson as Assistant Professor of Pathology in 1939. Later, he served as Professor and Chairman of the Department of Pathology from July 1, 1948 until his inauguration as president.

Over the years, Dr. Herbut held office in more than 25 professional organizations. He was awarded honorary Doctor of Science degrees by the Philadelphia College of Pharmacy and Science in 1968, and by Washington and Jefferson College in 1974.

Other honors he received included the McCrae Award by the Jefferson Society for Clinical Investigation, the American Society of Clinical Pathologists Ward Burdick Award, and the Schaffrey Award by the medical alumni of St. Joseph's College.

Upon hearing the news, Dr. John V. Templeton, president of the Jefferson Medical College Alumni Association, said, "We have lost not only a president, but also a devoted and beloved friend."

Dr. Herbut is survived by his wife, the former Margaret Finkos, two daughters, Mrs. Linda Foulkrod, and Paula Herbut, and three grandchildren.
Katherine Childs graduated from Trinity College, Texas, after which she entered Johns Hopkins School of Nursing. After graduation in 1926, she spent five years with the Presbyterian Board of Foreign Missions in Iran. On her return to the United States, she joined the staff of Lake Forest Hospital, Chicago.

Later she moved to Barnes Hospital in St. Louis where she first met Miss Helen McClelland, who prevailed upon her to come to Pennsylvania Hospital, Philadelphia, as Assistant Director of Nursing Service in charge of the women’s building. She held this post for fourteen years.

Miss Childs left this position to head the School of Nursing and Nursing Service at Jefferson Hospital, Philadelphia. Her forward-looking approach to the education of nurses was very much evidenced throughout Pennsylvania.

After six years at Jefferson, she then went on to Easton Memorial Hospital, Maryland, where she remained as Director of Nursing until her retirement. While here she saw the hospital enlarged, the nursing school enrollment increased and she was responsible for having the school accredited by the National League for Nursing.

Katherine Childs combined energy, intelligence and unwavering strength of purpose with the personal magnetism and gentleness of character which made her so warmly loved and respected.

Katherine Childs, Honorary Member of the Jefferson Nurses Alumni Association, died January 22, 1976.

HELP US — HELP YOU

Want to help your Alumni Association save money? We try to keep up to date, but with nearly 3000 active addresses, it is a really big job.

The Postal Service returns every piece of Alumni mail that is not delivered; this costs us money, and the cost of returned mail may soon double.

Here is how you can HELP US - HELP YOU!

Advise us if there has been any change whatsoever in the address we are currently using. Also send us the address of a classmate or friend who is not receiving mail from the Alumni Association.

Name .................................................................................. Class Year ........
Old Address:
Street .................................................................................. City ...................... State ...... Zip Code ........
New Address:
Street .................................................................................. City ...................... State ...... Zip Code ........
CLASS ADDRESS LISTS
Class address lists will be available from the Alumni Office Clerk-Typist at a charge of $2.00 per list. Enclose a long self-addressed stamped envelope.

ALUMNI BULLETIN
The Alumni Bulletin will be sent automatically to all Association members; individuals who are not Association members may obtain a copy of the Bulletin upon request at a cost of $3.00 per copy. An order form will be mailed to all graduates in the Spring of 1977.

MAIDEN NAME — YEAR OF GRADUATION
Whenever you have occasion to write to your Alumni Association, please use your first name, maiden name, then married name, and the year you graduated.
EXAMPLE: JANICE SMITH GREEN — 1972
Mrs. John Green makes it very difficult for the Association to locate your card in the files. You are urged to notify the Secretary of the Alumni Association of any corrections, marriages, deaths, or changes of address. Please help us keep errors at a minimum and our files accurate.

CAP CHARMS
Jefferson cap charms are available in sterling silver and 14 carat gold. For information please write Betty Piersol or Margaret Summers, 1002 Spruce Street, Philadelphia, PA 19107.
