THE PRESIDENT'S MESSAGE

Dear Alumna,

My pride in our Alumnae Association and all Jefferson Graduates is tremendous. I am so proud of being a part of such a fine group. The loyalty and cooperation from each one of you make the task of being president a lot easier.

One of the rewards of being president is presiding at the Annual Luncheon. It is always a pleasure to look out over the crowd and recognize so many familiar faces and to see the happy renewing of friendships. It is truly a good looking group.

This past year we have been involved in trying to get the Sesquicentennial Campaign off the ground. Although we are pleased with the response our nurses have made, it is still far from our goal. If you change your thinking, it is not too late to increase your contributions.

The Nursing Symposium presented by the College of Allied Health Sciences on Friday, May 3, 1974 at Jefferson Alumni Hall was excellent. It is hoped this will become a yearly project.

My sincere thanks to each of you for your help, because without it we would not have an Alumnae Association of which we can be so proud.
Can we continue to count on you!

Sincerely yours,

Margaret Summers, Class of 1941

Expenses (United Fund, etc.) 255.00
Scholarships Granted 1,500.00
Gifts for Shut-Ins 90.28
Total Disbursements 9,827.38

ANNUAL REPORT OF THE SCHOOL OF NURSING

Just to think we are nearly five years into the 70's! Daily, the clock seems to tick faster and "tempus fugit" (as it is humorously quoted, "tempus fugit"). Change keeps pace with time and we have said good-bye to the era of many of the things which some of us rather nostalgically seem to remember as the "good ole days".

Today, students may be married at any time during the program and live off campus. Maternity leave is granted. Of our 273 students, ten are married and two have children. In fact, one of our students expects to graduate next year about the time her daughter graduates from high school. Night duty is a thing of the past and relief for students is limited to four weeks under the supervision of an instructor.

Males have invaded the ranks — three in the current freshman class! It's difficult not to refer to them as male students and simply refer to them as students, but we keep trying, and by the time they graduate, we hope to have made the adjustment. Speaking of adjustment, the admission of males has not caused any major curriculum changes.

Since we shortened the program to 33 months in 1970, no major curriculum changes have occurred. One major change on the horizon is the anticipated move from our present cramped, antiquated facilities (these have not changed, except for an occasional coat of paint, since the "good ole days"), to the glistering, newly-remodeled Health Sciences Center (Edison Building) at 9th and Sansom Streets. We expect to be housed there by the beginning of classes in September of this year. Those of you dropping in for a visit, please remember our administrative offices will also be moving there, and will no longer be in the Martin Residence. Perhaps next year, prior to the luncheon, we can arrange for you to tour our new facilities.

Our faculty remains relatively stable, some being with us more than 15 years. At present, the faculty numbers 36, including 19 Jefferson graduates and 17 graduates of other programs. Eight of the faculty hold master's degrees and 21 baccalaureate degrees.

Most group activities are on the wane, as students prefer to "do their own thing", but one group activity does not seem to change — basketball. Although their league championship streak was broken this year (they finished in third place), the team won their third consecutive title in the Annual Thomas Jefferson Invitational Tournament, and their third consecutive victory at the Spectrum prior to the 76ers game. It should be noted that in the last three years, our success at the Spectrum was better than that of the 76ers, but we will not lend them our coach, Patricia Jones, '74, and Donna Ronieri, '75, two team members, had personal moments of glory when they won the Times National Basketball Association Free Throw Competition at the Spectrum and, with the local title, an all expense paid trip to the national competition in San Diego, in which they were less successful than on home ground. Patricia Jones was this year's recipient of the Thomas Jefferson Award for athletic achievement, given by the School of Nursing Department of the Women's Board, and presented by the coach at the basketball banquet.

Our cheerleaders won their league title for the second consecutive year, in spite of the fact that one of the team had emergency surgery the week before the competition and could not participate, nor be replaced. That's real Jefferson Spirit!

After seven months of anticipation and preparation of the Report of Self-Evaluation, our routine visit (April 6-12, '74), for continuing N.L.N. accreditation is now history. We have only to wait for the recommendations from the May meeting of the Board of Review. We wait for their recommendations with confidence, anticipating continuing accreditation for the six year maximum. You will be interested, and no doubt proud, to know that the visitors complimented the faculty for their commitment and dedication to their assignments, the students, and the purposes of the diploma program. Perhaps the Board of Review, when reviewing our recommendations, should be noted to think we are nearly halfway into the 76-77 academic year.

ANNUAL REPORT OF ALUMNAA ASSOCIATION OF THE SCHOOL OF NURSING

Respectfully submitted,
Doris E. Bowman
Director, School of Nursing
ANNUAL REPORT OF THE

DEPARTMENT OF BACCALAUREATE NURSING

COLLEGE OF ALLIED HEALTH SCIENCES

Forty six students were admitted in the first class entering in September 1972. There will be 40 gradu-

ates receiving their Bachelor of Science in Nursing, in June, 1974. The fall 1974 class will number 65 men and women. Faculty has been actively involved in curriculum planning throughout our existence both in preparing for the first group of students as well as in planning the ongoing curriculum. There has been stu-
dent participation since their admission. We are making sincere efforts to prepare graduates who will be able to function effectively in today's world of health care as well as to prepare them for inevitable changes that will take place in the delivery of health care as they progress in their nursing careers. Em-
phasis is placed on the role of the nurse in the evolving health care system.

Many health care agencies in the Philadelphia area are being utilized to provide clinical laboratory ex-
perience in the nursing courses. These include Jeffer-
sion related hospitals and various types of neighbor-
hood health agencies.

Charlotte E. Vass
Chairman, Department of Baccalaureate Nursing

PROGRESS — THOMAS JEFFERSON UNIVERSITY

The last year has brought more changes and more plans for future changes emphasizing Jefferson's further growth and development.

Physical changes within the hospital have resulted in improved facilities for patient care. The newly constructed Intensive Care Nursery has provided modern facilities and equipment for the care of high risk infants, many of whom might not have survived without such support. Two operating rooms on the Sixth Floor have been renovated to provide more room for gynecological surgery. A second cardiac surgery room has been made available on the Fourth Floor, Pavilion. A second psychiatric unit was opened on Twelfth Floor, Thompson Building which provides care to the more disturbed patients.

In addition to the improvements made for in-
patients, Jefferson recognizes the need to promote proper health care and help prevent illness among the people of South Philadelphia where readily accessible medical care is quite limited. Towards this end, Thomas Jefferson University Hospital has been co-
operating with institutions of the South Philadelphia area in the evolution of a Health Plan group. These institutions will develop a com-
munity health center where persons belonging to the SPHA (South Philadelphia Health Action) group will be benefited by a group of health professionals capable of managing the range of problems an individual may present. Comprehensive and continuing care will be provided with emphasis on preventive care.

Another problem in providing health care through-
out the nation is the scarcity of family practitioners. Jefferson Medical College cognizant of this problem, has established a Department of Family Medicine under Dr. Paul C. Brucker. This summer a three-year residency program in Family Medicine will begin at Jefferson. These physicians will be exposed to all phases of health care, preventive and curative, and will follow and treat patients in the hospital and on an out-patient basis. Junior medical students may take a six-week family medicine preceptorship which permits them to visit offices of family doctors in the Philadelphia area.

Over the past ten years, Thomas Jefferson Univer-
sity has been expanding its established tradition of providing health care to the community. A Children and Youth Ambulatory Program for Comprehensive Child Care is located at Thirty-third and Foxworth Streets. A Mental Health Ambulatory Program has been functioning at Twelfth and Walnut Streets with satellite clinics in South Philadelphia. Emergency care at night and on weekends and hospitalization are available at Thomas Jefferson University Hospital in both programs.

The changes in physical facilities and new pro-
grams represent only a few of the steps Jefferson has been taking to provide total patient care in both pre-
ventive and curative phases.

We know that you will be interested in keeping up to date with news of your Alma Mater and hope that you will encourage yourselves or any opportunity you may have to visit the University and to see for yourselves the new Jefferson.

With good wishes for a happy and prosperous year.

Mabel C. Prevost
Assistant Hospital Director

TRENDS IN NURSING AT

THOMAS JEFFERSON UNIVERSITY HOSPITAL

The Nursing Service Department at Thomas Jeffer-
sion University Hospital has for its primary objective to deliver quality patient care and provide a stimulating environment for student education. To achieve these objectives we continually evaluate our patient care programs and implement new programs when indicated.

The Cardiac Rehabilitation program is an example of this. Rehabilitation of the cardiac patient focuses on physical conditioning through a graded exercise pro-
gram and on teaching and counseling the patient about diet, health habits, and performance of activi-
ties of daily living. The program's goal is to assist the individual to live a productive life, including early return to a work or home environment.

Members of the Department of Rehabilitation Medi-
cine, Cardiology and Nursing developed the program. Nursing plays a vital role in the program as they are responsible for teaching, providing emotional support, and observing the patient's response in increased activity. All aspects of the program begin while the patient is in C.C.U. Following discharge from C.C.U., the patient transfers to Rehab, where his exercise pro-
gram is instituted. Physical Therapy, physicians and nurses on Rehab closely coordinate their efforts to ensure that the individual patient progresses smoothly through his program. Patient and family teaching in preparation for discharge are done by the nurses from C.C.U. and Rehab. Plans are now being made to institute a home care program for these patients.

Primary Nursing Care

In the spring of 1973, a group of staff nurses ex-
pressed dissatisfaction with team nursing as a method of delivering care. They felt that team nursing did not allow them to establish an effective relationship with patients and families. This occurred because the team leader and team members were not always assigned to the same group of patients; and team leaders were responsible for eight hours, not twenty-four hour care.

To resolve the problem expressed by the staff nurses, we looked for another method of delivering care. Primary Nursing is a method of delivering nursing care which is based on the principle that a nurse is responsible and accountable for the nursing care of a group of patients twenty-four hours a day, from admission to hospitalization to discharge. The major goal is to reduce fragmentation of care by providing the patient with one nurse who is totally responsible for his care.

The nurse's responsibility includes assessing the needs of patients, identifying nursing care problems, planning care, giving care, relating care needs to staff members on other shifts, and evaluating care. The primary nurse exercises her responsibility and account-
ability by counseling staff members on how to meet the needs of patients and by following up to see if care was given. When problems with care do occur, the primary nurse investigates why and implements a program to prevent its recurrence, i.e., education of staff.

Since June of 1973, Primary Nursing has been insti-
tuted on six nursing units. Plans are now being for-
mulated to use this method of care on all nursing units. On the units where primary care is used, patient satisfaction has improved. Staff morale has improved. We believe this is because nurses are more involved with their patients and can see the effective-
ness of their care.

Cardiac Rehabilitation and Primary Nursing are two examples of the changing focus in nursing at Jeffer-
sion. In essence, we are caring for individuals with complicated, long-term illnesses, and we are altering our approach to care to meet the needs of these patients. This implies teaching programs which help patient and family adjust to the illness. Diabetic classes and the asthma teaching program are ex-
amples.

We also have a psychiatric nurse consultant who assists the staff in dealing with dying patients and with the emotional problems of very ill patients.

Nursing at Jefferson is dynamic. We have achieved much in the past decade, but there is much still to be done; Goals for the future include participating in an interdisciplinary approach to care, implementing a problem oriented medical record, and establishing a program of evaluating nursing care.

Carol Hutelmyer, R.N., M.S.N.
Acting Director, Nursing Service

COLLEGE OF ALLIED HEALTH SCIENCES

SEQUICENTENNIAL SYMPOSIUM

MAY 3, 1974

Plans in preparation for the celebration of the Sesquicentennial of Thomas Jefferson University have been in effect since 1972 with the appointment of a Steering Committee and a Themes Committee by Dr. Peter A. Harbort, President. Ideas for the celebration were explored and gradually a program for the year was developed. The resultant calendar for the year was widely distributed to Alumni, University faculty and personnel, and other institutions and schools.
We believe that it is a diversified program and that the history, the present activities of the University and future plans for "Century 21" will be illustrated through the programs during the year. Of particular interest to nursing, will be the use of the program of the College of Allied Health Sciences. In planning this program, the Associate Dean and the Chairmen of the two baccalaureate programs, Medical Technology and Nursing, participated in developing this category. The day selected was the day before the Annual Alumni Luncheon of the School of Nursing and we believed that it would attract Alumni to come a day in advance to be able to participate in the activities. The program consisted of three concurrent symposia. One was a symposium relating to Nursing, the second one was a symposium concerned with Medical Technology and the third was an inter-professional symposium in which participants from various health-related professions discussed their contributions in the health care profession.

We were extremely pleased with the enthusiastic response from the estimated 300 people who attended the three symposia.

The morning of the Nursing session, "Jefferson Nurses in Action", included participation by alumnae of the School of Nursing who have been very active in nursing and who are known nationally. Nursing in perspective from three points of view was discussed by Miss Anna Kuba, who is currently the Coordinator of the Program in Nursing of the American Nurses' Association, Dr. Barbara Schutt, who is former editor and current contributing editor to the American Journal of Nursing and who will shortly be taking the position as the Director of the Department of Nursing of Alfred College in Connecticut, and Dr. Hamlet Werley, who is the Associate Dean for Research at the College of Nursing, University of Illinois. Each of these speakers presented a very stimulating talk and I am sure prompted the members of the audience to consider not only the past and the present but also the future of nursing in general and nursing in particular here at Jefferson.

Another part of the morning program consisted of participation of two School of Nursing graduates who are involved in rather unique activities in nursing. The first is Miss Maureen Maguire who is Co-director of the Pediatric Nurse Practitioner program at the John Hopkins University. The second is Miss Mary O'Neill who has had a great deal of background in Nephrology and is Executive Director of the Pediatric Renal Care Unit in Jackson, Miss., their descriptions of their activities and their impressions of the nursing contributions in these two areas were very interesting.

The afternoon of the Nursing symposium was devoted to what is happening today at Thomas Jefferson University Hospital. Several members of the nursing staff, some of whom are Alumnae of the School of Nursing, involved in rather innovative activities in nursing here at Jefferson, were present. They presented a very stimulating and interesting discussion of their responsibilities and gave the audience a picture of the innovativeness of the hospital nursing staff at the present time.

The events of the day evoked considerable discussion and participation from the audience.

The day was climax by a social hour at Jefferson Alumni Hall, a large number of the participants attended. All in all, the College of Allied Health Sciences Symposiums proved to be very stimulating and we think seriously of having similar programs periodically in the future. When these are planned each Alumnae member will be notified and encouraged to attend.

Charlette E. Voss
Chairman, Department of Baccalaureate Nursing

The proposed Clinical Teaching Facility will support the educational goals of Thomas Jefferson University which are: 1. The education of medical and allied health personnel at undergraduate and graduate levels. 2. The provision of continuing education to practicing health professionals. 3. The maintenance of a rich environment for the continuing search for knowledge in the medical field. 4. The development of educational and care services which will contribute to improved levels of health and well-being of our community.

The Clinical Teaching Facility will be an essential element of the University. It will not alone be a hospital or a hospital and some clinics, but rather it will be an educational institution which will afford students and teachers alike an exemplary setting for the interaction of superb patient care and the education of professionals who must work together throughout their careers. It will be, as well, a unique resource for research programs and an important health resource for the community it serves.

The gradual disappearance over the past several decades of the "clinic patient" from hospitals and the evident and predictable increase in the scope of ambulatory patient services has provided a significantly different environment for the clinical education of health professionals.

A multidisciplinary structure for care and teaching designed around physiological systems will be provided rather than continuing the traditional fractionalized typical hospital organization and physical structure of today. These systems will permit the concentration of responsibility for delivering the ancillary services needed, for the provision of continuing rather than episodic patient care, and for attaining the most suitable environment for both personal and professional satisfaction for patients, teachers, students, and staff.

The Clinical Teaching Facility will support the delivery of ambulatory care and patient care will combine the delivery of inpatient and ambulatory care in one physical complex and will, therefore, make significant new economies in our teaching and in the delivery of patient care while permitting the delivery of primary, secondary, and tertiary care on the Jefferson campus.

The Clinical Teaching Facility will be the result of a combination of the Foerderer Pavilion and a new building. The two will be bridged across Sansom Street at every level.

The new building, which will encompass the city block between 10th and 11th Streets and Chestnut and Sansom Streets will contain 400 beds and 110 physicians' offices. The major portion of diagnostic and therapeutic services will be provided in the southern half of the new building, and the in-patient programs in the Foerderer Pavilion and the northern half of the new building are designed to draw on these services at each respective level. Intensive Care Units will be provided on each level and will serve the patients that Jefferson Physicians' offices will be rented to staff and all ambulatory care on campus will be delivered in that setting.

The major entrance to the new building will be on ground level on 11th Street with a service entrance and a loading dock on Sansom Street. The service entrance will be rented to commercial activities. There will be a small convenience parking area at ground level.

The Foerderer Pavilion will be extensively remodeled and will contain 185 beds which will be mostly for non-acute patient care such as Psychiatry, Extended Care, and Physical Medicine and Rehabilitation. In addition, the pediatrics, the obstetrical services, delivery rooms, and an enlarged and expanded Department of Clinical Laboratories will remain in this building. The Emergency Department, the Blood Bank, and a Pre-Kam Testing unit will occupy the entire first floor of the Foerderer Pavilion.

The two buildings have been carefully planned so that the programs at each level of the combined structure will complement each other. An example of this will be on the 7th, 8th and 9th floors of the Foerderer Pavilion where the Extended Care, Physical Medicine and Rehabilitation, and Pediatric beds are housed respectively. Many of the patients occupying these beds will either have a need for medical care or a need for Rehabilitation modalities on the 9th floor of the new building and for services of physicians located on the 8th and 9th floors. There will be a constant flow of patients and services between the two buildings and among the various departments.

When completed, the Clinical Teaching Facility will provide 585 beds for Jefferson (400 in the new building and 185 in the Foerderer Pavilion) as a reduction of 85 beds from our present complement and will be permitted by utilizing a variety of economics such as the separation of multidisciplinary clinics, the utilization of the modern Pavilions, and the efficiency of the ancillary services. After the Clinical Teaching Facility is completed and the Hospital expands to full capacity, the new Pavilion, which will be on the 12th floor of the new building, will occupy the entire first floor of the Foerderer Pavilion.

Recently Thomas Jefferson University developed a close affiliation with the Wills Eye Hospital and the present plans call for the Wills Eye Hospital to move to Jefferson's campus and locate its hospital on two floors in the new building of the Clinical Teaching Facility. This will be done on a condominium basis with the 12th floor of the new building utilized for Wills Eye Hospital's out-patient care and the 11th floor for in-patient care. The implications of this move are many but will provide for improved increased efficiency and economy in patient care in both institutions and will share the new building with all major professional and hospital services with Thomas Jefferson University Hospital.
GENETIC COUNSELING PROGRAM AT JEFFERSON

The Division of Medical Genetics of the Department of Medicine, Obstetrics and Gynecology, and Pediatrics of Jefferson Medical College has conducted a program in genetic counseling since the 1950s. This program has been supported from its inception by federal funds from the Department of Health, Education, and Welfare. The program is conducted in the Department of Obstetrics and Gynecology under the direction of Dr. Francis J. Marangi, Jr., M.D., and is affiliated with the Thomas Jefferson University Hospital, the Philadelphia College of Osteopathic Medicine, and the University of Pennsylvania Medical Center. The program is supported by grants from the Department of Health, Education, and Welfare and the National Institutes of Health.

The program's primary objective is to provide genetic counseling and educational services to the families of patients who are known to be affected with genetic disorders. The program also provides educational services to the general public and to health professionals.

The program's activities include the following:

1. Genetic counseling: The program offers genetic counseling to patients and their families who are known to be affected with genetic disorders. The program also offers genetic counseling to patients who are at risk for genetic disorders.

2. Genetic education: The program offers genetic education to the general public and to health professionals. The program provides information about genetic disorders and their management.

3. Genetic research: The program conducts genetic research to improve the understanding of genetic disorders and their management.

The program's activities are supported by grants from the Department of Health, Education, and Welfare and the National Institutes of Health.

In conclusion, the genetic counseling program at Jefferson Medical College offers genetic counseling and educational services to the families of patients who are known to be affected with genetic disorders. The program also offers genetic counseling to patients who are at risk for genetic disorders. The program provides genetic education to the general public and to health professionals. The program conducts genetic research to improve the understanding of genetic disorders and their management.

Francis J. Sweeney, Jr., M.D.

Vice-President for Health Services
Thomas Jefferson University
the community. This is accomplished through a series of what are called satellite clinics in the eastern part of Pennsylvania and the southern and central portions of New Jersey. These satellite clinics are conducted under the sponsorship of the National Foundational Dinner program and are usually conducted in affiliated medical institutions within the community. One or more of the genetic counseling center staff physicians attend the clinics together with house officers or students from Jefferson. Some of the physicians who participate in this program are Dr. Leon Peris of the Department of OB/GYN, Dr. Gary Carpenter of the Department of Pediatrics, Dr. Susan Cowack of the Department of Internal Medicine, and Dr. Leonard Reisman of the Department of Pathology. The clinics themselves are conducted on a once-monthly basis, usually for one half a day. Patients are seen by appointment and given thorough clinical evaluations plus testing for any chromosomal or biochemical phenomena that seem appropriate. Blood or other materials are collected for such testing at the satellite center, but the laboratory work is done at Jefferson. At follow-up visits the patients are counseled or started into management programs appropriate to their problem. Usually clinicians from the affiliated institution or house officers or nurses participate in these programs so that a great deal of postgraduate education occurs in an informal and very effective sense. These clinics are conducted at the Crozer-Chester Medical Center in Chester, Pa.; Our Lady of Lourdes, Allentown, Pa.; St. Peter’s Hospital in New Brunswick, N. J.; St. Luke’s Hospital of Bethlehem, Pa.; the Allentown Hospital of Allentown, Pa.; Community Medical Center in Scranton, Pa.; Kirby Health Center in Wilkes-Barre, Pa.; St. Joseph’s Hospital at Wilkes-Barre, Pa.; the Reading Hospital in Reading, Pa.; the Doylestown Hospital in Doylestown, Pa.; the Hamburg State School in Hamburg, Pa.; and the Elizabeth Ann State Hospital for Crippled Children in Elizabethtown, Pa. All together some 800 to 1,000 women train in this nursing and active service which we hope is helping to demonstrate how new and innovative medical services can be brought out of the medical center and into the community with great effectiveness.

Laurie Jackson, M.D.
Director, Division of Medical Genetics
Thomas Jefferson University

LAIRD JACKSON, M.D.

THE JEFFERSON BREAST DIAGNOSTIC CENTER PROGRAM

Though it may be hard to believe, about 89,000 new cases of breast cancer will be discovered this year in the United States. These cancers will occur, for the most part, in the 33,000,000 or so women in the risk age group. The tragedy is that nearly 90% of these cancers will be found by the woman herself, and over 69% of these will be noticed at an advanced stage. Such cancers probably have been growing for an average of eight to ten years prior to detection. Thus we have the problem of detecting at the earliest possible time the 33,000 cancers in the breasts of 33,000,000 women. This parallels the problem faced by the Pap test.

Currently there are three distinctly different techniques which can be used clinically for breast detection. The physical examination of the breast probably dates back at least to the early Egyptians, and its effectiveness is to a large measure dependent on the skill of the examiner. The second technique is a special X-ray examination of the breasts using special films, low kilovoltage and often special X-ray tubes. This is called mammography, and is a technique which has had universal usage for the past fifteen or more years. Mammography, when performed by a skilled radiologist, is capable of detecting cancers well before they can be clinically palpated. The third technique involves the taking of hundreds of thousands of temperature measurements of the skin of the breasts. These measurements are then presented as a temperature picture in which the blockier the image the higher the temperature. Thermography, as this new technique is called, has been shown to be especially sensitive to very early subclinical cancers.

Here at Jefferson the physical examination of the breasts has probably been routinely practiced since its founding. Mammography was first introduced in the Department of Radiology in the early 1960’s by Dr. G. D. Dodg. Thermography was first introduced in conjunction with mammography in mid-1964 by Professor J. D. Wallace, and was established on a routine procedure two years later, thus making Jefferson one of the pioneering centers in the clinical application of both mammography and thermography.

Many institutions have now established mammography as a routine study, and their experience has demonstrated the value of mammography in early detection. When mammography delineates a small cancer in a breast, which by physical examination has been found clinically free of disease, such cancers are generally very small in size. Such patients have a much lower incidence of regional lymph node involvement. An example of the effectiveness of mammography is found in a recent study of 30,000 women in which mammography and a physical examination of the breasts were utilized. One third of all the cancers discovered in the women were found by mammography alone. These cancers would have been missed had mammography not been performed. This study also demonstrated that a reduction of one third was achieved in the mortality rate from breast cancer in a five year follow-up, thus demonstrating that earlier detection is highly beneficial to the woman herself.

The practical problem of screening 33,000,000 women each year is huge. One were to employ mammography as the sole technique, the company building the special film would then each of the approximately 10,000,000 examinations be spent about a quarter of his work day reading these special films. The problem then is to find some technique which can process the women so as to select that population in whom the incidence is indeed very high. This is the role of the Pap smear in cancer of the cervix, and it is this role which we hope thermography will play in carcinoma of the breast.

If one reviews the reported experience using thermography for certain cancer detection, one finds that in 38,800 reported cases there were 2,236 histologically proven cancers. Of these, 1919 were thermographically suspicious—an accuracy rate for cancer of about 86%. How does this compare with other procedures? For carcinoma of the colon a reported accuracy rate of about 90%, as do the examinations for carcinoma of the esophagus and stomach. We should see that thermography might meet the requirements and need for a screening technique.

This is the question which the National Cancer Institute was hoping to answer. The Breast Diagnostic Center is the result of a contract between the Jefferson Medical College and the National Cancer Institute. The Jefferson program in breast detection will run for five years. It is the brainchild of its Director, Prof. J. D. Wallace, who is Research Professor of Radiology. The Center is under the joint responsibility of the Department of Radiology, of which Jack Ekel and in the Jefferson Medical Center is a cooperative effort involving several of the clinical departments: Surgery, Medicine, Pathology, Family Medicine, and Community Health and Preventive Medicine at Jefferson, as well as the Medical Department of the Bell Telephone Company of Pennsylvania.

The plan is to enroll 20,000 volunteer women between the ages of 45 and 64, who have had no previous evidence of breast cancer. New member women will be admitted at the rate of 5,000 the first year, which is now near completion, 10,000 the second year, and 5,000 the third. We estimate that about 85% of those examined will be asked to return in two years, and will be a status questionnaire two years after their second examination. The remaining 15% will for the most part be asked to return in 6 months. The results of the examinations will be sent only to the physician designated by the woman. In the event that she does not have a regular physician we will suggest the Jefferson Department of Family Medicine who, according to her preference, will either act as her physician, or will assist her in contacting a physician in her neighborhood.

The examinations are now being made at two centers. The Jefferson Center is presently in the base of the Curtis Clinic and is expected to move into specially designed quarters on the third floor of the Health Sciences Building on the corner of Ninth and Sansom Streets. The second center is located on the second floor of the former Bell Telephone Company building at 1 Parkway. The Jefferson Center has been in operation since early December 1973 and the Bell Center started operations this past March.

In order to conserve the women’s time, all screening is done by appointment and can be reliably expected to take three-quarters of an hour. Appointments can be made by calling 215-573-1870, or by having three telephone lines. Ms. Joan Franco, who is the Administrator, is very happy to arrange for groups, as she recently did for 32 women who chartered a bus and travelled here from Wilkes-Barre. All appointments will be confirmed by letter.

When you enter the Center the receptionist will check with you as to the accuracy of the information received over the phone. She will also ask you for the name, address and phone number of a close friend whom we could contact if in the future we are not able to contact you. Finally, the receptionist will ask you the name and address of the physician to whom you wish the report sent. Of course we shall
also send you a report within about a week of the screening.

The next step is a specialized history concerned with the breasts. This history is in the form of a mark-sense sheet, on which you will check the circles for your answers. It is exactly the same type which is used for the several college board examinations.

You will then be given a colored bag, and asked to step into a "cooling" booth where you will be requested to disrobe to the waist, putting your belongings in a bag. You will be asked to sit with hands on your hips for 7 minutes. The cooling process is really not very cold, since the temperature will be between 68° and 70°. The cooling does two things. It erases the skin's thermal memory of your clothes and it reduces the normal blood supply to the skin, but has little effect on an abnormal blood supply. After 7 minutes of "cooling" you will be asked to move, with hands still on your hips, to a seat in the thermographic room. The thermogram will be taken in three views: AP and the two obliques. Incidentally, as with normal photography, in thermography you provide the signal from your skin, so there is no radiation such as X-rays involved.

Once the thermogram is finished, you might ask the technician to sit in the chair and let you look into the viewing hood on the thermographic unit so you can see what her face looks like. You will then be given a package containing a wrap-around gown. These come in several colors. The same technician will then take you into the mammography room, where she will take two views of each breast. You might be interested in the fact that we do not use plates, but rather special Xerox plates in place of the film. If you ask the technician she will show you some examples of this technique.

When the mammogram has been taken the same technician will weigh you, measure your height, and then introduce you to the physician who will examine your breasts clinically. You will hear the physician call out the findings to the technician, as she records them. If you have any questions, be sure to ask the physician.

The technician will then take you to a dressing booth. Once dressed, you can give your history form to the receptionist, and you are then a co-investigator in this project, having made your unique contribution.

It's simple, painless, and vitally important!

Behind the scenes, things are buzzing. When you made your appointment the information was immediately put into our computer at the Stein Research Center. The computer then generated the confirmation letter to you, and on the day before your appointment it provided Ms. Franco with a listing of the next day's appointments at each of the two centers. The additional information you gave the receptionist was also put into the computer. The history form, together with the clinical examination forms, were taken to Stein in the afternoon and the computer automatically read these forms and stored all this information. While this was going on your thermograms are read separately by two thermographers. If there is any disagreement the films are read by a third thermographer. At the same time, the mammograms are read in the same way by the radiologists. All readings are reported by each reader on a report form like your history form and are also read into the computer. The computer then puts together all the information concerning you, and in most cases generates a letter to you and another to your physician, reporting normal findings. In instances where there is suspicion of an abnormality, but no direct evidence, letters to this effect are generated, are reviewed against the actual film and films, and are sent out asking you to plan to come back in for a checkup in six months. There are many benign conditions which can produce suspicion so don't be overly concerned if you are asked to come back in six months. Finally, if either the mammograms or the clinical examination leads the physician to recommend a biopsy, special letters will be written. Your physician will be personally contacted by phone by the Center physician, and the findings discussed.

Our hope and expectation is that we, that is all of us, will find those cancers at such an early stage that they will have little or no effect on the woman's future life. If together we can achieve this, then the techniques will be reviewed to see what combination of these three types of examinations is most effective. The program will then be made available not only to our 20,000 women, but also to the 33,000,000 other women who need such an examination, as well as to generations to come.

The program is as much yours as ours—for only with your cooperation can we get the answers which have been needed for so long.

Finally, since the program is funded by the National Cancer Institute, the examinations are free for the calling. What we need are concerned and understanding women who will make their unique contribution and keep in contact with us for five years.

As nurses, you know at first hand the importance of bringing effective early detection of breast cancer to all of our people as well as to yourselves. By joining the program you can help yourself as well as contribute to the health of future generations.

Don't worry about where you live. We have already had women come in from Pittsburgh. A group of women chartered a bus in Wilkes-Barre, came down, and not only had a good time shopping and seeing the sights, but also joined the program.

It only takes a telephone call to (215) 829-8350. Ms. Franco can arrange for two of you, or for larger groups. You can become an important part of our joint effort to bring about early detection of breast cancer.

Jefferson graduates between ages 45 and 64 note: You are eligible and welcome to participate in this health maintenance program.
COMMITTEE REPORTS

SOCIAL

On December 11, 1973 the Christmas party was held in the Faculty Club of Jefferson Alumni Hall. Following the dinner Santa (Mary Ann Stauffer) made her annual visit and presented each member and guest a gift.

On March 12, 1974 the Alumnae had its annual dinner and auction sale. Proceeds from the sale were placed in the General Fund.

The main event of the year was the Spring Luncheon held May 4, 1974 in the Crystal Ballroom of the Benjamin Franklin Hotel. There were 346 in attendance.

The graduating class of 1974 were guests of the Association. There were 29 members present. Class President, Miss Cheryl James was presented with a corsage.

The guests at the Head Table were:
Miss Doris Bowman, Director of the School of Nursing
Dr. Charlotte Voss, Chairman, Department of Baccalaureate Degree Nursing
Miss Elizabeth Sweeney, Director of the School of Practical Nursing
Mrs. Mamie Peace, Director of the Operating Room
Miss Carol Hutelmeyer, Acting Director of Nursing Service

The 50th Anniversary class was the guests of the Association. Present were: Lillian Pratt, Veronica Owens, Julia Ganster, Estelle Taylor, Blanche McGuigan.

Flowers were presented to the following Alumnae:
Miss Mary Godfrey - 65th Anniversary
Miss Elizabeth Heaton - Class of 1915
Miss Nanette Lolley - Class of 1918
Mrs. Elizabeth Miller - Class of 1921
Mrs. Ann Craver - Class of 1921
Miss Clara Brunner - Class of 1923

The class of 1947 had 34 members present for their 25th anniversary, this was the largest anniversary class.

The flowers at the head table were given to Wanda Edge Kinsey, Class of 1947, who was hospitalized on the day of the Luncheon.

The social committee wishes to thank all members for their continued support and assistance in making the social events a success.

The Annual Spring Luncheon for 1975 will be held May 3, 1975 at the Benjamin Franklin Hotel.

Janet Hindson, '50
Chairman

MEMBERSHIP

On January 11, 1974, the senior class was appraised of the functions, structure and by-laws of the Alumnae Association. Copies of the Alumnae Association Bulletin and Constitution and By-Laws were also given to the students at this time.

In meeting with the students on April 18, 1974 the senior class completed membership forms for entry into the Alumnae Association upon graduation. The class was also invited as guests to the Annual Luncheon on May 4, 1974. Thirty members accepted this invitation as guests of the Association.

Delora Watkins Blank, '67
Chairman

SICK AND WELFARE

During this past year there were many alumnae members hospitalized at Thomas Jefferson University Hospital. Cards were sent and visits made to all known members.

Jeannette Plasterer, '51
Chairman

BULLETIN

Thank you to all contributors to the 1974 Bulletin. Special thanks must go to Peg Summers, Martha Riland, and Delores Heckenberger whose help made compilation a rewarding experience. One noteworthy contribution is the extensive class news of the class of 1934 upon their 40th anniversary.

I hope the 1974 Bulletin will renew your interest in Jefferson and rekindle relationships with your classmates.

Lenora Schwartz, '66
Chairman
ADMINISTRATION

The Alumnae Room has been as busy as a bee hive the past year. Besides sending out Alumnae material, we have been involved in addressing envelopes for the activities and the information of the University.

There have been programs of interest to nurses and there will be more programs in the future.

Please send your new addresses when moving, also change of name, so you will be on the active mailing file.

I am in the Alumnae Room on Tuesdays, 10 to 4, of each week. The Alumnae Room is on the Mezzanine Floor of Jefferson Hall, 11th and Locust Street, Room M-2. Telephone No. 829-8991.

Martha E. Riland,
Clerk-Typist

Note of interest. From 1893 to 1974, there have been 4176 Graduates from the School of Nursing.

MISSING ALUMNAE MEMBERS

Help us find the correct addresses for the following: The letters for the annual giving and luncheon invitations sent March 1974 were returned to the Alumnae Office — marked moved — no forwarding address.

MISS CHERYL JAMES, PRESIDENT OF THE CLASS OF 1974 WITH MISS MARGARET SUMMERS AND MISS MARY GODFREY

MODEL SHOWING SITE OF NEW CLINICAL TEACHING FACILITY
RESUME OF MINUTES OF
ALUMNAE ASSOCIATION MEETINGS

September 11, 1973
A motion was made, seconded and carried to re-committed to Miss Bowman and her committee to issue the Fall scholarship to Janice Osterhous.

1100 By-Laws booklets went out in July. Thanks to Miss Lindal and all who helped with the mailing.

A new Santa suit will be made by Misses Oberdorf and Handy.

It was decided to send the Reader's Digest to the following:
  Elizabeth Heaton  Sarah Bergey
  Emma Knock  Mary Godfrey
  Ethel Faur  Edith Chyfar
  Mabel Miller  Freda Steinback

It was decided to send Christmas flowers to:
  Mary Kimball  Violette Emig
  Ann Bergner  Rosa Diserode

An appropriate gift will be sent to Bernice Collins.

October 9, 1973
Miss Bowman reported that there have been two applications for scholarships. It was moved and seconded to award scholarships for the Spring 1974 semester to Judith Johnson and Sally Dupras.

Mrs. O'Connor reported that personal contacts are being made concerning donations to the Sesquicentennial Campaign. Denise Watkins will be the representative to the P.N.A. Convention in Pittsburgh.

It was moved and seconded to send the United Fund $150.

A very interesting film was shown about total knee replacement.

November 13, 1973
The Christmas party will be held December 11, 1973 in Jefferson Hall.

Denise Watkins gave an excellent report of the P.N.A. convention which she attended as a representative of the Association.

It was moved, seconded and carried to send the Christmas Seal Fund Society a contribution of $25.00.

January 8, 1974
Miss Hindson reported that the Christmas party was a huge success with 44 persons in attendance.

The following ballot was approved:
  President—Peg Summers
  2nd Vice-President—Delores Hackenberger
  Evelyn Frazier
  Board of Directors—Denise Watkins Blank
  Catherine Mikota
  LuAnn Miller
  Evelyn Dute

Mrs. Schulte, a speech therapist, showed a very interesting film about the world of the aphasic and conducted a question and answer period.

February 12, 1974
Miss Hindson reported that the annual supper and auction will be held March 12 in the Faculty Club in Jefferson Hall.

Mrs. O'Connor reported that much more effort is needed in order to reach our Sesquicentennial campaign commitment.

It was announced that the Breast Diagnostic Center survey is open to all Jefferson graduates. This is a good opportunity for health maintenance.

An interesting and informative program was then presented by Mrs. Margaret Reddy — a stoma therapist.

April 9, 1974
There were 28 reservations with 25 in attendance at the annual supper and auction. The auction raised $118.50. The Annual Spring Luncheon is to be held May 4. Dr. Charlotte Voss is to be the speaker.

Mrs. O'Connor announced that $31,000 has been raised so far for the Sesquicentennial campaign.

The ANA Convention will be in June in San Francisco. No one is presently able to go.

Results of election:
  President—Margaret Summers
  2nd Vice-President—Delores Hackenberger
  Board of Directors—Janet Hindson
  Denise Watkins Blank
  Evelyn Dute

A motion was made and carried to destroy the ballots.

May 14, 1974
It was moved and seconded to accept the recommendations of the Scholarship committee to grant scholarships for the Fall semester to Peggy Eckhart Hess and to Betty Birroughs Alesey.

There were 362 reservations for the luncheon with 366 in attendance. The head table flowers were sent to Wanda Edgel Kinsey.

June 30 is the deadline for all contributions to the Sesquicentennial campaign.

It was decided to contribute $300.00 to the History of Nursing in Pennsylvania being sponsored by the College of Physicians of Philadelphia to provide for our representation in the project.

A motion was made and carried to send Lenore Schwartz to the ANA Convention as the representative of the Association.

It was decided to purchase several souvenir items of Jefferson to be available to graduates by the 1975 luncheon.

Mr. Louis McCreight from the General Electric Space Center in Valley Forge presented a program about the applications and benefits of space technology.

A motion was made and carried that the President and the Board of Directors conduct any emergency business which may arise between May and September.

All of the regular meetings of the Alumnae Association were held in room 1203 of the Jefferson Alumni Hall.

Respectfully submitted,
Lenora W. Schwartz
Recording Secretary

MR. BROWN
The weather man in town, his name is also Brown, he used to own a scrubby farm. It's two miles out of town.

Now Brown when he came home that night, was drunk of course. A strange freak too, he harnessed up his horse.

So down the road he staggered then and cursed for want of light.

And when he reached the barn he found his things were there all right, but after fussing quite a while, he got himself a drink.

And picking up the whip and rain, he jumped into his rig. His wife, she heard him from the house, and wondered what could be.

So down the road she came in breathless haste to see. Why Brown what does this mean. You're horrid drunk tonight.

And going closer up to him, She held aloft the light, but back she fell with sudden fear, the sight was strange I vow. For he had not hitched up his horse, but harnessed up his cow.

Rosa Diserode, '23
WAYS AND MEANS COMMITTEE REPORT
May 15, 1973 - May 15, 1974

Thank you once again for your continued support and your generous giving to your Alumnae Association. The contributions to the Relief Fund, Scholarship and General Fund brought the total amount to $5,053.00. All contributions received after May 15, 1974 will be acknowledged in the Alumnae Bulletin for 1975. Following is a list of contributors and contributions according to classes:

1909-$15.00
Mary R. Godfrey

1914-$40.00
Marguerite C. Barnett, Ethel R. Harrington, Martha M. Karp

1915-$30.00
Minnie Turner, Elizabeth Heaton

1917-$10.00
Frances M. Greve

1919-$10.00
Nora Day, Hilda Cala

1920-$45.00
Anna Trego, Ann Devitt, Berenice Tegler

1921-$70.00
Frances Pratt, Henrietta Sprouse, Madaline Spencer, Ethyl Moss, Elizabeth Briggs

1923-$40.00
Grace Tourjansky

1924-$20.00
Penelope Kastner, Clarissa, Jessie S. Reed

1925-$75.00
Estelle Tyler, Myrtle Popik, Lilian Praet, Julia Gustay, Kathryn Task, Luna Kutz

1926-$60.00
Mildred Chodoski, Edith Opyer, Nora Try, Elizabeth Scotton, Claire Lucharger, Margaret Briggs

1928-$50.00
Marjorie Workinger, Mary Beersengers, Mary Claus, Ernestine Rowe, Ruth Davis, Josephine Dickenson

1929-$125.00
Maryan Smith, Mary Malish, Margaret Gregory, Elizabeth Diamond, Edna Shipman, Edna Scott, Anna Millie

1929-$20.00

1930-$50.00
Edith Lee, Ethel Hughes, Ann Gomby, Elia Keair, Virginia Avery, Evelyn Smeldt

1931-$95.00
Mary Mather, Alyce Hammonds, Marylou Knopp, Helen Rodgers, Esther Saunderberg, Emma Bahrer, Benita Colewell, Virginia Ignatoff, Sue Wells, Mildred Bernekar, Agnes Kaiel Henry

1933-$121.00
Thelma Morra, Mildred Jefferson, Dorothy Watson, Mary Batlione, Vernece Veloski, Mildred Getz, Gail Wood, Mary Pitzer, Marjorie Manley, Sylvia Vines, Ethel Taylor

1933-$170.00
Kathryn Rhude, Pauline Kaug, Solon Baker, Ruth Freyert, Katherine Lead, Marian Casey, Kathryn Maggin, Catherine Paine, Carolyn Richman, Anna Croad

1934-$265.00
Mildred Brande, Julia McCricken, Tilla, Shay, Alice Franklin, Catherine Starr, Mildred Smith, Evelyn Tocce, Margaret Schellenger, Marie Sawich, Vera Dahms, Margaret Swartz, Kathleen Armstoge, Betty Parwis, Dorothy Rueterheld, Margaret Argolla, Angela Casas, Alice Jones, Marian Burch, Alfred Kramer, Ruth Dunlap, Margaret Blake, Helen Mansky, Anna Delone, Mildred Bowman, Marion Miller

1935-$47.00
Evelyn Carson, Blanche Rushin, Erma O'Donnell, Marion Hayes, Pauline Thorpe, Mary Moore, Arline Wolffer

1936-$155.00
Mary Menendez, Betty Miller, Elmer Brothers, Thekla Soy, Margaret Roman, Marion Smith, Erma Carter, Lyda Yerkes, Mary Willey, Evelyn Dule

1937-$375.00
Florence Keller, Pauline Seiger, Mildred Hawksworth, Myrle Matthews, Hilpert Zeller, Kathleen Rauberg, Margaret Taylor, Louise Johnson, Alice Fuller, Cornelia Molade

1938-$375.00
Amanda Jones, Bertha Sneedlo, Edith McCafferty, Mary Richardson, Mildred Clifton, Mary Corliss, Ethel Wannell

1939-$76.00
Barbara Schuh, Grace Peterson, Clancy Mitchell, Mildred Curran, Mary McCoy, Daisy Day, Virginia Furr, Marian O'Connor

1940-$60.00
Irma Morel, Ruth Halbrech, Marion Trorey, Margaret Miller, Helen Emmalene, Mary Rosier, Sara Snelter

1941-$77.00
Gene Jersild, Glandine Waters, Ruth Smore, Harriet Worley, Josephine Moellers, Ruth Gillian, Peggy Summer, Kathryn Quackenbush, Frances Rumberger

1942-$116.00
Viola Braddock, Dorothy Temptation, Dorothy Cloud, Gladys White, Alice Reinhart, Rebecca Wilkins, Joyce Sprack, Ellen Steward, Rhoda Wish, Beatrice Steven, Irene Polier, Dorothy Nifong, Doris Bowman, Myrtle Berman

1943-$150.00
Catherine Kehl, Betty Miller, Elmer Brothers, Thekla Soy, Margaret Roman, Marion Smith, Erma Carter, Lyda Yerkes, Mary Willey, Evelyn Dule

1944-$150.00
Jean Joseph, Marion Morris, Jeanette Kibler, Esther Kohn

1944-$135.00
Marion Crawford, Mildred Hawkesworth, Myrle Matthews, Holpert Zeller, Kathleen Rauberg, Margaret Taylor, Louise Johnson, Alice Fuller, Cornelia Molade

1945-$135.00
Elizabeth Snyder, Pearl Rae, Col. Catherine Beetz, Phyllis Crawford, Malene Barrick, Carol King, Florence Howard, Christine Park, Betty Drew
we keep going. Give my best regards to Deceased January 18th. They are coming this weekend and we will help her out. Have three Cary —

winter 1905.

I have lived from the Fidelity Bank as 50th! To M. retired July 15, 1973 and that can't make our 40th Anniversary. Maybe the doctor won't let me work, but I'm sure she will. M. has been there for pay. 5,000 people keep us busy. Ruth Duncan Delbert, 200 W. 4th St., Stockbridge, Ohio 43787. We have just returned from Vassar, Florida. We have been there for two months. We are glad it is over. We will see you in church. C. went on a trip to Europe with her husband and four boys. She has a new home and it is a Blessing for her in England. We will be glad to see you.

The weather was beautiful and fine for golf. Expect to go to Ireland, and we will be thinking of all of you. Please give my best wishes for a great celebration! Will be thinking of all of you. Please give my best wishes, C. Hare Duncan, 522 Walnut St., Columbus, O 4143.

Edna Hastings Plagens, 847 E. Walnut St., State, Ohio 43012.

Margaret Myra Smith, 549 E. Walnut St., State, Ohio 43012.

Our youngest, Ruth, is a freshman in the local hospital nurses organizing a unit for collective bargaining. She has been appointed to the Advisory Committee for the County Treasurer. My son expects to graduate in June with a degree in Russian Literature in June. chalked her up in the list of the Axe.

We have attended two seminars, one with the Lutheran Church on the local hospital nurses organizing a unit for collective bargaining. She has been appointed to the Advisory Committee for the County Treasurer. My son expects to graduate in June with a degree in Russian Literature in June. chalked her up in the list of the Axe.
