

Description of Additional Supplementary Files

Supplementary Data 1. List of proteins measured in serum using the SomaScan assay in TTS patients (n=2), where column 1 shows the protein name, column 2: the protein Z-score, and column 3: the protein/gene NCBI link.

Supplementary Data 2. Transcriptomic and proteomics signatures increased on D2 (prime) compared with D58 (boost) immunization with Ad26.COVS.S (5×10^{10} vp). Pathway GSEA normalized score (NES) and the fold discovery rate (FDR q value) were shown for each pathway.
