All regular meetings will be held at Jefferson Hall, 11th & Locust Streets, Philadelphia. Meetings begin at 7:00 P.M. Room number posted in lobby.

THE PRESIDENT'S MESSAGE

Dear Alumna,

My pride in our Alumnae Association and all Jefferson Graduates is tremendous. I am so proud of being a part of such a fine group. The loyalty and cooperation from each one of you make the task of being president a lot easier.

One of the rewards of being president is presiding at the Annual Luncheon. It is always a pleasure to look out over the crowd and recognize so many familiar faces and to see the happy renewing of friendships. It is truly a good looking group.

This past year we have been involved in trying to get the Sesquicentennial Campaign off the ground. Although we are pleased with the response our nurses have made, it is still far from our goal. If you change your thinking, it is not too late to increase your contributions.

The Nursing Symposium presented by the College of Allied Health Sciences on Friday, May 3, 1974 at Jefferson Alumni Hall was excellent. It is hoped this will become a yearly project.

My sincere thanks to each of you for your help, because without it we would not have an Alumnae Association of which we can be so proud.

Can we continue to count on you!

Sincerely yours,

Margaret Summers, Class of 1941

#### ANNUAL REPORT OF THE SCHOOL OF NURSING

#### Just to think we are nearly five years into the 70’s Daily. The clock seems to tick faster and “tempus fugit” for as it is humorously quoted, “tempus fugit”. Change keeps pace with time and we have said good-bye to the era of many of the things which some of us rather nostalgically seem to remember as the “good ole days”.

Today, students may be married at any time during the program and live off campus. Maternity leave is granted. Of our 273 students, ten are married and two have children. In fact, one of our students expects to graduate next year about the time her daughter graduates from high school. Night duty is a thing of the past and relief for students is limited to four weeks under the supervision of an instructor.

Males have invaded the ranks — three in the current freshman class! It’s difficult not to refer to them as male students and simply refer to them as students, but we keep trying, and by the time they graduate, we hope to have made the adjustment. Speaking of adjustment, the admission of males has not caused any major curriculum changes.

Since we shortened the program to 33 months in 1970, no major curriculum changes have occurred. One major change on the horizon is the anticipated move from our present cramped, antiquated facilities. These have not changed, except for an occasional cost of paint, since the “good ole days”), to the glistening, roomy, renovated Physical Education Center (Edison Building) at 9th and Saxon Streets. We expect to be housed there by the beginning of the fall of 1974. Perhaps you are dropping in for a visit, please remember our administrative offices will also be moving there, and will no longer be in the Martin Residence. Perhaps next year, prior to the luncheon, we can arrange for you to tour our new facilities.

Our faculty remains relatively stable, some being with us more than 15 years. At present, the faculty numbers 36, including 19 Jefferson graduates and 17 graduates of other programs. Eight of the faculty hold master’s degrees and 21 baccalaureate degrees.

Most group activities are on the wane, as students prefer to “do their own thing”, but one group activity does not seem to change — basketball. Although their league championship streak was broken this year (they finished in third place), the team won their third consecutive title in the Annual Thomas Jefferson Invitational Tournament, and their third consecutive victory at the Spectrum prior to a 76 ers game. It should be noted that in the last three years, our success at the Spectrum was better than that of the 76 ers, but we will not lend them our coach! Patricia Jones, ’74, and Donna Rouxier, ’75, two team members, had personal moments of glory when they won the Times — National Basketball Association free throw competition at the Spectrum and, with the local little, an all expense paid trip to the national competition in San Diego, in which they were less successful than on home ground. Patricia Jones was this year’s recipient of the Thomas Jefferson Award for athletic achievement, given by the School of Nursing Department of the Women’s Board, and presented by the coach at the basketball banquet.

Our cheerleaders won their league title for the second consecutive year, in spite of the fact that one of the team had emergency surgery the week before the competition and could not participate, nor be replaced. That’s real Jefferson Spirit!

After seven months of anticipation and preparation of the Report of Self-Evaluation, our routine visit (April 6-12, 1974), for continuing NLN accreditation is now history. We have only to wait for the recommendations from the May meeting of the Board of Review. We wait for their recommendations with confidence, anticipating continuing accreditation for the six year maximum. You will be interested, and no doubt proud, to know that the visitors complimented the faculty for their commitment and dedication to their assignments, the students, and the purposes of the diploma program. Perhaps we can use the occasioned moments of glory when they won the Spectrum was better than that of the “tempus fugit”).

In this age of accountability, passing State Board Examinations is not sufficient evidence to a faculty that their graduates are safe, competent practitioners. Since 1970, the faculty has been carrying on a graduate follow-up study with questionnaires sent to employers four months after completing their employment. Preliminary final results of the study will not be available until next year when the five-year study period is completed. However, preliminary results seem to indicate that we are, indeed, still producing in the Jefferson tradition, the nurse who is a safe, competent practitioner.

Respectfully submitted,

Doris E. Bowman
Director,
School of Nursing
ANNUAL REPORT OF THE
DEPARTMENT OF BACCALAUREATE NURSING
COLLEGE OF ALLIED HEALTH SCIENCES

Forty six students were admitted in the first class entering in September 1972. There will be 40 gradu­ates receiving their Bachelor of Science in Nursing, in June, 1974. The fall 1974 class will number 65 men and women. Faculty has enthusiastically involved in curriculum planning throughout our existence both in preparing for the first group of students as well as in planning the ongoing curriculum. There has been student participation since their admission. We are making sincere efforts to prepare graduates who will be able to function effectively in today's world of health care as they progress in their nursing careers. Em­phasis is placed on the important role of the nurse in making sincere efforts to prepare graduates who will be able to function effectively in today's world of health care as they progress in their nursing careers. Em­phasis is placed on the important role of the nurse in pre­paring for the future.

Many health care agencies in the Philadelphia area are being utilized to provide clinical laboratory ex­perience in the nursing courses. These include Jeffer­son related hospitals and various types of neighbor­hood health agencies.

Charlotte E. Vass
Chairman, Department of Baccalaureate Nursing

PROGRESS—THOMAS JEFFERSON UNIVERSITY

The last year has brought more changes and more plans for future changes emphasizing Jefferson's further growth and development.

Physical changes within the hospital have resulted in improved facilities for patient care. The newly con­structed Intensive Care Nursery has provided mod­ern facilities and equipment for the care of the high risk infant, many of whom might not have survived without such support. Two operating rooms on the Sixth Floor have been renovated to provide more room for gynecological surgery. A second cardiac surgery room has been made available on the Fourth Floor. Pavilion. A second psychiatric unit was opened on Twelfth Floor, Thompson Building which provides care to the more disturbed patients.

In addition to the improvements made for in­patients, Jefferson recognizes the need to promote proper health care and help prevent illness among the people of South Philadelphia where readily accessible medical care is quite limited. Towards this end, Thomas Jefferson University Hospital has been co­operating with institutions of the South Philadelphia area in the evolution of a Health Plan group. These institutions will develop a com­munity health center where persons belonging to the SPHA (South Philadelphia Health Action) group will be benefited by a group of health professionals capable of managing the range of problems an individual may present. Comprehensive and continuing care will be provided with emphasis on preventive care.

Another problem in providing health care through­out the nation is the scarcity of family practitioners. Jefferson Medical College cognizant of this problem, has established a Department of Family Medicine under Dr. Paul C. Brucker. This summer a new three­year residency program in Family Medicine will begin at Jefferson. These physicians will be exposed to all phases of health care, preventive and curative, and will follow and treat patients in the hospital and on an outpatient basis. Junior medical students may take a six­week family medicine preceptorship which permits them to visit offices of family doctors in the Philadelphia area.

Over the past ten years, Thomas Jefferson Univer­sity has been expanding its established tradition of teaching the community. A Children and Youth Ambulatory Program for Comprehensive Child Care is located at 13th and Fishtown Streets. A Mental Health Ambulatory Program has been functioning at Twelfth and Walnut Streets with satellite clinics in South Philadelphia. Emergency care at night and on weekends and hospitalization are available at Thomas Jefferson University Hospital in both pro­grams.

The changes in physical facilities and new pro­grams represent only a few of the steps Jefferson has been taking to provide total patient care in both pre­ventive and curative phases.

We know that you will be interested in keeping up to date with news of your Alma Mater and hope that you will visit our University and to see for yourselves the new Jefferson.

With good wishes for a happy and prosperous year.

Mabel C. Prevost
Assistant Hospital Director

TRENDS IN NURSING AT
THOMAS JEFFERSON UNIVERSITY HOSPITAL

The Nursing Service Department at Thomas Jeffer­son University Hospital has for its primary objective to deliver quality patient care and provide a stimulating environment for student education. To achieve these objectives we continually evaluate our patient care program and implement new programs when indicated.

The Cardiac Rehabilitation program is an example of this. Rehabilitation of the cardiac patient focuses on physical conditioning through a graded exercise pro­gram and on teaching and counseling the patient about diet, health habits, and performance of activi­ties of daily living. The program's goal is to assist the individual to live a productive life, including early return to work and family responsibilities. Members of the Department of Rehabilitation Medi­cine, Cardiology and Nursing developed the program. Nursing plays a vital role in the program as they are responsible for teaching, providing emotional support, and observing the patient's response in increased activity. All aspects of the program begin while the patient is in C.C.U. following discharge from C.C.U., the patient transfers to Rehab, where his exercise pro­gram is instituted. Physical Therapy, physicians and nurses on Rehab closely coordinate their efforts to insure that the individual patient progresses smoothly through his program. Patient and family teaching in preparation for discharge are done by the nurses from C.C.U. and Rehab. Plans are now being made to institute a home care program for these patients.

Primary Nursing Care

In the spring of 1973, a group of staff nurses ex­pressed dissatisfaction with team nursing as a method of delivering care. They felt that team nursing did not allow them to form an effective relationship with patients and families. This occurred because the team leader and team members were not always assigned to the same group of patients; and team leaders were responsible for eight hours, not twenty­four hour care.

To resolve the problem expressed by the staff nurses, we looked for another method of delivering care. Primary Nursing is a method of delivering nursing care which is based on the principle that one nurse is responsible and accountable for the nursing care of a group of patients twenty­four hours a day, from admission to discharge. The major goal is to reduce fragmentation of care by providing the patient with one nurse who is totally responsible for his care.

The nurse's responsibility includes assessing the needs of patients, identifying nursing care problems, planning care, giving care, relating care needs to staff members on other shifts, and evaluating care. The primary nurse exercises her responsibility and account­ability by counseling staff members on how to meet the needs of patients and by following up to see if care was given. When problems with care do occur, the primary nurse investigates why and implements a program to prevent its recurrence, i.e., education of staff.

Since June of 1973, Primary Nursing has been insti­tuted on six nursing units. Plans are now being for­mulated to use this method of care on all nursing units. On the units where primary care is used, patient satisfaction has increased. Staff morale has improved. We believe this is because nurses are more involved with their patients and can see the effects of their care.

Cardiac Rehabilitation and Primary Nursing are two examples of the changing focus in nursing at Jeffer­son. In essence, we are caring for individuals with complicated, long­term illnesses, and we are allowing our approach to care to meet the needs of these patients. This implies teaching programs which help patient and family adjust to the illness. Diabetic classes and the asthma teaching program are ex­amples.

We also have a psychiatric nurse consultant who assists the staff in dealing with dying patients and with the emotional problems of very ill patients.

Nursing at Jefferson is dynamic. We have achieved much in the past decade, but there is much still to be done; Goals for the future include participating in an interdisciplinary approach to care, implementing a problem oriented medical record, and establishing a program of evaluating nursing care.

CAROL HUTLEMeyer, R.N., M.S.N.
Acting Director, Nursing Service

COLLEGE OF ALLIED HEALTH SCIENCES
SESQUICENTENNIAL SYMPOSIUM
MAY 3, 1974

Plans in preparation for the celebration of the Sesquicentennial of Thomas Jefferson University have been in effect since 1972 with the appointment of a Steering Committee and a Themes Committee by Dr. Peter A. Harbur, President. Ideas for the celebration were explored and gradually a program for the year was developed. The resultant calendar for the year was widely distributed to Alumni, University faculty and personnel, and other institutions and schools.
We believe that it is a diversified program and that the history, the present activities of the University and future plans for "Century 21" will be illustrated through the programs during the year. Of particular interest is the senior Alumnae, who will give a plenary session in the afternoon of the first day. The Alumnae Association will be addressed by Miss Anna Kuba, who is currently the Chairman of the Department of Baccalaureate Nursing.

We were extremely pleased with the enthusiastic response from the estimated 300 people who attended the symposium.

The morning of the Nursing session, "Jefferson Nurses in Action," included participation by alumnae of the School of Nursing who have been very active in nursing and who are known nationally. Nursing in perspective from three points of view was discussed by Miss Anna Kuba, who is currently the Coordinator of the Program in Clinical Nursing of the American Nurses' Association. Dr. Barbara Schutt, who is former editor and current contributing editor to the American Journal of Nursing and who will shortly be taking the position as the Director of the Department of Nursing at Albany College in Connecticut and Dr. Hamlet Weary, who is the Associate Dean for Research at the College of Nursing, University of Illinois, presented a very stimulating talk and I am sure prompted the members of the audience to take seriously the past and the present but are not sure when the future of nursing in general and nursing in particular here at Jefferson. Another part of the morning program consisted of participation of two School of Nursing graduates who are involved in research activities in nursing. The first is Miss Maureen Maguire who is Co-director of the Pediatric Nurse Practitioner program at the Johns Hopkins University Hospital and Miss Eileen O'Neill who has had a great deal of background in Nephrology Nursing with Jefferson Hospital and the Social Security Administration in Jackson, Miss.; their descriptions of their activities and their impressions of the nursing contributions in these areas were very interesting.

The afternoon of the Nursing symposium was devoted to what is happening today at Thomas Jefferson University Hospital. Several members of the nursing staff, some of whom are Alumnae of the School of Nursing, involved in rather innovative activities in nursing here at Jefferson. They presented a very stimulating and interesting discussion of their responsibilities and gave the audience a picture of the innovativeness of the hospital nursing staff at the present time.

The proposed Clinical Teaching Facility will support the educational goals of Thomas Jefferson University which are:

1. The education of medical and allied health personnel at undergraduate and graduate levels.
2. The provision of continuing education to practicing health professionals.
3. The maintenance of a rich environment for the continuing search for knowledge in the medical and health sciences.
4. The development of educational and care services which will contribute to improved levels of health and well-being of our community.

The Clinical Teaching Facility will be an essential element of the University. It will not alone be a hospital or a hospital and some clinic, but rather it will be an educational environment that will afford students and teachers alike an exemplary setting for the interaction of superb patient care and the education of many professionals who must work together throughout their careers. It will be, as well, a resource for clinical research programs and an important health resource for the community it serves.

The gradual disappearance over the past several decades of the "clinical patient" from hospitals and the evident and predictable increase in the scope of ambulatory patient services has provided a significantly different environment for the clinical education of health professionals.

A multidisciplinary structure for care and teaching designed around physiological systems will be provided rather than continuing the traditional fractionated typical hospital organization and physical structure of today. These systems will permit the concentration of responsibility for delivering the ancillary services needed; for the provision of continuing rather than episodic care along with maintaining the optimal interpersonal relationship between both personal and professional satisfaction for patients, teachers, students, and staff.

The proposed Clinical Teaching Facility will combine the delivery of inpatient and ambulatory care in one physical complex and will, therefore, not only be a teaching hospital but will also be a center for the education of allied health personnel in the teaching and in the delivery of patient care while permitting the delivery of primary, secondary, and tertiary care on the same campus.

The Clinical Teaching Facility will be the result of a combination of the Foerderer Pavilion and a new building. The two will be bridged across Sansom Street at every level.

The new building, which will encompass the city block between 10th and 11th Streets and Chestnut and Sansom Streets will contain 400 beds and 110 physicians' offices. Two physicians' offices will be staffed to all ambulatory care on campus will be delivered in that setting.

The Clinical Teaching Facility will be the result of a combination of the Foerderer Pavilion and a new building. The two will be bridged across Sansom Street at every level.

The building will be located on the north side of the campus and will house all major professional and hospital services with Thomas Jefferson University Hospital.

The Foerderer Pavilion will be extensively remodeled and will contain 185 beds which will be used for in-patient care and will be located in the southern half of the new building and for services of physicians located on the 7th, 8th and 9th floors. All patients occupying these beds and services will be provided with whatever medical care and rehabilitation modalities on the 9th floor of the new building and for services of physicians located on the 7th and 8th floors. There will be a constant flow of patients and services between the two buildings and ambulatory care on campus.

When completed, the Clinical Teaching Facility will provide 585 beds for Jefferson (400 in the new building and 110 in the Foerderer Pavilion), which is a reduction in the total number of beds which will be permitted by utilizing a variety of economics such as the planned economics in the Foerderer Pavilion.

The proposal is currently being presented to the Foerderer Pavilion and the new building will be designed as a combined structure to minimize costs as much as possible and will be the result of a combination of the Foerderer Pavilion and a new building.

The new building will be located on the north side of the campus and will house all major professional and hospital services with Thomas Jefferson University Hospital.
GENETIC COUNSELING PROGRAM AT JEFFERSON

The Division of Medical Genetics of the Department of Medicine, Obstetrics and Gynecology, and Pediatrics of Jefferson Medical College has conducted a program in genetic counseling and education for the past 10 years. This program has been supported from its inception by grants from the National Institutes of Health, Philadelphia, Pennsylvania, and has been the subject of several publications. The emphasis in this description of genetic counseling is on the communication aspect of the process.

Once one learns to look at the clinical condition more closely or to measure small differences one finds that there are separate diseases caused by separate genes. This can frequently have a great deal of significance for the prognosis in the patient because different genetic diseases may pursue different clinical courses in the same individual. For instance, once a diagnosis of a specific genetic problem has been established one can usually deduce from the patient's history whether the genetic defect is expressed at birth or whether it is made of transmission of the gene which causes the clinical condition.

The cost of the Clinical Teaching Facility, including the renovation of the Fororder Pavilion, will be approximately $63,000,000. This amount represents the estimated cost of the land purchased between 10th and 11th Streets and Chestnut and Sansom Streets. It is anticipated that the balance of the funds necessary for construction will be obtained through a hospital or municipal authority which will issue tax free bonds.

The proposed Clinical Teaching Facility will, therefore, be limited to size Jefferson's educational and patient care needs and as noted will offer a full spectrum of in-patient, ambulatory, and outreach care. The new facility will also provide considerable economic benefits to the community, and economic interests of the community, and will support the health care and educational goals implicit in national policy.

Specifically, a facility offering a single standard of exemplary in-patient and ambulatory care in multi-disciplinary setting of which approximately $5,100,000 will be raised in Jefferson's Sesquicentennial Fund Drive. This latter amount represents the estimated cost of the land purchased between 10th and 11th Streets and Chestnut and Sansom Streets. It is anticipated that the balance of the funds necessary for construction will be obtained through a hospital or municipal authority which will issue tax free bonds.

The proposed Clinical Teaching Facility will, therefore, be limited to the size Jefferson's educational and patient care needs and as noted will offer a full spectrum of in-patient, ambulatory, and outreach care. The new facility will also provide considerable economic benefits to the community, and economic interests of the community, and will support the health care and educational goals implicit in national policy.

Specifically, a facility offering a single standard of exemplary in-patient and ambulatory care in multi-disciplinary setting of which approximately $5,100,000 will be raised in Jefferson's Sesquicentennial Fund Drive. This latter amount represents the estimated cost of the land purchased between 10th and 11th Streets and Chestnut and Sansom Streets. It is anticipated that the balance of the funds necessary for construction will be obtained through a hospital or municipal authority which will issue tax free bonds.

The proposed Clinical Teaching Facility will, therefore, be limited to the size Jefferson's educational and patient care needs and as noted will offer a full spectrum of in-patient, ambulatory, and outreach care. The new facility will also provide considerable economic benefits to the community, and economic interests of the community, and will support the health care and educational goals implicit in national policy.
the community. This is accomplished through a series of what are called satellite clinics in the eastern part of New Jersey. These satellite clinics are conducted under the sponsorship of the National Foundation March of Dimes and are usually conducted in affiliated medical institutions within the community. One or more of the genetic counseling center staff physicians attend the clinics together with house officers or students from Jefferson. Some of the physicians who participate in this program are Dr. Leon Peris of the Department of OB/GYN, Dr. Gary Carpenter of the Department of Pediatrics, Dr. Susan Cowhock of the Department of Internal Medicine, and Dr. Leonard Reisman of the Department of Pathology.

The clinics themselves are conducted on a once monthly basis, usually for one half a day. Any patient is seen by appointment and given thorough clinical evaluation plus testing for any chromosomal or biochemical phenomenon that seem appropriate. Blood or other materials are collected for such testing at the satellite center, but the laboratory work is done at Jefferson. At follow-up visits the patients are counseled or started into management programs appropriate to their problem. Usually clinicians from the affiliated institution or house officers or nurses participate in these programs so that a great deal of post graduate education occurs in an informal and very effective sense. These clinics are conducted at the Crozer-Chester Medical Center in Chester, Pa.; our Lady of Lourdes Hospital, N. J.; Peter’s Hospital of Bethlehem, Pa.; the Allentown Hospital of Allentown, Pa.; Community Medical Center in Scranton, Pa.; Kirby Health Center in Wilkes-Barre, Pa.; St. Joseph’s Hospital in Reading, Pa.; the Reading Hospital in Reading, Pa.; the Doylestown Hospital in Doylestown, Pa.; the Hamburg State School in Hamburg, Pa.; and the Elizabethtown State Hospital for Crippled Children in Elizabethtown, Pa. All together some 800 to 1,000 patients are seen every year in this informative and active service which we hope is helping to demonstrate how new and innovative medical services can be brought out of the medical center and into the community with great effectiveness.

Lauri Jackson, M.D.
Director, Division of Medical Genetics
Thomas Jefferson University

LAURI JACKSON, M.D.

THE JEFFERSON
BREAST DIAGNOSTIC CENTER PROGRAM

Though it may be hard to believe, about 89,000 new cases of breast cancer will be discovered this year in the United States. These cancers will occur, for the most part, in the 33,000,000 or so women in the risk age group. The tragedy is that nearly 90% of these cancers will be found by the woman herself, and over 60% of these will be noticed at an advanced stage. Such cancers probably have been growing for eight to ten years prior to detection. Thus we have the problem of detecting at the earliest possible time the 33,000,000 cancers in the breasts of 33,000,000 women. This parallels the problem faced by the Pep test.

Currently there are three distinctly different techniques which can be used clinically for breast detection. The physical examination of the breast probably dates back at least to the early Egyptians, and its effectiveness is to a large measure dependent on the skill of the examiner. The second technique is a special X-ray examination of the breasts using special films, low kilovoltage and often special X-ray tubes. This is called mammography, and is a technique which has had universal usage for the past fifteen or more years. Mammography, when performed by a skilled radiologist, is capable of detecting cancers well before they can be clinically palpated. The third technique involves the taking of hundreds of thousands of temperature measurements of the skin of the breasts. These measurements are then presented as a temperature picture in which the blockier the image the higher the temperature. Thermography, as this new technique is called, has been shown to be especially sensitive to very early subclinical cancers.

Here at Jefferson the physical examination of the breasts has probably been routinely practiced since its founding. Mammography was first introduced in this Department of Radiology in the early 1960’s by Dr. G. D. Dodd. Thermography was first introduced in conjunction with mammography in mid-1964 by Professor J. D. Wallace, and was established as a routine procedure two years later, thus making Jefferson one of the pioneering centers in the clinical application of both mammography and thermography.

The Jefferson Breast Diagnostic Center is the result of a contract with the Department of Radiology. The Center is under the leadership of Jack Jackson, M.D., of the Department of Radiology, and is expected to move into newly designed quarters on the third floor of the Health Sciences Building at 1 Park Avenue, a short stroll from the Department of Radiology. The Center is under the administration of Ms. Joan Franco, who is the administrator, will be happy to arrange for groups, as she recently did for 32 women who had their breasts checked from Wilkes-Barre and travelled here from Elizabeth. A second floor of the Bell Telephone Company building is now near completion, and the Jefferson Breast Diagnostic Center will be in operation some time in December 1973. This new center is expected to open for operation in early March, 1974.

In order to conserve the women’s time, all screening is done by appointment and can be reliably expected to take three quarters of an hour. Appointments can be made by calling 215-892-5000, where we have three telephone lines. Ms. Joan Franco, who is the administrator, will be happy to arrange for groups, as she recently did for 32 women who had their breasts checked from Wilkes-Barre and travelled here from Elizabeth. All appointments will be confirmed by letter.

When the patient arrives at the Center the receptionist will check with you as to the accuracy of the information received over the phone. She will also ask you for the name, address and phone number of a close friend whom we could contact if in the future we are not able to contact you. Finally, the receptionist will ask you the name and address of the physician to whom you wish the report sent. Of course we shall...
also send you a report within about a week of the screening.

The next step is a specialized history concerned with the breasts. This history is in the form of a mark-sense sheet, on which you write in the squares for your answers. It is exactly the same type which is used for the several college board examinations.

You will then be given a colorful bag, and asked to step into a "cooling" booth where you will be requested to disrobe to the waist, putting your belongings in the bag. You will be asked to sit with your hands on your hips for 7 minutes. The cooling process is really not very cold, since the temperature will be between 60° and 70°. The cooling does two things. It erases the skin's thermal memory of your clothes and it reduces the normal blood supply to the skin, but has little effect on an abnormal blood supply. After 7 minutes of "cooling" you will be asked to move, with your hands still on your hips, to a seat in the thermographic room. The thermogram will be taken in three views: AP and the two obliques. Incidentally, as with normal photography, in thermography you provide the signal from your skin, so there is no radiation such as X-rays involved.

Once the thermogram is finished, you might ask the technician to sit in the chair and let you look into the viewing hood on the thermographic unit so you can see what her face looks like. You will then be given a package containing a wrap-around gown. These come in several colors. The same technician will then take you into the mammography room, where she will take two views of each breast. You might be interested in the fact that we do not use film, but rather special Xerox plates in place of the film. If you ask the technician she will show you some examples of this technique.

When the mammogram has been taken the same technician will weigh you, measure your height, and then introduce you to the physician who will examine your breasts clinically. You will hear the physician call out the findings to the technician, as she records them. If you have any questions, be sure to ask the physician.

The technician will then take you to a dressing booth. Once dressed, you can give your history form to the receptionist, and you are then a co-investigator in this project, having made your unique contribution.

It's simple, painless, and vitally important!

Behind the scenes, things are buzzing. When you made your appointment the information was immediately put into our computer at the Stein Research Center. The computer then generated the confirmation letter to you, and on the day before your appointment it provided Ms. Frances with a listing of the next day's appointments at each of the two centers. The additional information you gave the receptionist was also put into the computer. The history form, together with the clinical examination forms, were taken to Stein in the afternoon and the computer automatically read these forms and stored all this information. While this was going on your thermograms are read separately by two thermographers. If there is any disagreement the films are read by a third thermographer. At the same time, the mammograms are read in the same way by the radiologists. All readings are reported by each reader on a report form like your history form and are also read into the computer. The computer then puts together all the information concerning you, and in most cases generates a letter to you and another to your physician, reporting normal findings. In instances where there is suspicion of an abnormality, but no direct evidence, letters to this effect are generated, are reviewed against the actual film and films, and are sent out asking you to plan to come back in for a checkup in six months. There are many benign conditions which can produce suspicion so don't be overly concerned if you are asked to come back in six months. Finally, if either the mammograms or the clinical examination lends the physician to recommend a biopsy, special letters will be written. Your physician will be personally contacted by phone by the Center physician, and the findings discussed.

Our hope and expectation is that we, that is, all of us, will find those cancers at such an early stage that they will have little or no effect on the woman's future life. If together we can achieve this, then the techniques will be reviewed to see what combination of these three types of examinations is most effective. The program will then be made available not only to our 20,000 women, but also to the 33,000,000 other women who need such an examination, as well as to generations to come.

The program is as much yours as ours—for only with your cooperation can we get the answers which have been needed for so long.

Finally, since the program is funded by the National Cancer Institute, the examinations are free for the calling. What we need are concerned and understanding women who will make their unique contribution and keep in contact with us for five years.

As nurses, you know at first hand the importance of bringing effective early detection of breast cancer to all of our people as well as to yourselves. By joining the program you can help yourself as well as contribute to the health of future generations.

Don't worry about where you live. We have already had women come in from Pittsburgh. A group of women chartered a bus in Wilkes-Barre, came down, and not only had a good time shopping and seeing the sights, but also joined the program.

It only takes a telephone call to (215) 829-8350. Ms. Frances can arrange for two of you, or for larger groups. You can become an important part of our joint effort to bring about early detection of breast cancer.

Jefferson graduates between ages 45 and 64 note: You are eligible and welcome to participate in this health maintenance program.
COMMITTEE REPORTS

SOCIAL

On December 11, 1973 the Christmas party was held in the Faculty Club of Jefferson Alumni Hall. Following the dinner Santa (Mary Ann Stauffer) made her annual visit and presented each member and guest a gift.

On March 12, 1974 the Alumnae had its annual dinner and auction sale. Proceeds from the sale were placed in the General Fund.

The main event of the year was the Spring Luncheon held May 4, 1974 in the Crystal Ballroom of the Benjamin Franklin Hotel. There were 346 in attendance.

The graduating class of 1974 were guests of the Association. There were 29 members present. Class President, Miss Cheryl James was presented with a corsage.

The guests at the Head Table were:
Miss Doris Bowman, Director of the School of Nursing
Dr. Charlotte Voss, Chairman, Department of Baccalaureate Degree Nursing
Miss Elizabeth Sweeney, Director of the School of Practical Nursing
Mrs. Mamie Peace, Director of the Operating Room
Miss Carol Hutelmeyer, Acting Director of Nursing Service

The 50th Anniversary class was the guests of the Association. Present were: Lillian Pratt, Veronica Owens, Julia Gansser, Estelle Taylor, Blanche McGuigan.

Flowers were presented to the following Alumnae:
Miss Mary Godfrey - 65th Anniversary
Miss Elizabeth Heaton — Class of 1915
Miss Nanne Tolley — Class of 1918
Mrs. Elizabeth Miller — Class of 1921
Mrs. Ann Craver — Class of 1921
Miss Clara Brunner — Class of 1923

The class of 1947 had 34 members present for their 25th anniversary, this was the largest anniversary class.

The flowers at the head table were given to Wanda Edgele Kinsey, Class of 1947, who was hospitalized on the day of the Luncheon.

The social committee wishes to thank all members for their continued support and assistance in making the social events a success.

The Annual Spring Luncheon for 1975 will be held May 3, 1975 at the Benjamin Franklin Hotel.

Janet Hindson, '50
Chairman

MEMBERSHIP

On January 11, 1974, the senior class was apprised of the functions, structure and by-laws of the Alumnae Association. Copies of the Alumnae Association Bulletin and Constitution and By-Laws were also given to the students at this time.

In meeting with the students on April 18, 1974 the senior class completed membership forms for entry into the Alumnae Association upon graduation. The class was also invited as guests to the Annual Luncheon on May 4, 1974. Thirty members accepted the invitation as guests of the Association.

Deidre Watkins Blank, '67
Chairman

SICK AND WELFARE

During this past year there were many alumnae members hospitalized at Thomas Jefferson University Hospital. Cards were sent and visits made to all known members.

Jeanette Plasterer, '51
Chairman

BULLETIN

Thank you to all contributors to the 1974 Bulletin. Special thanks must go to Peg Summers, Martha Riland, and Delores Heckenberger whose help made compilation a rewarding experience. One noteworthy contribution is the extensive class news of the class of 1934 upon their 40th anniversary.

I hope the 1974 Bulletin will renew your interest in Jefferson and rekindle relationships with your classmates.
ADMINISTRATION

The Alumnae Room has been as busy as a beehive the past year. Besides sending out Alumnae material, we have been involved in addressing envelopes for the activities and the information of the University.

There have been programs of interest to nurses and there will be more programs in the future.

Please send your new addresses when moving, also change of name, so you will be on the active mailing file.

I am in the Alumnae Room on Tuesdays, 10 to 4, of each week. The Alumnae Room is on the Mezzanine Floor of Jefferson Hall, 11th and Locust Street, Room M-2. Telephone No. 829-8991.

Martha E. Riland, Clerk-Typist

Note of interest. From 1893 to 1974, there have been 4176 Graduates from the School of Nursing.

MISSING ALUMNAE MEMBERS

Help us find the correct addresses for the following: The letters for the annual giving and luncheon invitations sent March 1974 were returned to the Alumnae Office—marked moved—no forwarding address.

MISS CHERYL JAMES, PRESIDENT OF THE CLASS OF 1974 WITH MISS MARGARET SUMMERS AND MISS MARY GODFREY

MODEL SHOWING SITE OF NEW CLINICAL TEACHING FACILITY
RESUME OF MINUTES OF  
ALUMNAE ASSOCIATION MEETINGS

September 11, 1973
A motion was made, seconded and carried to re-committee to Miss Bowman and her committee to reissue the Fall scholarship to Janice Osterhus.
1100 By-Laws booklets went out in July. Thanks to Miss Riland and all who helped with the mailing.
A new Santa suit will be made by Misses Oberdorf and Handy.
It was decided to send the Reader's Digest to the following:
  Elizabeth Heaton   Sarah Bergey
  Emma Knock        Mary Godfrey
  Ethel Paust       Edith Chyfar
  Mabel Miller      Fred Steinbock

It was decided to send Christmas flowers to:
  Mary Kimball      Violette Emig
  Ann Bergner       Rosa Diserode

An appropriate gift will be sent to Benice Collins.

October 9, 1973
Miss Bowman reported that there have been two applications for scholarships. It was moved and seconded to award scholarships for the Spring 1974 semester to Judith Johnson and Sally Dupras.
Mrs. O'Connor reported that personal contacts are being made concerning donations to the Sesquicentennial Campaign. Delores Watkins will be the representative to the P.N.A. Convention in Pittsburgh.
It was moved and seconded to send the United Fund $150.
A very interesting film was shown about total knee replacement.

November 13, 1973
The Christmas party will be held December 11, 1973 in Jefferson Hall.
Delores Watkins gave an excellent report of the P.N.A. convention which she attended as a representative of the Association.
It was moved, seconded and carried to send the Christmas Seal Fund Society a contribution of $25.00.

January 8, 1974
Miss Hindson reported that the Christmas party was a huge success with 44 persons in attendance.
The following ballot was approved:
  President—Peg Summers
  2nd Vice-President—Delores Heckenberger
  Evelyn Frazier
  Board of Directors—Delores Watkins Blank
  Catherine Mikota
  LuAnn Miller
  Evelyn Dute

Mrs. Schulte, a speech therapist, showed a very interesting film about the world of the aphasic and conducted a question and answer period.

February 12, 1974
Miss Hindson reported that the annual supper and auction will be held March 12 in the Faculty Club in Jefferson Hall.
Mrs. O'Connor reported that much more effort is needed in order to reach our Sesquicentennial campaign commitment.
It was announced that the Breast Diagnostic Center survey is open to all Jefferson graduates. This is a good opportunity for health maintenance.
An interesting and informative program was then presented by Mrs. Margaret Reddy—a stoma therapist.

April 9, 1974
There were 28 reservations with 25 in attendance at the annual supper and auction. The auction raised $118.50. The Annual Spring Luncheon is to be held May 4. Dr. Charlotte Voss is to be the speaker.
Mrs. O'Connor announced that $30,000 has been raised so far for the Sesquicentennial campaign.
The ANA Convention will be in June in San Francisco. No one is presently able to go.
Results of election:
  President—Margaret Summers
  2nd Vice-President—Delores Heckenberger
  Board of Directors—Janet Hindson
  Delores Watkins Blank
  Evelyn Dute

A motion was made and carried to destroy the ballots.

May 14, 1974
It was moved and seconded to accept the recommendations of the Scholarship committee to grant scholarships for the Fall semester to Peggy Eckhart Hess and to Betty Bilbrorough Aleyes.
There were 362 reservations for the luncheon with 346 in attendance. The head table flowers were sent to Wonda Edgel Kinsey.
June 30 is the deadline for all contributions to the Sesquicentennial campaign.
It was decided to contribute $200.00 to the History of Nursing in Pennsylvania being sponsored by the College of Physicians of Philadelphia to provide for our representation in the project.
A motion was made and carried to send Lenore Schwartz to the ANA Convention as the representative of the Association.
It was decided to purchase several souvenir items of Jefferson to be available to graduates by the 1975 luncheon.
Mr. Louis McCreight from the General Electric Space Center in Valley Forge presented a program about the applications and benefits of space technology.
A motion was made and carried that the President and the Board of Directors conduct any emergency business which may arise between May and September.
All of the regular meetings of the Alumnae Association were held in room M23 of the Jefferson Alumni Hall.

Respectfully submitted,
Lenore W. Schwartz
Recording Secretary

Mr. Brown
The weather man in our town.
His name I'll now call Brown,
He used to own a scruffy farm.
Is two miles out of town.
Now Brown when he came home that night,
Was drunk, of course
A strange freak too,
He harnessed up his horse.
So down the road he staggered then
And cursed for want of light.
And when he reached the barn he found
His things were there all right,
But after fussing quite a while,
He got himself a drink.
And picking up the whip and rein,
He jumped into his jig.
His wife, she heard him from the house,
And wondered what could be.
So down the road she came
In breathless haste to see.
Why Brown what does this mean,
You're horrid drunk tonight.
And going closer up to him,
She held aloft the light,
But back she fell with sudden fear,
The sight was strange I vow.
For he had not hitched up his horse,
But harnessed up his cow.

Rosa Diserode, '23
WAYS AND MEANS COMMITTEE REPORT
May 15, 1973 - May 15, 1974

Thank you once again for your continued support and your generous giving to your Alumnae Association. The contributions to the Relief Fund, Scholarship and General Fund brought the total amount to $5,053.00. All contributions received after May 15, 1974 will be acknowledged in the Alumnae Bulletin for 1975. Following is a list of contributors and contributions according to classes.

1909—$15.00
Mary R. Godfrey
1914—$40.00
Marguerite G. Bennett Eile B. Hunting Martha M. Karp
1915—$30.00
Mollie Turner Elizabeth Heaton
1917—$13.00
Frances M. Grace
1919—$10.00
Iva Deyar Hilda Cals
1920—$45.00
Anna Trigo
Ann DeKitt Berenice Tegler
1921—$70.00
Frances Platt Henrietta Sprouse Maudie Spanner Ethyl Moull Elizabeth Bilger
1922—$125.00

The Class of '143
Karen Hattifnen Snider, 7 North Church St., Ephrata, Pa. 17522.

Margaret Lumin Miller, 42 Westboro Terrace, Raleigh, N.C. 27608. I was appointed Director of Church Women's Organizations in the First Congregational Church of Raleigh and North Carolina in 1970. I am planning to retire in 1975.

June Osgood, 17 S. Main St., Eddyville, Iowa 52555.

Dorothy blossom, 19 Valley Rd., Des Moines, Ia. 50326.

Helen Eiker Frederick, Woodburn Court, Westwood Ave., Atlanta, Ga. 30318.

Donna carr Cornelius, Illinois. They both looked real well.

Mildred Eulene Bouma, 172 Iris Court, Algonquin Retirement Center, Orange City, Iowa 51044. I retired this year. But days are not much. Ruth’s and husband stoped here recently. They both looked real well. I hope we can go to your funeral for one. As far as I know, I am planning to see if I can get the.

Clive Dean Miller, Alice Wood, Westwood, N.J. 08099.

Mildred Eugene Brandt, 904 Morton Ave., Burlington, Iowa 52601. The past five years have been interesting and busy. We have enjoyed our children and grandchildren and been to California several times. My husband will retire from the Fruttiy Dutch Hawaii in January after 46 years with the bank. As for myself, I keep busy with the Red Cross. Valentine’s Day was on Friday, February 15, a weekday. So I decided to make it special by having her go home for the holidays. This year I decided to go single and enjoy the mountain biking and skiing here. In 1975 I will be planning to cut the June of visit to all the family and friends.

Lucille Winkler, 8 236th Forkway, Summit, N.J. 07981.

Margaret Mariana Perdoo, 1076 S. Sependale, Philadelphia, Pa. 19114.

Margaret Bourbon Gour, 2936, Ithaca, N.Y. 14850.

Wildred Myron Smith, 309 N. Main St., Winchester, Va. 22601. As you know, I have been very interested in Japan, and in 1972, my husband and I retired to the same city of Winchester, Virginia, to live near the Japanese School. It was with great joy that we arrived in four days (thi top 1979). I met an expert in Topky and taught with joy the correct pronunciation of Kanji. It was with great satisfaction that I made these connections through an international Japanese program in the city of Winchester.

As I am planning to retire in 1975, I am planning to go every winter and see my family. Expect to go away every winter. God willing, So that I can know some people on the golf course. Mrs. Bowman, 545 Sun, 522 Walnut St., Hollidaysburg, Pa. 16648. How much my plan is to see my family for about a year, her husband is declared. Would you like to know what would be on your mind? You can find out about this online at 11104. I am planning to visit your celebration at your request.

Peach Hasselton, 6748 V. Street, Des Moines, Ia. 50310.

We are still working after the post office closed. We married, six grandchildren, one son, who lives in Michigan, but the local government. I hope to see you all May 4th.
1928- Elizabeth Owen McGuffin, 70 Collins Rd, Trenton, N.J. 08619. I am honored to have been selected for certification in Occupational Health Nursing. I am appointed to the Medical College and will start at Jefferson in September.

CLASS ADDRESS LISTS
Class address lists will be available from the Alumnae Office Clerk-Typist, at a charge of $2.00 per list. Enclose a long, self-addressed, stamped envelope.

ALUMNAE BULLETIN
The Alumnae Bulletin will be sent automatically to all Association members. Individuals who are not Association members may obtain a copy of the Bulletin upon request, at a cost of $3.00 per copy. An order form will be mailed to all graduates in the Spring of 1975.

MAIDEN NAME — YEAR OF GRADUATION
Whenever you have occasion to write to your Alumnae Association, please use your first name, maiden name, then married name and the year you graduated.
Example: Janice Smith Green — 1972
Mrs. John Green makes it very difficult for the Association to locate your card in the files. You are urged to notify the Secretary of the Alumnae Association of any corrections, marriages, deaths or changes of address. Please help us keep errors at a minimum, and our files accurate.

CAP CHARMS
Jefferson cap charms are available in sterling silver and 14 carat gold. For information, please write Betty Pierson or Margaret Summers, 1002 Spruce Street, Phila., Pa. 19107.

ALUMNAE DAY—FIRST SATURDAY IN MAY

CAPS
Jefferson caps may be purchased from the Marvin-Neitzel Corporation, 2016 Fifth Avenue, Troy, New York 12181. (C. D. Williams & Company was purchased by Marvin-Neitzel). The minimum order is for three caps at a cost of $1.50 each, plus a fifty cents postage and handling charge. Identification may be obtained by directing correspondence to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Philadelphia, Pa. 19107.

PINS
Jefferson pins may be purchased at J. E. Caldwell and Company, Chestnut and Juniper Streets, Philadelphia, Pa. 19107. Identification may be obtained by directing correspondence to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Philadelphia, Pa. 19107.

TRANSCRIPTS
All requests for transcripts should be submitted in writing to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Phila., Pa. 19107. Requests should be submitted at least a month prior to the date needed. There is a $2.00 fee for each transcript. Checks should be made payable to School of Nursing, Thomas Jefferson University.
