On the Cover

Johann Jacob Scheuchzer, a prominent Swiss naturalist, believed that all fossils were relics of Noah's Flood. He was thus delighted to discover, in 1725, the remains of what appeared to be a human who had perished in the Flood. Scheuchzer published a small pamphlet, *Homo diluvii testis*, the Human Witness of the Flood (Zurich, 1726), in which he illustrated his fossil with a large woodcut. Seventy-five years later, Georges Cuvier would reveal that the fossil was in fact the remains of a large extinct salamander. The testimony of the "human witness" would no longer be admissible in the court of science. (Photo and caption courtesy of the Linda Hall Library of Science, Engineering & Technology).
