Opening of the College

The 116th Annual Session of the College was inaugurated at the opening exercises on the evening of September 18, 1940. Robert P. Hooper, LL.D., President of the Board of Trustees, and Dean Henry K. Mohler, presided. The introductory lecture was given by Dr. Hobart A. Reimann, Magee Professor of Practice of Medicine and Clinical Medicine, on the topic of "Education of the Medical Student."

Announcement was made of the appointment of Dr. Lewis C. Scheffey as Professor of Gynecology, to fill the vacancy left by Dr. Brooke A. Anspach who resigned to become Emeritus Professor of Gynecology.

The total enrollment for the coming year was 513 students; 148 are new students representing 134 admissions to the First Year Class and 14 to the Third Year Class. Of the 134 members of the First Year Class, 106 were recommended by Jefferson Alumni; 27 members of the Class are sons or other relatives of physicians, and 8 are sons of Jefferson graduates. The First Year Class was selected from a total group of 742 applicants.

Geographically, 22 states, insular possessions and foreign countries are represented as follows:

California
Connecticut
Delaware
Idaho
Indiana
Illinois
Iowa
Massachusetts
New Jersey
New York
North Carolina
Ohio
Oregon
Pennsylvania
Rhode Island
South Carolina
Tennessee
Washington
West Virginia
Puerto Rico
Territory of Hawaii
Brazil
Fourteen new students were admitted to the Third Year Class. They completed the first two years of medicine in the following medical schools:

University of North Carolina  University of Alabama
Wake Forest College  Dartmouth College
University of Mississippi

Address by Dr. Hobart A. Reimann
Magee Professor of Practice of Medicine and Clinical Medicine

In his opening address, Dr. Reimann pointed out the necessity for an everchanging curriculum and organization in the medical school in order to keep up with the times. He stressed the fact that the student of medicine as well as the members of the Faculty and others in authority need always have an inquisitive and open mind. The following are significant paragraphs in his manuscript:

Pre-Medical Education

For a number of years I have been disturbed by the increasing tendency of Medical Schools to demand 4 years of college work and a degree as requisites for admission. In general, I believe this to be unnecessary, and I feel that the improvement said to be evident in present-day medical students, as a whole, as compared with those of 20 years ago, is not wholly due to the lengthening of pre-medical education. The number of students attending preparatory colleges has become so vast that there is a shortage of competent teachers, with the result that in many places an inferior type of education is dispensed. Furthermore, it seems that in certain schools one merely needs to spend the requisite amount of hours, and acquire the requisite number of credits to receive a degree. Therefore, the time spent may be largely wasted, and as a result, academic degrees have less meaning than formerly.

I feel that—one, or at most two years, well spent in a rigid curriculum should suffice and permit men to enter and finish the prescribed medical course at an earlier age. It would be desirable of course, if 4 years could be spent in an ideal educational environment, but this should be optional for exceptional students and not made a requirement. Life is just so long and time passes quickly. A decade or more ago the average age of graduating physicians was in the early twenties, now it is close to thirty. With the recent development of various boards for certification in the medical specialties, several more required years of training are now added which bring the age close to thirty-five before a student can be self-supporting. Earlier graduation would permit students to spend more time in hospital and laboratory work in their more formative and impressionable years and would on the whole seem desirable.

The Inquiring Mind

The mental discipline imposed by the preclinical sciences, if seriously regarded, automatically frees the mind from the bonds of medical dogmatism. The discipline imposed by the use of control tests and final critical survey, if more generally applied, would greatly enhance the value of medicine to
mankind. I refer to the development of the open mind or the resilient and nimble intellect which I mentioned before. In spite of the rapid development of scientific medicine, many old practices are still adhered to without anyone taking the trouble to investigate the true state of affairs. Yet by inquiring too deeply into certain things, one is all too often disillusioned or shocked, and by suggesting a change in procedure one is apt to be looked upon as rather queer or radical. On the other hand, such changes and adoption of new and fresh ideas, or the revision of old ones, often lead to astonishing success. We have had much evidence recently as to what can be accomplished by discipline, orderliness, obedience, precision, industry, frugality, seriousness, and cooperation in the use of new technics, and especially in dropping the outmoded ones. It is a pity that it takes a war or a revolution to emphasize the facts.

Fortunately in our country one may dare to contradict established practices without fear of more violence to one’s person than dark looks and ridicule. We should compare our good fortune with that of Galileo, for example, who for most of his life lived in the shadow of the inquisition for simply saying that the earth was not the only important thing in the universe. The clerical authorities in charge, although recognizing that perhaps Galileo was right, imprisoned him and forbade him to proclaim the truth lest it change things and interfere with the established order of their comfortable existence.

* * * * *

The Curriculum

I should like to discuss briefly the curriculum. The ultimate aim of any medical school should be the training of persons to prevent and to cure disease in its broadest sense, and from what I have already said about the changing aspects of medical practice, the curriculum should be flexible enough to be changed to meet the needs of the times. As most of you know, certain important changes have recently been made in our school, changes which I believe represent real progress. Students now have much more opportunity to gain first-hand practical experiences in the study of disease than before. But these changes should only be the forerunners of still more profound ones upon which I have already touched. I hope we will be able to introduce clinical medicine to students in the earlier years, to spread the teaching of preclinical sciences to the later years and above all to make for greater use of the valuable material in our excellent Out-Patient Department which is not now fully exploited.

To make such changes requires upsetting of the accustomed ordered system and entails forebearance and sacrifice on the part of both student and staff. We must all, students and staff alike, be prepared to give and take. There are bound to be difficulties and rough edges to smooth over. Mistakes will be made and steps may have to be retraced, but in the end it will be worth the trouble. The proposed changes are not personal whims or fancies but are based on tried principles as practiced in the majority of medical schools. Changing needs dictate that certain courses fashionable a generation ago be dropped entirely or merged with others, particularly where duplication or triplication of teaching occurs. New and timely courses should be introduced or enlarged like preventive medicine, industrial medicine, psychosomatic medicine, social medicine, physiotherapy and psychotherapy. We all recognize that to remain in the forefront of medical schools we must readjust ourselves from time to time accordingly.
No one can doubt that the average medical student today is far better equipped to practice than the man taught by lectures and recitations a generation ago. As a matter of fact the practical instruction now available to students actually lessens the need for a prolonged internship which at once suggests that here another desirable change may be made. I believe that a one year rotating internship is desirable. This may be followed by a fellowship or residency in some special field in which training is demanded by various boards for the certification of specialists.

It is also highly recommended that as many students as possible seek internships elsewhere than in the hospital school where they worked as juniors and seniors. They should see different methods, hear new teachers and work with new companions. An interchange of students is certain to raise the level of internships, and customs which increase inbreeding of the hospital staff are just as certainly harmful.

I cannot refrain from touching upon one more subject which has comprised so large a portion of my medical life, that is, research in Medicine. Dr. Gruber has discussed the importance of research in Medicine so fully in his address of 1938 that I need not dwell long upon it, except to point out that commendable progress has been made along these lines in our school in the past two years. Our board of trustees, our president and our dean are fully cognizant of our greater needs and have wisely cleared the way for further expansion. But it must be realized how expensive such work is and that it must be backed by resources for technical assistants, supplies, equipment, space, and above all for more full-time men of ability, and the provision for leisure enough for undistracted thought and work. Good research seldom is made by those obliged by necessity to practice medicine in the usual custom.

We at Jefferson have never overemphasized fundamental research work; we have not done it quite enough, but the opportunities for the occasional student or teacher who is gifted with a mind and energy out of the ordinary, now, I believe, has a far better opportunity for the exercise of his abilities than ever before. Young men do not enter academic or research medicine because they are not good enough to practice, as was once believed, but because they have different interests and ability along different lines. There is not only room but actual necessity for both practical and academic minds in every school. Let me point out that something more is expected of us than of an average hospital. We as a teaching institution must not satisfy ourselves with things as they are, but we are expected to bear a responsibility for the shaping of things to come. We must introduce and test the new, and discard the chaff and the barnacles, and never for one moment become too self-satisfied.

Our responsibilities have become all the heavier with the present tragedy of the world. It naturally devolves upon us in North America to carry out the tradition which is no longer possible abroad. Our responsibilities are great, and many of them will be borne by you. We will do our best to assist you.

A. O. A. LECTURE

The annual Alpha Omega Alpha lecture was this year given by Lieutenant Colonel Asa M. Lehman, Professor of Military Science and Tactics, on Wednesday evening, November 20, 1940 in the College Auditorium. Lieut. Col. Lehman's topic was "Selective Service—Its Application to Medical students".
Recent Important Bequests and Gifts

THE College has been the recipient of a valuable gift from the estate of the late Dr. Pascal Brooke Bland, which includes his entire library of 2848 volumes of rare and old books as well as many First Editions, also a number of ancient and original pictures. A complete list of the pictures follows:

"Gross Clinic", oil copy of painting by Thomas Eakins, 33 x 40.
Sir Astley Paston Cooper, Bart., engraving 8½ x 11.
Medals of the following (showing obverse and reverse 13½ x 15½):
  Koch 2'; Soemmering 2'; Büttner 1½'; Billroth 1½'; Cholera in Paris 8'; Vesalius 1½'; Bichat 1½'; Jenner 1'; Fracastorius 1 6/8'; Von Bergman 2½'.
  Pasteur, print 6½ x 8¼.
Sir James Y. Simpson 10½ x 13.
D. Abrahamus Vaterus (with descriptive plate) engraving by J. M. Beringroth, 1752, 8½ x 14½.
William Hunter, engraving by B. Smith from an original picture by Mason Chamberlin, 10½ x 13¼, published Feb. 1, 1817.
Leeuwenhoek, engraving, J. Chapman (Sculp.), oval portrait and scene in study, 6¾ x 8¾, published Feb. 26, 1813.
Lavoisier, engraving, Chapman (Sculp.) oval portrait and scene in laboratory, 6¾ x 8½, published Dec. 19, 1812.
Nicholas Mac's painting of "The Surgeon's Guild", Amsterdam 1680, 5½ x 3½.
Obstetrical scenes, 4 engravings (each 3 x 4½ with individual legends in Latin), 15½ x 5½.
John Abernethy, engraving by Cooper, published Nov. 1825, 8¼ x 11½.
John Hunter (1728-1793), copy of portrait in color attributed to Thomas Gainsborough. "The original of this portrait was presented to the Royal College of Surgeons of England in 1925 by George Buckston Browne, F.R.C.S." 7 x 8½.
Henry A. Deventer, engraved portrait by P. Bouttats, 5½ x 7¾.
Sammelweis, Ignaz, photograph of statue, 7¾ x 10¾.
Dr. Richard Mead (1673-1754), engraving by Arthur Pond, 1739, 6½ x 9½.
Jean D. Larrey (1766-1842), Lith de Delpech, 6 x 8¾.
Albert de Haller, engraving by Pigmenerne, 9 x 11.
Birth Scene, "The earliest woodcut illustration of a birth scene, from the Seelwurzgarten, Ulm, Conrad Dinkmut, 1483," 7½ x 10½.
"German engraving about 1700, showing a room with a woman lying-in, another in the birth chair, a child in a cradle, showing a curious manner of fastening it in this, also several obstetrical instruments lying on a desk." 5½ x 7¾.
Anatomical theatre at the Leyden University, 1610. 8 x 6½.
"The Van Mierwelt in the Delft Hospital", London, 1617. Dr. Van Der Neer in center surrounded by 15 other figures, 7¾ x 5¾.
Thomas Willis, engraving, 5½ x 7¼.
Boerhaave, Herman, engraving 1798, 6¾ x 8¾.
S. Hahnemann, engraving 4½ x 6¾.
Thomas Sydenham, engraving, Maria Beale, prinxit, A. Blooteling Sculp., 3½ x 6½.
William Harvey, copy of portrait by Van Dyke, 5½ x 7¼.
"Anatomy of Dr. Frederik Ruysch" by Johan van Neck (1863), Amsterdam Museum, print 7 x 9½.
Ignaz Philipp Semmelweis (1818-1865), 7 x 9½.

THE late Dr. Charles W. LeFever bequeathed to the College his entire medical library, including a large number of books and volumes of bound journals. The Eye Department was the recipient of various ophthalmological instruments from his estate. Dr. Charles W. LeFever was formerly Demonstrator of Ophthalmology, Jefferson Medical College.

FURTHER gifts by Mr. and Mrs. Thomas D. M. Cardeza have made possible the letting of contracts to condition four rooms in the northwest corner of the Thompson Annex for the Transfusion-Plasma units and the section for Biologic Photography. These units are a part of the activities of the Division of Hematology.
Faculty Changes

The following appointments and promotions have been made in the faculty of The Jefferson Medical College and its Hospital since the publication of the last issue of the Bulletin.

Lewis C. Scheffey, M.D., elected Professor of Gynecology.
John B. Montgomery, M.D., elected Clinical Professor of Gynecology.
Victor G. Haury, M.D., promoted from Assistant Professor to Associate Professor of Pharmacology.
George Allen Bennett, M.D., promoted from Associate to Assistant Professor of Anatomy.
John T. Eads, M.D., promoted from Associate to Assistant Professor of Medicine.
Reynold S. Griffith, M.D., promoted from Associate to Assistant Professor of Therapeutics.
Robert Bruce Nye, M.D., promoted from Demonstrator to Associate in Therapeutics.
Marshall M. Lieber, M.D., promoted from Demonstrator to Associate in Pathology.
Howell B. Peacock, M.D., promoted from Demonstrator to Associate in Laryngology.
Kenneth E. Fry, M.D., promoted from Demonstrator to Associate in Surgery.
John T. Eads, M.D., promoted from Demonstrator to Associate in Therapeutics.
George Willauer, M.D., promoted from Instructor in Operative Surgery to Demonstrator of Surgery.
Mahlon C. Hinebaugh, M.D., promoted from Instructor to Demonstrator of Obstetrics.
John Vernon Ellson, M.D., promoted from Instructor to Demonstrator of Obstetrics.
James M. Surver, M.D., promoted from Instructor to Demonstrator of Surgery.
Calvin Searle Drayer, M.D., appointed Instructor in Neurology.
Stephen L. Casper, M.D., appointed Instructor in Roentgenology.
Ross B. Wilson, M.D., appointed Instructor in Obstetrics.
E. Ross Hart, Ph.D., appointed Instructor in Pharmacology.
Louis A. Kustin, M.D., promoted from Assistant Demonstrator to Instructor in Laryngology.
George Albert Silver, M.D., appointed Assistant Demonstrator of Bacteriology.
Edward C. Britt, M.D., appointed Assistant Demonstrator of Laryngology.
Herbert Stockton Gaskill, M.D., appointed Assistant Demonstrator of Neurology.
Robert Slocum Garber, M.D., appointed Assistant Demonstrator of Psychiatry.
David Naidoff, M.D., appointed Assistant Demonstrator of Ophthalmology.
David M. Brooks, M.D., appointed Assistant Demonstrator of Ophthalmology.
Leonard Parkhurst, M.D., appointed Assistant Demonstrator of Medicine.
John A. McCormick, M.D., appointed Assistant Demonstrator of Obstetrics.
Joseph L. Finn, M.D., appointed Assistant Demonstrator of Obstetrics.
Glenn S. Dickson, M.D., appointed Assistant Demonstrator of Gynecology.
George A. Porreca, M.D., appointed Assistant Demonstrator of Gynecology.
Donald McGrew, M.D., appointed Assistant Demonstrator of Pathology.

ANNOUNCEMENT was recently made of the appointment of two members of the faculty to positions of high rank in other institutions.

Dr. Thaddeus L. Montgomery was appointed Professor of Obstetrics and Gynecology of the Temple University Medical School, Philadelphia, in August, 1940. He fills the vacancy created by the resignations of Jefferson graduates Dr. Jesse O. Arnold, Class of '96, and Dr. Frank C. Hammond, Class of '95, Professors of Obstetrics and Gynecology, respectively.

Dr. Montgomery obtained his medical degree at Jefferson in 1920. Following his internship at Jefferson Hospital, he became associated with the Department of Obstetrics and at the time of his resignation, held the rank of Clinical Professor. He is a member of many local, state, and national societies, including the American College of Surgeons and the American Board of Obstetricians and Gynecologists. He is the author of various articles pertaining to the subject of obstetrics.

Dr. Montgomery will be remembered by Jefferson Alumni for his splendid teaching qualities, his industry, and his interest in student welfare. He was a charter member and founder of the Jefferson Society for Clinical Investigation and was the editor of the Alumni Bulletin from 1932 to 1940.

Howard Holt Bradshaw, Class of '28, Associate in Surgery, has accepted the position of Professor of Surgery and Director of the Department of Surgery of the Medical School of Wake Forest University, Winston-Salem, North Carolina, to take effect July 1, 1941.

On August 1, 1940, the resignation of Dr. Brooke M. Anspach, as Professor of Gynecology of Jefferson Medical College was reluctantly accepted by the Board of Trustees. He subsequently was appointed as Emeritus Professor and Consultant Gynecologist to the Hospital. Dr. Anspach held the Chair of Gynecology since 1921, having succeeded the late Dr. E. E. Montgomery.

Space does not permit the elaboration of the many attributes of Dr. Anspach—student, scientist, teacher, practitioner. Graduated from the Medical School of the University of Pennsylvania in 1897, he immediately took up the study of gynecology, spending several years in European clinics. His early training and association with Dr. John G. Clark, then the leading gynecologist of Philadelphia, contributed much to the perfection in operative technic which is Dr. Anspach's. The great number of appointments held by him in the various hospitals of Philadelphia, the many honors bestowed upon him by national, state, and local societies and the esteem in which he is held by his colleagues and students, speak more than can be written here.

Dr. Anspach states that he will devote his efforts to his private practice and to the investigation of certain problems for which heretofore he has had little time.
ON AUGUST 1, 1940, Dr. Lewis C. Scheffey was appointed Professor of Gynecology at Jefferson. He succeeds Dr. Brooke M. Anspach, who resigned after occupying the Chair since 1921. Dr. Anspach was elected Emeritus Professor of The Jefferson Medical College.

Dr. Scheffey was born in Stamford, Connecticut, September 21, 1893. Early in life he removed to Wyomissing, Pennsylvania. He graduated from the Reading High School in 1910. In 1915, he enrolled in the premedical course at Jefferson following his graduation from the Philadelphia College of Pharmacy and Science. In 1920, he received his degree in Medicine from The Jefferson Medical College. His internship was served in the College Hospital and upon its completion he received his appointment as Clinical Assistant in the Department of Gynecology and became the personal assistant to Professor Brooke M. Anspach. He advanced through the ranks, in sequence, and his ultimate election to the Chair of Gynecology is the result of meritorious effort and devotion to the profession.

Dr. Scheffey is a Diplomate of the American Board of Obstetrics and Gynecology. He is a member of the County, State, and National Medical Societies; the American Gynecological Society, the Obstetrical Society of Philadelphia, and the American College of Surgeons. In many of these organizations he has held office. He is a member of numerous scientific, art, and historical groups, including the Pennsylvania Academy of Fine Arts. He is a Trustee of the Philadelphia College of Pharmacy and Science.
His contributions to the literature have been numerous. He is the assistant author of "Anspach's Gynecology," 5th Edition. He is especially interested in the study and management of uterine cancer.

As avocations, Dr. Scheffey is interested in biographic and historical documents. He is a member of the Phi Alpha Sigma Medical fraternity and of the University Club of Philadelphia.

Library News

The high ranking position of the library of The Jefferson Medical College is one of which our graduates should be proud. Its rapid growth from obscurity with a meager handful of books to its present status has taken place in less than two generations. At the time of occupancy of the present college building the census showed a total of 12,480 volumes. Today it houses an accumulation of over 36,000 books together with many thousands of monographs and journals. Its collections of valuable and rare books are unparalleled among medical schools.

From time to time large numbers of books have been added to the library through the generosity of its many friends. Outstanding among these valuable gifts are those of Samuel P. Scott, P. Brooke Bland, Albert P. Brubaker, William H. Green, Hobart Amory Hare, S. MacCuen Smith, Mrs. Francis T. Stewart. Unmentioned, but nevertheless helpful to a great degree, are the contributions of many hundreds of loyal individuals who have given of their spare books and journals.

During the past six months a total of 671 books, 1861 journals and 379 pamphlets were contributed to the library by friends and members of the faculty. Not the least of these donations were gifts of one or two items. With this thought in mind all alumni are urged to send to the library old or rare books with their recent publications. In this way a benefit will be conferred to the library. It will also help in establishing a record of the literary contributions of our graduates and faculty of The Jefferson Medical College.

Recent contributions to the library were received from the following individuals:

Alpers, Dr. Bernard J.
Balnbridge, Dr. William Seaman
Bancroft, Dr. George R.
Bauer, Dr. Edward L.
Bauer, Mrs. Estelle H.
Bland, Dr. P. Brooke
Blumberg, Dr. Nathan
Cantarow, Dr. Abraham Chodoff, Dr. Richard J.
Clerf, Dr. Louis H.
Cridler, Dr. Joseph O.
Dargeon, Dr. Harold W.
Farrell, Dr. John T., Jr.
Goldburgh, Dr. Harold L.
Goldstein, Dr. Hyman I.
Golub, Dr. J. J.
Gottschalk, Miss Madeleine
Groedel, Dr. Franz M.
Guggenheim, Dr. Louis K.
Henrici, Dr. Arthur T.
Hepburn, Dr. Joseph S.
Hyman, Dr. Albert S.
Keen, Miss Florence
Kornblum, Dr. Karl
Kredel, Dr. F. E.
Leaman, Dr. William G., Jr.
Learn, Dr. Blair G.
Lieber, Dr. Marshall M.
McGlannan, Mrs. Alexius
Macnabb, Dr. Norman M.
Mohler, Dr. Henry K.
Moon, Dr. Virgil H.
Muller, Dr. George P.
Parsons, Dr. Willard H.
Postell, Mr. William Dosite
Pyle, Miss Mary W.
Reimann, Dr. Hobart A.
Rosenbach, Dr. A. S. W.
Rosenberger, Dr. Randle C.
Roush, Dr. Ralph R.
Schaefer, Dr. J. Parsons
Scott, Dr. A. C.
Shoemaker, Miss Nora

(Estate)
Stewart, Dr. Harold L.
Tovell, Dr. Ralph M.
Waltuch, Dr. Max
Weed, Mrs. Melrose E.
Widing, Dr. Herbert A.
THE JEFFERSON MEDICAL COLLEGE

DR. PASCAL BROOKE BLAND
Emeritus Professor of Obstetrics

DR. CHARLES F. NASSAU
Clinical Professor of Surgery
Dr. Pascal Brooke Bland
1875 - 1940

Dr. PASCAL BROOKE BLAND, Emeritus Professor of Obstetrics in the Jefferson Medical College, died at his home in Bala, Pennsylvania on Thursday, October 31, 1940. His sudden death left his many friends and devoted patients bewildered and grief stricken.

For four years following his retirement from active teaching he had continued unabatedly the private practice of gynecology, still maintaining a high interest in the Department of Obstetrics, for which he had done so much.

His resignation from the office of Professor of Obstetrics in 1937 was much against the wishes of the Board, and followed a period of twelve years in which with amazing vigor and unexcelled executive ability he had whipped his department into shape and made it a leader in the Medical College.

Without stint during those twelve years he poured his time, his financial resources, and his life's energy into a project which was not too much to his liking, but to which he felt an intense duty and extreme responsibility.

Dr. Bland's professional career from the onset was a brilliant one and destined to be marked by many honors. Graduated from Jefferson with high honors, he was given one of the few appointments as intern then available in the teaching hospital. Appointed at the conclusion of internship to a humble position in the Department of Gynecology, his meritorious efforts soon elevated him to positions of responsibility. From Associate Professor of Gynecology he was elected, in 1925, to Professor of Obstetrics. Books, monographs and papers added to his professional standing. Space does not permit here, nor does the nature of this sketch call for a listing of the numerous society and honorary organizations which called him into membership.

It is sufficient for us to record here our memory of the man himself, steeped in the lore of medicine and devoted to its ancient traditions and literature; consecrated to his Alma Mater; generous to her; generous to his friends; generous to his associates; considerate of the young practitioner; quick to commiserate, quick to sympathize, quick to encourage.

His life was full, and undoubtedly it held many high moments.

Dr. Charles F. Nassau
1868 - 1940

THE DEATH of Dr. Charles Francis Nassau on August 11, 1940, was an irreparable loss to the City of Philadelphia, the Medical Profession and The Jefferson Medical College.

The son of a Presbyterian medical missionary, Dr. Nassau was born in Benita, French Congo, West Africa, on November 12, 1868. When Charles was two years old, his parents returned to Philadelphia where he received his preliminary education in the public schools. He attended Pennsylvania Military College for two years and then decided to study Medicine. Taking the first step in this direction, he entered the School of Biology at the University of Pennsylvania for a two years' course. While studying this subject, Dr. Nassau served as prosector and official photographer on the Brooks' Expedition to the Bahama Islands in 1887. This Expedition was under the leadership of Professor Brooks of Johns Hopkins University. In the summer of 1889, he was employed by the Smithsonian Institute in Washington preparing the skeletons of small mammals and birds.
In 1888 he matriculated at the Medical School of the University of Pennsylvania, graduating in 1891. His internship was served at Presbyterian Hospital and subsequently he took post-graduate work in Pathology and Surgery at the Old German Hospital. Later he went abroad, studying in Berlin, Strassburg and the University of Vienna. While in Europe, Dr. Nassau became associated with von Bergmann, von Olshausen and von Recklinghausen. He worked for a few months in England under Mr. Lawson Tait but on receiving an appointment on the Surgical Service of William S. Halstead at Johns Hopkins Hospital, he returned to the United States in September, 1894, to take up his duties there.

In 1895 Dr. Nassau came to Philadelphia and began the practice of Medicine, working in the Outpatient Department of the Old German Hospital and at St. Joseph's Hospital. In the latter institution, he met Dr. J. Chalmers DaCosta and a true friendship lasting a lifetime sprang up between them. DaCosta was impressed with Nassau's ability and persuaded him to attend Jefferson Medical College. He entered the Senior Class, receiving a degree from the institution in 1906.

Dr. Nassau then began to climb the ladder of promotion in the Surgical Department at Jefferson, beginning as Demonstrator of Anatomy under the late George McClellan and mounting to the rank of Clinical Professor of Surgery, the position he held until his death.

In addition to his work at Jefferson, Dr. Nassau was Surgeon-in-Chief to Frankford Hospital; Surgeon to St. Joseph's Hospital; Surgeon to Mt. Sinai Hospital and Consulting Surgeon to many hospitals throughout the State.

He served as President of the Philadelphia County Medical Society and as Director of the Department of Public Health. He received the degree of LL.D. from Villanova College and of Sc.D. from St. Joseph's College. He was a member of the outstanding Medical and Surgical societies in the United States.

Editorial Notes

With the completion of the last issue of the Alumni Bulletin, Dr. Thaddeus Montgomery asked to be relieved of his active editorial duties. Dr. Montgomery is responsible for the high standing which the Bulletin has attained; it is recognized as one of the best of such alumni publications.

The present issue is the first to appear under the direction of the newly appointed editorial board. It is our hope that the high standards established under Dr. Montgomery's editorship can be maintained.

The continued success of the Bulletin will depend largely upon the degree of cooperation of its readers, who are urged to send in any items of interest, appropriate for publication and to make suggestions as to how the Bulletin may be improved. In another section of the Bulletin, a questionnaire has been inserted for the convenience of all Alumni.

The William Potter Memorial Lecture

The William Potter Memorial Lecture was given on January 10, 1941 by Henrik Dam, Ph.D. His subject was "A Survey of the Present State of Knowledge on Vitamin K." Dr. Dam, formerly Associate Professor of the Biochemical Institute, University of Copenhagen, Denmark, is the discoverer of Vitamin K.
Alumni Activities
Branch Chapter Meetings

PENNSYLVANIA
Southwestern Chapter

On Thursday, November 21, 1940, the Southwestern Chapter held a meeting at Pittsburgh, Pennsylvania, which consisted of a luncheon, clinics and a dinner in the evening at the Duquesne Club. Dr. Lewis C. Scheffey, Professor of Gynecology, and Dr. Horace J. Williams, Professor of Otology, represented Jefferson and were the guests of honor. Clinics were held at the Allegheny General Hospital, at which Drs. Scheffey and Williams presented cases in their respective fields. Approximately 80 guests were present.

Officers elected for the ensuing year are as follows:

President:
Dr. S. A. Baltz—'03
60 Murray Avenue
Uniontown, Pa.

Secretary-Treasurer:
Dr. L. L. Bartlett—'29
2127 Broadway Avenue
Beechview, Pittsburgh, Pa.

Vice-Presidents:

Allegheny County
Dr. William M. McClements—'35
Medical Arts Building
Pittsburgh, Pa.

Westmoreland County
Dr. Richard Cole, Jr.—'34
Greensburg, Pa.

Indiana County
Dr. Ralph M. Lytle—'12
Saltsburg, Pa.

Washington County

JEFFERSON ALUMNI
Midwinter Smoker
and
Business Meeting

* BELLEVUE-STRATFORD HOTEL
February 13, 1941—8:00 P. M.
* Buffet Supper and Entertainment
Northeastern Chapter

In the evening a dinner was held at the Scranton Club. The following men were elected to office:

President:
Dr. John J. McHugh—'08

1st Vice-President:
Dr. Abram E. Snyder—'89

2nd Vice-President:
Dr. Arno C. Voigt—'01

3rd Vice-President:
Dr. Roy E. Nicodemus—'27

Secretary-Treasurer:
Dr. Almon C. Hazlett—'13

Pennsylvania State Meeting

A smoker and buffet supper was held October 2, 1940, at the Hotel Wellington, during the meeting of the Pennsylvania State Medical Society in Philadelphia. A large group of Jefferson graduates from all parts of Pennsylvania attended. Credit is due the Chairman, Dr. John T. Eads, for the success of the meeting.

New York

New York City

On November 29, 1940, the New York Alumni Association met at the Hotel Dolphin. Each of the sixty-three Jefferson graduates present showed intense interest in Jefferson. Drs. John T. Farrell, Jr., Theodore R. Fetter, and Adolph A. Walkling were the guests of honor, representing the College. They gave short talks together with Drs. Robert G. Carlin, Donald E. McKenna, Kingsley Roberts, and Edward J. Wagner. This chapter is probably our most active one and has been instrumental in the formation of another chapter in the western and central portions of New York State.

The following men have been elected as officers:

President:
Dr. Robert G. Carlin—'02

Vice-Presidents:
Dr. Arno E. Towne—'26
Manhattan
Dr. Donald E. McKenna—'16
Brookline
Dr. Jacob Burstan—'16
Bronx
Dr. James R. Reuling—'14
Queens
Dr. A. Alver Shapiro—'25
Richmond
Dr. Luther H. Kice—'08
Nassau and Suffolk
Dr. James H. Wall—'27
Westchester and Rockland

Secretary:
Dr. Harry M. Imboden—'03

Treasurer:
Dr. Kingsley Roberts—'20
Western and Central New York

Alumni of Western and Central New York State gathered for the first time at the Oak Hill Country Club, Rochester, New York, September 4, 1940. This new chapter promises to be a most active one. Dr. Robert G. Carlin, President of the New York State Alumni, was toastmaster of the evening. Drs. Henry K. Mohler, Thomas A. Shallow, and Randle C. Rosenberger, who are members of the faculty, spoke about the progress of Jefferson. Their subjects were well received. Motion pictures of The Jefferson Medical College were shown. The following men were elected to represent the chapter:

President:
Dr. Alfred F. Luhr—'05
Buffalo

Vice-President:
Dr. I. David Wolin—'14
Rochester

Secretary-Treasurer:
Dr. Samuel A. Munford—'05
Clifton Springs

NEW JERSEY
Northern New Jersey

On October 30, 1940, the Northern New Jersey Chapter entertained at the Essex Club in Newark, New Jersey. Thirty graduates of Jefferson were in attendance. Speakers of the evening were Drs. VanNess, Orton, Wyeth, and Shallow. The latter spoke on the “Future of Jefferson.” This chapter has been holding meetings quite regularly and its membership is steadily increasing.

The officers are as follows:

President:
Dr. Henry B. Orton—'08

Vice-President:
Dr. Roy VanNess—'12

Secretary-Treasurer:
Dr. Frederick C. DeTroia—'35

Southern New Jersey

At a luncheon held June 5, 1940, during the New Jersey State Medical Convention in Atlantic City, Drs. Thomas A. Shallow and Edward L. Bauer were guests of honor and represented the College. Dr. William J. Carrington, of Atlantic City, presided. Approximately seventy-five graduates were present. The committee is to be congratulated on the splendid response.

The officers are as follows:

President:
Dr. Byron G. Davis—'10

1st Vice-President:
Dr. Charles Hyman—'26

2nd Vice-President:
Dr. Harold S. Davidson—'15

Secretary-Treasurer:
Dr. Harry Subin—'24

The Ross V. Patterson Fellowships become available from time to time to recent graduates of Jefferson Medical College. This affords excellent opportunities for those especially desirous of pursuing some problem in medical research.

Residencies in various branches of medicine and surgery are open to recent graduates.

For further information address Committee, Fellowships, Residencies, and Internships, The Jefferson Medical College, 1025 Walnut Street.
The Jefferson Alumni Association of Delaware was founded May 25, 1940, at a meeting at the home of Dr. Joseph S. McDaniel, Dover, Delaware.

The following officers were elected:

President:
Dr. Joseph S. McDaniel—'18

Vice-Presidents:
New Castle County
Dr. G. A. Beatty—'30

The Southern Medical Association

At the meeting of the Southern Medical Association in Louisville, Kentucky, on November 14, 1940, a banquet at the Brown-Palace Hotel was attended by the entire assembly.

After the banquet, the Alumni of the various medical schools assembled in individual rooms. Eight Jefferson men, besides Dr. Warren B. Davis, who represented the Jefferson Faculty, were present. All were enthusiastic and interested in hearing of Jefferson's progress.
MIDWINTER SMOKER

The Chairman of the Entertainment Committee, Dr. John T. Eads, announces that the midwinter smoker will be held at the Bellevue-Stratford Hotel on Thursday, February 13, 1941. The business meeting will begin promptly at eight o’clock in the North Garden. This will be followed by entertainment, and a buffet supper. The Committee has made a special effort to make this smoker a gala one and has placed special emphasis upon the entertainment. The time and place is most convenient and everyone is urged to procure tickets as early as possible.

ANNUAL BANQUET

All Alumni should mark the date of the next annual banquet which will be held on June 5 at the Bellevue-Stratford Hotel, Philadelphia. In another section of the Bulletin, is a list of the Alumni who attended last year’s dinner. This list readily indicates the growing attendance at our yearly banquets and the possibility which is extended to each alumnus of meeting many old friends.

JEFFERSON A. M. A. MEETING

Graduates of Jefferson Medical College will gather for a dinner in Cleveland, Ohio, on Wednesday evening, June 4, 1941, at six-thirty P. M. This dinner will be held in the Empire Room of the Hotel Cleveland and will be in conjunction with the annual meeting of the American Medical Association.

Dr. Horace E. Mitchell, Class of 1912, will be general Chairman of the affair. Dr. Mitchell will be assisted by the following Committee:

Dr. C. C. Roe Jackson, Cleveland, O.
Dr. E. C. Goldcamp, Youngstown, O.
Dr. H. R. Conn, Akron, O.
Dr. A. A. Brindley, Toledo, O.
Dr. O. R. Clovis, Canton, O.

Because of the success of the dinner meeting held in New York during the American Medical Association meeting in 1940, Jefferson graduates have been clamoring for similar meetings to be held during each A. M. A. convention. Dr. Mitchell and his Committee have secured one of the finest banquet rooms in Cleveland for this affair.

Any arrangements or information desired can be had by writing to Dr. Horace E. Mitchell, 14805 Detroit Avenue, Cleveland, Ohio.

JEFFERSON ALUMNI PROMINENT AT CLEVELAND MEETING

During a meeting of the American Academy of Ophthalmology and Otolaryngology, held in Cleveland on October 8, 1940, fifty-eight Jefferson graduates representing Classes from 1902 to 1940, were in attendance. Dr. Horace E. Mitchell, Class of 1912, acted as Chairman of the committee and toastmaster of the banquet.

The speakers were Dr. Louis H. Clerf, ’12; Dr. Leroy A. Schall, ’17; Dr. James M. Shields, ’12, and Dr. Carroll R. Mullen, ’26. Other Alumni who participated were Drs. Hunter H. Turner, ’04; Frank L. Bryant, ’27; Austin T. Smith, ’22; William K. Allsop, ’15; William H. Bunn, ’15; Oscar R. Clovis, ’17; Merle F. Bossart, ’19; John D. Brian, ’03; Edward G. Goldcamp, ’14, and Arthur A. Brindley, ’12.
Alumni Day—1940

Each year an increasing number of graduates return to their Alma Mater during the Commencement Week Exercises. The Clinics during Ex-Internes’ Day and Alumni Day together with the Exhibits are regarded by those who have attended them in previous years, as outstanding presentations. Of equal importance is the Annual Dinner, an event affording the graduates of Jefferson to meet in a most festive occasion. In order to impress those of us who may hesitate to attend the Alumni Day Exercises and Dinner, during the coming year, the Bulletin publishes a list of those graduates, with their year of graduation, who were present at the dinner in 1940. A perusal of this list will readily indicate to all the favorable opportunity that is afforded in meeting old friends and new faces, and in reviving the spirit of Jefferson.

The annual dinner of the Jefferson Society for Clinical Investigation was held at the University Club on Thursday, October 17, 1940. Members of the Board of Trustees and Senior Faculty were present as guests of the Society. The speakers of the evening were Dr. D. Winslow Atchley, Associate Professor of Medicine at Columbia University, and Dr. Edward A. Strecker, Professor of Psychiatry at the University of Pennsylvania, who spoke on “The Contribution of Clinical Research to the Art of Medicine” and “Where Are We Going?—Psychiatric Aspects of the Present World Chaos”, respectively.

The annual award given to that individual or group of individuals belonging to the Junior Staff who published the most meritorious piece of investigative work during the previous year was conferred upon Dr. Abraham Rakoff for his researches on “Concentrations of Estrogenic Gonadotropic Hormones in the Sera of Pregnant Women”. Honorable mention was made of the paper by Dr. Tracy D. Cuttle on his paper “Observations on the Relation of Leucocytosis to Ascorbic Acid Requirements”.

General Hospital No. 38

In compliance with a request from the Surgeon-General’s office, The Jefferson Medical College and Hospital has the privilege to form a unit to be known as General Hospital No. 38. Appointments for this unit are in the process of being approved. It should be remembered that Jefferson was quite active during the last World War and at that time the unit was established at Nantes, France. A statement in the next issue of the Bulletin will appear, indicating the personnel of General Hospital No. 38, pending approval by the Surgeon-General.

Jefferson Hospital
**Endowed Room and Benevolence Fund**

The first Jefferson Alumnus to occupy the Alumni room in Jefferson Hospital was admitted May 22, 1940. Up to December 31, there were four additional admissions. The room was occupied a total of 119 days. The Board of Trustees has been most generous in the type of room provided in each instance. Since the endowment provides for only one admission at a time, those contemplating using the room are requested to make application in advance.

In order to refresh the memory of Alumni the regulations governing the use of the Endowed Room and Benevolence Fund, as approved by the Board of Trustees on January 29, 1940, and published in the May, 1940 issue of the BULLETIN, are reprinted below:

(a) No specific room to be designated but an available room will be assigned by the business office of the hospital, the hospital always reserving this right.

(b) Application for the use of the endowed room must be made in writing to the Medical Director; he in turn will obtain the approval of the Endowed Room and Benevolence Committee of the Alumni Association of The Jefferson Medical College; except in case of emergency, when the Medical Director will use his discretion as to the worthiness of the applicant.

(c) The room will be available to graduates of The Jefferson Medical College, wherever they live, who are financially unable to pay for such care, but not to members of their families, their relatives, or their dependents.

(d) Applicants for benefits of the endowed room will not be considered in the case of patients suffering from acute or chronic alcoholism, contagious diseases, or insanity. Incurable patients may be admitted for temporary relief, provided that prior to admission it be understood that his stay must necessarily be limited and that provision be made for his care upon removal from the institution.

(e) Length of stay:
The use of the endowed room for any one patient will be limited to a stay of four consecutive weeks. If the case is particularly deserving and the diagnosis and necessary treatment unusual, a longer stay may be allowed by the Medical Director upon the recommendation of the attending physician if no other applicants are on the waiting list.

(f) Benefits provided:
1. Private room with bath and meals.
2. Ordinary nursing care.
3. Medication, including special drugs, oxygen therapy and physical therapy.
4. Nurse's board if a special duty nurse is employed.
5. Operating room and anesthesia charges.
6. Ambulance service.
7. X-ray and radium charges.
8. Basal metabolic tests and electrocardiograms.
9. Special laboratory examinations.
10. Blood transfusions if the case is an emergency.

The continued interest and the support of alumni is respectfully solicited in the second drive for $10,000 which will provide special nurse's care, medicine, etc. when such aid is essential. The necessity for this new fund has been brought to our attention in the light of experience encountered during the past year. It is expected that this cause will attract response from those who have not yet subscribed to the previous fund. Contributions should be sent to the Alumni Office or to the Chairman, Dr. Warren B. Davis.

I wish to contribute to the Endowed Room Fund $……
