The focus on traditional acute, hospital-based health care is being replaced with a new paradigm aimed at providing primary care, care of populations, and care across transitions and providers. As changes unfold, nursing education is challenged to prepare graduates who can effectively function in new healthcare environments of the 21st century. In response, the Jefferson College of Nursing (JCN) embarked on the ambitious task of designing a new 21st century baccalaureate nursing curriculum over a 2-year period. Although a 2-year turnaround time for curriculum design is unprecedented, what is most unique about JCN’s initiative is that it began with a charge of developing an idealized curriculum from a blank slate. Advised by a curriculum consultant, a group of nine faculty and six key stakeholders (known as the Curriculum Navigators) created the H.E.R.E.© Curricular Model which provides a framework for a nursing curriculum that is forward thinking and contemporary.

The four major themes of the H.E.R.E.© model, Interprofessional Collaboration, Innovation, Population Health and Practice Excellence, are the foundation for the curriculum model as well as the curriculum’s organizing framework statement, Promoting Health and Quality of Life along the Care Continuum. A concept-based approach based on Giddens book (2013) organizes the curriculum concepts. Traditional clinical experiences were replaced with “immersions” that encompass objectives from concurrent courses and connect didactic concepts to patient care experiences across the health care continuum and settings.

Practice Excellence
Caring
Clinical Reasoning
Evidence-Based Practice
Leadership
Quality & Safety
Interprofessional Collaboration
Professionalism
Interprofessional Communication
Teamwork
Collaborative Practice
Population Health
Cultural Awareness & Sensitivity
Care Coordination
Civic & Social Responsibility
Innovation
Research
Informatics
Health Care Technology
Clinical Inquiry
Health Care Infrastructure

The H.E.R.E.© Curricular Model
H: Humanistic
E: Evidence-based
R: Reflective
E: Excellence in practice

The H.E.R.E.© curricular model aligns with the Jefferson Health mission, “Health is All We Do.”

The H.E.R.E.© curricular model provides a framework for a concept-based baccalaureate nursing curriculum that focuses on promoting health and quality of life along the care continuum. The four themes, Practice Excellence, Interprofessional Collaboration, Population Health and Innovation, provide a foundation for the curricular elements, concepts, interrelated concepts, and exemplars. The course objectives, leveled outcomes, and program outcomes were mapped to:

The BSN Essentials
Quality, Safety & Education in Nursing (QSEN)
Jefferson College of Interprofessional Education
IPE Competencies
Clinical Prevention and Population Health Curricular Framework

The Student Experience
The student learning experience has changed in both the didactic and practice settings to align with 21st century health care needs and expectations:

Practice Excellence
NU399 Professional Practice 1: Students enroll in a series of 4 professional practices courses throughout the curriculum. In PPs, students use Portfolium to begin building an electronic CV to capture their individual experiences related to each of the four curricular themes in the curriculum. Portfolium helps to prepare students for today’s competitive job search.

Interprofessional Collaboration
NU399 Immersion 2: Students participate in Team STEPPS. The purpose of Team STEPPS is to improve students’ communication and teamwork skills in an interprofessional setting.

Population Health
NU426 Population Health & Health Disparities: In addition to class, students complete 44 hours of service learning in local Philadelphia communities and focus on health determinants, social determinants or health disparities.

NU445 Care Coordination: In addition to class, students complete 44 hours of experiential learning focused on the role of the nurse in care coordination and/or care transitions. Students work with nurses and other healthcare professionals, in the health insurance industry and case management as part of the experiential learning.

Innovation
NU398 Immersion 1: Students identify a problem in the immersion setting and present an evidence-based poster and innovative idea.

Recent Examples:
A student group created a L.E.D. light to sense appropriate hand washing upon entering and leaving a patient’s room.
A student group created a research instrument to evaluate “discharge” and “transfer” readiness from the patient/family member and health care provider perspective.

Future Direction
The FACT (facilitated accelerated course track) nursing students are in the third semester and the junior traditional nursing students are currently completing their first semester of the new curriculum.

Ongoing and future plans include:
Curriculum Evaluation Team
Small group faculty meetings
Student evaluations
Practice partner evaluations and focus group discussions
