ALUMNAE CALENDAR 1974 - 1975

September 10, 1974  Regular meeting
October 8, 1974  Regular meeting
November 12, 1974  Regular meeting
December 1974  Christmas Dinner
                Time and place to be announced
January 14, 1975  Regular meeting
February 11, 1975  Regular meeting
March 11, 1975  Regular meeting
April 8, 1975  Annual meeting
May 3, 1975  Annual Luncheon
May 13, 1975  Regular meeting

All regular meetings will be held at Jefferson Hall, 11th & Locust Streets, Philadelphia. Meetings begin at 7:00 P.M. Room number posted in lobby.

THE PRESIDENT'S MESSAGE

Dear Alumna,

My pride in our Alumnae Association and all Jefferson Graduates is tremendous. I am so proud of being a part of such a fine group. The loyalty and cooperation from each one of you make the task of being president a lot easier.

One of the rewards of being president is presiding at the Annual Luncheon. It is always a pleasure to look over the crowd and recognize so many familiar faces and to see the happy renewing of friendships. It is truly a good looking group.

This past year we have been involved in trying to get the Sesquicentennial Campaign off the ground. Although we are pleased with the response our nurses have made, it is still far from our goal. If you change your thinking, it is not too late to increase your contributions.

The Nursing Symposium presented by the College of Allied Health Sciences on Friday, May 3, 1974 at Jefferson Alumni Hall was excellent. It is hoped this will become a yearly project.

My sincere thanks to each of you for your help, because without it we would not have an Alumnae Association of which we can be so proud.

Can we continue to count on you!

Sincerely yours,

Margaret Summers, Class of 1941
FINANCIAL REPORT
December 31, 1973

Receipts:
Dues and Re-instatement of Members $ 6,320.00
Annual Luncheon Reservations 1,457.00
Interest on Savings Accounts 1,230.92
Miscellaneous 1,609.89
Annual Giving Contributions:
General Fund 4,366.00
Relief Fund 329.00
Scholarship Fund 531.00
Total Receipts $15,843.81

Disbursements:
Annual Luncheon Expenses $ 1,892.65
Printing, Mailing & Stationery 2,228.47
Sick Benefits for Members 100.00
Graduation Prizes 125.00
Contributions (United Fund, etc.) 325.00
Other Operating Expenses 3,300.98
Remittance Expenses 395.00
Scholarships Granted 1,500.00
Gifts for Shut-Ins 90.28
Total Disbursements 9,827.38

Cash Balance as of December 31, 1973
General Fund $ 7,765.56
Savings Account 5,042.42
Relief Fund 19,075.93
Scholarship Fund 13,842.64

Most group activities are on the wane, as students prefer "to do their own thing", but one group activity does not seem to change — basketball. Although their league championship streak was broken this year (they finished in third place), the team won their third consecutive title in the Annual Thomas Jefferson Invitational Tournament, and their third consecutive victory at the Spectrum prior to a 76 ers game. It should be noted that in the last three years, our success at the Spectrum was better than that of the 76 ers, but we will not lend them our coach! Patricia Jones, 74, and Donna Ranzier, 75, two team members, had personal moments of glory when they won the Timex - National Basketball Association free throw competition at the Spectrum and, with the local little; an all expense paid trip to the national competition in San Diego, in which they were less successful than on home ground. Patricia Jones was this year's recipient of the Thomas Jefferson Award for athletic achievement, given by the School of Nursing Department of the Women's Board, and presented by the coach at the basketball banquet.

Our cheerleaders won their league title for the second consecutive year, in spite of the fact that one of the team had emergency surgery the week before the competition and could not participate, nor be replaced. That's real Jefferson Spirit!!!

After seven months of anticipation and preparation of the Report of Self-Evaluation, our routine visit (April 6-12, 1974), for continuing N.L.N. accreditation is now history. We have only to wait for the recommendations from the May meeting of the Board of Review. We wait for their recommendations with confidence, anticipating continued accreditation for the six year maximum. You will be interested, and no doubt proud, to know that the visitors complimented the faculty for their commitment and dedication to their assignments, the students, and the purposes of the diploma program. The students were complimented for being, "alert, interested and knowledgeable about their educational program".

Respectfully submitted,
Doris E. Bowman
Director, School of Nursing
ANNUAL REPORT OF THE DEPARTMENT OF BACCALAUREATE NURSING
COLLEGE OF ALLIED HEALTH SCIENCES

Forty six students were admitted in the first class entering in September 1972. There will be 40 gradu­ates receiving their Bachelor of Science in Nursing, in June, 1974. The fall 1974 class will number 65 men and women. Faculty have actively involved in curriculum planning throughout our existence both in preparing for the first group of students as well as in planning the ongoing curriculum. There has been stu­dent participation since their admission. We are making sincere efforts to prepare graduates who will be able to function effectively in today's world of health care as well as to prepare them for inevitable changes that will take place in the delivery of health care as they progress in their nursing careers. Em­phasis is placed on the role of the nurse in the evolving health care system.

Many health care agencies in the Philadelphia area are being utilized to provide clinical laboratory ex­perience in the nursing courses. These include Jeffer­son related hospitals and various types of neigh­borhood health agencies.

Charlotte E. Vass
Chairman, Department of Baccalaureate Nursing

PROGRESS — THOMAS JEFFERSON UNIVERSITY

The last year has brought many changes and more plans for future changes emphasizing Jefferson's further growth and development.

Physical changes within the hospital have resulted in improved facilities for patient care. The newly constructed Intensive Care Nursing has provided modern facilities and equipment for the care of high risk infants, many of whom might not have survived without such support. Two operating rooms on the Sixth Floor, Pavilion have been renovated to provide more room for gynecological surgery. A second psychiatric unit was opened at South Philadelphia. A Mental Health Ambulatory Program has been functioning at Twelfth and Walnut Streets with satellite clinics in South Philadelphia. Emergency care at night and on weekends and hospitalization are available at Thomas Jefferson University Hospital in both programs. The changes in physical facilities and new programs represent only a few of the steps we have taken to provide toto patients and families. This occurred because the team leader and team members were not always assigned to the same patients. Staff morale has improved. We believe this is because nurses are more involved with their patients and can see the effectiveness of their care.

We also have a psychiatric nurse consultant who assists the staff in dealing with dying patients and with the emotional problems of very ill patients.

Nursing at Jefferson is dynamic. We have achieved much in the past decade, but there is much still to be done. Goals for the future include participation in an interdisciplinary approach to care, implementing a problem oriented medical record, and establishing a program of evaluating nursing care.

Carol Hutelmyer, R.N., M.S.N.
Acting Director, Nursing Service

TRENDS IN NURSING AT THOMAS JEFFERSON UNIVERSITY HOSPITAL

The Nursing Service Department at Thomas Jefferson University Hospital has for its primary objective to deliver quality patient care and provide a stimulating environment for student education. To achieve these objectives we continually evaluate our patient care programs and implement new programs when indicated.

Cardiac Rehabilitation Program is an example of this. Rehabilitation of the cardiac patient focuses on physical conditioning through a graded exercise program and on teaching and counseling the patient about diet, health habits, and performance of activities of daily living. The program's goal is to assist the individual to live a productive life, including early replacement of lost physical and mental activity. Members of the Department of Rehabilitation Medi­cine, Cardiology and Nursing developed the program. Nursing plays a vital role in the program as they are responsible for teaching, providing emotional support, and observing the patient's response in increased activity. All aspects of the program begin while the patient is in C.C.U. Following discharge from C.C.U., the patients transfer to Rehab, where his exercise pro­gram is instituted. Physical Therapy, physicians and nurses on Rehab closely coordinate their efforts to insure that the individual patient progresses smoothly through his program. Patient and family teaching in preparation for discharge are done by the nurses from C.C.U. and Rehab. Plans are now being made to institute a home care program for these patients.

Mabel C. Prevost
Assistant Hospital Director
We believe that it is a diversified program and that the history, the present activities of the University and future plans for "Century 21" will be illustrated through the programs during the year. Of particular interest to nursing, was the opportunity to participate in the program of the College of Allied Health Sciences. In planning this program, the American Nurses' Association, Dr. Barbara Voss, Chairman of Department of Baccalaureate Nursing, presented a very stimulating and interesting discussion of their responsibilities and gave the audience a picture of the innovativeness of the hospital nursing staff at the present time.

The proposed Clinical Teaching Facility will support the defined goals of Thomas Jefferson University which are:

1. The education of medical and allied health personnel at undergraduate and graduate levels.
2. The provision of continuing education to practicing health professionals.
3. The maintenance of a rich environment for the continuing search for knowledge in the medical field.
4. The development of educational and care services which will contribute to improved levels of health and well-being of our community.

The Clinical Teaching Facility will be an essential element of the University. It will not alone be a hospital or a hospital and some clinics, but rather it will be an educational one with different educational programs for students and teachers alike.

The gradual disappearance over the past several decades of the "clinic patient" from hospitals and the evident and predictable increase in the scope of ambulatory patient services has provided a significantly different environment for the clinical education of health professionals.

A multidisciplinary structure for care and teaching designed around physiological systems will be provided rather than continuing the traditional fractionated typical hospital organization and physical structure of today. These systems will permit the concentration of responsibility for delivering the ancillary services needed, for the provision of continuing rather than episodic care for the "clinical patient" and for the education of many professionals who must work together throughout their careers. It will be, as well, a mutual resource for clinical research programs and an important health resource for the community it serves.

The Foerderer Pavilion was completed and occupied in 1969. The Board of Trustees accepted and supported a proposal from President Peter A. Herbst that it would be an instrument of the educational process which is not alone be a teaching facility but also a major professional and hospital services with the Northern Montgomery County community.

In 1969 the Board of Trustees accepted and supported a proposal from President Peter A. Herbst that it would be an instrument of the educational process which is not alone be a teaching facility but also a major professional and hospital services with the Northern Montgomery County community.

The Clinical Teaching Facility will be the result of a combination of the Foerderer Pavilion and a new building.

GENETIC COUNSELING PROGRAM AT JEFFERSON

The Division of Medical Genetics of the Department of Medicine, Obstetrics and Gynecology, and Pediatrics of Jefferson Medical College has conducted a program in genetic counseling. This program began in 1958, after the discovery of an X-linked recessive disorder in a large family of Philadelphia Jews, with the aid of the American Jewish Committee.

In the clinical context, the program was a by-product of the care of patients with a specific disease. As the family was extended and other members of the family were also found to be affected elsewhere, the program developed into a service for other families. This was followed by the establishment of a genetic counseling center in Philadelphia in 1960. The center is located in the Clinical Research Building of Jefferson Medical College, near the outpatient department of the hospital, and is staffed by medical students and residents.
the community. This is accomplished through a series of what are called satellite clinics in the eastern part of Pennsylvania and the southern and central portions of New Jersey. These satellite clinics are conducted under the sponsorship of the National Founda-

tion for Disease Control. The clinics are conducted in conjunction with house officers or students from Jefferson. Some of the physicians who participate in this program are Dr. Leon Peris of the Department of OB/GYN, Dr. Gary Carpenter of the Department of Pediatrics, Dr. Susan Cowherd of the Department of Internal Medicine, and Dr. Leonard Reisman of the Department of Pathology. The clinics themselves are conducted on a once-monthly basis, usually for one half a day. Patients are seen by appointment and given thorough clinical evaluations plus testing for any chromosomal or biochemical phenomenon that seem appropriate. Blood or other materials are collected for such testing at the satellite center, but the laboratory work is done at Jefferson. At follow-up visits the patients are counseled or started into management programs appropriate to their problem. Usually clinicians from the affiliated institution or house officers or nurses participate in these programs so that a great deal of postgraduate education occurs in an informal and very effective sense. These clinics are conducted at the Crozer-Chester Medical Center in Chester, Pa.; Our Lady of Lourdes, Camden, N. J.; St. Peter's Hospital of Bethlehem, Pa.; the Allentown Hospital of Allentown, Pa.; Community Medical Center in Scranton, Pa.; Kirby Health Center in Wilkes-Barre, Pa.; St. Joseph's Hospital of Hazleton, Pa.; the Reading Hospital in Reading, Pa.; the Doylestown Hospital in Doylestown, Pa.; the Hamburg State School in Hamburg, Pa.; and the Laubach Elementary State Hospital for Crippled Children in Elizabethtown, Pa. All together some 80 to 90,000 women are seen every year in this nursing and active service which we hope is helping to demonstrate how new and innovative medical services can be brought out of the medical center and into the community with great effectiveness.

Laird Jackson, M.D.
Director, Division of Medical Genetics
Thomas Jefferson University

LAIRD JACKSON, M.D.

THE JEFFERSON BREAST DIAGNOSTIC CENTER PROGRAM

Though it may be hard to believe, about 89,000 new cases of breast cancer will be discovered this year in the United States. These cancers will occur, for the most part, in the 33,000,000 or so women in the risk age group. The tragedy is that nearly 90% of these cancers will be found by the woman herself, and over 69% of these will be noticed at an advanced stage. Such cancers probably have been growing for eight to ten years prior to detection. Thus we have the problem of detecting at the earliest possible time the 33,000 cancers in the breasts of 33,000,000 women. This parallels the problem faced by the Pop test.

Current there are three distinctly different techniques which can be used clinically for breast detection. The physical examination of the breast probably dates back at least to the early Egyptians, and its effectiveness is to a large measure dependent on the skill of the examiner. The second technique is a special X-ray examination of the breasts using special films, low kilovoltage and often special X-ray tubes. This is called mammography, and is a technique which has had universal usage for the past fifteen or more years. Mammography, when performed by a trained radiologist, is capable of detecting cancers well before they can be clinically palpated. The third technique involves the taking of hundreds of thousands of temperature measurements of the skin of the breast. These measurements are then presented as a temperature picture in which the blacker the image the higher the temperature. Thermography, as this new technique is called, has been shown to be especially sensitive to very early subclinical cancers.

Here at Jefferson the physical examination of the breasts has probably been routinely practiced since its founding. Mammography was first introduced in the Department of Radiology in the early 1960's by Dr. G. D. Dodd. Thermography was first introduced in conjunction with mammography in mid-1964 by Professor J. D. Wallace, and was established as a routine procedure two years later, thus making Jefferson one of the pioneering centers in the clinical application of both mammography and thermography.

Many institutions have now established mammography as a routine study, and their experience has demonstrated that mammography is highly beneficial in early detection. When mammography delineates a small cancer in a breast, which by physical examination has been found clinically free of disease, such cancers are generally very small in size. Such patients have a much lower incidence of regional lymph node involvement. An example of the effectiveness of mammography is found in a recent study of 30,000 women in which mammography and a physical examination of the breasts were utilized. One third of all the cancers discovered in these women were found by mammography alone. These cancers would have been missed had mammography not been performed. This study also demonstrated that a reduction of one third was achieved in the mortality rate from breast cancer in a follow-up period of three years. Thus demonstrating that earlier detection is highly beneficial to the woman herself.

The practical problem of screening 33,000,000 women each year is huge. If one were to employ mammography by the modality that is now being utilized, then each of the approximately 10,000 practicing radiologists would have to spend about a quarter of his work day reading these special films. The problem then is to find some technique which can process the women and select that population in whom the incidence is indeed very high. This is the role of the Pop smear in cancer of the cervix, and it is this role which we hope thermography will play in carcinoma of the breast.

If one reviews the reported experience using thermography for breast cancer detection, one finds that in 38,500 reported cases there were 2,236 cancers found. Of these, 1919 were thermographically suspicious—an accuracy rate for cancer of about 86%. How does this compare with other techniques? The American Cancer Society for carcinoma of the colon has a reported accuracy rate of about 90%, as do the examinations for carcinoma of the esophagus and other sites. We can say that thermography might meet the requirements and need for a screening technique.

This is the question which the National Cancer Institute has asked Jefferson to answer. The Breast Diagnostic Center is the result of a contract between the Jefferson Medical College and the National Cancer Institute. This program will run for five years. It is the brainchild of its Director, Prof. J. D. Wallace, who is Research Professor of Radiology. The Center is under the responsibility of the Department of Radiology, of which Jack Eckenweiler, M. D., is Director. The Center is a cooperative effort involving several of the clinical departments: Surgery, Medicine, Pathology, Family Medicine, and Community Health and Preventive Medicine at Jefferson, as well as the Medical Department of the Bell Telephone Company of Pennsylvania.

The plan is to enlist 20,000 volunteer women between the ages of 45 and 64, who have had no previous evidence of breast cancer. New members will be admitted into the program at the rate of 5,000 the first year, which is now near completion, 10,000 the second year, and 5,000 the third year. We estimate that about 85% of these examined will be asked to return in two years, and will be sent a status questionnaire two years after their second examination. The remaining 15% will for the most part be asked to return in 6 months. The results of the examinations will be sent only to the physician designated by the woman. In the event that she does not have a regular physician we will suggest the Jefferson Department of Family Medicine who, according to her preference, will either act as her physician, or will assist her in contacting a physician in her neighborhood.

The examinations are now being made at two centers. The Jefferson Center is presently in the base- ment of the Curtis Clinic and is expected to move into specially designed quarters on the third floor of the Health Sciences Building on the corner of Ninth and Sansom Streets. The second center is located on the second floor of St. Christopher's Hospital for Children at 1 Parkway. The Jefferson center has been in operation since early December 1973 and the Bell Center started operations this past March.

In order to conserve the woman's time, all screening is done by appointment and can be reliably expected to take three quarters of an hour. Appointments can be made by calling (215) 956-8200, where we have three telephone lines. Ms. Joan Franco, who is the Administrator, will be happy to arrange for groups, as she recently did for 32 women who chartered a bus and travelled here from Wilkes-Barre. All appointments will be confirmed by letter.

When the woman arrives the receptionist will check with you as to the accuracy of the information received over the phone. She will also ask you for the name, address and phone number of a close friend whom we could contact if in the future we are not able to contact you. Finally, the receptionist will ask you the name and address of the physician to whom you wish the report sent. Of course we shall...
also send you a report within about a week of the screening.

The next step is a specialized history concerned with the breasts. This history is in the form of a mark-sense sheet, on which you block in the squares for your answers. It is exactly the same type which is used for the several college board examinations.

You will then be given a colorful bag, and asked to step into a "cooling" booth where you will be requested to disrobe to the waist, putting your belongings in the bag. You will be asked to sit with hands on your hips for 7 minutes. The cooling process is really not very cold, since the temperature will be between 48° and 70°. The cooling does two things. It erases the skin's thermal memory of your clothes and it reduces the normal blood supply to the skin, but has little effect on an abnormal blood supply. After 7 minutes of "cooling" you will be asked to move, with hands still on your hips, to a seat in the thermographic room. The thermogram will be taken in three views: AP and the two obliques. Incidentally, as with normal photography, in thermography you provide the signal from your skin, so there is no radiation such as X-rays involved.

Once the thermogram is finished, you might ask the technician to sit in the chair and let you look into the viewing hood on the thermographic unit so you can see what her face looks like. You will then be given a package containing a wrap-around gown. There are various colors. The technician will then take you into the mammography room, where she will take two views of each breast. You might be interested in the fact that we do not use film, but rather special Xerox plates in place of the film. If you ask the technician she will show you some examples of this technique.

When the mammogram has been taken the same technician will weigh you, measure your height, and then introduce you to the physician who will examine your breasts clinically. You will hear the physician call out the findings to the technician, as she records them. If you have any questions, be sure to ask the physician. The technician will then take you to a dressing booth. Once dressed, you can give your history form to the receptionist, and you are then a co-investigator in this project, having made your unique contribution.

It's simple, painless, and vitally important!

Behind the scenes, things are buzzing. When you made your appointment the information was immediately put into our computer at the Stein Research Center. The computer then generated the confirmation letter to you, and on the day before your appointment it printed a Ms. Franco with a listing of the next day's appointments at each of the two centers. The additional information you gave the receptionist was also put into the computer. The history form, together with the clinical examination forms, were taken to Stein in the afternoon and the computer automatically read these forms and stored all this information. While this was going on your thermograms are read separately by two thermographers. If there is any disagreement the films are read by a third thermographer. At the same time, the mammograms are read in the same way by the radiologists. All readings are reported by each reader on a report form like your history form and are also read into the computer. The computer then puts together all the information concerning you, and in most cases generates a letter to you and another to your physician, reporting normal findings. In instances where there is suspicion of an abnormality, but no direct evidence, letters to this effect are generated, are reviewed against the actual file and films, and are sent out asking you to plan to come back in for a checkup in six months. There are many benign conditions which can produce suspicion so don't be overly concerned if you are asked to come back in six months. Finally, if either the mammograms or the clinical examination leads the physician to recommend a biopsy, special letters will be written. Your physician will be personally contacted by phone by the Center physician, and the findings discussed.

Our hope and expectation is that we, that is all of us, will find those cancers at such an early stage that they will have little or no effect on the woman's future life. If together we can achieve this, then the techniques will be reviewed to see what combination of these three types of examinations is most effective. The program will then be made available not only to our 20,000 women, but also to the 33,000,000 other women who need such an examination, as well as to generations to come.

The program is as much yours as ours—for only with your cooperation can we get the answers which have been needed for so long.

Finally, since the program is funded by the National Cancer Institute, the examinations are free for the calling. What we need is concerned and understanding women who will make their unique contribution and keep in contact with us for five years. As nurses, you know at first hand the importance of bringing effective early detection of breast cancer to all of our people as well as to yourselves. By joining the program you can help yourself as well as contribute to the health of future generations.

Don't worry about where you live. We have already had women come in from Pittsburgh. A group of women chartered a bus in Wilkes-Barre, came down, and not only had a good time shopping and seeing the sights, but also joined the program.

It only takes a telephone call to (215) 829-8350. Ms. Franco can arrange for two of you, or for larger groups. You can become an important part of our joint effort to bring about early detection of breast cancer.

Jefferson graduates between ages 45 and 64 note: You are eligible and welcome to participate in this health maintenance program.
COMMITTEE REPORTS

SOCIAL

On December 11, 1973 the Christmas party was held in the Faculty Club of Jefferson Alumni Hall. Following the dinner Santa (Mary Ann Stauffer) made her annual visit and presented each member and guest a gift.

On March 12, 1974 the Alumnae had its annual dinner and auction sale. Proceeds from the sale were placed in the General Fund.

The main event of the year was the Spring Luncheon held May 4, 1974 in the Crystal Ballroom of the Benjamin Franklin Hotel. There were 346 in attendance.

The graduating class of 1974 was guests of the Association. There were 29 members present. Class President, Miss Cheryl James was presented with a corsage.

The guests at the Head Table were:
Miss Doris Bowman, Director of the School of Nursing
Dr. Charlotte Voss, Chairman, Department of Baccalaureate Degree Nursing
Miss Elizabeth Sweeney, Director of the School of Practical Nursing
Mrs. Mamie Peace, Director of the Operating Room
Miss Carol Hutelmeyer, Acting Director of Nursing Service

The 50th Anniversary class was the guests of the Association. Present were: Lillian Pratt, Veronica Ovens, Julia Ganster, Estelle Taylor, Blanche McGuigan.

Flowers were presented to the following Alumnae:
Miss Mary Godfrey — 65th Anniversary
Miss Elizabeth Heaton — Class of 1915
Miss Nanne Tolley — Class of 1918
Mrs. Elizabeth Miller — Class of 1921
Mrs. Ann Craver — Class of 1921
Miss Clara Bruner — Class of 1923

The class of 1947 had 34 members present for their 25th anniversary, this was the largest anniversary class.

The flowers at the head table were given to Wanda Edge Kitney, Class of 1947, who was hospitalized on the day of the Luncheon.

The social committee wishes to thank all members for their continued support and assistance in making the social events a success.

The Annual Spring Luncheon for 1975 will be held May 3, 1975 at the Benjamin Franklin Hotel.

Janet Hindson, ’50
Chairman

MEMBERSHIP

On January 11, 1974, the senior class was appraised of the functions, structure and by-laws of the Alumnae Association. Copies of the Alumnae Association Bulletin and Constitution and By-Laws were also given to the students at this time.

In meeting with the students on April 18, 1974 the senior class completed membership forms for entry into the Alumnae Association upon graduation. The class was also invited as guests to the Annual Luncheon on May 4, 1974. Thirty members accepted the invitation as guests of the Association.

Deldre Watkins Blank, ’67
Chairman

SICK AND WELFARE

During this past year there were many alumnae members hospitalized at Thomas Jefferson University Hospital. Cards were sent and visits made to all known members.

Jeanette Plasterer, ’51
Chairman

BULLETIN

Thank you to all contributors to the 1974 Bulletin. Special thanks must go to Peg Summers, Martha Bland, and Delores Heckenberger whose help made compilation a rewarding experience. One noteworthy contribution is the extensive class news of the class of 1934 upon their 40th anniversary.

I hope the 1974 Bulletin will renew your interest in Jefferson and rekindle relationships with your classmates.

Lenora Schwartz, ’66
Chairman
ADMINISTRATION

The Alumnae Room has been as busy as a beehive the past year. Besides sending out Alumnae material, we have been involved in addressing envelopes for the activities and the information of the University. There have been programs of interest to nurses and there will be more programs in the future.

Please send your new addresses when moving, also change of name, so you will be on the active mailing file.

I am in the Alumnae Room on Tuesdays, 10 to 4, of each week. The Alumnae Room is on the Mezzanine Floor of Jefferson Hall, 11th and Locust Street, Room M-2. Telephone No. 829-8981.

Martha E. Riland, Clerk-Typist

Note of interest. From 1893 to 1974, there have been 4176 Graduates from the School of Nursing.

MISSING ALUMNAE MEMBERS

Help us find the correct addresses for the following: The letters for the annual giving and luncheon invitations sent March 1974 were returned to the Alumnae Office—marked moved—no forwarding address.

MODEL SHOWING SITE OF NEW CLINICAL TEACHING FACILITY
RESUME OF MINUTES OF ALUMNAE ASSOCIATION MEETINGS

September 11, 1973
A motion was made, seconded and carried to recommend to Miss Bowman and her committee to reissue the applications for scholarships.

October 9, 1973
A new Santa suit will be made by Misses Oberdorf and Handy.

November 13, 1973
The Christmas party will be held December 11, 1973 in Jefferson Hall.

January 8, 1974
Miss Hindson reported that the Christmas party was a huge success with 44 persons in attendance.

February 12, 1974
Miss Hindson reported that the annual supper and auction will be held March 12 in the Faculty Club in Jefferson Hall.

May 14, 1974
It was moved and seconded to accept the recommendations of the Scholarship committee to grant scholarships for the Fall semester to Peggy Eckhart Hess and to Betty Bilbrorough Aleye.

Mrs. O'Connor reported that much more effort is needed in order to reach our Sesquicentennial campaign commitment.

It was announced that the Breast Diagnostic Center survey is open to all Jefferson graduates. This is a good opportunity for health maintenance.

An interesting and informative program was then presented by Mrs. Margaret Reddy—a speech therapist.

April 9, 1974
There were 28 reservations with 25 in attendance at the annual supper and auction. The auction raised $118.50. The Annual Spring Luncheon is to be held May 4. Dr. Charlotte Voss is to be the speaker.

Mrs. O'Connor announced that $3,000 has been raised so far for the Sesquicentennial campaign.

May. 14, 1974
It was decided to contribute $200.00 to the History of Nursing in Pennsylvania being sponsored by the College of Physicians of Philadelphia to provide for our representation in the project.

A motion was made and carried to reissue the Fall scholarship applications to Peggy Eckhart Hess and to Betty Bilbrorough Aleye.

May 30 is the deadline for all contributions to the Sesquicentennial campaign.

It was decided to contribute $200.00 to the History of Nursing in Pennsylvania being sponsored by the College of Physicians of Philadelphia to provide for our representation in the project.

A motion was made and carried to send Lenore Schwartz to the ANA Convention as the representative of the Association.

It was decided to purchase several souvenir items of Jefferson to be available to graduates by the 1975 luncheon.

Mr. Louis McCreight from the General Electric Space Center in Valley Forge presented a program about the applications and benefits of space technology.

A motion was made and carried that the President and the Board of Directors conduct any emergency business which may arise between May and September.

All of the regular meetings of the Alumnae Association were held in room M23 of the Jefferson Alumni Hall.

Respectfully submitted, Lenore W. Schwartz Recording Secretary

Mr. BROWN

Now Brown was one of the best runners in the town. His name was Brown, and he used to own a scrubby farm. But he had never shown much interest in farming. Now Brown when he came home that night, he was drunk, of course. A strange sight he was, his foot hanging out of his shoe, and his horse was falling asleep.

So down the road he staggered then And cursed for want of light.

And when he reached the barn he found his things were there all right, but not the money. He got his rest and drink.

And picking up the whip and rain, He jumped into his rig. His wife, she heard him from the house, And wondered what could be.

So down the road she came In breathless haste to see. Why Brown what does this mean, You're horrid drunk tonight.

And going closer up to him, She held aloft the light, But back she fell with sudden fear, The sight was strange I vow. For he had not hitched up his horse, But harnessed up his cow.

Rosa Diserode, '23
WAYS AND MEANS COMMITTEE REPORT
May 15, 1973 - May 15, 1974

Thank you once again for your continued support and your generous giving to your Alumnae Association. The contributions to the Relief Fund, Scholarship and General Fund brought the total amount to $5,053.00. All contributions received after May 15, 1974 will be acknowledged in the Alumnae Bulletin for 1975. Following is a list of contributors and contributions according to classes.

1909-$15.00
Mary R. Godfrey

1910-$40.00
Marguerite G. Bennett
Esther B. Haring
Martha M. Kepp

1915-$20.00

1951—Mary Alice Schutz, 7180 Waverly Road, Byram, Pa. 19313. I was discharged from the Army last December. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1952—Jeanne Foreman Young, 7452 Hill Road, Philadelphia, Pa. 19120. I was discharged from the Army last December. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1953—Josephine Keenan Swarts, 3453 N. 11th Street, Allentown, Pa. 19109. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1954—Elizabeth Snyder Barlow, 675 County Line Rd, Bryn Mawr, Pa. 19010. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1955—Katherine Powers, 345 S. 11th Street, Philadelphia, Pa. 19149. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1956—Eunice Ofner, 1740 Fairmont Ave, Philadelphia, Pa. 19130. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1957—Constance Vetter, 1203 Spruce Street, Philadelphia, Pa. 19107. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1958—Eveline Jones Bond, 1738 River Hill Road, Meadbrook, Pa. 19046. My husband, Dr. Robert M. Bond, Montgomery, is now a Surgery Resident at the University of Pennsylvania. He has been with the University of Pennsylvania for 15 years. He is now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1959—M. Faith Stewart Graham, 6498 Woodlawn Drive, State Colle., Pa. 19030. Reinstated B.S. in Nursing from Pennsylvania State University. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1960—Sarah Jane Cooper, 3024 Bellroy Drive, Philadelphia, Pa. 19101. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1961—Jean Haw Aver, 16535 Prindle Drive, Gravestown Hills, Pa. 19111. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1962—Barbara Elizabeth Brown, 350 Oakdale Drive, Springfield, Pa. 19064. Our son Eric received a full 4 year Scholarship to Navy College.

1963—Nina Davis Waller, 12779 Mifflin Rd, Millersville, Pa. 19061. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.

1964—Barbara Weller, 1782 Paper Bridge Rd, Peabody, Mass. 01960. I am now teaching in the School of Nursing at the University of North Carolina. I am very happy and I am retired and enjoying life.
Barbara J. Oh Klerk, 1027 Cheyenne Blvd., Indian Harbor Beach, FL 32937. My third daughter, Montgomery, was born in September 1973. We are enjoying our
son Patrick and I am working part-time and going to school.

Historian at the University of Kentucky. Our first child is expected in June of 1975.

Quintin Edward Schuurs, 321 Bellows Road, Bradenton, FL 33773. I have been married for three years and have three
children. My oldest daughter is 14 and my two sons are 12 and 14. I am working in
my practice.

Carolyn Welburn Winters, 2-344A East 11th St, Dover, Del. 19730. My husband and I are both employed
in the Federal Government. We have been blessed with three children, two boys and
one girl. We are both very happy and are looking forward to the future.

Mary Carol O'Rourke, 1705 Washington Blvd., Seattle, WA 98122. I have been married to
my husband for two years and we have a daughter, Elizabeth. We are both
employed in the aerospace industry.

Marilyn Elizabeth Speicher Gillin, 26 E. Langhorne Avenue, Colorado Springs, Co. 80909. She has been married
for five years and has three children, two boys and one girl. She is currently working
as an Administrative Assistant in the School of Nursing.

Christine Caceres, Louise 15 months. Jim will be done with his 3 years old and Greg, 14 months are growing
second child due 4-9-74. I am still working as an
Office Worker.

Kellie Anne is 5 and Bridget is 4. Basil has
a very busy Neurosurgical Practice at Brookland Hospital.

Jennifer is 3 already.

Carolyn H. Smith, 5615 79th Avenue, Oak Park, IL 60302. Frank and I have just been blessed with a beautiful baby girl.

CLASS ADDRESS LISTS
Class address lists will be available from the Alumnae Office-Clerk-Typist, at a charge of $2.00 per list. Enclose a long, self-addressed, stamped envelope.

ALUMNAE BULLETIN
The Alumnae Bulletin will be sent automatically to all Association members. Individuals who are not Association members may obtain a copy of the Bulletin upon request, at a cost of $3.00 per copy. An order form will be mailed to all graduates in the Spring of 1975.

MAIDEN NAME—YEAR OF GRADUATION
Whenever you have occasion to write to your Alumnae Association, please use your first name, maiden name, then married name and the year you graduated.
Example: Janice Smith Green—1972
Mrs. John Green makes it very difficult for the Association to locate your card in the files. You are urged to notify the Secretary of the Alumnae Association of any corrections, marriages, deaths or changes of address. Please help us keep errors at a minimum, and our files accurate.

CAP CHARMS
Jefferson cap charms are available in sterling silver and 14 carat gold. For information, please write Betty Piersol or Margaret Summers, 1002 Spruce Street, Phila., Pa. 19107.

ALUMNAE DAY—FIRST SATURDAY IN MAY

CAPS
Jefferson caps may be purchased from the Marvin-Neitzel Corporation, 2016 Fifth Avenue, Troy, New York 12181. (C. D. Williams & Company was purchased by Marvin-Neitzel). The minimum order is for three caps at a cost of $1.50 each, plus a fifty cents postage and handling charge. Identification may be obtained by directing correspondence to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Phila., Pa. 19107.

PINS
Jefferson pins may be purchased at J. E. Caldwell and Company, Chestnut and Juniper Streets, Phila­delphia, Pa. 19107. Identification may be obtained by directing correspondence to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Philadelphia, Pa. 19107.

TRANSCRIPTS
All requests for transcripts should be submitted in writing to the Director, School of Nursing, Thomas Jefferson University, 11th and Walnut Streets, Phila., Pa., 19107. Requests should be submitted at least a month prior to the date needed. There is a $2.00 fee for each transcript. Checks should be made payable to School of Nursing, Thomas Jefferson University.
