Science Today in Verse

Hope Leman, Samaritan Health Services

Travelogue

Measuring satellites show
That Venice continues to sink.
Just thought you ought to know
Before it sinks into the drink.

Love Songs

She nightingales select a mate
By the sweetness of his song
A technique I'd not underrate
Women seldom being wrong

An Old Story

Once male fruit flies are rejected
Feeling blue and quite dejected
(No surprise—nay, none at all)
They turn at once to alcohol.

Danger Signs

A Greek volcano may soon awake
To give locals quite a shake.
But as I do not live in Greece,
I shall be left in perfect peace.

Survival Strategies

Butterflies group into five
This gets them through the night.
It's easier to stay alive
With lots of you to bite.

Marine Biology

Giant and Colossal squids,
As their names, of course, suggest
Are rather large in size.
And, as you might have guessed,
Have quite enormous eyes.

The Traveler

A roving did a whale go
About the seven seas
From Russia he started out
And was lately seen in Mexico. ❖
