## REGULATIONS.

The Session commences on the second Monday of October.

The examinations are so arranged as to permit the Commencement for conferring degrees to be held as early in March as is practicable.

There is likewise an examination of candidates for graduation during the first week of July. The degrees are conferred on the candidates, who are successful at this examination, at the annual commencement following.

The candidate must be of good moral character, and at least twenty-one years of age.

He must have attended two full courses of lectures in some regular and respectable medical school, one of which shall have been in this College, and must exhibit his tickets, or other adequate evidence thereof, to the Dean of the Faculty.

He must have studied medicine for not less than three years, and have attended at least one course of clinical instruction in an institution approved by the Faculty.

He must present to the Dean of the Faculty a thesis of his own composition, correctly written, and in his own handwriting, on some medical subject; and exhibit to the Faculty, at his examination, satisfactory evidence of his professional attainments.

The degree will not be conferred on any candidate who absents himself from the public Commencement without the special permission of the Faculty.

Clinics will be held during the spring and summer; and every Wednesday and Saturday in the month of October, and during the course, medical and surgical cases will be investigated, prescribed for, and lectured on, before the Class. During the year ending March the first, 1861, a vast number of cases received treatment. The surgical operations performed amounted to above 300, and included amputation of the leg; various plastic operations; extirpation of the mamma and tonsils; lithotomy; tenotomy; operations for cataract, harelip, ankylosis, hernia iridis, staphyloma, and hydrocele; for the removal of hemorrhoids and tumors of various kinds; for the ligation of arteries and for varices; for fistula in ano; for strabismus and ununited fracture, caries and necrosis; for stricture; for dislocations and fractures, &c. &c.

The hours of attendance at the clinic of the College are so arranged as to permit the students to attend, every Wednesday and Saturday, the clinics held at the Pennsylvania Hospital and the Philadelphia Hospital. Professor Pancoast is one of the surgeons of the former; and Professor Gross of the latter. At both these institutions, the advantages are great for the practical observation of medical and surgical cases.

On and after the first of October, the dissecting-rooms will be open, under the direction of the Professor of Anatomy and the Demonstrator.
