This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's Center for Teaching and Learning (CTL). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Sci-Tech News by an authorized administrator of the Jefferson Digital Commons. Today’s Top Science News

Bioelectric signals do something key
And affect things substantially
Doing something very few
Anticipated they could do
Meanwhile, we’ve had some news
Of quite unprecedented views
Of the sun that parallel instabilities
In earth’s oceans and its seas
Astronomers conclude early-type red
Galaxies are more or less as good as dead
But that those with gases at their core
Can last 80 million years or more
Dermatologists lament the blight
That is ultraviolet light
And warn us to beware its rays
Even on chilly, cheerless, cloudy days
Boys give each other the flu
But your children give it not to you

The government suggests it would be best
Seldom mercury to ingest
Breathing smoke from burning wood
For your lungs is not good
Surgical molecular navigation
Is a desirable innovation
Unemployment for morale is bad
And the jobless are often sad
Evidence of the ancient past
Confirms Neanderthals didn’t last
Female docs fall behind on pay
Probably not good, authors say
Australian lake glows in the dark
Weight loss but walk in park
And that’s the news that you get
Of science from the Internet
