# Leading the Horses to Water They'll Want to Drink: Strategies for promoting your Institutional Repository on and off campus

**Dan Kipnis**

**Senior Education Services Librarian**

**Manager of Jefferson Digital Commons**

**Twitter: #MDIRday2011**

# DIGESTIVE TRACT

Absorbtion takes place in the stomach, small intestinal tract and the large colon. You can see the absorbtion veins leading from the tracts and back to the liver. These veins are blue on this diagram.

After food has been filtered by the liver, It move into the hapatic portal which takes it to the heart to feed your blood cells.

After absorption, the food is taken directly to the liver, via the portal vein, to be cleansed.

The waste product from the liver is sent to the gull bladder for disposal by being stored as bile until new food passes from the stomach to the duodenum.
Once food is detected in the duodenum, bile is added to break food down into a liquid, ready for absorption.

The pancreas also secretes enzymes into the duodenum at the same time that bile is added to help break down food.

Soluble fibre absorbs the waste from the liver as well as cholesterol from new food therefore preventing these undesirables from being re-absorbed in the intestinal tracts..

Insoluble fibre does not break down into a paste until it reaches the large intestinal tract. Here is where it encourages the growth of the colon's natural flora..

# JDC homepage

# Service & Solutions

# Define your goal

- What are you after?
- Develop your message
- It is about your community-not you
- Solve a problem
- Look for need
- Create a brand
- Commit yourself and more forward

# We want to start an IR, but…

- We have no staff
- We lack technology skill set
- We have no time

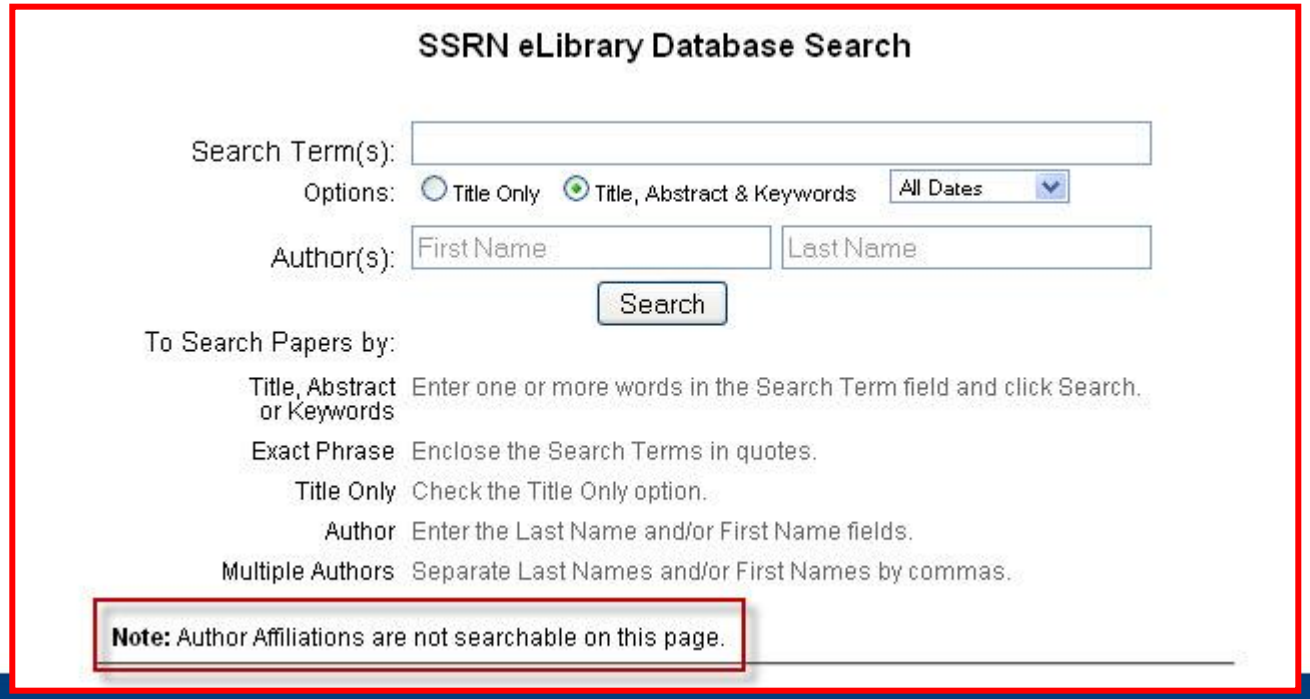
# Solutions

- Use student workers for scanning and loading
- Use your technicians and paraprofessional staff (new skills)
- Outsource technology (servers, design etc.)
- Many libraries are hiring scholarly communication and data librarians

# How is your IR different from what already exists?

**Social Science Research Network (SSRN) or (Legal Scholarship Network)**

**Levels of promotion—SSRN favors individual to institution**



# Permanency of links and identity

**http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1722155**

**vs.**

**http://jdc.jefferson.edu/cardiologyfp/9/**

# What solutions are you providing?

- Increased exposure to a global audience
- Branding flexibility
- No ads
- SEO
- Monthly statistics
- Free to users
- File flexibility, version control, editorial control
- Stability (permanent URL)
- University Press (Jefferson Journal of Psychiatry)

# Methods of Promotion

# Methods of promotion

- Workshops:

  **Take Advantage of the Jefferson Digital Commons for *Shameless Self-Promotion* Increasing Your Research Impact with the Jefferson Digital Commons**

- Email outreach (Scopus search to gather faculty citations)
- Seek out invitations to speak at departmental staff meetings
- Elevator speeches-develop your talking points
- Social Media (Facebook, Twitter etc.)
- You must offensively advocate
- Toot your horn

## Jefferson Digital Commons Posts 1/2 Million Downloads

The Jefferson Digital Commons has just passed the 500,000 download milestone as campus participation continues to grow.

The Commons now offers over 3,300 articles, presentations, historical works and other documents, with participation by over 50 Jefferson units. Services include:

1. Management of local conferences
2. Publication of departmental journals and newsletters
3. Archiving of scholarly articles
4. Archiving of presentations and lectures (images, posters, audio files, video files)
5. Data curation and preservation to meet NIH requirements
6. Preservation of departmental historical documents
7. Personal researcher pages
8. Inclusion of documents into Google and other search engines

# Reddit-What is new and popular on web

# Additional methods of promotion

- Emailed all 840 residents and fellows
- Outreach to postdocs (presentations and emails)
- Presentations at faculty retreats
- Flyers with paychecks
- Wine and Cheese (food always works)
- New faculty orientation presentations *
- Posters in library and out in high traffic areas
- Events (Open Access Week-Oct 24-30, 2011)
- Brochures
- Articles in campus publications

# Train your staff!

- They will help with outreach and recruitment
- Example:  Our Medical Media Services department (create posters, videos, etc. on campus)

  They send me conference posters that they produce for loading into the JDC
- Anyone on the front lines can help promote your IR
- Teach them your talking points

# Work with your public affairs/PR office

- They send out press releases
- Can your links appear in their press release?

# Some Numbers

# International Survey of Institutional Digital Repositories 2010

- 56 institutions surveyed from 11 countries (USA, Canada, Australia, Germany, South Africa, India, Turkey etc.)
- Published by Primary Research Groups (http://bit.ly/f70juo)
- 73% of IRs linked to college website
- Only 1.69% had link to iTunes
- None had link to YouTube site or channel
- Only 8.47% had blog for IR
- 39% had brochure
- Only 13.56% published an annual report

# International Survey of Institutional Digital Repositories 2011

- 15.79% of repositories have an E-publishing program through which they publish monographs or books in either a print or digital format that might not have been initially published elsewhere
- Nearly 58% archived digital images, a practice most common in the USA, especially among research universities.
- A mean of 32.3% of visitors to the repositories are from the repository's own institution

# International Survey of Institutional Digital Repositories

- Mean number of press releases sent out by IRs in sample was less than 2 and the median was 0.  Range was 0-20. (Press releases seen as popular method for raising profile in developing world)

- Confusion about marketing IRs (to own faculty vs. other scholars and worldwide parties)

- Cost of report $89.50

Source: Primary Research Group, ISBN 1-57440-161-0

# Questions from the survey

- Who contributes to the repositories and on what terms?
- Who uses the repositories?
- What do they contain and how fast are they growing, in terms of content and end use?
- What measures have repositories used to gain faculty and other researcher participation?
- How successful have these methods been?
- How has the repository been marketed and cataloged?
- What has been the financial impact?
- Data is broken out by size and type of institution for easier benchmarking.

# Elevator Speech

# Your elevator speech

- What you need:
  - Grabber
  - Name
  - Value Proposition
  - Unique Elements
  - Call to Action

*Method from Michaelhschaefer.com*

# Grabber

- Consultant:
  - I keep your company out of Dilbert's comic strip
- Librarian
  - I am the original search engine
  - You talk, we listen
  - I'm your secret weapon to impress your supervisor

# Value Proposition

- Do you solve a problem or need?
- Are your benefits unique?

Volvo:

safety

McDonalds:

consistency

FedEx:

On time delivery

IRs:

Research ubiquity and Preservation

# Unique Elements

- Librarians help save time by loading content
- Researchers save lives by dispersing research
- Help find grant money and collaborators by sharing your research

# Call to Action

- Is there something you are requesting from your listener?
- What is in it for the listener?
- Make your elevator speech your own
- Seek a connection

# Putting it together (30 seconds to 2 mins)

**Grabber: Dr X, Let me distribute your research to the world.**

**Name: Hi I'm Dan Kipnis and I manage the Jefferson Digital Commons the digital archive of the University.**

**Value Proposition: Let me archive your published articles, videos, PowerPoints, conference posters in the JDC.**

**Unique elements: Email me your content and I'll load it for you, provide you with monthly email statistics and make your work findable on the web.**

**Call to action: Let's get all your research and scholarly works out to a global audience. Here's my card, email me.**

# Search Engine Optimization

# SEO = Search Engine Optimization

- Create inbound links
  - (Facebook, library blog, wikipedia, twitter)
- Use rich descriptive text when adding content
  - Try to use logical descriptive prose
- Update regularly

# More persuasion

# Incentive?

# Vanity?

# Faculty want

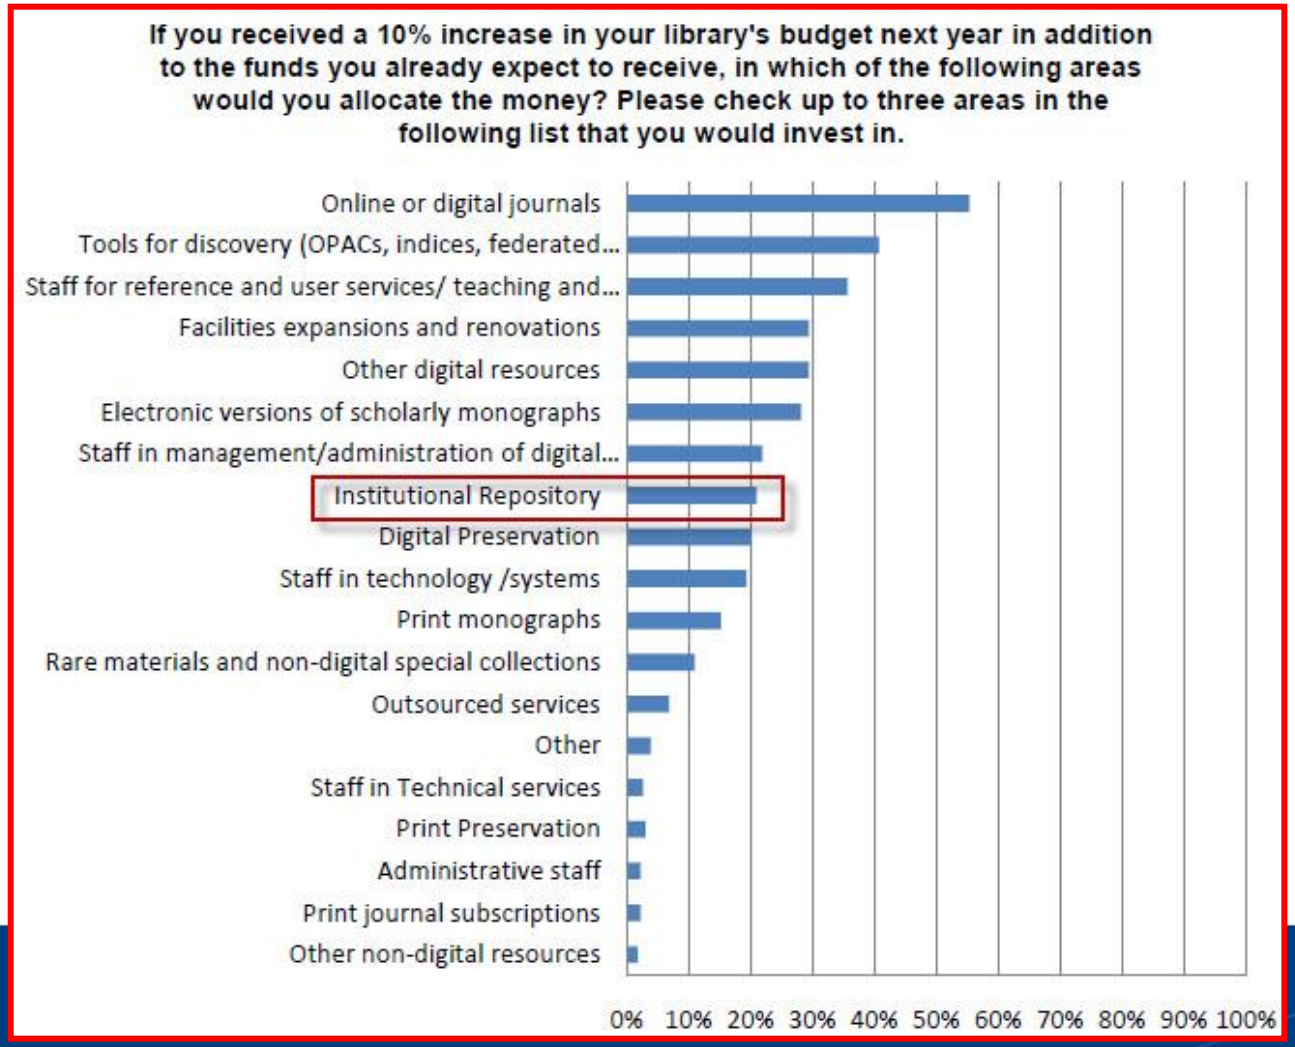
- Visibility
- Citations
- Respect
- Funding

# Use statistics for persuasion

- **Over 30% of surveyed faculty in the United States now use a "general-purpose search engine" as the starting point for their research. Over 70% of faculty responded that they use Google or Google Scholar often or occasionally to find information in academic journals. The Jefferson Digital Commons will index your scholarship increasing visibility to a global community that relies on Google, Google Scholar and other search engines for their research.**

**Read the full report by Roger C. Schonfeld and Ross Housewright at: *http://www.ithaka.org/ithaka-s-r/ research/faculty-surveys-2000-2009/***

# Ithaka S+R Library Survey 2010-Insights from U.S. Academic Library Directors (n=239)



Jefferson

# Library Directors see key functions for IR

- Directors with an IR, 53% see providing open access to materials as the key function of their repository.
- Much higher from institutions with doctoral institutions (66%)

# Where do you start your search for information?

- 87% google, 10% other search engines, 3% wikipedia
- 0% library portals

Source: http://www.davidleeking.com/2011/03/31/no-one-starts-at-your-website/

King references: OCLC ***Perceptions of Libraries, 2010: Context and Community***

# Increased citation rates = tenure

- Relative increase of citation rate for open access vs. toll articles has been measured:*
  - Biology 49%
  - Political science 86%
  - Electrical & electronic engineering 51%
  - **Clinical medicine 193%**
  - Mathematics 91%

*Data from: Antelman, Kristen. Do Open-Access Articles Have a Greater Research Impact? College and Research Libraries, 65(5), 372-382. September 2004. http://eprints.rclis.org/bitstream/10760/5463/1/do_open_access_CRL.pdf

# The power of word of mouth

- “great..thanks Dan..I'll try to send other colleagues..*”

Response from faculty member after asking them to contribute additional scholarship and helping to spread the word with colleagues

*Presenter has highlighted word

# Tell stories to help promote your IR

- 2011, Neonatologist from Harvard wanted to link to video from JDC for her teaching resource workshop on teaching others how to design a teaching session for MedEd PORTAL.
- 2008, a request came from Dr. Stephen Whitney at Rice University to include an article he found in the JDC in a print CoursePack for approximately 40 students enrolled in his MBA management course.
- 2006, Oxford University has linked to our Resident as teacher: developing skills for bedside teaching on ward rounds videos

# Patrons love finding info

Dear Mr. Angelo,

We were able to pull up the entire 1900 yearbook to my computer and found the information which mentions Dr. Jones. **We will download and copy the book for our personal use.** My husband is the grandson of Dr. X X and is thrilled to have that information. Thank you very much for your help and prompt reply. Also a special thank you to X X who was so very helpful.

Most sincerely, X X

### ABSTRACT

Introduction:

Opioids are the mainstay of post-operative pain management and may produce side effects that impact patient recovery. Use of Extended Release Epidural Morphine (EREM) has been shown to result in significantly less average morphine usage and to have superior analgesic efficacy than other modes of post-operative pain management. The purpose of this retrospective review was to compare the incidence and onset of side effects of EREM and other post-operative analgesic regimens.

Method:

This was a retrospective, IRB approved analysis of 206 randomly selected patients receiving unilateral hip (THA) or knee arthroplasty (TKA) between January 2007 and July 2007. 139 patients received lower than recommended doses of EREM. 87 received one of the following analgesic regimens: patient controlled analgesia (PCA) with fentanyl, intrathecal (IT) morphine and fentanyl PCA, indwelling epidural catheter with 0.2 % ropivacaine and fentanyl PCA, or femoral nerve block (FNB) and fentanyl PCA. The incidence of opioid side effects on post operative day (POD) 0, 1, & 2 was recorded. Nausea/vomiting and pruritus were identified by the administration of treatment medication. Time interval between spinal, CSE, or EREM administration and first dose of side effect treatment was also noted. Standard error of the mean (SEM) and two tailed ANOVA with $\alpha=0.05$ was performed on average time to first dose of treatment between groups of analgesic modalities.

Results See Tables 1 and 2

Discussion:

All analgesic modalities produced peak side effects on day zero which then declined over the next 24 hours. The occurrence of side effects was reported by a request for treatment. The intensity of side effects was not graded. Hence the incidence of side effects may appear higher than reported. Although EREM produced more side effects than some other modalities it had a similar profile to the IT morphine with fentanyl PCA group. The majority of patients responded to a single rescue dose for nausea and pruritus. No patient in any group experienced respiratory depression requiring an opioid antagonist. ANOVA analysis showed no statistical significance in the time to rescue between the analgesic groups. Overall, THA had higher incidence of side effects than TKA.

Conclusion:

Analgesic efficacy must be considered when evaluating side effects. Other studies have demonstrated superior analgesic efficacy with EREM. While EREM may have a higher side effect profile than some treatments, the impact may be minimal compared to the benefits of better analgesia and a reduction in risks related to other more invasive modalities. Overall, the side effects of EREM responded to one rescue dose, supporting minimal patient discomfort and use of healthcare resources.

### Introduction

- Pain Control following total joint arthroplasty (TJA) remains challenging and often requires opioid analgesics.
- Opioids have side effects that may affect patient recovery
- Use of Extended Release Epidural Morphine (EREM) has been shown to reduce average supplemental oral/IV opioid morphine equivalent usage .
- EREM has also been shown to have superior analgesic efficacy over other modes of post operative pain management -5

### Method

- Study consists of 206 randomly selected patients receiving total hip arthroplasty or total knee arthroplasty between January and July of 2007.
- Patients were chosen based on different postoperative analgesic modalities:
- Patient information was extracted from medical records and gathered in a database.

| Hip (n=) | Knee (n=) |
|---|---|
| 1. EREM 15 mg | 1. EREM 15 mg |
| 2. EREM 10 mg | 2. EREM 10 mg |
| 3. Epidural Infusion (ropivacaine 0.2% with fentanyl PCA | Epidural Infusion (ropivacaine 0.2% with fentanyl PCA |
| 4. Fentanyl PCA | 3. Single Injection femoral nerve block and fentanyl PCA |

- Incidences of side effects were recorded on post operative day zero, one, and two.
- Side effects were determined by administration of treatment medications.
- Time interval from spinal, combined spinal epidural, or EREM to first dose of side effect treatment was recorded.
- Side effects recorded include:
  - Pruritus
  - Nausea/vomiting
  - Respiratory depression

### Discussion:

- All modalities produced peak side effects on day zero, which declined over the next 24 hours.
- Intensity of side effects was not graded, hence the incidence of side effects may appear greater than expected.
- EREM had a similar side effect profile to IT morphine with PCA.
- Majority of patients responded to a single rescue dose for pruritus and nausea.
- No patient in any group experienced respiratory depression requiring pharmacologic intervention in this study.
- Opioid related side effects associated with EREM were similar to other analgesic modalities and generally responded to single-dose treatment.

### Conclusion:

- Given the previously demonstrated efficacy of EREM and a side effect profile similar to other modalities, EREM may offer greater patient comfort and reduce utilization of healthcare resources.

Home > *Russell* journal

*Russell* is devoted to the study of all aspects of Bertrand Russell's thought as well as his life, times and influence. In addition to original research and reviews of new books, *Russell* publishes new texts and textual studies, discussions, bibliographies, indexes, and archival lists. Scholarly articles submitted to the journal are peer-reviewed twice anonymously. *Russell* is not the organ of any association or institution.

*Russell* is published by McMaster University's Bertrand Russell Research Centre with the assistance of grants from the Aid to Scholarly Journals programme of the Social Sciences and Humanities Research Council of Canada and from McMaster's Faculty of Humanities.

**Note:** Access to issues from 2008 to date is by subscription. *Russell* (ISSN 1913-8032) was founded by McMaster Library in 1971 as a quarterly, and until 1980 it was numbered by cumulative issue number. A new series was begun as Vol. 1, no. 1, in Summer 1981. Here the old series is assigned (for technical reasons) to Vols. 91-100.

# JEFFERSON DIGITAL COMMONS EXCEEDS HALF A MILLION FULL-TEXT DOWNLOADS!

## Extends Jefferson publications to a global community

### FREE DIGITAL ARCHIVE FOR JEFFERSON AUTHORS

The Jefferson Digital Commons (JDC) is the free digital archive for articles published by Jefferson authors, Jefferson-sponsored journals, and historical materials from the University Archives and Special Collections. The goal of the Commons is to enhance the visibility of Jefferson scholarship and to promote Jefferson authors.

The Jefferson Digital Commons has helped your colleagues find your publications over 500,000 times. Researchers from 98 unique countries have found your items in the JDC, extending your research to a global community. In addition, all major search engines including Google, Yahoo and Bing have indexed JDC records, making your research easily accessible.

### JEFFERSON DIGITAL COMMONS CONTINUES TO GROW

Includes 3,300+ records

Among the more than 3,300 records are:

- Podcasts
- Articles
- Videos
- Conference recordings
- Historical collections from Scott Memorial Library University Archives including the entire archive of the JMC Alumni Bulletins
- Jefferson created peer-reviewed journals
- Campus newsletters

aisr Connections

*Orientation Issue*
*Academic Year 2009-2010*

*Your connection to knowledge resources and educational technology at Jefferson*

*The mission of Academic & Instructional Support & Resources (AISR) is to strengthen the educational, research and clinical activities of the Jefferson community by providing knowledge-based information, developing and managing instructional technologies and content, supporting and managing campus classroom technologies, and providing leadership in scholarly communication and publishing.*

## Jefferson Digital Commons: Digital Archive

**http://jdc.jefferson.edu**

The Jefferson Digital Commons (JDC) is the free digital archive for articles published by Jefferson authors, Jefferson-sponsored journals, and historical materials from the University Archives and Special Collections. Since 2006, the JDC has had over a quarter of a million full-text downloads. The goal of the Commons is to enhance the visibility of Jefferson scholarship and to promote Jefferson authors. Articles deposited in the Commons are indexed by Google, Google Scholar, Yahoo, Scirus and other major search engines, thereby extending the influence of your work and encouraging additional citations. Join the growing number of Jefferson authors who have their work freely available online.

*10 reasons to participate in the Jefferson Digital Commons:*

1. ***Free:*** The Jefferson Digital Commons can help share your research with the world via the World Wide Web. There is no cost in depositing materials.

2. ***Scott Memorial Librarians:*** Librarians will help with your copyright questions.

3. ***Exposure on the web:*** All files are indexed by common search engines. In 2008, a request came from Dr. Stephen Whitney at Rice University to include an article he found in the JDC in a print CoursePack for approximately 40 students enrolled in his MBA management course.

4. ***Statistics:*** Receive monthly email alerts indicating the number of times your files have been downloaded. For example, the article "Pathophysiology, diagnosis, and treatment of spinal meningoceles and arachnoid cysts" has been downloaded over 2,400 times since inclusion in the JDC. Increased visibility translates into higher citation rates.[2]

5. ***University Press:*** Create your own online e-journal, such as the *Jefferson Journal of Psychiatry* [**http://jeffjpsychiatry.jefferson.edu/**]. Or post your departmental newsletter, annual report, lectures, conference proceedings etc.

6. ***File flexibility:*** The Jefferson Digital Commons supports a variety of file types including: Word, PDF, images, video clips, sound segments, data sets and PowerPoint files.

7. ***Version control:*** You control what version is archived in the Digital Commons (copyright permitting).

8. ***Personal pages:*** Create a personal researcher page to further promote yourself on the web. Readers can receive email alerts when new materials have been posted to your page.

9. ***Stability:*** Deposits are given a stable web address, making them easier to find and share without dealing with broken web links. This is an example of a stable web address: **http://jdc.jefferson.edu/rsfp/1/**

10. ***Nobel Prize winners:*** Yes, even Nobel Prize winners are enthusiastic about the Jefferson Digital Commons.[3]

For more information about the Jefferson Digital Commons, contact Dan Kipnis, Senior Education Services Librarian, at:

Jefferson™

# The Future

# Future efforts

- Retired faculty or soon to be retired (legacy)
- Working with development office to promote historical collections
- Working with PR to help embed IR links in press releases
- Increasing links in Wikipedia
- Contacting top downloaded authors for additional content

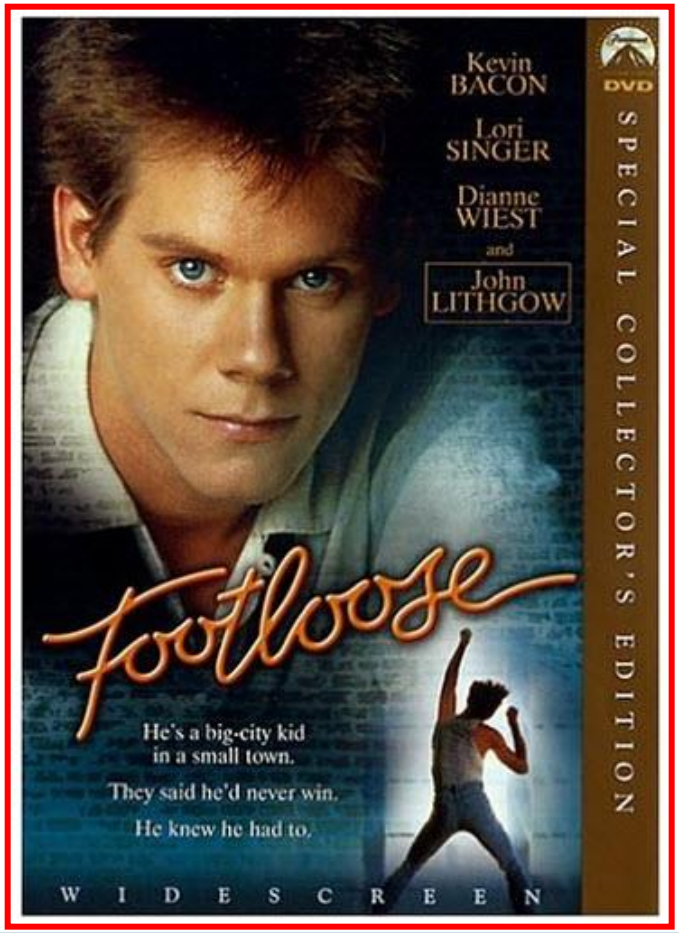
# When does promotion stop?

- Never, but…

Positive signs of growth:

- When your community can talk about it in their own words
- When you start receiving referrals
- Your marketing will gain momentum

# Six degrees-creating access points



Elvis Presley was in *Change of Habit* (1969) with Ed Asner

Ed Asner was in *JFK* (1991) with Kevin Bacon
