This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University’s Center for Teaching and Learning (CTL). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Jefferson Medical College Alumni Bulletin by an authorized administrator of the Jefferson Digital Commons. For more information, please contact JeffersonDigitalCommons@jefferson.edu.
TO THE ALUMNI

THIS OPPORTUNITY, as President of the Alumni Association, to send greetings to each alumnus, is an esteemed privilege. It affords me great pleasure to be able to give expression to my deep sense of appreciation of the honor that is mine to represent, during the coming year, the six thousand alumni scattered throughout the four corners of the world.

Beginning with the founding of the College, which was accomplished against great opposition, it always has been the policy of our Alma Mater to provide the best curriculum possible to prepare students for the practice of medicine. That this has been accomplished is evidenced by the fact that Jefferson today is greater than it ever has been in its history. The pioneering and unconquerable spirit displayed by Jefferson in the past continues to prevail, meeting the needs of the times. It has passed successfully through many critical periods, each time emerging victorious from what seemed insurmountable difficulties.

Our highly-esteemed Board of Trustees, the members of which are leaders in their respective fields of activity, are constantly engaged in considering ways and means to meet the demands that an increasingly complex civilization and culture have put upon the College. In the early days of the history of this institution, which developed from a humble beginning, life was relatively simple, with equally modest needs as compared with those of modern times.

The leaders of the Faculties of the past were singularly well-chosen and more than eminently successful. Their methods of instruction met the requirements of their day, but obviously methods, to be modern, improve with each succeeding generation. Today members of the Faculty are heads of departments whose accomplishments in teaching and research are criteria by which are judged their reputation and ability.

Jefferson always has been a pioneer, concerned not so much with the methods used but with the results obtained in the field of medical education. If Jefferson is to continue its position in the field of medical education, not only must it possess a well-qualified faculty and teaching corps, but it must give great weight to the qualifications of the applicants selected for its student body. The utmost care and discrimination must be exercised in accepting as students only those who from their previous records show character, determination and application, evincing a wholesome and real ambition for a life of service to their fellow-man.

Scarcely can one conceive of the large amount of helpful service that has been rendered by the 16,440 physicians who have graduated from the Jefferson Medical College during the 113 years of its existence. Their accomplishments have had and continue to have a far-reaching influence, unquestionably affecting the affairs of the State and Nation. The past achievements of Jefferson are a matter of history and speak for themselves; the future will bring problems which will be met with the same will and determination that characterized its actions in the past.

As successor to the late Dean Patterson, I am wholly in accord with the policies of the Board of Trustees and Faculty, whose objectives are to expand as rapidly as possible by making available an increased
number of full-time teachers in the pre-clinical years; to enlarge the opportunities for contact by the student with the patient; to emphasize the importance of the course in Preventive Medicine and Public Health, in keeping with the modern trend of medical education; to continue to stimulate and encourage clinical and laboratory research; to increase the staff of Fellows and Residents as rapidly as suitable candidates can be found who possess qualifications which will conform to the high standards of Jefferson. Linking the past with the present, and pledging for the future the retention of all that has proven sound, and continuing to encourage its development—this is my sincere ambition.

H. K. MOHLER

Dr. Henry Keller Mohler
Dean of The Jefferson Medical College
President of The Jefferson Alumni Association

THERE is no alumnus of the Jefferson Medical College who does not welcome the elevation to high office of Dr. Henry K. Mohler, one of the most brilliant, steadfast, and loyal alumni of our Alma Mater. His election to these two positions constitutes the logical answer to the problem of finding a leader familiar with the conditions and the personnel of the College, devoted to the service of his Alma Mater, and endowed with the vision and excellent ability to conduct the affairs of a great institution.

Henry Keller Mohler was born April 2, 1887, in Ephrata, Penna. He attended the public schools in his native city, and was graduated from the Ephrata High School in 1904. That same year he entered the Philadelphia College of Pharmacy, from which he received a P. D. degree in 1907, standing as first man in his class. Next he entered Jefferson Medical College, receiving his degree of Doctor of Medicine in 1912. He was president of his senior class, and was voted its “most popular man.”

After serving his internship in Jefferson Hospital, Dr. Mohler was placed in charge of the Laboratory of Clinical Medicine until 1914, and while still on that post was named Instructor in Medicine; successively Demonstrator, Associate, Assistant Professor, Associate Professor, and, in 1936, Clinical Professor of Medicine. In June 1938, he was elevated to the position of Sutherland Prevost Professor of Therapeutics.

In addition to the above named, Dr. Mohler served as Medical Director of the Jefferson Hospital from 1914 to 1938, during which time he was in immediate contact with the affairs of both College and Hospital.

In constant consultation with the members of the Faculty and the Board of Trustees, an excellent training and foundation were laid for his election to Dean of The Jefferson Medical College, in 1938.

* * * * *

Not content with the honor which the Board of Trustees have conferred upon this man, the Alumni of The Jefferson Medical College have made him the President of their Association. His qualifications for this office are equally high. His contributions to the activities of the Association go back over a long period of years to a time when a small group of the Faculty—
Coplin, Montgomery, Hare, Patterson—met in one of the outpatient departments of the hospital each month and endeavored to nurture the then growing, but still feeble Alumni Organization.

His constant membership, attendance at executive meetings and alumni gatherings both in Philadelphia and throughout the country, place him in a position to be familiar with every phase of the needs and requirements of our group. His desire to more completely familiarize the Alumni with the activities of the institution has been demonstrated in the freedom of press which has been granted to the Publication Committee, all evidences of his sympathetic understanding of the Alumni viewpoint.

His plans for the College and the Association will fulfill the visions which many Alumni have had for the still greater development of their Alma Mater. The Alumni, the Board of Trustees, the Faculty stand behind him in his great undertaking, and extend to him their hearty encouragement in the many problems which he has to meet and the decisions which he has to make.

_Sutherland M. Prevost Professor of Therapeutics_

To his position as Sutherland M. Prevost Professor of Therapeutics, Dr. Mohler brings a carefully and thoroughly constructed foundation in medical science. He has observed each phase of the departmental needs, from a humble position at the beginning of his career, throughout his successive promotions to the present position.

He is therefore familiar not only with the scientific requirements of his position, but the practical pedagogical features of the subject. Extensive participation in all those branches of activity which have to do with the furthering of medical progress is evidenced by the several positions which he holds in the medical world of his city, state, and nation.

Dr. Mohler is Director of the Philadelphia Health Council and Tuberculosis Association; Director of the Pennsylvania Society for the Study and Prevention of Tuberculosis; member, Board of Directors of the Children's Heart Hospital; member of Pneumonia Commission of the Medical Society of the State of Pennsylvania; member, Philadelphia County Medical Society, Pennsylvania State Medical Society, and the American Medical Association; fellow of the Philadelphia College of Physicians and the American College of Physicians; member of the Philadelphia Heart Association and the American Heart Association. He is past president of the Philadelphia Heart Association and the Pennsylvania Hospital Association.

The Dean's fraternities are Alpha Kappa Kappa and Alpha Omega Alpha. He also is a member of the Philadelphia Medical Club and the Philadelphia Art Club.

When the Jefferson unit was organized for medical service in the World War, Dr. Mohler received a captain's commission in the unit which was officially designated U. S. Army Base Hospital No. 38. In France he became assistant and chief of Medical Service in U. S. Army General Hospital No. 38, with the rank of lieutenant colonel. Until 1938, when he resigned from the service, he held a lieutenant colonel's commission in the Medical Officers Reserve Corps.
ON SEPTEMBER 1, 1938, Dr. Bernard J. Alpers was appointed Professor of Neurology at Jefferson.

Dr. Alpers was born in Salem, Mass., in 1900. In 1923, he received his degree in medicine from Harvard Medical School, and in 1924 the degree of Doctor of Science in Medicine from the University of Pennsylvania. In addition to his postgraduate work at the University of Pennsylvania, Dr. Alpers studied at the University of Madrid, at Oxford, and at the University of Hamburg.

Dr. Alpers is a Diplomate in Neurology and Psychiatry of the American Board of Psychiatry and Neurology. He is a member of the county, state, and national medical societies, and of the American Neurological Association, the American Psychiatric Association, the Association for Research in Nervous and Mental Diseases, the College of Physicians of Philadelphia, the Philadelphia Neurological Society, and the Philadelphia Psychiatric Society. In many of these organizations, he has held office.

His contributions to the literature have been numerous, more than sixty, all in the field of his specialty.

As avocations, Dr. Alpers is interested in sixteenth century history and the study of trees. He is a member of the Phi Delta Epsilon and of the Harvard Club of Philadelphia.
Dr. Alpers has outlined his plans for his department as follows: "The department of neurology consists, as in the past, of the combined specialties of neurology and psychiatry. Its functions are twofold: teaching and research. With regard to teaching, changes have been made in neurology and are contemplated in psychiatry. At present, the course in neurology extends through three years. The teaching begins in the second year with a course in neuropathology. After this year, this will consist of both a lecture and laboratory course so that the student may have an opportunity of seeing under the microscope the more common neurological conditions to be encountered in practice. The teaching is continued in the third year by a course in semiology, or the meaning of neurological symptoms. This course is equivalent to a course in physical diagnosis and prepares the student for the fourth year clinics in neurology which deal with the more common neurological diseases.

"Psychiatry is taught at present in the third and fourth years, the third year course consisting of a background of psychological mechanisms in preparation for the fourth year instruction in the neuroses and psychoses by means of clinics and sections. Plans have been made and submitted to begin the instruction of psychiatry in the first year and to carry it through the four years in an effort to bring the student in touch with the emotional and personality problems which it is so important for him to understand. Medical students too frequently forget about the personalities of their patients in their search for diagnoses. It is to correct this that the course in psychiatry has been widened in scope, and it is hoped that instruction will soon begin in the first year and continue by a series of correlated courses through the four years.

"As for the research activities of the department, these now center about the laboratory of neuropathology which has been newly established and equipped. The laboratory occupies a large space on the sixth floor of the college
building and is equipped with the most modern apparatus for the carrying out of all the modern neuropathological techniques. The laboratory is concerned with two matters chiefly: (1) the examination of routine neurological material; (2) research activities. The research is of two types: (1) studies of groups of cases of neurological and neuropathological interest; and (2) the study of experimentally produced neuropathological conditions. In addition, the laboratory serves as a means of instruction for members of the department and is engaged in the preparation of material for the students' laboratory course in neuropathology.

"The research activities of the laboratory are varied and include studies of: (1) the nervous system in carbon disulphide poisoning in the human; (2) the nervous system in carbon disulphide poisoning in animals; (3) the relation of the hypothalamus to temperature regulation; (4) the relation of the hypothalamus to emotional and personality disorders; (5) the relation of the hypothalamus to hypertension; (6) the brain in rocky mountain spotted fever. These and other activities are part of the research program. Especial interest is centered on the basal ganglia and their diseases."

New Members of the Board of Trustees

THE Board of Trustees of the Jefferson Medical College announce the election during the past year of Thomas D. M. Cardeza and Horace B. Liversidge to membership on the Board.

* * * * *

Thomas D. M. Cardeza was born in Philadelphia in 1875, the son of James Warburton Martinez Cardeza and Charlotte Drake Cardeza. He was a member of the class of 1900 at the University of Pennsylvania. During his college work his interest lay primarily in the field of natural science. Upon leaving the University he spent much of his time in travel, particularly in exploring in Africa and in collecting natural history specimens. Such constituted his principal occupation until his appointment to the American Embassy in Vienna, in which connection he served until diplomatic relations between America and Austria were broken off. He was private secretary to Ambassador Penfield for two and a half years and, all told, was in the diplomatic service for something over six years. He also served in the Department of State, and after the war received an appointment in Budapest, Hungary.

In recent years Mr. Cardeza has made his residence in Philadelphia, although his varied interests oftentimes have taken him abroad.

In addition to his recent appointment on the Board of Trustees of the Jefferson Medical College and Hospital, Mr. Cardeza is a member of the Board of the Fidelity-Philadelphia Trust Company, Director of the Philadelphia Zoo, member of the Board of Managers of the Morris Arboretum of the University of Pennsylvania and of the Museum of the University of Pennsylvania. For many years he has been a Fellow of the Royal Geographical Society.

Horace P. Liversidge is a Pennsylvanian by birth. He is president of the Philadelphia Electric Company, and has been identified with that company and its predecessors since his graduation from Drexel Institute in 1897. He succeeded to numerous supervisory posts in the engineering and operating departments of the company until his election as vice-president in 1924. Two years later, in 1926, he was named vice-president and general manager; in 1936, he was made a director, and in September 1938, he was elected president.
Mr. Liversidge has been associated prominently with many local, civic, educational, philanthropic and industrial groups. He has gained national repute for his activities in both local and national electrical and engineering fields. He served four one-year terms as president of the Electrical Association of Philadelphia. Under his leadership great strides were made toward creating closer harmony among all branches of the industry in this territory; and in public recognition of this work he was awarded the James H. McGraw Medal for Co-operation in the Electrical Industry. He is a past president of the Association of Edison Illuminating Companies and has been chairman of the Philadelphia sections of the American Institute of Electrical Engineers and of the American Society of Mechanical Engineers. He is now a member of the Operating Committee of the Edison Electric Institute.

In addition to his position as trustee of The Jefferson Medical College and Hospital Mr. Liversidge is also a member of the Advisory Board of the Salvation Army, a member of the Board of Managers of The Franklin Institute and of The Electrical Association of Philadelphia. He is also a director of the Central-Penn National Bank, the Insurance Company of North America and several of its subsidiaries. He is a trustee of the Drexel Institute of Technology.

The William Potter Memorial Lecture

The Annual William Potter Memorial Lecture was delivered in the Assembly Hall of the Jefferson Medical College on February 25th by Major General Merritte W. Ireland, World War Surgeon-General of the United States Army and one of the most illustrious of Jefferson graduates.

General Ireland's topic, "Medicine's Debt to the United States Army," was the twelfth annual lecture given in memory of Mr. Potter, who served on the College Board of Trustees for thirty-one years, for twenty-nine years as President of the Board.

Major General Ireland was a graduate of the class of 1891.Immediately after his graduation he entered the service of the Army. For several years he served as surgeon and health officer at posts in remote parts of the west, while there were still occasional skirmishes with the Indians. Before the 19th century had ended he had served actively in the Spanish-American War and the Philippine Insurrection. Twenty years later he was with the American Expeditionary Forces in France. Since his retirement in 1931 he has been residing in Washington, D. C.

Upon the basis of this outstanding record and years of service for his country, the veteran military surgeon was well qualified to unfold what the medical fraternity and the general public owe to the painstaking research, the heroic experiments, and the outstanding discoveries in medicine and health made by Army men. His talk dealt largely with the human interest side of his subject. He paid the following tribute to Jefferson men for the part they have played in the various wars waged by this nation:

"The record of Jefferson Medical College in the history of military medicine has been an inspiring one. During the great and wholly unnecessary Brother's War of the 60's your graduates did faithful service in both armies. Hunter H. McGuire, of Virginia, who matriculated here in '56, and Matthew M. Butler, of Tennessee, of the class of '60, father of Admiral Butler of the Medical Corps of the Navy, among others, won distinction in the
MAJOR GENERAL IRELAND, PRESIDENT ROBERT P. HOOPER
Of the Board of Trustees, and the William Potter portrait.
Upon the occasion of the Annual Memorial Lecture.
Southern army. In history it is recorded that they were the surgeons who attended Stonewall Jackson when he was wounded at Chancellorsville. Had the records of the Medical Corps of the Confederate Army not been destroyed in the Richmond fire of April 2, 1865, it would, perhaps, be found that your graduates from the Southern States were as prominent in all the armies of 'the Nation that is dead and gone,' as they were in the Federal Army.

"In the old Army, in the Union Army, and, since that War, in the American Army, graduates of Jefferson have played no inconsiderable part in military medicine. W. W. Keen, Jonathan Letterman, S. Weir Mitchell, and Carl R. Darnell, to mention but four, would confer distinction on any medical college.

"What this college did in the World War came under my own observation. One out of four of your living graduates, including the venerable Keen, served in the Army; twenty-seven of them made the supreme sacrifice; and the Jefferson Hospital Unit, which went to France, served with honor to the Army and to their Alma Mater. We had no better nurses than those you trained and sent us, and in the Medical Department of the Army today there is no finer group of doctors than those who went through these venerable halls."

---

**Recent Important Bequests**

**The Ross V. Patterson Fellowship and Teaching Fund**

The Caroline Tyler Lea Fund

Two important bequests have been made to the Jefferson Medical College during the past year. The first of these is the fund which was left by former Dean Ross V. Patterson, for the purpose of promoting the establishment of fellowships in the various departments of fundamental and clinical science. The second is a bequest of $50,000.00, left by Arthur H. Lea for the purpose of conducting research in the prevention or cure of streptococcus infection.

The following extract from the will and testament of Dr. Ross V. Patterson provides as follows:

"I give, devise, bequeath, limit and appoint unto The Jefferson Medical College of Philadelphia, upon the condition that the Trustees of the said The Jefferson Medical College of Philadelphia shall establish a permanent endowment fund to be known as the "Ross V. Patterson Fellowship and Teaching Fund"; the income from which shall be used in approximately equal amounts for the following two major purposes respectively prefaced (A) and (B):

(A) The award of funds to graduates of The Jefferson Medical College whose records indicate ability beyond average in order to make possible to them further medical study, investigation, and training, the better to fit them for careers in (a) the practice of medicine; (b) in medical teaching; (c) in public health service; or (d) in research. During the period of time in which they are engaged in assigned work and receiv-
ing pecuniary aid from the "Ross V. Patterson Fellowship and Teaching Fund" each shall be designated "Patterson Fellow," with such appropriate further addition as will indicate the kind of work being done. The number of Fellows to be so appointed, the length of time which they shall serve, the stipend to be awarded to each, the conditions of payment and the character of the work are to remain in the full discretion of the Board of Trustees of The Jefferson Medical College, according to their best judgment, the amount of income available, the exigencies and opportunities of the times, the special abilities of the Fellow to be appointed, and the particular needs and opportunities in the institution itself. It is my wish and hope that the creation of such Fellowships will serve a double purpose in promoting the welfare and knowledge of promising graduates, and at the same time advance the aims of The Jefferson Medical College by temporarily enlisting in its service some of the best of its graduates, who may by other appointments later become permanently attached to its staff.

(B) A sum derived from income and approximately equal to that used for the support of Fellowships shall be used for the payment of salaries to full time teachers in the Training School for Nurses of The Jefferson Medical College Hospital, the amount to be paid to any one such teacher and the number of such teachers to be so employed, to be determined by the income available, and the particular needs of the Training School, and to be within the full discretion of the Board of Trustees. Teachers so employed shall be designated as supported by the "Ross V. Patterson Fellowship and Teaching Fund." It is my belief that training schools for nurses, in order most effectively to accomplish their purposes, should have a number of well-qualified teaching nurses giving their entire time and interest to the pedagogic needs of the training school."

The extract from the will of Arthur H. Lea, dated January 27, 1936, reads as follows:

"35. I give and bequeath to The Jefferson Medical College in Philadelphia the sum of Fifty Thousand Dollars ($50,000) as a permanent fund, in the name of my wife, Caroline Tyler Lea, and myself, only the income to be used for research directed towards the discovery of a preventive of or cure for streptococcus infection, medical and/or surgical, as suggested by the late Dr. H. A. Hare. When this preventive and/or cure is found and scientifically confirmed, the income of this fund shall be used for the general purposes of the College."

The Jefferson Society Prize

THE annual award of the Jefferson Society for Clinical Investigation, given to that individual or group of individuals belonging to the junior staff who have published the most meritorious piece of investigative work during the past year, has been conferred upon Dr. M. Thomas Horwitz, for his paper "Normal Anatomy and Variations of the Peripheral Nerves of the Leg and Foot."

Honorable mention is made of the work of Dr. Lynn M. Rankin in his paper "Fractures of the Pelvis."
In HIS inimitable fashion, Dr. Randle C. Rosenberger addressed a well-attended staff meeting at the Jefferson Hospital on February 24th, on the subject "Fifty Years at Jefferson." In point of teaching years this most beloved member of the Alumni Association is the senior member of the faculty.

Perhaps this statement should be modified according to the speaker's own words: "Actually I have been around Jefferson forty-eight years, but fifty is a good round number and sounds better."
Forty-eight years covers his three years as a student and his forty-five years of teaching; first, as Instructor of Pediatrics and Assistant Demonstrator in Histology; later, as member of the Pathologic Department; and finally, as Professor of Bacteriology and Preventive Medicine, in 1909.

Dr. Rosenberger regaled the staff upon the “Gay Nineties” period of medical education, when a plug of tobacco and a bag of peanuts were important items in the classroom diet of the medical student; when five cents would “save a student’s life” with a glass of beer and a well-rounded lunch in Charlie Praz’s saloon; when fifteen cents would buy a square meal just across from the hospital in “Jack O’ Hearts” restaurant, in which the atmosphere was always redolent with the symphonic odors of tobacco smoke and burning grease—the proprietor always ready to extend credit or loan money to a Jefferson student and provide a second or third cup of coffee without extra charge.

Those were also the years when Jefferson played football and when it was always quite the thing to start a fight after each game, “no matter who won”; when students would start street parades at the drop of a hat; when cuspidors were standard equipment in the library; and when students went to University of Pennsylvania football games in order to cheer for the opposing team. After nearly every game the professors and their political friends were roused from their slumbers to obtain release for students whose high enthusiasm had caused them to become enmeshed in the toils of the law.

“I am often asked,” Dr. Rosenberger said, “whether the students of today are better than those of days gone by. Sometimes I think they are and then sometimes I think they are not. They are, in a way, different. They are far cleaner, they dress better, and I think the fellows in the old days were much poorer than those who come to the college today. The students today keep the building cleaner, they do not chew tobacco, although they do smoke cigarettes and put their stumps everywhere you do not want them.

“One of the things I miss is the singing. The students today don’t go in for singing. In the years when we had a football team there was plenty of song.”

Dr. Rosenberger recalled how, in 1916, it seemed that Jefferson would become affiliated with its arch-rival, the University of Pennsylvania. He produced what he believes to be the “only piece of paper of its kind in existence.” It was a letter-head with the following inscription at the top:

“The Medical School of the University of Pennsylvania and the Jefferson Medical College of Philadelphia—Office of the Dean—Medical Laboratory Building, Thirty-sixth and Hamilton Streets.”

Dr. Rosenberger related that, in 1916, “Mr. Potter and Mr. Johnson, of the Board of Trustees, came into a faculty meeting and read off the terms of the agreement whereby we were to join the University of Pennsylvania as a medical school. The articles of agreement were brought in already printed. They were signed, and in that year, in the spring, we took part at the Metropolitan Opera House in the commencement of the University of Pennsylvania.

“Now, there had been rumors that Jefferson was going to affiliate with Princeton, and then with Bucknell, and then with other colleges. You see how near we were to being obliterated by this process of so-called affiliation. I do not know just what happened. We teachers did not know where we stood at the time, but fortunately the thing did not go through for some reason or other.”
Intimate little glimpses were given into the lives of many of the distinguished professors of the last half century—the DaCostas, Coplin, Spitzka, Dean Holland, Parvin, Longstreth, Montgomery, Keen, Davis, Gibbon, Graham, and others.

To illustrate his lecture, Dr. Rosenberger had slides made from old photographs dug up in the library, or borrowed from the older alumni. Many of them showed young students in luxuriant hirsute adornment; there were interior views showing equipment and furnishings that today are obsolete and in marked contrast with the newest and most efficient material available that now is standard everywhere throughout the College.

In the course of his lecture he showed a photograph of an interesting group of very early students, not one of which can now be identified, thus making the picture of little or no use in the archives of the College. He urged that all alumni having early photographs of Jefferson men, or Jefferson scenes, identify them fully so that, should they ever be turned over to the library, they can be of possible aid in further lectures, or development of historical material.

At sixty-four, Dr. Rosenberger continues hale and hearty and enthusiastic over his "bugs." His good humor and ready wit—wit that can bite when necessary—remain with him, as every student of today will testify. Of Pennsylvania Dutch stock, he participates actively in the affairs of The Pennsylvania German Society and the Cannstatter Volksfest Verein, of which he is a life member. A lover of outdoor life, he enjoys membership in the Academy of Natural Sciences, the American Museum of Natural History, the Zoological Society of Philadelphia, and the Audubon Society.

Further proof of his love for outdoor life is the fact that a horse and buggy is today his favorite means for transportation through the countryside near Rahns, Pa., where, with Mrs. Rosenberger, he works in his old-fashioned garden and indulges his other hobbies—bird study, quoits, croquet. He gave up tennis and baseball a while back because the younger set was getting a little too fast for him.

The Jefferson Medical College
Activities of the Various Departments

In accordance with the frequently expressed desire of Alumni to hear more of the activities of the departments and the work of individual members of the staff of their college and its hospital, the Publication Committee of the Bulletin is attempting this year to present news from each department. A letter was addressed to the head of each department, requesting him to provide the editor with information regarding the new equipment, the progress and the plans for his department; also with information in reference to the activities of individual members of his department, including the promotions, the meetings that have been attended, the election to national societies, the election to office in local and national organizations, new appointments in various institutions, papers that have been read during the year, meetings that have been attended, and publications prepared. The response to this questionnaire has been quite variable. In some instances the reports were very brief and obviously do not encompass the entire activities of the department; in other cases the reports have been so extensive that it has been necessary for the Publication Committee to summarize many portions of the report; in fact,
DR. FRANK C. KNOWLES
Professor of Dermatology
Portrait presented to the College by the Class of 1939
at this time and in this section it appears impossible to include all of the articles written by the individual members of the staff, and the Publication Committee, therefore, plans to present soon again the bibliography of the entire staff as was done a few years ago.

In the present report the reader will, therefore, find the original statement of the head of the department in regard to progress in his division and a resume of such reports of the activities of the individual members of his department as have been submitted by the department heads.

It is to be hoped that this new section of the Bulletin will prove of such interest that the departments will be encouraged to render each year a complete report of their activities to the Alumni Association of the institution.

ANATOMY

Dr. Schaeffer states that during the past summer the administrative offices were re-decorated, new furniture installed, and the telephone system throughout the building made more available for office and staff use. New and additional lighting fixtures were placed in the Histology and Embryology Laboratory greatly adding to the working facilities. The Compression and Tank System in the Embalming Room was replaced with more modern equipment. The large general incinerator was entirely rebuilt, a new hot water generator installed, and a new boiler added to the equipment for the preparation of skeletal material.

A number of motion films bearing on developmental processes were purchased and added to the facilities for teaching embryology. The equipment for the various phases of photography was modernized.

Full-time teachers have been added to the staff, men who have already given evidence of ability in the direction of original work.

The Department of Anatomy is committed to the thought that the instruction of the medical school is twofold: first, to teach and train men to become practitioners of medicine, and second, to have the teachers of its regularly constituted departments contribute to the enlightenment of scientific medicine in its various branches. It is believed that the combining of research with teaching makes the most effective and stimulating teachers. The Anatomical Seminar inaugurated a few years ago continues to prove stimulating and helpful.

Dr. A. J. Ramsay has been advanced to the rank of Assistant Professor of Histology and Embryology.

Dr. George A. Bennett was appointed Associate in Anatomy on a full-time basis.

Dr. J. Parsons Schaeffer rewrote his chapter on the Respiratory System for the forthcoming tenth addition of Morris' Anatomy.

Dr. Schaeffer is co-author with Drs. Pancost and Pendergrass of a large textbook on "The Head and Neck in Roentgen Diagnosis".

Dr. N. A. Michels wrote section XIV on "The Mast Cells" in volume I of the four-volume edition of the "Handbook of Histology".

Dr. George H. Bennett was elected a member of the Association of American Anatomists at the Boston meeting in April, 1939.

Drs. Schaeffer, Michels, and Ramsay participated in the program of the American Association of Anatomists, Pittsburgh, Pa.; Dr. Schaeffer also attended the sessions of the American Association of Anatomists, Boston. In June, 1939, Dr. Schaeffer participated in the Scientific Program of the meeting of the American Medical Association, San Francisco.

BACTERIOLOGY

Dr. Rosenberger states that due to the Patterson fellowships he feels that our department will be equipped and properly manned when an investigation is to be sponsored. All equipment for routine teaching is being gradually added from year to year and when contemplated alterations are completed there will be opportunity given for worthwhile research problems.

Dr. Kreidler is now chairman of the program committee of the local branch of the (Eastern Penna.) Society of American Bacteriologists.

BRONCHOSCOPY AND LARYNGOLOGY

Dr. Kelvin A. Kasper was promoted to Assistant in Laryngology, Dr. D. C. Baker to Assistant in Laryngology and Bronchoscopy, Dr. F. J. Putney to Chief Clinical Assistant in Bronchoscopy, Dr. C. W. Wirtz, Jr., to Clinical Assistant in Bronchoscopy, Dr. Howard M. Hebble to Clinical Assistant in Laryngology, and Dr. Edward C. Britt to Clinical Assistant in Laryngology.

Dr. C. Calvin Fox was promoted to Associate in Laryngology.

Dr. F. J. Putney was made Assistant Laryngologist, Radiological Clinic, Philadelphia General Hospital.

The Drs. K. A. Kasper, D. C. Baker, Jr., and C. W. Swalm were certified by the American Board of Otolaryngology.

Dr. L. H. Clerf is Director of the Pennsylvania Tuberculosis Society and Secretary of Pennsylvania State Medical Society (Eye, Ear, Nose, and Throat Section).

There were exhibits at the Penna. State Society and the Interstate Post Graduate Association.

CHEMISTRY

Dr. Bancroft states it must be understood that the major activity is that of teaching the course in Physiological Chemistry, and that in itself is a strenuous task.

Dr. Bancroft was elected Chairman of the Pennsylvania Chapter of the American Institute of Chemists. He also addressed a meeting of the American Chemical Society at Baltimore.
DERMATOLOGY

Dr. Knowles states that plans are progressing for several Dermatological research problems.

Dr. Edward F. Corson was promoted to Clinical Professor of Dermatology and Dr. Arthur A. Pratt to Instructor in Dermatology.

Several members of the staff were elected to the American Academy of Dermatology & Syphilology.

Dr. Frank C. Knowles was elected as a trustee on the Original Board of the American Academy of Dermatology and Syphilology.

Drs. F. C. Knowles, H. B. Decker, A. G. Pratt, and Alex Clarke read papers before the American Dermatological Association.

Jefferson was host to the Philadelphia Dermatological Society on March 24, 1939.

GENTO-URINARY SURGERY

Dr. Davis states that the most important news concerning the Department of Genito-Urinary Surgery is that beginning July 1, 1939, a Residency will be established. The term of the Residency will be for 3 years, so that the appointee will obtain a thorough training which will qualify him not only for certification by the Board of Urology, but to practice Urology anywhere in the country. The first appointee is Dr. John Y. Houser, graduate of the University of Cincinnati, who has had training in General Surgery and Surgical Pathology to fit him for this position. It is to be hoped that when the next appointment is made, a suitably qualified graduate of Jefferson Medical College may be selected.

Except for maintaining and improving existing equipment, there are no striking innovations on the treatment of Genito-Urinary diseases under way, however, to add a new cystoscopic-fluoroscopic-roentgenographic table, which will be of the latest design.

Dr. H. A. Bogaev was made assistant to the Urologic Service at the Philadelphia General Hospital. Dr. W. H. Kinney was made Chief of Urologic Staff at the Delaware County Hospital.

Dr. D. M. Davis wrote the Chapter in Medical Clinics of North America on "Coli on the Bladder" and the chapter on "Hydronephrosis" in the Textbook of Medicine. Dr. H. A. Bogaev wrote a monograph on Sulfanilamide in the Treatment of Acute pyelitis in the Male.

Dr. D. M. Davis is Executive Committee member of the Philadelphia Urologic Society; Dr. T. R. Fetter is Secretary-Treasurer of the Philadelphia Urologic Society, and Dr. J. F. McCahey is Associate Vice-President of the Philadelphia County Medical Society.

Dr. D. M. Davis presented papers before the American Urologic Society at Quebec in June, 1938, the American Neisserian Society in Washington in May, 1938, the International College of Surgeons in October, 1938, the Rochester Academy of Medicine in November, 1938, and the American Urological Association at White Sulphur Springs in May, 1939.

Dr. W. H. Kinney presented a paper before the Pennsylvania State Society in May, 1938. Dr. J. F. McCahey read a paper before the American Urologic Society at Quebec in June, 1938, Dr. M. A. Bogaev read a paper before the American Urologic Society at Quebec in June, 1938, Dr. T. R. Fetter had an exhibit given for them at Jefferson.

The American College of Surgeons, the International College of Surgeons, and the combined New York and Philadelphia Branch Societies of the American Urologic Association had clinics given for them at Jefferson.

GyneCOLOGY

Dr. Anspach states that the Gynecological Department has had an active year.

They were the beneficiary of the Charity Ball, and will get some new equipment for their operating room and for the clinic.

Drs. Montgomery and Lintgen were advanced to Assistant Gynecologists in the hospital and Drs. Caffazo and Farrell were made Associates in Gynecology in the medical school. Dr. Scheffey was made Clinical Professor of Gynecology and Drs. Montgomery, Lintgen and Ginsberg Associates in Gynecology.

Dr. Scheffey was elected a member of the Board of Directors of the Philadelphia County Medical Society and Dr. Roy Mohler has been re-elected secretary of the Obstetrical Society of Philadelphia.

Drs. Anspach and Scheffey took part in the proceedings of the American Gynecological Society.

Dr. Anspach discussed a paper before the Pennsylvania State Medical Society. He contributed on salpingitis to the surgical clinics of North America. He took part in the proceedings of the Post-graduate Institute of the Philadelphia County Medical Society, addressed the Delaware State Medical Society at Wilmington, and also addressed the Delaware division of the Women's Field Army of the American Society for the Control of Cancer.

Dr. Scheffey read a paper before the Regional Section of the American College of Surgeons. He also addressed the Cape May and Atlantic County Medical Societies, the Carbon County Medical Society, and the McLean County Medical Society of Illinois.

Dr. Montgomery addressed the Hazleton Branch of the Luzerne County Medical Society, the Cambria County Medical Society and the Carbon County Medical Society.

Dr. Hoffmann addressed the Berks County Medical Society and the Delaware County Medical Society. He also made an exhibit before the meeting of the State of New Jersey Medical Society in Atlantic City.

Dr. Roy Mohler addressed the Connecticut State Medical Society.

The Staff entertained the Tri-City Meeting of the Boston, New York, and Philadelphia Obstetrical Societies with an operative clinic and clinical demonstrations.

MEDICINE

Dr. Reimann states that the Department of Medicine plans to establish a clerkship system for the fourth-year students in September, 1939. The adoption of this method of teaching will permit constant and consistent supervised teaching in the wards for small groups of students who will be expected to work out for themselves the history, physical examination, laboratory and special studies on patients assigned to them. The medical wards at Jefferson, Pennsylvania, and Philadelphia General Hospitals will be used. They will perform their own laboratory tests, attend x-ray conferences, make rounds, and also read a paper and present an exhibit before the American Urologic Society at Quebec in June, 1938, Dr. T. R. Fetter had an exhibit given for them at Jefferson, Pennsylvania, and Philadelphia General Hospitals will be used. They will perform their own laboratory tests, attend x-ray conferences, make rounds, and also read a paper and present an exhibit before the American Urologic Society at Quebec in June, 1938, Dr. T. R. Fetter had an exhibit given for them at Jefferson, Pennsylvania, and Philadelphia General Hospitals will be used. They will perform their own laboratory tests, attend x-ray conferences, make rounds, and also read a paper and present an exhibit before the American Urologic Society at Quebec in June, 1938, Dr. T. R. Fetter had an exhibit given for them at Jefferson, Pennsylvania, and Philadelphia General Hospitals will be used. They will perform their own laboratory tests, attend x-ray conferences, make rounds, and also read a paper and present an exhibit before the American Urologic Society at Quebec in June, 1938, Dr. T. R. Fetter had an exhibit given for them at Jefferson. This general plan will necessarily call for a great reduction in number of hours now devoted to didactic lectures.
In the future it is hoped that further changes in teaching arrangements may be made. For example, it is desired to introduce students to medical ward work in the third year and to allow the fourth-year students to serve the outpatient department in lieu of the present arrangement. It is felt that the better supervision usually available in the wards will enable students to obtain more benefit from contact with patients in the dispensary. The service of trained fourth-year students as clerks in the dispensary will benefit students, patients and the service in general by reducing the amount of detail for the staff.

Another laboratory is being constructed on the second floor to accommodate a new division of hematology in the Department of Medicine under the supervision of Dr. Harold Jones. The laboratory is to be used chiefly for experimental work in hematology. It is planned to inaugurate a hematologic clinic in the outpatient department.

Numerous investigative problems are under way in the Department of Medicine chiefly in the field of metabolism, nutrition, hematology and infectious diseases. The work has been greatly facilitated by the support and encouragement of the Dean. Researches have been conducted in cooperation with the Departments of Pharmacology, Pathology, Radiology, Physiological Chemistry and also with members of the Staff of the University of Pennsylvania and the Rockefeller Institute.

The Department has continually sought better cooperation with other departments and has thus far established a close connection with the Department of Surgery at the Pine Street Hospital and with the Department of Psychiatry. A member of the Psychiatric Department regularly makes ward rounds with the medical staff to study and make recommendations in cases involving psychiatric problems.

**Staff promotions:**

Drs. Creighton H. Turner, Garfield G. Duncan and A. Cantarow to Associate Professors.

Dr. Leandro M. Tocantins to Assistant Professor.

Dr. John T. Eads to Associate, Drs. Peter W. Wirtz, W. Craig Clark, Hayward Hamrick and Tracey D. Cuttle to Assistant Demonstrators.

**Appointment to the Staff of Other Institutions:**

Dr. E. J. G. Beardsley, Director of the Medical Dept. Delaware County Hospital, Drexel Hill.

Dr. Mitchell Bernstein, Chairman of the Medical Staff, Jewish Hospital, Philadelphia.

**Books, Monographs:**

Dr. Hobart A. Relmann, "Treatment in General and encouragement of the present practice. It is felt that the better supervision usually available in the wards will enable students to obtain more benefit from contact with patients in the dispensary. The service of trained fourth-year students as clerks in the dispensary will benefit students, patients and the service in general by reducing the amount of detail for the staff.

**Appointment to the Staff of Other Institutions:**

Dr. E. J. G. Beardsley, Director of the Medical Dept. Delaware County Hospital, Drexel Hill.
Dr. S. A. Loewenberg, Academy of Medicine of Northern New Jersey, Endocrine Disturbances and Present Day Endocrine Therapy, Endocrinopathies, Hudson County Medical Society, Jersey City, New Jersey. Dr. S. S. Schlezinger, at Wilkes-Barre, Pa., Practical Therapy in Endocrinology.

NEUROLOGY
An account of the new department of Neurology and its equipment appears elsewhere in the Bulletin.

Dr. Robert A. Matthews was promoted to Assistant Professor of Psychiatry, Drs. Nathan S. Schlezinger and Thomas K. Rathmell to Instructors in Neurology, and Dr. Robert C. Bookhammer to Demonstrator in Psychiatry.

In the hospital, Drs. Nathan S. Schlezinger, Walter R. Krauss and Milton K. Myers to Clinical Assistants in the Out-Patient Department of Neurology.

Dr. Nathan S. Schlezinger was made Assistant in Neurology at the Wills Hospital. Dr. Raphael H. Durante was made Assistant Physican in Neurology at the Philadelphia General Hospital.

Dr. Bernard J. Alpers is Vice-President of The Association for Research in Nervous and Mental Diseases, Assistant Secretary of the American Neurological Association, and Secretary of the Philadelphia Neurological Society.

Dr. Baldwin L. Keyes is President of the Philadelphia Psychiatric Society, Vice-President and Director of the Public Charities Association, Chairman of the Mental Hygiene Committee, Member of the Advisory Council, Penal Affairs Committee, Member of Medical Advisory Board of Municipal Court of Philadelphia, Chairman of Noise Abatement Committee of the Pennsylvania Medical Journal.

Dr. Robert A. Matthews is Editor of Transactions of both the Philadelphia Neurological and Philadelphia Psychiatric Societies.

Dr. Bernard J. Alpers wrote the Chapter on Vascular Diseases of the Brain in Tice's Practice of Medicine.

Dr. Baldwin Keyes wrote chapters on Nervous and Mental Diseases in Reimann's Treatment in General Medicine.

Dr. Matthews was a contributor to the Section of Neurology and Psychiatry, Review of Medical Progress and Supplement to Cyclopaedia of Medical Science.

Dr. Nathan S. Schlezinger wrote the chapters on Meningitis and Paralysis in the Cyclopaedia of Medicine.

Dr. Keyes participated in meetings of the American Psychiatric Association at San Francisco, the American Neurological Association at Atlantic City, the American Society for Research in Mental and Nervous Diseases at New York, and the Pennsylvania State Medical Society at Scranton.

Several clinics were given by Dr. Baldwin Keyes for visiting Medical Societies.

OBSTETRICS
Dr. Vaux states that a new Chappel Incubator in the Maternity Department, nursery and equipment for students on outside cases have been received. New facilities are enlargement and continuity in the laboratory for special work on vaginal infections and hormonal studies and endocrinology. Arrangements have been completed for all the deliveries to take place on the second floor, Maternity Department or in the Isolation Division. New Isolation Quarters on the third floor, larger capacity and fully equipped for isolation cases.

In the future it will be desirable to move the private labor room from the eleventh floor to the third floor, when arrangements can be fulfilled whereby we may acquire the present kitchen to be converted into a labor room for private patients.

There were several new editions and many monographs prepared and participated in by members of the staff.

There were scientific exhibits by the Department and members of the staff from the Bland Collection. There was also a scientific exhibit at the A. M. A. convention in St. Louis. Members of the Department Staff took part in the Inaugural Section of Obstetrics and Gynecology at the State Society in Scranton.

Many clinics were given to visiting societies, particularly to the Tri-City Meeting and a small Travel Club Group from Virginia Obstetrical Societies.

OPHTHALMOLOGY
Dr. Shannon states that on March 27, 1939, the Faculty approved the recommendation of the Committee on Research and Research Grants for the proposed research of Dr. Warren S. Reese, bearing on experiments in the prevention of anterior synchiae resulting from perforating wounds of the cornea.

Dr. Carroll R. Mullen was promoted to Instructor in Ophthalmology.

Dr. Joseph Waldman has been appointed Chief of Clinics, Eye Out-Patient Department, Jefferson Hospital.

Dr. Carroll R. Mullen was appointed Attending Surgeon, Wills Eye Hospital.

Dr. Sidney Vaux was elected to the American Academy of Ophthalmology and Otolaryngology.

Drs. Carroll R. Mullen and S. S. Simons were elected Fellows of American College of Surgeons.

Drs. Shannon, Olsho, and LeFever are members of the Committee of the Conservation of Vision; and Dr. Olsho is Director of the Eye Section of the Philadelphia County Medical Society. Dr. LeFever is a member of the Executive Committee of the Eye Section.

Dr. Shannon gave a radio talk over KYW in April, 1938 and participated in the clinic for the International College of Surgeons in October, 1938.

Dr. Simons read a paper before the State Medical Society.

Dr. Olsho participated in the Post-Graduate Lectures of the Academy of Ophthalmology and Otolaryngology at Washington.

OTOLOGY
Dr. Williams states that deafness is on the increase in America and a large part of this deafness has its origin in neglected ears in childhood.

The Department of Otolaryngology has organized a clinic for the prevention of deafness. In this clinic these patients have their ears tested in a sound-proof room; they are studied for local and systemic conditions which might have some influence on their hearing, and proper treatment is instituted.

Dr. H. J. Williams will present a paper before the American Medical Association in May, at St. Louis.
**Pathology**

Dr. Moon states that plans have been formulated and are now under consideration by the Board of Trustees, for a Research Fellow in Pathology, under the Ross V. Patterson Bequest.

Dr. B. L. Crawford was made Assistant Professor of Pathology, and Dr. C. J. Bucher Associate in Pathology. Dr. M. M. Lieber was made Demonstrator of Pathology and Dr. Peter A. Herbut has been nominated for a vacancy as Instructor in Pathology caused by the resignation of Dr. Corwin.

Dr. W. C. Corwin was elected to fellowship in the American Association of Pathologists and Bacteriologists. Dr. Hugh C. Grady and Dr. W. C. Corwin read papers at the annual session of the above Association.

A paper was read before the Surgical Section of the A. M. A. at San Francisco. The Staff demonstrated its exhibit on Shock at the same session and also at the meeting of the Pennsylvania State Medical Association and that of the International Post-Graduate Assembly at Philadelphia.

During the five years 1934-1938, 46 papers were published from this department, either independently or in collaboration with others. Four additional reports have been accepted for publication. For many years it was regretted that the departments of pre-clinical science in Jefferson were not abreast with those of other schools in research work. Many Alumni have expressed gratification that all of these departments, as well as the clinical divisions, are now attracting attention by their productivity.

**Pediatrics**

Dr. Bauer states that there is a new cubicle system in the solarium and a new speech defect clinic.

Dr. Edward L. Bauer gave Post-Graduate Lectures in Reading, Scranton, Norristown and Clearfield. In August he will give a ten lecture Post-Graduate Course to five counties under the auspices of the State Department of West Virginia.

Dr. Edward F. Burt had an exhibit at the State Medical Society and the A. M. A.

Dr. Aaron Capper gave an address before the Luzerne County Medical Society at Hazleton.

Dr. Edwin Stork gave an address at Reading.

Dr. Milton Meyers published the Medical Vocabulary in Five Languages.

**Pharmacology**

Dr. Miles E. Drake was made an Associate in Pharmacology.

Dr. Gruber elected Treasurer of the American Society for Pharmacology and Experimental Therapeutics.

The staff took part in American Societies for Experimental Biology, April, 1939.

Four papers on various phases of pharmacologic research have been written in the past year by Dr. Cantarow and Dr. Haury.

**Physiology**

Dr. Thomas reports that the only events of interest that have occurred in the Department of Physiology in the past year are:

1. Publication of a paper in the American Journal of Physiology by Prof. Thomas and Associate Prof. Crider on Inhibition of Gastric Motility associated with the Presence of Products of Protein Hydrolysis in the Upper Small Intestine. This paper described the results of research which has been going on in the Department for several years.

2. Prof. Thomas and Associate Prof. Crider attended the meeting of the Federation of American Societies for Experimental Biology at Toronto, during the last week of April. Prof. Thomas presented a paper on Inhibition of Amylase and Amylase-Digestible Dextrins due to Amino-acids in the Small Intestine.

There have been no changes in the personnel nor any notable additions to the equipment in the past several years. However, we feel that the Department is at present well organized and except for the possibility of taking advantage of fellowship funds recently provided by the College, we do not see the need for any extensive changes.

**Surgery**

Dr. Muller states that a new surgical unit has been completely equipped at the Pine Street Hospital through the generosity of Mr. and Mrs. B. H. Fein. This operating room enables modern surgical treatment for all phases of pulmonary tuberculosis required by the patients, in the Chest Department. Several of the operating rooms have been equipped with new lights of a modern type.

The anaesthetic machines have been brought up to date.

The most important "news" is that teaching in the surgical department will be much more clinical next fall, as it is planned to introduce what is called the clinical clerkship method.

Dr. John Flick was made Clinical Professor of Surgery and Dr. Howard H. Bradshaw has been made Demonstrator of Surgery and Assistant Surgeon in the Hospital.

Dr. John Flick is Chief of Surgical Service "A" at the Pennsylvania Hospital and Surgeon to the Bryn Mawr Hospital and White Haven Sanitarium. Dr. Bradshaw is now on the Surgical Staff of the Presbyterian Hospital and on the Courtesy Staff of the Bryn Mawr Hospital.

Dr. Muller is revising the Davis Applied Anatomy, and has revised his chapter on the Pancreas in Christopher's Text Book of Surgery.

Dr. Muller, Flick and Walking were admitted as Founders of the American Board of Surgery and Dr. Bradshaw, by examination, was certified.

Dr. Muller participated in the meetings of the American College of Surgeons in New York and in its Sectional Meeting at Indianapolis.

Drs. Bradshaw and Willauer had an exhibit of thoracic surgery before the Interstate Post-Graduate Association and the Pennsylvania State Medical Society Meeting.

Dr. Walking participated in a Seminar at Huntington, Pennsylvania, and meetings of the Washington and Warren County Medical Societies.

Dr. Muller read papers before the Medical Society at New Jersey, the Southern Pennsylvania Alumni Association, at Harrisburg, and the Philadelphia Academy of Surgery and New York Surgical Society.

Dr. Walking attended a Seminar on Fractures at Williamsport and presented a paper before the Luzerne County Medical Society.
Surgery
Dr. Shallow states that the Neurosurgical Division has expanded with the acquisition of Dr. John McNerney whose preliminary training was at Jefferson, Yale, and the Crile Clinic. Dr. McNerney has been appointed Neurosurgeon to St. Joseph's and Frankford Hospitals.
Dr. Benjamin Haskell was promoted to Chief Clinical Assistant in the Rectal Department; Dr. Kenneth E. Fry to Assistant Surgeon; Dr. Kenneth E. Fry to Demonstrator of Surgery; Dr. Robert Layton to Chief Clinical Assistant; Dr. P. A. McCarthy to Associate in Surgery; Dr. William T. Lemmon to Associate in Surgery; and Dr. Sherman Eger to Demonstrator of Surgery.
Dr. William T. Lemmon was elected to the position of Surgeon at the Philadelphia General Hospital. Dr. Charles F. Nassau was named Director of Public Health.
Dr. Shallow contributed to the Cyclopedia of Medicine and Operative Surgery by Dr. Max Thorek.

Dr. Shallow was appointed to the Board of Regents of the International College of Surgeons and to the Editorial Board of the same organization.
Dr. Shallow read a paper and held a clinic for the International College of Surgeons meeting in Philadelphia.

Therapeutics
Dr. Mohler states that the Ross V. Patterson Heart Station is in operation on a full-time basis in the Hospital since September 1, 1938.
Dr. Eads was promoted to Associate in Medicine. Dr. Semisch was elected to Associate Cardiologist in Jefferson Hospital and Dr. Hamrick was elected Assistant Demonstrator of Medicine.
Dr. Griffith wrote in the Cyclopedia of Medicine and Dr. Eads wrote a chapter in the "Treatment in Medicine" by Reimann.
Dr. Mohler contributed to "Reimann Treatment" and was Associate Editor of "Therapeutics" in Cyclopedia of Medicine.

New Appointments in The Jefferson Medical College since June 1, 1938
Bernard J. Alpers, M.D., Professor of Neurology.
Lewis C. Scheffey, M.D., from Associate Professor to Clinical Professor of Gynecology.
Arthur J. Davidson, M.D., from Associate Professor to Clinical Professor of Orthopedic Surgery.
Edward F. Corson, M.D., from Associate Professor to Clinical Professor of Dermatology.
Creighton H. Turner, M.D., from Assistant Professor to Associate Professor of Medicine.
Garfield G. Duncan, M.D., from Assistant Professor to Associate Professor of Medicine.
A. Cantarow, M.D., from Assistant Professor to Associate Professor of Medicine.
Robert A. Matthews, M.D., from Associate to Assistant Professor of Psychiatry.
Leandro M. Tocantins, M.D., from Associate to Assistant Professor of Medicine.
Miles E. Drake, B.S., M.S., Ph.D., Associate in Pharmacology.
Hyman M. Ginsburg, M.D., from Demonstrator to Associate in Gynecology.
C. Calvin Fox, M.D., from Demonstrator to Associate in Laryngology.
Carl J. Bucher, M.D., from Demonstrator to Associate in Pathology.
John T. Eads, M.D., from Demonstrator to Associate in Medicine.
P. A. McCarthy, M.D., from Demonstrator to Associate in Surgery.
William T. Lemmon, M.D., from Demonstrator to Associate in Surgery.
Ralph C. Hand, M.D., from Instructor to Demonstrator of Orthopedic Surgery.
Robert S. Bookhammer, M.D., from Instructor to Demonstrator of Psychiatry.
Howard H. Bradshaw, M.D., from Instructor to Demonstrator of Surgery.
Kenneth E. Fry, M.D., from Instructor to Demonstrator of Surgery.
Sherman A. Eger, M.D., from Instructor to Demonstrator of Surgery.
Warren C. Corwin, M.D., Instructor in Pathology.
Henry Sigmond, M.D., from Assistant Demonstrator to Instructor in Orthopedic Surgery.
M. Thomas Horovitz, M.D., from Assistant Demonstrator to Instructor in Orthopedic Surgery.
J. Vernon Ellson, M.D., Instructor in Obstetrics.
Arthur G. Pratt, M.D., from Assistant Demonstrator to Instructor in Dermatology.
Carroll R. Mullen, M.D., from Assistant Demonstrator to Instructor in Ophthalmology.
William Hirschler, M.D., from Assistant Demonstrator to Instructor in Otology.
Thomas K. Rathmell, M.D., Instructor in Nervous and Mental Diseases.
Nathan S. Schlezinger, M.D., Instructor in Neuro-Pathology.
Kenneth M. Corrin, M.D., Assistant Demonstrator of Psychiatry.
Charles W. Semisch, M.D., Assistant Demonstrator of Therapeutics.
Hayward R. Hamrick, M.D., Assistant Demonstrator of Therapeutics.
J. Brophy, M.D., Assistant Demonstrator of Obstetrics.
G. Dickson, M.D., Assistant Demonstrator of Obstetrics.
S. V. Kramen, M.D., Assistant Demonstrator of Obstetrics.
L. G. Feo, M.D., Assistant Demonstrator of Obstetrics.
Paul Ebner, M.D., Assistant Demonstrator of Obstetrics.
A. Rakoff, M.D., Assistant Demonstrator of Obstetrics.
Peter A. Theodos, M.D., Assistant Demonstrator of Medicine.
C. Wilmer Wirts, M.D., Assistant Demonstrator of Medicine.
John Craig Clark, M.D., Assistant Demonstrator of Medicine.
Hayward Hamrick, M.D., Assistant Demonstrator of Medicine.
Tracy D. Cuttle, M.D., Assistant Demonstrator of Medicine.
Melvin Dillman, M.D., Roentgenologist to the Department of Anatomy.

A New Division of Hematology

IN DECEMBER 1938, the Jefferson Medical College and Hospital received funds, from sources which at present request that their names be withheld, to establish the Division of Hematology in the Department of Medicine. A modern laboratory, complete in every respect for this purpose, is being constructed on the second floor, just west of the Men's Medical Department. Something more than $20,000.00 has been made available for the essential expenditures during the current year, part of which will be applied to the equipment of the laboratory and part to the conduct of research problems. In addition to the laboratory, an outpatient clinic for the study of spleen, blood, and bone marrow disturbances will be conducted.

The same donors plan in the very near future to supply funds for a blood bank and for the early conduct of extensive research on the problem of leukemia. The donors have further made plans to establish a permanent foundation which will make possible extensive researches in all phases of blood disease.

The personnel of the laboratory has been selected as follows:
Director—Dr. Harold W. Jones.
Assistant Director—Dr. Leandro M. Tocantins.
Fellow—Dr. Welland Hause.
Jefferson Fellowships and Residencies

THE first fellowship at Jefferson was established in 1905 by a gift of $5,000 from the late Emeritus Professor W. W. Keen, as a memorial to Mrs. Keen. Whenever the accumulated income amounts to $1,000 a fellowship is awarded by the Trustees to a graduate of Jefferson Medical College of not less than one nor more than ten years’ standing upon condition that he shall spend at least one year in medical research in such subject or subjects as may be approved by the Faculty, and that he shall publish at least one paper embodying the results of his work as the Corinna Borden Keen Research Fellow of the Jefferson Medical College. The original Fellow was Aller G. Ellis, M. D. of the Class of 1908. Since that time this fund has aided six other Fellows.

This was followed in 1929 by a yearly grant from Mrs. John C. Martin. The purpose was to determine what part, if any, is played by infections in organs themselves in certain of the chronic diseases such as: nephritis, cirrhosis, Banti’s disease, and others. The recipient of this grant was known as the Martin Research Fellow in Pathology. The first Fellow was H. L. Stewart, M. D. of the Class of 1926. The grant was discontinued in 1936.

In 1930 the J. Ewing Mears Teaching and Research Fellowship was established by J. Ewing Mears, M. D., Class of 1865. The income from this fund is to be spent in defraying the expense of a course of study of conditions that may better the physical and moral qualities of future generations, reserving to the College the right to determine the particular aspects of the science taught. The original Fellow was L. M. Tocantins, M. D. of the Class of 1926.

The I. P. Strittmater Research Fund was established in 1928. The income from this fund yielded enough so that one Fellow was appointed in August 1931.

In 1937 the Emeritus Professor of Obstetrics, P. Brooke Bland, M. D., established two Residencies in Obstetrics. Preference in appointment is given to those who have served as interns in the Jefferson Hospital. The original Residents in this department are J. A. McCormack, M. D., and J. L. Finn, M. D., Class of 1935.

The establishment of additional Residencies and Fellowships has progressed rapidly since 1937. During 1938 additional Residencies were set up in Surgery, Medicine, Obstetrics, and two in Roentgenology. In 1939 one was made available in Genito-Urinary Surgery.

In 1939 a Fellowship in Hematology was established. The Arthur H. Lea Fellowship in Bacteriology and Chemistry was also established. Added to these are Fellowships in Medicine, Bronchoscopy, Otolaryngology, and Chest Diseases.

What is thus far the greatest single addition to the establishment of Fellowships is The Patterson Fund, established in 1938 by the late Dean, and Professor of Therapeutics, Ross V. Patterson, M. D. The income from this fund is to be used for Fellowships whose holders will be engaged primarily in research problems.

The establishment of Fellowships is one of the important steps in the advancement of medical knowledge and will do much to keep the name of Jefferson in the front rank of medicine.

As the horizon of medicine becomes broader in scope it becomes increasingly difficult for any one individual to be proficient in many branches,—consequently the need has arisen for special training. It is to answer this
need that Jefferson's new Fellowships and Residencies have been instituted. Those who hold them are fortunate in being able to advance themselves in their chosen field under expert tutelage.

__________________________

Jefferson Alumnus To Be
New Surgeon General of Army

THE new nominee for the post of Surgeon General of the United States Army, Colonel James C. Magee, is a Jefferson alumnus.

Colonel Magee was a resident of Philadelphia in youth, was a member of the Class of 1905, and entered the Army Medical Corps three years later.

__________________________

Jefferson Alumnus to be Honored in Costa Rica

THE following resolution received from The Board of Society Protection of Cartago, Costa Rica, C.A. indicates the honor which is to be conferred upon a former Jefferson graduate.

The reply of the Board of Trustees and of the Dean is appended.

Cartago, Costa Rica, April 19th, 1939.

The Board of Society Protection of Cartago, Costa Rica, C. A.

Whereas:
On the 11th day of next month of May 1939, in the Central Square of this city will be unveiled the Bronze Bust of the late Doctor Maximiliano Peralta Jimenez the beloved son of this Providence;

Whereas:
Doctor Peralta was one of the most distinguished benefactors, noted Director and Physician of this Hospital, hence it bears the name of that eminent citizen, ever since the date of his death, Jan. 26 of the year 1922;

Whereas:
Doctor Maximiliano Peralta Jimenez was graduated at the Jefferson Medical College of Philadelphia, Pa., U.S.A., Class of 1894;

Whereas:
The excellent virtues of a man, as Doctor Peralta was adorned of, are by themselves intimately a part of his Alma Mater;

Be it Resolved:
That a hearty participation of the event of this homage be tendered to the most Honorable Faculty and Board of Trustees of the Jefferson Medical College of Philadelphia, Pa., U. S. of A., by means of H. H. the Dean of such medical institution.

(signed) A. QUIROS T. President.
Alberto Quiros T.

(signed) G. IGLESIAS Secretary
Guillermo Iglesias.

To His Honor the Dean of Jefferson Medical College.

April 28, 1939.

The Board of Society Protection of Cartago, Costa Rica.

Gentlemen:

The Board of Trustees of The Jefferson Medical College of Philadelphia learn, through the kind offices of Dr. J. Guzman C. of Cartago, Costa Rica, that on the eleventh day of May, 1939, it is proposed, in the Central Square of Cartago, Costa Rica, to unveil a bronze bust of the late Dr. Maximiliano Peralta Jimenez, a graduate of The Jefferson Medical College, Class of 1894.

Your very kind invitation to have a representative of The Board of Trustees and The Jefferson Medical College participate in this event of homage occasions great pleasure, and we are honored by your invitation.

Hereby is authorized Dr. J. Guzman C. to represent the College on the occasion which is to honor a distinguished alumnus of this Institution.

We extend our very cordial greetings and best wishes.

Very truly yours,

(signed) H. K. MOHLER,
Dean.
Branch Chapter Meetings
of the Alumni Association

FROM the Corresponding Secretary of the Alumni Association, Dr. James Surver, a report of branch chapter meetings has been received. Never in the history of the Jefferson Medical College has there been such activity in the various chapters throughout the country. New organizations have been created, defunct groups have been revivified, and the chapters which have been noted for their constant loyalty have continued actively with their meetings. The officers of these various new and old chapters are as follows:

NORTHEASTERN CHAPTER

President .................................................. E. R. Rebhorn '15
1st Vice-President ....................................... W. H. Summers '20
2nd Vice-President ...................................... Paul Kersteter '14
Secretary-Treasurer ...................................... John Lohmann '34

SOUTHWESTERN CHAPTER

President .................................................. James Burt '02
1st Vice-President ....................................... James H. Corwin '03
2nd Vice-President ...................................... Marchand Snyder '11
Secretary-Treasurer ...................................... Newton K. Hammond '30

RHODE ISLAND CHAPTER

President .................................................. R. L. Wall '12
Secretary .................................................. N. O. Spikes '24

SOUTHERN PENNSYLVANIA CHAPTER

President .................................................. Lt. Col. George Lull '09
Vice-President ............................................ Samuel Grossman '29
Secretary-Treasurer ...................................... Eurfryn Jones '29

NEW YORK CHAPTER (Organization meeting)

President .................................................. Robert G. Carlin '02
Vice-President ............................................ Arno E. Towne '26, Manhattan
Vice-President ............................................ Donald E. McKenna '16, Brooklyn
Vice-President ............................................. Jacob Burstan '16, Bronx
Vice-President ............................................. James R. Reuling '14, Queens
Vice-President ............................................. A. Alver Shapiro '25, Richmond
Vice-President ............................................. Luther H. Kice '08, Nassau and Suffolk
Vice-President ............................................. James H. Wall '27, Westchester and Rockland
Vice-President ............................................. Stuart W. Vanderbeek '21, Northern New Jersey
Secretary .................................................. Harry M. Imboden '03
Treasurer .................................................. Kingsley Roberts '20

NORTHERN NEW JERSEY CHAPTER (Organization meeting)

President .................................................. Henry B. Orton '08
Vice-President ............................................ Roy Van Ness '12
Secretary-Treasurer ...................................... Frederick C. DeTroia '35
The following calendar of events illustrates the activities of these various groups:

**June 15, 1938**—Smoker at the Union League Club, 555 Post Street, San Francisco, Calif., at 9 o'clock, in connection with the meeting of the American Medical Association Convention.

**October 5, 1938**—During the 88th Annual Session of the Medical Society of the State of Pennsylvania, in Scranton, a dinner was held by the Jefferson Medical College Alumni Association at the Scranton Club. The meeting was attended by over one hundred Alumni and Drs. Rugh, Anspach, Clerf, Shallow, Reimann, Vaux, Lull, Keyes and others of the Faculty.

**November 17, 1938**—A meeting of the Northeastern Pennsylvania Chapter of the Jefferson Alumni Association — Drs. Mohler and Shallow attended. There were 125 Alumni present.

**November 17, 1938**—A meeting of the Southwestern Pennsylvania Chapter of the Jefferson Alumni Association at Pittsburgh, Pa. Clinics were held at the Presbyterian Hospital during the day. A dinner was given at the University Club—Drs. Clerf and Gordon attended. There were 95 Alumni present.

**February 21, 1939**—A dinner meeting to form the New York Chapter of the Jefferson Alumni Association. In order to keep up interest in the Association, it was thought best to have a vice-president for each of the several communities in the Metropolitan area. Eighty-five Alumni were present and the following Faculty Members — Drs. Mohler, Rosenberger, Muller and Beardsley. A letter from the President of the Board of Trustees was read. The meeting was a very successful one, everyone seeming to have enthusiastically enjoyed it.

**March 16, 1939**—A dinner and business meeting of the Southern Pennsylvania Chapter of the Jefferson Alumni Association was held at the Harrisburger Hotel, Harrisburg, Pa. Eighty men attended the meeting, and fifty-two were present at dinner. Lt. Col. George Lull of the Carlisle Barracks, Pa., became the new president. The following papers were read by members of the Faculty:

- Dr. George P. Muller, Surgical Treatment of Toxic Goiter.
- Dr. B. B. Vincent Lyon, Biliary Tract Diseases.
- Dr. John Eads, Medical Aspect of Peptic Ulcer.
- Dr. Hobart Reimann, Pneumonias.
- Dr. Thomas Shallow, Diverticula of the Pharynx and Esophagus.

**April 4, 1939**—A meeting was held for the purpose of organizing the Northern New Jersey Chapter of the Jefferson Alumni Association. Twenty-six Alumni were present at the smoker and buffet supper at the Essex Club, Newark, N. J. Addresses were given by Dr. H. K. Mohler and Dr. L. H. Clerf of the Faculty.

Plans have been completed through B. L. Sellmeyer, S.J. '12, for the a la carte dinner to be held in the main dining room of Hotel Statler at 7 P. M., C. S. T., on Wednesday evening, May 17th, for Jefferson Alumni attending the A. M. A. Convention in St. Louis.
Alumni Endowment Fund

At the Annual Business Meeting, February 28, 1939, the Endowment Fund Committee announced the completion of the Alumni Endowment Fund of $300,000.

A motion was made, seconded and carried to continue the accumulation of this Fund until it reaches the sum of $500,000.

It is gratifying to know the income of this fund now will be available for the payment of salaries of additional full time laboratory teachers and research workers, preference being given to graduates of Jefferson Medical College.

It is earnestly hoped that every Alumnus will give his loyal support toward building the Fund to its ultimate completion and thus continue to keep Jefferson in the front ranks as a great independent Medical School.

The following report submitted by the auditors to Dr. Mohler presents the summary of the Alumni Endowment Fund of the Jefferson Medical College from June 1, 1928, to December 31, 1938.

April 26, 1939.

Alumni Smokers at the American Medical Association and State Meetings

During the course of the American Medical Association meeting in St. Louis, there will be held a banquet for Jefferson Alumni in the Statler Hotel, on May 17th, at 7 P.M. Arrangements for this dinner are being made by Dr. B. L. Sellmeyer of St. Louis. For further information in reference to this event those alumni who are attending the convention should inquire at the registration desk.

Dr. David B. Allman announces that during the course of the New Jersey State Medical Meeting, in Atlantic City, June 5th, 6th and 7th, there will be held a dinner for Jefferson Alumni. The exact time and place have not been selected, but information regarding the same can be secured at the information desk by those physicians attending the convention.
Annual Business Meeting and Mid-Winter Smoker

The Annual Business Meeting and Mid-Winter Smoker of the Alumni Association was held on the evening of February 28, 1939, at the Walton Hotel. Two hundred and forty-two members of the Association attended.

New Members of the Alumni Association

As the Bulletin goes to press, we receive notice from Dr. R. S. Griffith, Chairman of the Committee on New Graduates, that over 65 per cent of the members of the senior class have already joined the Alumni Association, and by the time the college year is over no doubt every member of that class will be enrolled among the Alumni; and the present high rate of membership among the graduates of Jefferson Medical College will thus be maintained.

Members of this class have also contributed substantially to the Alumni Fund, following the usual custom in signing notes amounting to $200.00, the payments upon which are to start when the student begins with his active practice. These contributions constitute an important part of the growth of the College Endowment Fund.

Alumni Dinner

Arrangements for the Alumni Dinner at the Bellevue-Stratford on the evening of June 1st have been carefully made by the Entertainment Committee of the Alumni Association, under the experienced guidance of Dr. Louis H Clerf. The Entertainment Committee expects an attendance which will exceed that at last year's dinner, which those present will remember as one of the largest in the history of the Alumni Association. Those who have attended these recent dinners recall always with pleasure the interest of meeting former classmates, of hearing the latest news of Jefferson, of having the opportunity to see the new members of the Faculty, the Board of Trustees, and particularly upon this occasion of hearing directly from the new Dean and President of the Alumni Association, Dr. Henry K. Mohler.

In view of the many important and engaging features of the evening, a larger attendance is anticipated than that which is revealed in the accompanying photograph of the 1938 Dinner.

Scientific Exhibit of the Alumni Association of Jefferson Medical College

The exhibit of scientific work by members of the faculty and hospital staff, sponsored by the Jefferson Society for Clinical Investigation and presented last year in connection with the Alumni Day Clinics, will be carried out again this year under the sponsorship of the Alumni Association. The exhibit will be held in the rooms adjacent to the amphitheatre on May 31st and June 1st, and will consist of some of the recent developments in scientific investigation at the Jefferson.

The exhibit presented last year created a great deal of interest and favorable comment.
Class Reunions

For many years an important part of the alumni events have been the Class Reunions. These have generally been held either on the day before or the morning and noon of Alumni Day, and have consisted of either class reunion luncheons or elaborate two-day outings. Some of the classes have held reunions each year and have had large numbers of representatives.

As has always been the custom in the past, arrangements will be made for the seating of classes together, and the alumni should have no difficulty in finding at the dinner their former classmates.

During recent years it has been the custom to encourage the holding of reunions of those classes whose graduation would represent multiples of five or ten years. In accordance with this custom the following classes have reported their plans for reunions in 1939.

Further information in reference to these plans can be secured from the Class Chairman, or from the Alumni Office on arrival in Philadelphia.

Class of 1889—50th Reunion. Dr. Michael Ball, Warren, Pa., Chairman. Expect about 20 members. Will meet at the Banquet and have a special table.

Class of 1894—45th Reunion. Dr. R. C. Rosenberger, and Dr. F. H. Mills, Chairmen. To meet in the Library of the Jefferson Medical College. Luncheon on Thursday, June 1st. Will attend Alumni Dinner as a group.

Class of 1899—40th Reunion. Dr. F. Mortimer Cleveland, Chairman. Luncheon at the Hotel Philadelphian, 39th and Chestnut Sts., at 1 P. M., Thursday, June 1st. Will attend Alumni Dinner at 7 P. M.

Class of 1904—35th Reunion. Dr. Louis Chodoff and Dr. A. Spencer Kaufman, Chairmen. Luncheon at the Russian Inn, 1233 Locust St., at 12 o'clock. Alumni Dinner at 7 P. M., Thursday, June 1st.

Class of 1909—30th Reunion. Dr. G. S. Hensyl, Mahanoy City, Pa., Chairman. Luncheon and Dinner, Thursday, June 1st.

Class of 1914—25th Reunion. Dr. Charles B. Kaign, Atlantic City, N. J., Chairman. Luncheon at 1 P. M., the Union League, Broad and Sansom Sts., Philadelphia. Luncheon for wives at the same place and same time. Alumni Dinner at 7 P. M., Thursday, June 1st.

Class of 1919—20th Reunion. Dr. C. W. Nissler and Dr. Burgess Gordon, Chairmen. Wednesday, May 31st, day and night, Atlantic City, Madison Hotel. Thursday, June 1st. Cocktails at the Belleview-Stratford Hotel at 5 P. M. Alumni Dinner at 7 P. M.

Class of 1924—15th Reunion. Dr. Abraham Cantarow, Chairman. Class luncheon at noon and Alumni Dinner on evening of June 1st.

Class of 1929—10th Reunion. Dr. Sherman Eger, Chairman. Thirty members expected to return for reunion. Outing, Luncheon, and Dinner at the Mohican Club May 31st. Class magazine will be distributed on that date. Will attend clinics June 1st and Alumni Dinner in the evening.

Class of 1934—5th Reunion. Dr. Floyd J. Putney and Dr. Edward J. Moore, Chairmen. Luncheon at the Art Club, Thursday, June 1st, at 2 P. M. Alumni Dinner, 7 P. M. For further data in reference to the Class Reunion Luncheons which are held annually by many of the classes, Alumni should consult the Alumni Office in the College Building, 1025 Walnut Street, upon their arrival in the city.
Program for Commencement Season

MAY 31st—Jefferson Ex-Internes’ and Class Reunion Day

9:45 A. M. to 1 P. M.—Clinical presentations in the Amphitheatre of the Hospital by Ex-Internes of Jefferson Hospital and representatives of the Class Reunions.
Scientific exhibits by the members of the Hospital and College Staff in the halls adjacent to the Clinical Amphitheatre.
1 P. M.—Buffet Luncheon—Special Nurses’ Dining Room.
2 to 6 P. M.—Golf at the Rolling Green Country Club. Baseball at the League Parks, and other diversions.
7 P. M.—Dinner for Ex-Internes of Jefferson Hospital, at the Art Club.

JUNE 1st—Alumni Day

9:45 A. M. to 1 P. M.—Clinical presentations by members of the Senior Faculty in the Amphitheatre of the Hospital.
Scientific exhibits by the Staff of the Hospital and the College, in the halls adjacent to the Amphitheatre.
1 to 2 P. M.—Class Luncheons.
2 to 6 P. M.—Inspection of the College Buildings, the work of the Curtis Clinic and Hospital, Scientific Exhibits, etc.
Diversions, such as baseball and golf, which the Alumni may desire to take advantage of.
7 P. M.—ANNUAL ALUMNI BANQUET—Bellevue-Stratford Hotel, Broad and Walnut Streets.

June 2nd—Commencement Day

12 Noon—Commencement exercises of the Class of 1939, at the Academy of Music.

(All events on daylight saving time.)

Alumni Day Clinics
JUNE 1, 1939
Clinical Amphitheatre, 9:45 A. M.
*Daylight Saving Time*

10:00 A. M.—Dr. Charles M. Gruber.
Title to be announced later.

10:20 A. M.—Dr. Lewis C. Scheffey.
Factors Contributing to the Delayed Diagnosis of Uterine Cancer.

Hyperpyrexia in the Treatment of Chorea.

11:00 A. M.—Dr. George P. Muller.
A Review of Surgical Experience in Toxic Goitre.

Newer Concepts in Neurology.

11:40 A. M.—Dr. Henry K. Mohler.
Notes on Sulphanilamide Therapy.

12:00 Noon—Dr. Thomas A. Shallow.
Carcinoma of the Colon.

12:20 P. M.—Dr. Randle C. Rosenberger, ’94.
Present Day Prophylaxis.

12:40 P. M.—Dr. Hobart A. Reimann.
The Epidemic of Respiratory Infections of 1938-1939.
Endowed Room and Benevolence Fund

TWENTY-NINE years ago—in June 1910—an alumni movement was instituted to raise money to endow a room in the hospital for the free care of worthy alumni unable to pay for such service. After two years of effort by an Endowed Room Committee, $1100 was collected, and at that time the Board of Trustees agreed to reduce the financial requirements necessary for an endowed room from $25,000 to $10,000. The Alumni Association was urged to continue its efforts to complete such a fund. For a number of years the fund, with accumulated interest from its investment, increased but slowly, largely because the committee hesitated to solicit funds while campaigns were being carried on to raise money for the new hospital and college buildings and for the establishment of the general endowment fund.

Finally in 1937, under the forceful leadership of the late Dr. Michael Burns, a determined effort was made to complete the fund, then amounting to over $7,000, by reviving interest in the project, and by attempting to secure the balance from members of the Jefferson Staff and Alumni at large. The committee in charge was renamed to increase its sphere of usefulness and is now known as the “Endowed Room and Benevolence Committee.” Through their activities and those of others, the amount of money available has reached $9,531.59. With the goal of $10,000 in sight, the Executive Committee desires to secure promptly the relatively small balance needed to make a room available for needy graduates, subject to suitable regulations governing its use. Contributions not exceeding $10.00 are desired from alumni sympathetic to this worthy project, and it is hoped that this appeal will meet with an early response from those who have not yet subscribed. Contributions should be sent to the Alumni Office in the College. Do your share NOW!

I wish to contribute to the Endowed Room Fund $ ____________________

NAME ________________________________

CLASS ________________________________

ADDRESS ________________________________

(Make checks payable to and mail to ENDOWED ROOM FUND, Jefferson Medical College, Philadelphia, Pa.)
DR. FREDERICK J. KALTEYER, Clinical Professor of Medicine at the Jefferson Medical College, died December 21, 1938, following a heart attack. Dr. Kalteyer was born at San Antonio, Tex., July 21, 1873, a son of George H. and Johanna Kalteyer. His early education was obtained at schools in Texas, and his premedical course at the University of Pennsylvania. He was graduated from the University of Pennsylvania Medical School in 1895, and from Jefferson Medical College of Philadelphia in 1899. His internship was served at the German Hospital (now the Lankenau), Philadelphia.

Dr. Kalteyer specialized in internal medicine, and was on the staff of the following hospitals: Jefferson Hospital, assistant physician; Philadelphia General Hospital, visiting chief in medicine; St. Joseph's Hospital, physician to medical staff; and Delaware County Hospital, consultant physician.

Dr. Kalteyer made many contributions to the medical literature.

He was a member of his county and state medical societies and a Fellow of the A. M. A.; also member of the Interstate Postgraduate Medical Association of North America (assembly chairman by appointment in 1934); American College of Physicians; American Therapeutic Society; College of Physicians of Philadelphia; Meigs Medical Association; and the Medical Club of Philadelphia.

In 1938 Dr. Kalteyer was married to Miss Marie Camblos, who survives.

Dr. Kalteyer's faithful service to his Alma Mater and his interest in the Alumni Association will long be remembered by his former students and a host of professional friends.
