

Table S1. mTOQ-5 Responses (N=2455)

mTOQ-5 Questionnaire^a	Responded “Yes”	Responded “No”
The following questions refer to the times when you take treatment for your headaches. Please choose the answer which most closely fits your experience in the past 4 weeks.		
1) Were you able to quickly return to your normal activities (ie, work, family, leisure, social activities) after taking your headache medication?	1403 (57.1)	1052 (42.9)
2) Could you count on your headache medication to relieve your pain within 2 hours for most attacks?	1762 (71.8)	693 (28.2)
3) Did one dose of your headache medication usually relieve your headache and keep it away for at least 24 hours?	1357 (55.3)	1098 (44.7)
4) Was your headache medication well tolerated?	2200 (89.6)	255 (10.4)
5) Were you comfortable enough with your headache medication to be able to plan your daily activities?	1922 (78.3)	533 (21.7)

Data are n (%).

mTOQ-5, 5-item Migraine Treatment Optimization Questionnaire.

^a Response options = Yes and No. One point is assigned for each response of “Yes” so that total scores range from 0 (worst possible optimization) to 5 (best possible optimization).
