

Piras, K.P. Revill, P. Roberts, A.D. Robertson, N. Sanossian, H.M. Schambra, N.J. Seo, S.R. Soekadar, G. Spalletta, C.M. Stinear, M. Taga, W.K. Tang, G.T. Thielman, D. Vecchio, N.S. Ward, L.T. Westlye, and C.J. Winstein report no disclosures relevant to the manuscript. G.F.W. is on the Medical Advisory Board, Myomo, Inc. S.L. Wolf is a consultant for Microtransponder, Inc., Enspire, Inc., and SAEBO. K.A. Wong and C. Yu report no disclosures relevant to the manuscript. S.C. Cramer serves as a consultant for Abbvie, Constant Therapeutics, BrainQ, Myomo, MicroTransponder, Neuroolutions, Panaxium, NeuExcell, Elevian, and TRCare. P.M. Thompson received research support from Biogen, Inc., for research unrelated to this manuscript. Go to [Neurology.org/N](https://www.neurology.org/N) for full disclosures.

## Publication History

Previously published at bioRxiv doi: 10.1101/2022.04.27.489791  
 Received by *Neurology* October 16, 2022. Accepted in final form February 8, 2023. Submitted and externally peer reviewed. The handling editor was Editor-in-Chief José Merino, MD, MPhil, FAAN.

## Appendix Authors

Name	Location	Contribution
<b>Sook-Lei Liew, PhD OTR/L</b>	Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; study concept or design; and analysis or interpretation of data
<b>Nicolas Schweighofer, PhD</b>	Division of Biokinesiology and Physical Therapy, Herman Ostrow School of Dentistry, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; study concept or design; and analysis or interpretation of data
<b>James H. Cole, PhD</b>	Centre for Medical Image Computing, Department of Computer Science, Dementia Research Centre, Queen Square Institute of Neurology, University College London, United Kingdom	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Artemis Zavaliangos-Petropulu, PhD</b>	Brain Mapping Center, Department of Neurology, Geffen School of Medicine, University of California, Los Angeles, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Bethany P. Lo, BSc</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Laura K.M. Han, PhD</b>	Centre for Youth Mental Health, The University of Melbourne, Parkville, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data

## Appendix (continued)

Name	Location	Contribution
<b>Tim Hahn, PhD</b>	Institute for Translational Psychiatry, University of Münster, Germany	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Lianne Schmaal, PhD</b>	Centre for Youth Mental Health, The University of Melbourne, Parkville, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Miranda R. Donnelly, MS</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Jessica N. Jeong, BA</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Zhizhuo Wang, MSc</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Aisha Abdullah, BA</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Jun H. Kim, BSc</b>	Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Alexandre Hutton, MEng</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Giuseppe Barisano, MD, PhD</b>	Laboratory of Neuro Imaging, Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, University of Southern California, Los Angeles; Department of Neurosurgery, Stanford Medicine, Stanford University, CA	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Michael R. Borich, PhD</b>	Division of Physical Therapy, Department of Rehabilitation Medicine, Emory School of Medicine, Atlanta, GA	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Lara A. Boyd, PhD</b>	Department of Physical Therapy and Djavad Mowafaghian Centre for Brain Health, University of British Columbia, Vancouver, Canada	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data

Continued

## Appendix (continued)

Name	Location	Contribution
<b>Amy Brodtmann, MBBS, PhD</b>	The Florey Institute of Neuroscience and Mental Health, Melbourne; Eastern Cognitive Disorders Clinic, Melbourne; Royal Melbourne Hospital, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Cathrin M. Buetefisch, MD, PhD</b>	Department of Neurology, Emory University, Atlanta, GA	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Winston D. Byblow, PhD</b>	Centre for Brain Research and Department of Exercise Sciences, University of Auckland, New Zealand	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Jessica M. Cassidy, PhD, DPT</b>	Department of Allied Health Sciences, University of North Carolina at Chapel Hill	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Charalambos C. Charalambous, PhD</b>	Department of Basic and Clinical Sciences, Center for Neuroscience and Integrative Brain Research (CENIBRE), University of Nicosia Medical School, Cyprus	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Valentina Ciullo, PhD</b>	Laboratory of Neuropsychiatry, IRCCS Santa Lucia Foundation, Rome, Italy	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Adriana Bastos Conforto, MD, PhD</b>	Hospital das Clínicas, São Paulo University; Hospital Israelita Albert Einstein, São Paulo, Brazil	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Rosalía Dacosta-Aguayo, PhD</b>	Department of Psychiatry and Clinical Psychobiology, Universitat de Barcelona, Barcelona, Spain	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Julie A. DiCarlo, MS</b>	Center for Neurotechnology and Neurorecovery, Department of Neurology, Massachusetts General Hospital, Harvard Medical School, Boston	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data

## Appendix (continued)

Name	Location	Contribution
<b>Martin Domin, Dr rer med</b>	Functional Imaging Unit, Diagnostic and Neuroradiology, Universitymedicine Greifswald, Germany	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Adrienne N. Dula, PhD</b>	Department of Neurology, Dell Medical School at The University of Texas Austin	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Natalia Egorova-Brumley, PhD</b>	Melbourne School of Psychological Sciences, University of Melbourne, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Wuwei Feng, MD</b>	Department of Neurology, Duke University School of Medicine, Durham, NC	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Fatemeh Geranmayeh, PhD</b>	Clinical Language and Cognition (CLC) Lab, Department of Brain Sciences, Imperial College London, United Kingdom	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Chris M. Gregory, PhD</b>	Department of Health Sciences & Research, Medical University of South Carolina, Charleston	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Colleen A. Hanlon, PhD</b>	Cancer Biology, Wake Forest School of Medicine, Winston Salem, NC	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Kathryn Hayward, PhD</b>	The Florey Institute of Neuroscience and Mental Health, Melbourne, Victoria, Australia; Departments of Physiotherapy and Medicine (RMH), University of Melbourne, Parkville, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Jess A. Holguin, OTD</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data

## Appendix (continued)

Name	Location	Contribution
<b>Brenton Hordacre, PhD</b>	Innovation, Implementation and Clinical Translation (IIMPACT) in Health, Allied Health and Human Performance, University of South Australia, Adelaide, Australia	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Neda Jahanshad, PhD</b>	Imaging Genetics Center, Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Steven A. Kautz, PhD</b>	Department of Health Sciences & Research, College of Health Professions, Medical University of South Carolina; Ralph H. Johnson VA Medical Center, Charleston, SC	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Mohamed Salah Khelif, PhD</b>	The Florey Institute of Neuroscience and Mental Health, Melbourne, Victoria, Australia	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Hosung Kim, PhD</b>	Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Amy Kuceyeski, PhD</b>	Department of Radiology, Weill Cornell Medicine, New York, NY	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>David J. Lin, MD</b>	Center for Neurotechnology and Neurorecovery, Department of Neurology, Massachusetts General Hospital, Harvard Medical School, Boston	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Jingchun Liu, MD</b>	Department of Radiology, Tianjin Medical University General Hospital, China	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Martin Lotze, MD, PhD</b>	Functional Imaging Unit, Diagnostic Radiology and Neuroradiology, Universitymedicine Greifswald, Germany	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data

## Appendix (continued)

Name	Location	Contribution
<b>Bradley J. MacIntosh, PhD</b>	Hurvitz Brain Sciences Program, Centre for Brain Resilience & Recovery, Sunnybrook Research Institute, Toronto, Ontario, Canada; Computational Radiology Artificial Intelligence Unit, Oslo University Hospital, Norway	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>John L. Margetis, OTD</b>	Chan Division of Occupational Science and Occupational Therapy, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Maria Mataro, PhD</b>	Department of Clinical Psychology and Psychobiology, Institut de Neurociències, University of Barcelona; Institut de Recerca Pediàtrica, Hospital Sant Joan de Déu, Esplugues de Llobregat, Spain	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Feroze B. Mohamed, PhD</b>	Jefferson Integrated MRI Center, Department of Radiology, Thomas Jefferson University, Philadelphia, PA	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Emily R. Olafson, BSc</b>	Department of Radiology, Weill Cornell Medicine, New York, NY	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Gilsoon Park, PhD</b>	Mark and Mary Stevens Neuroimaging and Informatics Institute, Keck School of Medicine, University of Southern California, Los Angeles	Drafting/revision of the article for content, including medical writing for content; analysis or interpretation of data
<b>Fabrizio Piras, PhD</b>	Laboratory of Neuropsychiatry, IRCCS Santa Lucia Foundation, Rome, Italy	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Kate P. Revill, PhD</b>	Facility for Education and Research in Neuroscience, Emory University, Atlanta, GA	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
<b>Pamela Roberts, PhD</b>	Cedars-Sinai; California Rehabilitation Institute, Los Angeles	Drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; and analysis or interpretation of data
