UNIVERSITY ARCHIVES

These non-circulating collections are located in Room 401. The University Archives acquires and preserves important TJU records and departmental publications, faculty and student personal papers, memorabilia, photographs, and historical artifacts. The Special Collections include over 10,000 rare books documenting the history of health sciences from the 15th century to the present.

Conrad Gessner (1516-1565) was a Renaissance physician and a pioneering naturalist who catalogued all types of animals, birds, fishes and plants. This richly illustrated volume focuses on mammals and includes texts from Hebrew, Greek and Roman authorities. He also had correspondents, located worldwide, who reported on creatures; common, uncommon (and now extinct) as well as non-existent. This handsome unicorn represents the latter category. Our rare book is the earliest entry in our comparative anatomy holdings.
