

Teaching for Quality (Te4Q) Program at Thomas Jefferson University

Participant Application Form

Thomas Jefferson University is proud to host the Association of American Medical Colleges' Teaching for Quality (Te4Q) Program on **Thursday, November 20th and Friday, November 21st**. To be considered for the program, applicants must meet the following pre-requisite requirements:

- 1) Be faculty members from any of the schools of Thomas Jefferson University;
- 2) Be identified by their supervisors as quality improvement and patient safety champions within their respective departments;
- 3) Have experience and/or formal training in quality improvement and patient safety, either within their respective departments or at the institutional level; and
- 4) Be prepared to develop and execute an educational project upon the completion of the program

TJU Faculty Appointment: _____

Supervisor: _____

I support this faculty member's participation in the November 20-21 workshop and will arrange his/her schedule accordingly.

Supervisor's Signature: _____

Date:

Training and Experience in Quality Improvement and Patient Safety

1. What formal healthcare quality improvement and/or patient safety have you completed? Check all that apply.

LEAN / Six Sigma Training

TeamSTEPPS Training

Certificate Program in Quality Improvement; if so, please describe:

Degree Program in Quality Improvement; if so, please describe:

VA Quality Scholar Program

IHI Online Learning Modules

Other; please list: _____

2. Have you held a leadership role in patient and/or quality improvement? If so, please describe.

3. If you have served as the team leader or co-leader of a quality improvement project (i.e., root cause analysis), please describe the project and what you learned from your involvement.

4. What is your background in teaching and education? Do you have formalized training in education? And in what capacity are you involved in the training of students, post-graduate trainees, and/or faculty?

Required Educational Project

During the workshop, time will be spent on developing an educational quality improvement / patient safety project that you will be expected to execute on completion of the Te4Q workshop.

To successfully participate in the program, participants are asked to come prepared with one (or more) educational project ideas for development. Idea(s) should be designed to enhance knowledge and skills in quality improvement and patient safety for learners in one or more educational and practice continuum areas (i.e., UME, GME, staff and faculty development, and/or interprofessional education).

Briefly describe the educational project you will develop during the workshop. In your description, please consider the following:

- Any gaps or problems areas you want your educational program to address;
- Any quality improvement and/or patient safety competencies you want your learners to exemplify at the completion of your educational program

Return completed application to Alexis Skoufalos no later than **Friday, October 10**
