At Commencement for the 144 graduates, the address Consecratio Medici (Devotion of the Doctor) was delivered by the distinguished Harvard Professor of Surgery, Dr. Harvey C. Cushing, who was a close associate of Professor Thomas McCrae during their early careers at Johns Hopkins School of Medicine.

The Jefferson Society for Clinical Investigation was organized in this year with eleven founders and thirty charter members from the faculty. Dr. Harold W. Jones was the first President and Dr. Thaddeus L. Montgomery the Vice President. Most of these participants achieved prominence in Academic Medicine.

John B. Montgomery's lifelong association with Jefferson began with his internship, followed by association with Professor Brooke M. Anspach. This began his advancement in the Department of Gynecology leading to Co-Chairmanship of Obstetrics and Gynecology in 1955 (Fig. 235). He became Chairman in 1961. He was a popular teacher and also served as President of the Philadelphia Obstetrical Society as well as a founding member of the American College of Obstetricians and Gynecologists. Upon retirement from the Chairmanship in 1965 he became Chief of the Department of Obstetrics and Gynecology at Methodist Hospital. He was President of the Alumni Association in 1961 and his portrait was presented to the College in 1965. In 1951 he was awarded the honorary degree of Doctor of Science by his alma mater, Juniata College, where he was also a trustee. In 1972 Jefferson honored him with the degree of Doctor of Pedagogy and he received its Alumni Achievement award in 1979.

Theodore R. Fetter, student leader and editor of the year book, served his internship at Jefferson and was then appointed to the staff of genito-urinary surgery. He became assistant to Professor Loux and later to Professor Stellwagen. Under Professor Davis he advanced rapidly and absorbed the new teachings leading to an extensive practice. In 1951 he succeeded Dr. Davis as Chairman of Urology. Dr. Fetter was a forceful person, technically skilled, and a frequent contributor to medical literature. He served as President of the Alumni Association in 1950 and of the Philadelphia County Medical Society, the Pennsylvania State Medical Society, and the Mid-Atlantic Section of the American Urological Association. Lebanon Valley College honored him with the degree of Doctor of Science (Fig. 236).

Harold L. Stewart, Senior Class President and winner of the Surgery Prize, pursued post-graduate study at the United States Army Medical School. He returned to Jefferson as a research fellow in 1929 and advanced in the Department of Pathology until he joined a new research group at Harvard University in 1937 which in
1939 moved to Bethesda, Maryland as the nucleus of the National Cancer Institute. In 1954 he became Chief of the Department of Pathological Anatomy of the Clinical Center of the National Institutes of Health. He served as a member of the National Research Council and on the World Health Organization Advisory Panel on Cancer. Dr. Stewart was also President of the American Society for Cancer Research, the American Society for Experimental Pathology, Society of Pathologists, and the International Council of Societies of Pathologists. In 1966 he received the Jefferson Alumni Achievement Award (Fig. 237).

Leandro M. Tocantins, a native of Brazil, became an internationally recognized hematologist. Beginning in 1930 as J. Ewing Mears Fellow, his clinical and research skills were quickly apparent and he advanced in the Department of Medicine to Director of the Cardeza Foundation for Hematologic Research in 1954. In 1959 he achieved the position of Cardeza Professor of Clinical Medicine and Hematology. He was Vice-President of the International Society of Hematology and President (1956/57) of the National Blood Club while also doing extensive writing, speaking and editing (Fig. 238). The portrait of Dr. Tocantins was presented to the College in the Tocantins Memorial Library of the Charlotte Drake Cardeza Foundation in 1964.

George C. Griffith’s evolving career was heralded by his winning the Alumni Prize at graduation. His progress in academic medicine was rapid and distinguished, leading to his Professorship of Medicine, School of Medicine, Uni-

Fig. 237. Harold L. Stewart (JMC, ‘26), prominent in cancer research.
versity of Southern California. A master clinician and teacher, he became one of the nation’s leading cardiologists. He held many important posts, including Presidency of the American College of Cardiology and the American Therapeutic Society. He received numerous awards including the Cummings Humanitarian Award for Distinguished Teaching, Merit Awards from Los Angeles County and California Heart Associations and the Gold Heart Award from the American Heart Association. In 1969 he received the Jefferson Alumni Achievement Award (Fig. 239).

Pascal F. Lucchesi, following internship at the Philadelphia General Hospital, went on to the Philadelphia Hospital for Contagious Diseases, soon becoming Medical Director. During World War II he advanced in multinational public health posts as Lieutenant Colonel in the United States Army and was cited for meritorious service. In 1946 he was appointed Medical Director of the Philadelphia General Hospital and in 1952 he accepted the post of administrator of the newly merged Albert Einstein Medical Center. He was President of the Hospital Association of Pennsylvania and of the Philadelphia County Medical Society. From 1949 to 1960 he was Professor and Head of the Section of Public Health and Preventive Medicine at Hahnemann Medical College. He received the Strittmatter Award in 1947 and a Doctor of Science degree from LaSalle College in 1954.

Arno E. Town pursued training in Ophthalmology, receiving an M.Sc. degree in Ophthalmology at Graduate School of Medicine of the University of Pennsylvania in 1929, and served a residency at Bellevue Hospital in New York. He was then appointed to several New York hospitals advancing to Acting Chief of Ophthal-
mology at Bellevue and Acting Head of the Department at New York University College of Medicine. After wartime Naval service he returned to New York but in 1948 he was appointed Professor and Chairman of Ophthalmology at Jefferson where he established a research program in his specialty allied with the Department of Physiology (Fig. 240).

Carroll R. Mullen followed his internship at the Philadelphia General Hospital with direct appointment to its ophthalmology staff, advancing to its chief in 1936. He became associated with Jefferson and Wills Eye Hospitals and advanced in the latter to become Executive Surgeon in 1949.

A popular and energetic person, he was elected President of the Jefferson Alumni Association in 1953 and succeeded classmate Arno Town as Chairman and Professor of Ophthalmology at Jefferson in 1956. In 1959 he was elected to the Board of City Trusts. He was also consultant to numerous regional hospitals (Fig. 241).

John T. Eads, following Jefferson internship, became associated with Dr. Martin E. Rehfuss in the organization of the Gastrointestinal Clinic. He advanced to Assistant Professor of Medicine. He was consultant to numerous hospitals and during World War II served as Commander in the United States Navy Medical Corps.

Pyn Noyes Muangman returned to his native Thailand (Siam) to teach medicine and establish the first Radiology Department there. He served as Under Secretary of Health in the Ministry of Public Health from 1958 to 1960. In 1961 he was awarded the degree of Doctor of Science by Grinnell College and the Doctor of Laws by Jefferson Medical College.

Kelvin A. Kaspar became widely known for tear duct surgery on which he published numerous articles. He became affiliated with several Philadelphia hospitals and went on to Chief of Otolaryngology at Wills Eye Hospital. His Jefferson association was followed by advancement to Clinical Professor of Otolaryngology.

Entrance to Thompson Annex, 1020 Sansom Street.
At the Commencement of June 3, in the Academy of Music, the honorary degree of Doctor of Science was awarded by Board President, Mr. Alba B. Johnson, to Francis Xavier Dercum, Emeritus Professor of Nervous and Mental Diseases at Jefferson Medical College. Degrees were awarded to 138 graduates.

John Heysham Gibbon, Jr. was destined to become world-renowned for his perfection of the heart-lung machine and successful performance of the first intracardiac operation with its aid on May 6, 1953 (Fig. 242). He was a fifth generation physician whose father (JMC, 1891, Fig. 125) was a Professor of Surgery at Jefferson from 1907 to 1931. Dr. Gibbon went on to become the third Samuel D. Gross Professor of Surgery (1956-67) and to receive innumerable honors both at home and abroad. In addition to a distinguished military career in World War II, he was active in matters relating to teaching, training, research, writing and editing, public health, community affairs, and presidency of many professional organizations. His name was engraved on Jefferson’s Winged Ox Column; he served as President of the Alumni Association in 1960; the Class of 1963 presented his portrait to the College; and a room in the Kellow Conference Area was named in his honor in 1979 (Fig. 243).

Howard Holt Bradshaw, of Tennessee, became a pioneer in thoracic surgery (Fig. 244). He pub-

Fig. 242. John H. Gibbon, Jr. (JMC, '27) with his heart-lung machine.

Fig. 243. John H. Gibbon, Jr. (JMC, '27), Samuel D. Gross Professor of Surgery (1956-67).
lished numerous papers pertaining to basic research in anesthesia and pulmonary physiology. After special training in Boston, he activated the thoracic surgical service at Jefferson's Pine Street Hospital, maintained an active role in clinical thoracic surgery at Jefferson Hospital, and lectured to the medical students. In 1940 his international reputation led to an invitation to the Bowman Gray School of Medicine as Professor of Surgery, where he continued to contribute to the development of thoracic surgery.

Robert Bruce Nye, as a bright youthful clinician in Jefferson's Department of Medicine, became Director of the Curtis Clinic at its opening in 1931. His success in administrative duties led to his appointment to succeed Dr. Henry K. Mohler as Director of Jefferson Hospital in 1938 when the latter became Dean. Dr. Nye's tenure was interrupted by World War II in which he served as a Lieutenant Colonel with Jefferson's 38th General Hospital (1941-45). He returned to his teaching post in the Department of Medicine in 1946 and became Assistant Dean in 1951 and Associate Dean in 1960. Until his sudden death in 1966 he was intimately involved with Jefferson Medical College admissions (Fig. 245).

Fig. 244. Howard H. Bradshaw (JMC, '27), pioneer in thoracic surgery and research.

Fig. 245. Robert B. Nye (JMC, '27), Director of Jefferson Hospital and Assistant Dean.
Samuel M. Dodek became Professor of Clinical Obstetrics/Gynecology at George Washington School of Medicine. As Professor Emeritus his portrait was presented to the library of the School of Health Sciences at George Washington University in 1976.

Members of this class who subsequently taught at Jefferson were: David Raymond Meranze in Bacteriology, William Taylor Hunt, Jr. in Ophthalmology, John Cornelius McNerney in Neurosurgery, Richard Manges Smith in Roentgenology, and Herbert Andrew Widing in Surgery. Orville Carrier King became a well known Philadelphia surgeon and Chief of Surgery at the Pennsylvania Hospital.

The Commencement was held on June 1 for 144 graduates at which time the Address was delivered by Henry A. Christian, M.D., Hersey Professor of Medicine at Harvard, on "The Lure of Medicine." He was awarded an honorary degree of Doctor of Science by the President of the Board, Mr. Alba B. Johnson.

In this illustrious class, no one would exceed Jo Ono, of Japan, in world acclaim (Fig. 246). He came to the United States at the age of 16 and worked his way through high school, Lafayette College, and Jefferson Medical College. After internship at Jefferson, he took special training in diseases of the chest and continued with the study of bronchoesophagology under Professor Louis H. Clerf (JMC, '12, Fig. 183) from 1932 to 1934. He then returned to Tokyo where he was instrumental in organizing the Japanese Bronchoesophagological Society and the International Federation of Oto-Rhino-Laryngological Societies in which he served as Chairman from 1965 to 1973. He was instrumental in organizing the Japan Chapter and became Regent of the American College of Chest Physicians. He also organized the Society for Promotion of International Otolaryngology in which he held the position of Director for a number of years. An Official Delegate of Japan to meetings in foreign countries 15 times, an officer in 15 medical societies, author of eight books and at least 100 medical papers, he was a recipient of the Alumni Achievement Award in 1976.

Robert Archibald Matthews, of Pennsylvania, won four prizes at graduation. After internship (1930) he was appointed Instructor in Nervous and Mental Diseases at Jefferson, which marked the beginning of a distinguished career in psychiatry. During the next 20 years he rose to Clinical Professor of Psychiatry and served as Acting Head of the Department during World War II. In 1950 he accepted the position of Head of Psychiatry and Neurology at the Louisiana State University School of Medicine. In 1956 he returned to Jefferson as Chairman of Psychiatry as well as the first Commissioner of Mental Health for the State of Pennsylvania (Fig. 247). He also became the first Chairman of a clinical department to be fully salaried by the institution. At the height of his career as teacher, author, commissioner and as lecturer to numerous professional and lay groups, he was tragically killed in an automobile accident in 1961 at the age of 58.

David Mendel Farrell spent his entire professional career at Jefferson as a model clinician and teacher in which he rose to the rank of Professor of Obstetrics and Gynecology. He pioneered in a method to obtain pre-natal electrocardiograms. Guy Maurice Nelson developed an early interest in gastroenterology at Jefferson and participated with Dr. Martin E. Rehfuss in research in this specialty. Together in 1935 they co-au-
thorcd a book on *The Medical Treatment of Gallbladder Disease*. Dr. Nelson was prominent as a clinician and teacher in the Department of Medicine for many years (Fig. 248).

Other members of this class who served on the Jefferson Faculty were Robert Smith Bookhammer in Psychiatry, Mahlon Carlton Hinebaugh in Obstetrics, and William Joseph Tourish in Surgery. Ignatius Stanley Hneleski went on to become Medical Director of the Philadelphia General Hospital for many years.

1928
Architect's Drawing for the new College (1929) and Curtis Clinic (1931) Buildings.
At the Commencement held at the Academy of Music on June 7, the honorary LL.D. degree was conferred upon Lawrence F. Flick, M.D. (JMC, 1879, Fig. 99) by Board President Mr. Alba B. Johnson. Dr. Flick was a pioneer in promoting measures to more effectively prevent and control pulmonary tuberculosis.

This year marked the completion of the new Medical College Building at 1025 Walnut Street, a major milestone in Jefferson’s progress (Fig. 249). This replaced the 1898 Medical College Building previously located at the Northwest Corner of 10th and Walnut Streets.

Anthony Frederick DePalma, of Pennsylvania, became the James Edwards Professor and Chairman of Orthopaedics at Jefferson in 1950. He was a forceful teacher, skillful surgical technician, and prolific writer. His textbooks became classics and included: Surgery of the Shoulder (1950), Diseases of the Knee (1954), Degenerative Changes in the Sternoclavicular and Acromioclavicular Joints in Various Decades (1957), The Management of Fractures
and Dislocations (1959), and The Intervertebral Disc (co-authored with Dr. Richard H. Rothman, 1970). He also edited Clinical Orthopaedics, a series of volumes in symposium form produced under the auspices of the Association of Bone and Joint Surgeons. The Class of 1962 presented his portrait to the College and he received the Alumni Achievement Award in 1975 (Fig. 250). The Thompson auditorium was named in his honor in 1990.

Mario Alberto Castallo, of Rhode Island, took residency training in obstetrics and gynecology in New York. He joined the Jefferson Faculty in 1933 and maintained an active practice for almost 50 years. Rising to the rank of Clinical Professor of Obstetrics and Gynecology by 1952, he authored numerous contributions to the medical literature, published more than ten books, and served as Alumni Association President in 1966. He was never seen on campus without a fresh carnation in his lapel (Fig. 251).

Sherman Alfred Eger, of Pennsylvania, took a surgical residency at the Crile Clinic, working under the influence of its founder, the elder George Crile. On his return to Philadelphia he joined Jefferson's Faculty in the Department of Surgery, rising to Clinical Professor. He was the author of many articles on a broad spectrum of surgical disorders and prepared exhibits for local and national meetings. His particular interest, which had been stimulated initially by Dr. Crile, was in surgery for hypertension by denervation of the adrenal glands (Fig. 252).

James Miller Surver, of Pennsylvania, after serving as intern and chief resident physician at Jefferson Hospital, went abroad to visit many of the outstanding clinics. On return to Jefferson's Department of Surgery, he lectured on basic principles of surgery in the sophomore year and on oncology during the junior year. For many years he conducted the weekly tumor conferences. In addition to general surgery, Dr. Surver...
played an important role in the early phases of chest surgery at Jefferson. The senior class of 1954 dedicated its year book to him (Fig. 253). Paul Owen Blake, of North Carolina, for more than 60 years kept his association with the Department of Surgery and rarely missed any event connected with his alma mater.

Fig. 253. James M. Surver (JMC, ’29) lectured on basic principles of surgery.
On February 22, 1930, the new 1025 Walnut Street College was dedicated. The speaker on this occasion was George B. McClellan, Ph.D., Professor of Economic History at Princeton University, the great-grandson of Jefferson's Founder (Fig. 254).

Among the 140 graduates, Francis J. Braceland was destined to become the most famous member of the Class (Fig. 255). His prize in obstetrics, however, was not prophetic since he went directly into psychiatry following residency, beginning at the Institute of the Pennsylvania Hospital. Upon his return from a year of study in Europe in 1936, he was named Clinical Director at Pennsylvania. Advancing quickly he was also Assistant Professor at the Graduate School of Medicine of the University of Pennsylvania and Associate Professor at Woman's Medical College.

In 1941 he was made Professor of Psychiatry and Dean of Loyola University School of Medicine, Chicago. During World War II he advanced to the rank of Captain in the United States Navy Medical Corps, serving as Special Assistant in Psychiatry to the Surgeon General. He was awarded the Legion of Merit by the Secretary of the Navy for outstanding services which included duty as Chief of Neuropsychiatry, Bureau of Medicine and Surgery. In 1946 Dr. Braceland established the section of psychiatry at the Mayo Clinic as Consulting Psychiatrist as well as Professor of Psychiatry at the Graduate School, University of Minnesota. He was President of the American Psychiatric Association (1956/57) in addition to many activities in other organizations. Upon retirement from Mayo, he became Psychiatrist-in-Chief at the institute of Living at

Fig. 254. Dedication of new 1025 Walnut Street College Building on February 22, 1930. Dean Patterson, Dr. George B. Mcclelan, and Board President Alba B. Johnson (left to right).
became an instructor in the Department of Obstetrics; Patrick J. Kennedy was a prominent ophthalmologist for many years associated with the Wills Eye Hospital; Edward H. Kotin joined the Department of Medicine and for many years contributed clinical and teaching services; Marshall M. Lieber, after two years of European study, became a devoted teacher and researcher in the Department of Pathology, advancing to Associate Professor; Joseph Waldman went on to major achievements in ophthalmology, treating the King of Saudi Arabia during World War II while a major in the U.S. Army for which he received the Legion of Merit Award, and in civilian life specializing in neuro-ophthalmology with promotion at Jefferson to Professor of Ophthalmology.

Leon L. Berns, an honor graduate, after completing his internship, joined the Department of Anatomy at Jefferson and continued his teaching for more than 55 years, even after achieving the rank of Honorary Clinical Professor (Fig. 256).

At the fiftieth Reunion of the Class of 1930, three retired Rear Admirals in the United States Navy were in attendance. They were Drs. Francis J. Braceland, Cecil H. Coggins, and Charles W. Letcher (Fig. 257).

"And to this thought I hold with firm persistence
The last result of wisdom stamps it true:
He only earns his freedom and existence
Who daily conquers them anew."
Johann Wolfgang von Goethe (1749–1842).
At the Academy of Music on June 5, the degree of Doctor of Medicine was conferred upon the 141 members of the class. This brought 15,474 names to the total list of graduates.

The Curtis Clinic, constructed at the Tenth and Walnut Street site of the 1898 Medical College building was dedicated on December 17, 1931. This facility greatly enhanced patient care and student teaching (Fig. 258).

Kenneth Evans Fry won the gold medal surgery prize for the best essay on a subject pertaining to surgery and the gold medal for general excellence in clinical surgery. This marked the beginning of his career in the Surgery Department in which he remained a role model to students and residents alike in his well organized lectures, his operative technique, his surgical judgment and his keen knowledge of the surgical literature. He served throughout World War II in the Middle East and was most active in Alumni affairs such as Chairman of Annual Giving and President (1965). He was the first member of the Surgical Department to become Board Certified (1939) through taking the examinations (Fig. 259).

Robert Kyun Hyun Charr was an honor graduate whose appointment in the Department of Medicine was interrupted by tuberculosis. Upon

recovery he taught in Jefferson’s Pine Street Department for Diseases of the Chest and carried out research with Dr. J. Woodrow Savacool (JMC, ’38, Fig. 280) in basic science and clinical aspects of pulmonary disease. He was a most effective instructor in physical diagnosis and much admired by the students as a superb and compassionate clinician (Fig. 260). His brilliant career was cut short by premature death.

1931 365
The Commencement was held on June 3 for 143 graduates in the Academy of Music. The address was delivered by George Barton Cutten, D.D., Ph.D., LL.D., President of Colgate University, on "A Layman’s Advice to Doctors."

C. Earl Albrecht, class historian with a prior degree in theology from Moravian College and Seminary, became a pioneer in the Matanuska Valley of Alaska. He progressed to appointment as the first Alaskan Commissioner of Health. In 1961 as Assistant Secretary of Health for Pennsylvania, he was named Visiting Professor of Public Health at Jefferson. In 1963 he became fulltime Professor of Preventive Medicine, conducting several important regional surveys. He also advanced in the United States Army Medical Corps to the rank of Brigadier General. Following retirement from Jefferson, he became involved with the Trans-Arctic Medical Association and participated in its symposia on Circumpolar Health (Fig. 261).

Nathan S. Schlezinger, following Jefferson internship, pursued the study of neurology and psychiatry at Columbia University where he received the degree of Doctor of Science in 1938. Returning to Jefferson as Ross V. Patterson Fellow in Neurology, he soon joined the staff of Wills Eye Hospital where he developed the new specialty of neuro-ophthalmology. He progressed to Chief of Neurology at Wills, serving until retirement in 1976. Dr. Schlezinger advanced to Professor of Neurology at Jefferson where he also organized the Myasthenia Gravis Clinic (Fig. 262).

Howard C. Leopold, winner of the Saunders Prize, trained under Bela Schick and at the Cooke Clinic in New York in the emerging field of allergy. He was appointed to the Jefferson Allergy Clinic under Dr. J. Alexander Clarke in 1936. He became Chief of the Clinic in 1959 in addition to serving as consultant to numerous regional hospitals.

G. Henry Katz became a psychiatrist, for many years Director of the Devereux School. He was also affiliated with the Graduate School of the University of Pennsylvania and was elected the first President of the Philadelphia Association for Psychoanalysis.

Several class members became associated with the teaching staff following Jefferson internship. John J. Cheleden was trained in proctology and was a loyal alumnus throughout his career which he later pursued in Florida. Frederick W. Deardorff was appointed to the Department of Surgery, also briefly serving in thoracic surgery at the Department for Diseases of the Chest. Lewis C. Manges, Jr. was on the surgical staff of Jefferson as well as of the Philadelphia General Hospital. George A. Porreca became Clinical Assistant Professor of Obstetrics and Gynecology.

Do not stop to think about the reasons for what you are doing, about why you are questioning. Curiosity has its own reason for existence. One cannot help but be in awe when he contemplates the mysteries of eternity, of life, of the marvelous structure of reality. It is enough if one tries merely to comprehend a little of this mystery each day. Never lose a holy curiosity.

Albert Einstein (1879–1955)
The Oath of Hippocrates

I swear by Apollo, the physician, and Asclepius and Health and All-Heal and all the gods and goddesses that, according to my ability and judgment, I will keep this oath and stipulation:

To reckon him who taught me his art equally dear to me as my parents, to share my substance with him and relieve his necessities if required; to regard his offspring as on the same footing with my own brothers, and to teach them this art if they should wish to learn it, without fee or stipulation, and that by precept, lecture and every other mode of instruction, I will impart a knowledge of the art to my own sons and to those of my teachers, and to disciples bound by a stipulation and oath, according to the law of medicine, but to none others.

I will follow that method of treatment which, according to my ability and judgment, I consider for the benefit of my patients, and abstain from whatever is deleterious and mischievous, I will give no deadly medicine to anyone if asked, nor suggest any such counsel; furthermore, I will not give to a woman an instrument to produce abortion.

With purity and with holiness I will pass my life and practice my art, I will not cut a person who is suffering from a stone, but will leave this to be done by practitioners of this work. Into whatever houses I enter I will go into them for the benefit of the sick and will abstain from every voluntary act of mischief and corruption; and further from the seduction of females or males, bond or free.

Whatever, in connection with my professional practice, or not in connection with it, I may see or hear in the lives of men which ought not to be spoken abroad I will not divulge, as reckoning that all such should be kept secret.

While I continue to keep this oath unviolated may it be granted to me to enjoy life and the practice of the art, respected by all men at all times, but should I trespass and violate this oath, may the reverse be my lot.
Four years of the 1929 depression had changed many aspects of the Jefferson experience. Austerity was the order of the period and many ambitious programs had to be deferred or cancelled. Generally, however, morale was well maintained although many graduates were compelled to alter their career goals and hopes. The members of this class numbered 140.

Daniel C. Baker, Jr., after his Jefferson internship, went on to a career in otolaryngology, stimulated in the specialty by admiration for Professor Louis H. Clerf (JMC, ’12, Fig. 183). Dr. Baker served in the U.S. Navy during World War II and was appointed Assistant Professor of Otolaryngology at Columbia University School of Medicine in 1946. He became full Professor in 1964 (Fig. 263). He was Director of the Otolaryngological service at Presbyterian Hospital, New York, and consultant at many regional hospitals. He was President of the American Broncho-esophagological Association and at the time of his death he was President-elect of the American Laryngological Association. He was much in demand as a lecturer. He delivered the Chevalier Jackson Memorial Lectureship of the Philadelphia Laryngological Society. Selected to receive the Jefferson Alumni Achievement Award for 1974, Dr. Baker died a few days prior to the event. The Award was received in his behalf by his son, Daniel C. Baker, III, M.D.

Jacob J. Kirshner was appointed to the Department of Medicine and served for many years in the Pulmonary Division (Fig. 264). He advanced to Clinical Assistant Professor of Medicine. Dr. Kirshner also served for some years as Medical Director of the Eagleville Sanatorium and as Consultant to the Philadelphia Department of Health.

Other class members who were appointed to Jefferson teaching posts included Charles W. Semisch, III, Assistant Professor of Medicine, Leon N. Prince and Arnold Goldberger, both Clinical Assistant Professors of Obstetrics and Gynecology.
