This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's Center for Teaching and Learning (CTL). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Jefferson Medical College Alumni Bulletin by an authorized administrator of the Jefferson Digital Commons. For more information, please contact: JeffersonDigitalCommons@jefferson.edu.
The Medical School and Research

DEVOTION to the profession of medicine finds expression in three forms—practice, teaching, and research. For each of these three branches of medical activity there are today monumental examples: first, the great body of practitioners who care for the sick, the halt, and the blind throughout our country; second, the medical colleges of the land, which last year sent forth 5,101 graduates from their doors; and third, institutions for strictly medical research such as have been created by private benefaction. Accumulation of scientific knowledge, refinements in technique, the exacting nature of each type of activity, have necessitated this division of medical tasks into arbitrary groups.

By and large, however, every earnest student of medicine contains within himself the elements of the three, and the fact that his major responsibilities place him inevitably in one or another classification has never prevented his indulging to some extent in the activities of the others. . . . The older practitioner is the counsellor, the adviser, the “teacher” of the younger physician of his community. He adds to scientific knowledge when, from the wealth of his experience, he becomes the essayist of his medical society.

The institute of research is placed near to the hospital and the problems are selected from the life stream which pours through the wards and dispensaries. If the results of experimentation are to be productive, its workers must come to the bedside of the ill, observe the manifestations of disease and the effect of treatment. Its discoveries become the material for instruction in fundamental science and its personnel joins in that branch of teaching.

To the staff of a medical college the possibility of joining in all three of these activities is particularly tempting. In addition to the challenge to pedagogical ability which is renewed each year by the constantly changing body of students, there is the test of diagnostic acumen presented by the kaleidoscope of patients through the hospital, and the stimulus to imagination and intellectual development produced by contact with leaders in all branches of medicine. Small wonder that such an environment proves conducive to scientific development, academic reputation, and professional achievement! Most of the advancements in practical medicine emanate from the settings of the medical college.
With such observations in mind it is only to be expected that an alumnus should look to his Alma Mater for manifestations of these several directions of progress. For many generations Jefferson has so zealously guarded her reputation of teaching "practical" medicine, for providing clinical instruction, and for producing well trained practitioners, that her contributions to scientific progress have received small consideration. As a result of this policy there are undoubtedly many who hold the impression that the institution has fallen behind with this phase of medical activity.

In the Alumni Bulletins of 1933 and 1934 the editor took the pains to point out the steps that were being taken to insure that at Jefferson facilities would be provided for those whose natural ability and qualifications might lead them into the field of research. Your thoughtful consideration is referred to those previous numbers.

This year we print a bibliography of the scientific articles written by the members of faculty and staff and published during the past five years. Five hundred and fifty-six contributions have appeared in 82 different journals. Twenty-two text books have been written, revised, or contributed to.

Each year reveals an increasing volume of literature emanating from the halls of your Alma Mater. While the policy upon which Jefferson was founded has not been lost sight of, an appropriate degree of attention is being directed to the several other functions of a medical school, and those who devote time to research are receiving recognition and assistance.

**Publications of the Faculty and Staff of Jefferson Medical College and Hospital 1931-1935 Inclusive**

**American Heart Journal**

Coarctation of aorta: report of case in which sudden death was due to rupture of aorta—H. L. Stewart and S. Bellet, April '34.

**American Journal of Anatomy**

Susceptibility of cementum of rabbits to single erythema dose—N. A. Michels, May '33.

Plexus omentalis and its relation to capillary invagination in omentum of rabbit—N. A. Michels, Sept. '33.

Medullary and non-medullary erythropoiesis with special reference to plasma cell erythropoieage or Russel body cell, and to erythroatheretic (erythrolytic) function of lymph nodes and hemal nodes—N. A. Michels, Nov. '33.

**American Journal of Cancer**

Case of multiple primary carcinomas involving rectum and ovary—H. K. Seelaus and H. Haskell, March '34.

**American Journal of Clinical Pathology**

Precipitin test for diagnosis of meningitis—W. A. Kreidler and M. E. Murphy, Jan. '32.

Plasma cholesterol concentration in glomerulonephritis and other terminal states—A. Cantarow and S. G. McCool, Nov. '33.

**American Journal of Digestive Diseases and Nutrition**

Diagnosis and management of gall tract, particularly gall-bladder, disease; proposal for better standardization of methods—B. B. V. Lyon, March '34.

Report of instance of suppurrative cholangitis with obstructive jaundice; value of duodenal-tube drainage of biliary tract in diagnosis and in alteration of symptoms and signs—B. B. V. Lyon, D. B. Pfeiffer and J. Eiman, April '34.

History of gall bladder disease; resume of symptoms—M. E. Rehfuss, Sept. '34.

Decompression of obstructed biliary system of cat; morphological changes—H. L. Stewart and A. Cantarow, April '35.

President's address—B. B. V. Lyon, Oct. '35.

**American Journal of Diseases of Children**

Duodenal obstruction caused by congenital bands and adhesions simulating congenital hypertrophic pyloric stenosis—E. F. Burt and R. M. Tyson, June '31.

Congenital heart disease; atresia of tricuspid orifice—H. L. Stewart and S. Bellet, June '33.

Pneumococcic meningitis in newly born: case in 2 day old infant—J. F. Coppolino and P. Ganfone, Feb. '34.

Acetarsone in treatment of congenital syphilis; comparison with bismuth therapy—J. F. Coppolino, Aug. '34.

Kaposi's variceiform eruption; report of 3 cases—E. F. Corson and J. B. Ludy, Dec. '35.
AMERICAN JOURNAL OF HYGIENE

AMERICAN JOURNAL OF THE MEDICAL SCIENCES

Calcium and parathyroid therapy in chronic ulcerative colitis—B. Haskell and A. Cantarow, Feb. 31.

Diabetic gangrene: incidence and pathogenesis; analysis of 38 cases among 108 diabetics—D. W. Kramer, April 32.

Van den Bergh reactions and bromsulfalein test in estimation of hepatic functional impairment—A. Cantarow, Aug. 32.

Nevus flammeus: its occurrence and abnormalities—E. F. Corson, Jan. 34.

Conjugal syphilis—statistical study—H. B. Decker, Jan. 34.

Effect of pregnancy on insulin requirement of diabetic—G. G. Duncan and F. Fetter, March 34.

Mechanism and use of abdominal supports and treatment of pulmonary diseases—B. L. Gordon, May 34.

Pathologic changes in heart in auricular fibrillation—H. K. Mohler and B. L. Crawford, Feb. 34.

Bence-Jones proteinemia in multiple myeloma—A. Cantarow, March 35.

Clinical application of duodenal extract (Macel­lum-Laughton) in diabetes mellitus—G. G. Dun­can, N. P. Shumway, T. L. Williams, and F. Fetter, March 35.

Cytoplastic changes in peripheral neutrophil as aiding diagnosis and prognosis—D. R. Meraney, May 35.

Pathologic changes in heart in auricular fibrillation—H. K. Mohler and B. L. Crawford, Feb. 34.

Bence-Jones proteinemia in multiple myeloma—A. Cantarow, March 35.

Clinical application of duodenal extract (Macel­lum-Laughton) in diabetes mellitus—G. G. Dun­can, N. P. Shumway, T. L. Williams, and F. Fetter, March 35.

Cytoplastic changes in peripheral neutrophil as aiding diagnosis and prognosis—D. R. Meraney, May 35.

Bacterial flora associated with foreign bodies in trachea and bron-hi—C. J. Bucher, Sept. 35.

Further studies in calcium and parathyroid ther­apy in chronic ulcerative colitis—B. Haskell and A. Cantarow, Nov. '35.

AMERICAN JOURNAL OF NURSING

Allergic diseases—J. A. Clarke, Jr., July '32.

AMERICAN JOURNAL OF OBSTETRICS AND GYNECOLOGY

Etiology and significance of necrosis (infarction) of placenta; biologic and histologic study—T. L. Montgomery, Feb. 31.

Primary carcinoma of fallopian tube, with report of 2 cases—B. M. Ansphach and J. Hoffman, Sept. 31.

Breech presentation; report of 170 cases—R. W. Mohler, Jan. 32.

Foundation of endocrine clinic for study and treatment of amenorrhea, uterine bleeding and sterility—B. M. Ansphach and J. Hoffman, July 32.

Coagulability of blood in pregnancy—P. B. Bland, L. Goldstein, June 32.

Analysis of 1000 obstetric case histories—C. B. Lull, July 32.

Preliminary report on use of barbiturates with ether by rectum—C. B. Lull, Dec. 32.

Adenocarcinoma of cervix in 22 months' old child—L. C. Scheffey and B. L. Crawford, July 32.

Analysis of series of 82 cases of ectopic pregn­ancy—L. C. Scheffey, T. R. Morgan, and C. M. Stimison, Jr. 32.

Improved receiving table for newborn—H. Stuck­ert, June 32.

Instrument facilitating atraumatic palpbral separa­tion in newborn—M. Castallo, March '33.

Survey of cesarean sections performed in Phila­delphia during 1931—C. B. Lull, March '33.

Case of ectopia cordis—C. Lintgen, March 33.

Lesions of placental vessels; their relationship to pathology of placenta: their effect upon fetal morbidity and mortality—T. L. Montgomery, March 33.

Further studies in treatment of puerperal sep­ticemia and other blood stream infections with metabol—J. B. Bernstein, June 33.

Gonorrhoeal infection during pregnancy associated with trichomonas vaginalis infestation—J. B. Bernstein, May 34.

Early detection of chorionepithelioma by means of anterior pituitary hormone tests, with report of case—M. A. Castallo, Dec. 33.

Endometrial findings in functional menstrual dis­orders—B. M. Ansphach and J. Hoffman, Oct. 34.

Granulosa cell tumor of ovary in child with procoiety—P. B. Bland and L. Goldstein, Oct. 34.

Twin abdominal pregnancy—C. B. Lull and J. B. Bernstein, July '34.

Premature separation of placenta, with special reference to pathology of placental lesions—T. L. Montgomery, July 34.

Infrequent complications of uterine cancer, with certain clinical observations—L. C. Scheffey, Aug. 34.

Studies of hepatic function; hepatic function during pregnancy—A. Cantarow, H. Stuckert, and E. Gartman, Jan. 35.

Contributions of Great Britain to gynecology and obstetrics—B. M. Ansphach, Oct. 35.

Prophylaxis of congenital syphilis—J. F. Coppolino, May 35.

Fibromyoma of rectovaginal septum—L. C. Scheffey, May '35.

Management of prenatal and postnatal cervix—M. A. Castallo and T. L. Montgomery, July 35.

Some problems in pregnancy and diabetes; analysis of 20 pregnancies in 17 patients and preliminary report on 288 collected cases in literature—D. W. Kramer, July 35.

Chorionepithelioma following full term preg­nancy; case report—C. B. Lull, Nov. 35.

AMERICAN JOURNAL OF OPHTHALMOLOGY

Barraquer operation for removal of senile cataract as practiced by Professor Ignacio Barraquer—W. J. Harrison, Feb. 32.

**AMERICAN JOURNAL OF PATHOLOGY**

Origin of one type of secondary pneumonia—V. H. Moon, Nov. 33.

Tracheo-esophageal fistula of syphilitic origin; report of case—C. J. Bucher and J. One, Sept. 34.

Alteration in serum bilirubin and bromsulphalein retention in relation to morphological changes in liver and bile passages in cats, with total bilary stasis—A. Cantarow and H. L. Stewart, May 35.

Argyll Robertson syndrome occurring with puritary tumors; report of 2 cases—C. W. LeFever, May 35.

Hepatic infarction—H. Lund and H. L. Stewart and M. M. Lieber, Jan. 35.

**AMERICAN JOURNAL OF PHYSIOLOGY**

Study of reflexes involving pyloric sphincter and antrum and their role in gastric evacuation—J. E. Thomas, J. O. Crider and C. J. Mogan, June '34.

Effect of different sizes of balloons inserted in gut and changes in pressure within them upon activity of small intestine—C. M. Gruber and A. DeNote, April '35.

Platelets and spontaneous syndeosis of blood clots—L. M. Tocantins, Dec. 34.

**AMERICAN JOURNAL OF PSYCHIATRY**

Psychiatric department of Jefferson Medical College—M. A. Burns, March '32.

**AMERICAN JOURNAL OF ROENTGENOLOGY**

Primary carcinoma of lung; roentgen diagnosis and preliminary report on roentgen therapy—W. F. Manges, June '32.

Roentgen diagnosis and localization of opaque foreign bodies in air passages—W. F. Manges, March '33.

Foreign body removal with aid of double plane roentgenoscope—W. F. Manges, Nov. '33.

Design of flexible radium bomb with adequate protection, delivering hcymogenous field of radiation at various distances—W. S. Newcomet, May '35.

**AMERICAN JOURNAL OF SURGERY**

Inflammatory joint conditions as affected by men- struation—J. T. Rueh, July '34.

Diagnosis of renal tuberculosis—C. J. Bucher and T. R. Fetter, April '35.

Osteomyelitis of pate'la—J. R. Martin and N. T. Horwitz, Aug. 35.

Pericardiectomy for advanced Pick's disease—J. B. Flick and J. H. Gibbon, Jr., July '34.
Hepatic function; effect of cholecystectomy on hepatic function. A. Cantarow, E. Gartman and G. Ricchiuti, May '35.
Late subcutaneous rupture of tendon of extensor pollicis longus muscle—B. Lipschutz, Nov. '35.

BRITISH JOURNAL OF VENEREAL DISEASES
History of gonorrheal arthritis—J. F. McCahey, July '33.
Bulletin of Ayer Clinical Laboratory. Pennsylvania Hospital.
Aortic insufficiency; clinical study of etiological incidence in 252 cases—R. P. Regester, May '34.

CANADIAN MEDICAL ASSOCIATION JOURNAL
Antitoxic effect of anger in cases of insulin reaction—G. G. Duncan, July '35.

DELAWARE STATE MEDICAL JOURNAL
Intracranial injuries of newborn, from standpoint of general practitioner—P. B. Bland, Jan. '35.
Certain aspects of calcium therapy—A. Cantarow, July '35.

DEUTSCHE MED. WCHNSCHR.
Das Schocksyndrom—V. H. Moon, Nov. 2, '34 and Nov. 9, '34.

ENDOCRINOLOGY
Study of response of heart to pitresin following administration of thyroid extract—C. M. Gruber, V. H. Moon and E. Sufrin, Aug. '35.

EYE, EAR, NOSE AND THROAT MONTHLY
Pan-sinusitis (acute) with multiple cranial nerve involvement complicating diabetes mellitus; report of case with necropsy—F. J. Kalteyer and M. Bernstein, Dec. '33.
Ear thoughts—S. Cohen, May '34.

FOLIA HAEMATOLOGICA
Erythrocyte: critical review of its normal and pathologic morphology and physiology with data on normal red cell count and technic—N. A. Michels, 1931.

HYGEIA
"Out too soon": points for patients old and young—J. M. Cahan, Nov. '32.
What price antivisectomy?—V. H. Moon, Nov. '32.
Training for athletics and health; correcting physical defects—A. E. Parker, Aug. '33.
Training for athletics and health, accidents and first aid—A. E. Parker, Sept. '33.

Training for athletics and health, first aid to yourself—A. E. Parker, Oct. '33.
Training for athletics and health; "athletic heart."—A. E. Parker, April '34.

INTERNATIONAL CLINICS
Recent advances in calcium metabolism—A. Cantarow, March '31.
Diagnosis of foreign body in a bronchus—T. McCrae, Sept. '31.
Spontaneous rupture of heart with electro-cardiographic studies—H. L. Stewart, March '32.
Primary carcinoma of vagina—J. A. Lehman and T. E. Jones, Sept. '32.
Progress in medicine—A. Cantarow, March '32.
Progress in medicine—A. Cantarow, March '33.
Progress in medicine—A. Cantarow, March '34.
Functional uterine hemorrhage—H. Goldstein, Sept. '34.
Modern concept of sterility; analysis of 100 cases of functional sterility—P. B. Bland and A. First, Dec. '34.
Progress in medicine: cholesterol metabolism—A. Cantarow, March '35.

JOURNAL OF ALLERGY
Society for study of asthma and allied conditions; presidential address; future policy of this Society—J. A. Clarke, Jr., July '31.
Urinary proteoses in bronchial asthma; clinical study—D. R. Merante and A. Trasoff, Jan. '33.
Status asthmaticus or severe subacute asthma—J. A. Clarke, Jr., Sept. '33.
Permanent results following treatment for late hay fever—A. Vander Veer and J. A. Clarke, Jr., Sept. '35.

JOURNAL OF AMERICAN MEDICAL ASSOCIATION
Ether hyperglycemia, with especial reference to hepatic disease—A. Cantarow and A. M. Gehret, March 21, '31.
Three hormone tests for early pregnancy; their clinical evaluation; comparative study—C. Mazur and J. Hoffman, Jan. 3, '31.
Comparative biologic and histologic study of lymph glands from syphilitic patients—E. Saleeb and S. S. Greenbaum, Jan. 19, '31.
Is bronchocele indicated in tuberculosis?—L. H. Clerf, July 11, '31.
Acute perforation of duodenal ulcers; causes of death and consideration of treatment—B. L. Fleming, July 4, '31.
Nonnarcotic cupping of long bones in newborn; roentgenologic and clinio-anatomic study—J. T. Farrell, Jr., and E. F. Burt, May 21, '32.
Typhoid hepatocholangitis; cure of "carrier" of 26 years duration with 5 year "follow-up"—B. L. Fleming, Lyon, March 12, '32.
Smooth muscle contractions of small bowel; demonstration of active principle capable of stimulating these contractions—M. E. Rehfuss, Dec. 31, '32.

Favorable report of case—T. McCrae and J. C. Ullery, 1933.

Congenitally short esophagus—L. H. Clerf, June 16, '34.

Proteins versus carbohydrates; inquiry into their gastric digestion—M. E. Rehfuss, Nov. 24, '34.

**JOURNAL OF ASSOCIATION OF AMERICAN MEDICAL COLLEGES**

Some aspects of human anatomy; their importance, applications and correlation with clinical work—J. P. Schaeffer, March '33.

Desirability of teaching bronchoscopy and esophagoscopy to undergraduates—L. H. Clerf, Sept. '33.

Address of President—R. V. Patterson, Jan. 35.

**JOURNAL OF BONE AND JOINT SURGERY**

Giant-cell tumor (sarcoma?) of astragalus—A. J. Davidson and A. D. Kurtz, April '32.

Simple method of treatment of common metatarsal displacements—J. T. Rugh, Jan. '34.

Late or tardy ulnar-nerve palsy—A. J. Davidson and M. T. Horwitz, Oct. '35.

**JOURNAL OF CLINICAL INVESTIGATION**

Mechanical influence of pericardium upon cardiac function—J. H. Gibbon, Jr., June '31.

Ephedrine hyperglycemia with particular reference to arteriovenous blood sugar difference in hepatic disease—A. Cantarow and G. Richiuti, May '34.

Jefferson Society Award

The annual award of the Jefferson Society for Clinical investigation, conferred upon that member or members of the junior faculty and staff of the college and hospital whose published work of research is considered most meritorious by an award committee of the faculty, was for 1935 divided between Dr. John B. Montgomery and Dr. John T. Farrell, Jr., for their article “Irradiation in the Treatment of Ovarian Malignancy,” and Dr. A. Cantarow and George Richiutti, “Liver Function Tests and Their Clinical Value in Disease of the Biliary System.”

Portrait Presented to the College by the Class of 1936
March 26 - 1936
DAVID M. DAVIS, B.S., M.D.

Professor of Genito-Urinary Surgery, Jefferson Medical College

SUFFICIENT time has elapsed to impress all observers that the chair of Genito-Urinary Surgery, left vacant for a time by the death of Dr. Thomas C. Stellwagen, is competently filled by its new occupant, Dr. David M. Davis.

Doctor Davis is a graduate of Princeton University and of the Johns Hopkins Medical School. The major portion of his training was received in the Brady Institute under Dr. Hugh H. Young, with whom he later collaborated in the preparation of a widely known and authoritative text book of urology.

For four years he occupied the chair of Urological Surgery in the University of Rochester Medical School, Rochester, N. Y. He resigned from that institution to reestablish his association with Doctor Young.

Doctor Davis is widely known for his investigation in the field of urology. He is a competent clinician and a trained teacher. These activities have made him an authority in Genito-Urinary Surgery throughout the medical world.

Interne in Medicine, Baltimore City Hospital, 1911-12; Asst. Pathl., Johns Hopkins, 1912-14; Asst. in Urology, Johns Hopkins, 1914-17; Pathologist and Director of Laboratories, Brady Urological Institute, Johns Hopkins, 1914-19; Assoc. in Urology, Johns Hopkins, 1917-24 and 1928-30; Interne and Asst. Resident in Urology, Johns Hopkins, 1920-21; Resident in Urology, Johns Hopkins, 1921-22. Co-author with Dr. Hugh H. Young, Young's Prac-

First Lieutenant M.O.R.C., 1915-17; Captain, 1917-18; Major, 1918 to discharge. Active service May, 1917, to April, 1919. Bacteriologist for the Pennsylvania Unit at the American Ambulance Hospital in Paris during the summer of 1915.

Member: Phi Beta Kappa and Alpha Omega Alpha Fraternities; American Medical Association; American Urological Association; State and County Medical Societies; Medical and Surgical Association of the Southwest; Halsted Club; President, Medical and Surgical Association of the Southwest, 1934-35. Author of more than fifty scientific papers and contributor to Nelson’s Loose Leaf Surgery and Christopher’s Practice of Surgery.

The Curtis Clinic

Its Relationship to the Private and the Referred Patient

CONFUSION persists as to the function of the Curtis Clinic and its relationship to the charity and the private patient. Many physicians have in the past referred private or semi-private patients to it under the misapprehension that it is a diagnostic institution similar to that of the Mayo’s or of Lahey, and many alumni still make the mistake of referring private cases to individual friends and classmates at the Curtis Clinic. Private patients should be referred to the office of the individual whom the physician wishes his patient to see, or to the hospital with a note indicating that the patient be directed to that office.

The following letter from Robert B. Nye, M. D., Director of the Curtis Clinic, classifies the purpose and functions of the institution:

Dear Dr. Montgomery:

In accordance with your request I am giving you a brief summary of some of the admission policies of the Curtis Clinic.

For many years past many of the alumni, both in the city limits and particularly those in communities outside of the City of Philadelphia, have occasionally referred patients to the Out-Patient Department who are meant to be private patients of members of the Staff. These patients present themselves at the Jefferson Hospital and usually go from one office to another, finally arriving at the admission desk in the Curtis Clinic. As a rule the patients do not know where they are supposed to go, even though they often have a letter of introduction to one of the heads of one of the departments; this is particularly true in some of the special clinics such as skin, asthma, gastro-enterology, etc. From the standpoint of the patient it would be a great help if alumni would bear in mind the fact that the Curtis Clinic is not open for the admission of private patients with diagnostic problems; after going through the above rather embarrassing situation, the patient often times becomes disgusted and leaves the institution with a feeling of a rather poor organization. The referring doctor in turn gains the idea that his Alma Mater is not particularly interested in either him or his patient.

It seems important to define the role of the Curtis Clinic in this commu-
Scenes from the Curtis Clinic
nity responsibility. Specifically the clinic may be defined as a medical institution in which are organized those units, medical and social, which contribute to the rehabilitation of those patients whose medical and social situation is such as to require the coordinated services of the physician, the nurse, the medical-social worker and the technician. Patients in this group require not only medical treatment for physical disabilities but also have economic and social problems such as unemployment, inadequate income, poor housing, overcrowding, etc., which complicate medical care and which often precludes the successful treatment of disabilities unless the economic and social problems are remedied. The coordinated medical services furnished by this clinic, its affiliation with the medical college and teaching hospital and the services of the medical-social worker, which it provides, are especially significant in rendering to the patient in this group services as equally comparable as possible to that which the physician obtains for his well-to-do clientele.

In order to fulfil this responsibility, the clinic must observe certain principles with respect to who may receive these services and must develop satisfactory standards and procedures for carrying out these principles.

1. Clinic services should be for those persons in the community who are unable to pay the cost of needed medical service.

2. Eligibility for medical care in the clinic depends upon the nature of the medical needs of the patient and his ability to pay for that service.

3. The ability of the patient to pay for needed medical care must be determined after consideration of the following factors:

   (a) Medical requirements of the individual patients;
   (b) Earnings of the family;
   (c) Size of the family;
   (d) Reasonable standards of living;
   (e) Property, including savings, home, insurance, automobile, etc.;
   (f) Obligations such as rent, debts, support of others;
   (g) Obligations for previous medical services.

4. A competent physician should determine the nature of the patient’s condition or disease, the probable duration of the treatment required and the estimated cost of this treatment.

5. The judgment of a person who is qualified by training and experience in ascertaining and judging the social factors should be the basis for deciding the eligibility for clinic care from the economic point of view.

Trusting that this brief résumé of our admission principles will be of value, I remain

Very truly yours,

Robert B. Nye, M.D.
Director, The Curtis Clinic.

William Potter Memorial and Alpha Omega Alpha Lectures

THE Annual William Potter Memorial Lecture was delivered in the assembly hall of the College building on Friday evening, February 7, 1936, by Dean Lewis, M.D., Sc.D., LL.D., Professor of Surgery in the Johns Hopkins University School of Medicine. His subject was “Epochs in the Development of Surgery.”

The William W. Root Alpha Omega Alpha Annual Lecture was delivered
in the Assembly hall on Friday evening, February 14, 1936, by Walter B. Cannon, A. M., M.D., Sc.D., LL.D., George Higginson Professor of Physiology, Harvard University School of Medicine; his subject, "Serendipity."

Contributions of the Class of 1936 to the Alumni Fund

The members of the Class of 1936 are showing a whole hearted support to the Alumni Association in their contributions to the Alumni Fund.

At the time of composition of the Bulletin, 115 of its 133 members had signed notes pledging a sum of $210 payable over a period of 20 years. The officers of the Class are quite certain that 100 per cent of the members will join in the contribution before the school year is completed.

The present standing of the alumni fund is given below:

**ALUMNI FUND**

**General Financial Statement**

| Total amount of fund May 1, 1935 | $263,546.29 |
| Contributions and interest since May 1, 1935 | $10,958.94 |

**Total amount of fund May 1, 1936**

$274,504.23

Library Collection of Old Diplomas

The collection of old Jefferson diplomas, which was begun by the Dean some years ago, is increasing slowly, and has been placed in the archives of the Library. In the Alumni Bulletin of 1932 it was reported that 29 years were represented. At present the number is 45; some of these diplomas are in excellent condition—others only fair.

The following is a list of years represented and the condition of the diplomas in the collection. It is desirous to complete the list and to replace any that are in poor condition. The Dean asks for your co-operation in this endeavor.

Diploma of the First Graduating Class 1826
Diploma of the Present Graduating Class 1936
THE death of Dr. J. Clarence Keeler deprived the Jefferson College of one of its loyal sons and eminent teachers.

Dr. Keeler has been associated with his Alma Mater since the date of his graduation, serving first in the Department of Surgery and then in successive positions in the Department of Otology. Following the death of Dr. S. McCune Smith, he was on April 14, 1930, appointed Professor of Otology.

He was distinguished by his accomplishments as a teacher and a surgeon; he was punctilious in the performance of his duties, sincerely interested in inculcating into students a sound knowledge of his branch of medicine; a keen diagnostician, a skillful operator, and an author of note. He was unostentatious in his person, simple and kindly in manner, and a man held in high esteem by his colleagues, his students, and many friends.

Thomas McCrae
1870–1935

ON JUNE 30, 1935, Jefferson College suffered an irreparable loss in the death of Professor Thomas McCrae. Although Doctor McCrae’s physical activities had been gradually reduced for two years, he was able to continue his teaching with his wonted enthusiasm until his death.

Dr. McCrae was born in Guelph, Ontario, on December 16, 1870. His father Lieutenant-Colonel David McCrae and his mother Janet Eckford were both Scotch. Their two sons, John and Thomas, inherited a delightful sense of humor, the former to a degree that made him quite famous.
John McCrae, in spite of the fact that he was a physician, served in the late war as an artillery officer. He was later transferred to the medical service and died in France. To all English-speaking peoples he will ever be known as the author of “In Flanders Fields.”

Thomas McCrae had the rank of Lieutenant-Colonel in the medical corps of the Canadian Army and, for some time, headed the medical service of a Canadian General Hospital in England.

His preliminary training and medical education were received at the University of Toronto. After his internship and a year of study abroad he went to Johns Hopkins where he served under William Osler, became intimately associated with that eminent physician, and in 1908 married the niece, Amy Gwyn.

In 1912, Doctor McCrae was elected Professor of Medicine at the Jefferson Medical College, in which position he succeeded James C. Wilson.

Of McCrae's monumental contributions to medical literature little need be said, for their character insured extensive reading and frequent quotation. It was as a teacher that he will be affectionately remembered by hundreds of students of the Hopkins and of Jefferson. He knew just what the student of medicine needed to acquire and he developed a great skill in imparting it to him. He was not the witty didactic lecturer that his colleagues DaCosta and Hare were but he was an equally great and beloved teacher because he believed in and practiced constant and intimate contact with small groups of students. He loved teaching, as most good teachers do, and never, even in his last miserable years of ill health, tired of it.

Doctor McCrae introduced into Jefferson a new and valued form of clinical teaching. His influence will be noted throughout the next generation of Jefferson students and their faculty.

(The editor of the Bulletin has taken the privilege of quoting freely from the article written for the recent "Clinic" by Dr. John H. Gibbon.)
DR. CHARLES E. G. SHANNON

President of the Alumni Association 1936-1937

"A MAN of pleasing personality, humble mien, and understanding nature"—these are the words with which the students, in the annual Clinic, describe their professor of ophthalmology. No better portrait of a friend could be painted.

Dr. Shannon was born in Saco, Maine, which doubtless explains his inclination to return to the State of woods and lakes each summer. He received his early education in the public schools of his native city, and graduated from Thornton Academy in 1895. In the fall of the same year he entered Colby College at Waterville, and in the due course of time received a degree, cum laude. In addition to his accomplishments in the classroom, the annals of his first alma mater relate that he swung a vicious tennis racket, was the bulwark of the football team, and led the date club—information which should be of service to those members of his class who feel the "Sweet Ah-de-line" urge.

Encouraged by his cousin, Dr. George M. Gould, an ophthalmologist of Philadelphia, Dr. Shannon decided to pursue the study of medicine. His application to Jefferson Medical College was approved and in the fall of 1899 he became a member of the Sophomore class. Three years later, he received the degree of Doctor of Medicine.

Following an internship at the Pottsville Hospital for one year, he matriculated at Harvard Medical College and carried on postgraduate work in Ophthalmology at the Massachusetts Eye and Ear Infirmary. He was fortunate in coming under the personal supervision of Dr. Miles Standish who was Professor of Ophthalmology at Harvard University.
On his return to Philadelphia, he was invited by Dr. Howard F. Hansell, Professor of Ophthalmology at Jefferson Medical College, to become his assistant in his office and at the hospital. In the course of time he became Chief in the Eye Out-Patient Department and Associate in Ophthalmology in the College.

In 1915, he received the appointment of Assistant Ophthalmologist to the Philadelphia General Hospital and with the resignation of Dr. Howard F. Hansell, was made Attending Ophthalmologist at the institution, a position he held for many years.

Shortly after the United States entered the World War, he received his commission as First Lieutenant in the Medical Corps. After approximately eighteen months of service, he was honorably discharged in March, 1919, with the rank of Captain.

Following the sudden death of Dr. William M. Sweet in 1927, Dr. Shannon was elected to the Chair of Ophthalmology at the Jefferson Medical College.

Dr. Shannon attended the International Congress of Ophthalmology, in Amsterdam, in 1929, and during his stay in Europe, visited a number of eye clinics in Paris, Berlin and Amsterdam. He spent considerable time in the clinics of Dr. Morax and Dr. Magitot in Paris.

He is a member of the Philadelphia County and Pennsylvania State Medical Societies, the American Medical Association, the American Academy of Ophthalmology and Oto-Laryngology, the American Ophthalmological Society, and the College of Physicians in Philadelphia.

For two years, he served as Secretary of the Section in Ophthalmology, College of Physicians, and later was elected Chairman of the Section. He was recently elected a Director of the Philadelphia County Medical Society.

He has made a number of important contributions to ophthalmological literature and has taken an active part in the Medical Society meetings. For many years he has served as chairman of the class reunion committee of the Alumni Association.

Branch Chapter Meetings of the Alumni Association

The following news of branch chapter meetings is forwarded by the corresponding secretary for publication in the Bulletin:

A meeting of the Northeastern Branch was held in Wilkes-Barre on October 31st, and was attended by Doctors Klopp, Jones, Corson and Kinney. Clinics were held at the Mercy, Wilkes-Barre General, and Nesbit Hospitals during the morning and afternoon, and the Alumni Association dinner was held at the Westmoreland Club, and was attended by over one hundred Jefferson Alumni. The officers of the Northeastern Pennsylvania Chapter are: President, Dr. Harlem I. Evans, Ashland; Secretary, Dr. Charles F. Netzal, Plymouth.

The officers of the Western Pennsylvania Chapter are: President, Dr. Walter M. Bortz of Greensburg, and Secretary-Treasurer, Dr. John S. Silva, Pittsburgh.

A meeting of the North Carolina Chapter was held at Pinchurst on Wednesday, May 8th, and was attended by Dr. Louis H. Clerf. A total of forty-eight alumni were present, and the following named officers were elected for the ensuing year: President, Dr. D. W. Holt (1918) of Greensboro; Vice-President, Dr. J. C. Leonard, Jr. (1928) of Lexington;
A dinner of the Jefferson Alumni group was held in the main ballroom of the Penn-Harris Hotel on October 2nd in conjunction with the Pennsylvania State Medical Convention in Harrisburg. One hundred and thirty Jefferson Alumni were present, and the speakers were Doctors J. Torrance Rugh, Edward J. Klopp, Thomas A. Shallow, Randle C. Roshberger.

The officers of the Rhode Island Chapter are: President, Dr. Henri E. Gauthier, Woonsocket; Vice-President, Dr. E. T. Strecker, Providence; Secretary-Treasurer, Dr. Jesse M. Gibson, also of Providence.

Dr. Rife Gingrich of Middletown reports that the Dauphin County Medical Society has organized a Branch Chapter, and there were forty members present at the first meeting. They plan to continue as an active group, and have invited three neighboring counties to join with them.

Dr. Marshall J. Payne of Staunton, Virginia, of the class of 1893, delivered the principal address at the One Hundredth Anniversary of the birth of Dr. Hunter McGuire, who was at one time connected with the Jefferson Medical College.

The North Carolina Jefferson Alumni Association held its annual luncheon at one o'clock, Tuesday, May 5, 1936, in the Oriental Room of the George Vanderbilt Hotel in Asheville. Dr. Warren B. Davis was present to spread cheer and revive old memories of Jefferson.

The chairman of the class reunion committee reports that all of the classes of this denomination as far back as the last quarter of the 19th century are making their plans for luncheon, entertainment, and seats together at the alumni dinner.

For example, a special notice comes: "Members of the Class of 1926, the first class to join the Alumni Association 100 per cent, will meet in Philadelphia on June 3rd and 4th for a two-day celebration of the Tenth Anniversary of graduation. On Wednesday night, June 3rd, at 7:30 P. M. (Daylight Saving Time) the Reunion Banquet will be held at the University Club. At 1 P. M. Thursday, June 4th, the tenth annual class luncheon will be held at the Arcadia International Restaurant. At 6 P. M. a cocktail party will be held in the "Class of 1926" room at the Bellevue-Stratford hotel, preceding the annual banquet of the Alumni Association, which this class will attend in a body.

Other classes continue the policy of meeting each year, and the class of 1920, which is noted for its loyalty and large attendance, is to have their usual luncheon at the Hoffman House, 1214 Sansom St., on Thursday, June 4th, at 1 P. M.

In preparation for such functions the local class chairmen have communicated with their fellow members. If any alumnus upon reaching Philadelphia is uncertain about the headquarters of his class he should communicate with the alumni office at the college.

**Class Reunion**

**IN ACCORDANCE** with the policy of recent years, the executive committee is encouraging the holding of class reunions at five year periods particularly.

**Commencement Day Exercises and Speaker**

**THE 111th Annual Commencement Exercises of Jefferson Medical College will be held at the Academy of Music on Friday, June 5, 1936, at 12 noon.**

The speaker will be Dr. John H. Finley of the New York Times.
PROGRAM OF COMMENCEMENT SEASON

JUNE 3—Jefferson Ex-Interne's Day
10.00 A. M. to 12.30 P. M.—Clinical presentations in the Amphitheatre of the Hospital by Ex-Internes of Jefferson Hospital and Class Reunion guests.
(All Alumni Cordially Invited)
1 P. M.—Buffet Luncheon—Internes' Dining Room.
7 P. M.—Dinner for Ex-Internes of Jefferson Hospital, at the Art Club.

JUNE 4—ALUMNI DAY
10.00 A. M. to 12.15 P. M.—Clinical presentations by Members of the Faculty in the Amphitheatre of the Hospital.
1 to 2 P. M.—Class Luncheons.
2 to 5 P. M.—Inspection of College buildings, the Curtis Clinic, the Hospital, etc. Such diversions as golf, baseball, etc., the Alumni may desire to enjoy.
7 P. M.—ANNUAL ALUMNI BANQUET—Bellevue-Stratford Hotel.

JUNE 5—Commencement Day
12 Noon—Commencement exercises of the Class of 1936 at the Academy of Music.
(All Events on Daylight Saving Time)

ANNUAL ALUMNI BANQUET

BELLEVUE-STRATFORD HOTEL

THURSDAY EVENING
JUNE 4, 1936, at 7 P.M.
