Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-021-81803-6>, published online 26 January 2021

The original version of this Article contained an error in Table 2, where in columns “Total cohort (n = 1212)” and “Fasting plasma glucose \geq 100 mg/dL (n = 423)”, the n values for ‘Normal fructosamine’ and ‘High fructosamine’ were accidentally switched. The correct and incorrect heading rows appear below.

Incorrect:

Complications	Total cohort (n = 1212)			Fasting plasma glucose \geq 100 mg/dL (n = 423)		
	Normal fructosamine (n = 54)	High fructosamine (n = 1158)	p value	Normal fructosamine (n = 32)	High fructosamine (n = 391)	p value

Correct:

Complications	Total cohort (n = 1212)			Fasting plasma glucose \geq 100 mg/dL (n = 423)		
	Normal fructosamine (n = 1158)	High fructosamine (n = 54)	p value	Normal fructosamine (n = 391)	High fructosamine (n = 32)	p value

The original Article has been corrected.
