THE CHARACTER OF JEFFERSON'S BEGINNING

An Editorial

At the end of May, alumni will be sent the printed text of the Newcomen Address of President James L. Kauffman on "George McClellan and his Jefferson Medical College and Medical Center." Since this 125th Anniversary Address will cover the stirring story of the founding of Jefferson, its history and growth, and the forceful character of McClellan the Founder, no summary of these facts is presented in this anniversary issue.

Rather may we take a few minutes from the scene of the formal Opening of the Hall of Jefferson (Medical) College to show the elevated plane on which the College was established.

It was the morning of March 8, 1825; the place: the reconverted Winter or Tivolo Theatre above Fifth Street on Prune (since renamed Locust) Street in America's largest city of 138,000 inhabitants.

Dr. McClellan and his five faculty associates, having nearly overcome the rival opposition to the founding of Philadelphia's second medical college, were impressed with the wisdom of formally announcing the principles upon which the new institution was being established. They had assembled physicians and leading citizens of the community, "as an important part of the services of a day interesting to the whole Medical Profession, and to the Community at large."

The opening prayer was offered by Rev. Ashbel Green, late President of Princeton College and the principal address was delivered by Dr. Benjamin Rush Rhee's, Dean of the Faculty.

To paraphrase Dr. Rhee's remarks on the character of the infant institution—"When individuals embark in new and important enterprises, justice to themselves, and respect for the community . . . demand a public and candid exposition of their motives, the objects they propose to attain, and the means . . . to attain them. Especially is this so when the (issue) is one of general interest, and when those who may be affected by its success or failure, are scattered over a wide range of country. Such is the character of the enterprise to which your attention is this morning called. You are all interested in it . . . in proportion as you feel more or less concerned in the advancement of a liberal and honourable profession, and as you are solicitous to promote the welfare of those who have consecrated their lives to the extension of its usefulness, and the elevation of its character.

"And is there one among you who feel indifferent on these points? To the members of our profession, this question need not be proposed; and I feel confident that even those who fill other stations in society, require no argument to convince them, that their own earthly happiness is too deeply involved in the condition of Medical Science, to allow them to view with unconcern any effort, however humble, to enlarge its boundaries, or multiply the means proper for its promotion . . .
"The importance of the designs to be laid before you will, therefore, I feel assured, command your attention . . . but let us first reflect on the several duties and claims on the Physician, as they arise from his various relations to his fellow citizens . . . In addition to the duties incumbent on the Physician, in common with his countrymen of other callings and professions—his duty to his God—to his country—and to his family, there are required of him many others of an interesting character. The community, his professional brethren, and those just entering the study of Medical Science, severally have claim on his time, and severally exercise a particular influence over his exertions and conduct.

"Can it be objected against our undertaking, that the existence of two similar institutions in the same city will awaken discord in the ranks of our profession? Let those who imagine that this will be the case, consider whether they are not doing injustice to the character of their profession, by the bare supposition that its members cannot perform their duty without strife—that when their hands are stretched forth, they must, of necessity, strike at the peace of each other. We repel from ourselves the charged conveyed in the thought—we are not hostile to the interests of our fellows. On the contrary, we feel that our interests are identified with theirs, whether they dwell among us, or elsewhere. We will not invade the harmony of our profession, nor assail our neighbours; for we know that in no condition is dishonour more surely the result of an attempt to establish reputation and fortune on the ruins of another's fame, than in that in which our profession has placed us. To all our brethren we therefore most cheerfully extend the hand of fellowship, trusting that as we feel towards them, they will also feel ever towards us, and that no ungenerous hostility on their part will ever compel us to assume a similar attitude, and to stand forth, as we shall with manly boldness, in our own defence. Such are our views as they respect our professional brethren, and students of medicine.

"What shall the community, of which we are members, reap from the undertaking? The employment of an additional organized body in the advancement of a science, on which its health and happiness so materially depend, can not be deemed uninteresting to any of its members. Who can say to what new discoveries it may not give rise? Who can say what mysteries it may not develop—what new truths it may not advance—what new energy it may not impart to the arm of our profession? Who can say that the medical school here established, may not at some future period send forth him who is destined to discover the means by which pestilence may be prevented; or him for whom it is reserved to guard future generations, against that consuming fire, which is now wasting away the energies of the strong, and preying on the beauty of the fair? Who can say that at some future period, in this very hall, that student may not be armed with knowledge, to whom the salvation of a nation's idol may depend. Frown not therefore on the enterprise in its infancy. Rather encourage those who are embarked in it, to go on fearlessly and actively, that others may be induced by their success to engage in similar undertakings.

"That the good wishes and the prayers of thousands of pious and enlightened men are with us, is not the smallest ground of our confidence that we shall eventually prosper."
VICE-ADMIRAL JAMES L. KAUFFMAN, U.S.N. (RET.)
President of The Jefferson Medical College
At this important milestone when the Jefferson Medical College and Medical Center celebrates its 125th Anniversary, it is a great privilege for me to send greetings to each alumnus.

During the year I have served as President of this honored institution, I have been greatly impressed not only by the general loyalty of Jefferson's graduates, but by their universal interest in her further success and growth. Without the generous aid of the Alumni, Jefferson could not have maintained the excellence of the Pre-Clinical Faculty and its standards of medical science.

Our Faculty has been cooperative in all planning for progress. Numerous sound suggestions have originated with its members.

Our Board of Trustees, the members of which are leaders in their respective fields of activity, are constantly engaged in considering ways and means to meet the demands that the increasingly complex needs of medical education have put on the College.

One can hardly conceive of the great amount of outstanding service rendered by the nearly nineteen thousand physicians who have been graduated from the Jefferson Medical College in her century and a quarter of existence. Their accomplishments have had far-reaching influence affecting the welfare of the Nation.

Our course and responsibility now is one of executing plans for the institution's further development as a great Medical Center. With the traditions that link the past with the present, we are devoted to realizing these ambitions for a greater Jefferson.

President.
PERCIVAL E. FOERDERER
Chairman of the Board of Trustees
Mr. Percival E. Foerderer was elected Chairman of the Board of Trustees of Jefferson Medical College and Medical Center on March 20, 1950, to succeed the retiring Chairman, Mr. Robert P. Hooper.

Mr. Foerderer has served on Jefferson’s Board since December 17, 1928, and as Chairman of the College Committee of the Board since March 28, 1935.

Though Mr. Foerderer has been one of Philadelphia’s most active community leaders, and has participated in state and national affairs, he has devoted major interest to Jefferson.

The newly elected Chairman of the Board was born in Philadelphia and educated at Cheltenham Military Academy, the William Penn Charter School, and at the University of Pennsylvania. He became in 1903 assistant superintendent of the leather firm established by his father, Robert H. Foerderer, Inc., manufacturers of Vici Kid, advancing to a director and Vice-President in 1906, and President in 1908.

Mr. Foerderer is or has been a director of the Land Title Bank & Trust Company, the United States Leather Company, Pennsylvania Forge Company, Philadelphia Park Amusement Company, the Philadelphia Bourse, and Chairman of the board of directors of the Pennsylvania Mutual Life Insurance Company.

Some of Mr. Foerderer’s war-related and civil activities include: Council of National Defense, World War I; vice-chairman employment management division and chief of divisional priorities section, War Industries Board; war service committee of the leather industry; director, Philadelphia Chamber of Commerce; chairman Metropolitan Philadelphia Civilian Aid Committee for Army Air Corps; Lieutenant Colonel, Army Specialist Corps, 1942; chairman, Committee for Economic Development of Philadelphia, 1943; chairman, Tanners’ Council of America; chairman, Code Authority for leather industry NRA; chairman, Republican Finance Committee of Metropolitan Philadelphia.

Philanthropic and civic participation of Mr. Foerderer include: Vice-President, Foundation of Tanners’ Research Laboratories; Vice-President, Associated Hospital Service (Blue Cross) of Philadelphia; member of Board of Directors, Institute for Cancer Research, Eastern Pennsylvania Psychiatric Institute, and American Red Cross—Southeastern Chapter of Pennsylvania; member of the Hospital Planning Agency, Citizens’ Conference on Hospital Capital Requirements in Philadelphia and vicinity; member of Americans for the Competitive Enterprise System, Inc.; and member of the Board of Trustees, Committee for Economic Development.

Associations and clubs of which Mr. Foerderer is a member are: Honorary member—Tanners’ Council of America; the Newcomen Society; Numismatic and Antiquarian Society; Military Order of Foreign Wars of the United States—Pennsylvania Commandery; Delta Kappa Epsilon; Union League; Gulph Mills Golf Club; Philadelphia Country Club; Poor Richard; Merion Cricket Club; Radnor Hunt Club; Rittenhouse Club; and Penn Club,
ROBERT P. HOOPER

On March 20, 1950, Mr. Robert P. Hooper, for thirty years a member of Jefferson's Board of Trustees, retired as Chairman and member of the Board.

For thirteen years, from 1936 to 1949, Mr. Hooper served as President of Jefferson Medical College and Hospital, a position to which he brought outstanding leadership, and tireless devotion. He has given more of his time and interest to Jefferson than to his business or any other activities.

His businesslike administration enabled Jefferson to maintain its outstanding position in a difficult period of adjustment, growth and development—prewar, wartime, and postwar.

The May 1949 issue of the Alumni Bulletin gave details of Mr. Hooper's long career: as President of William E. Hooper and Sons Company; his unique position in the early promoting of better roads in America; his leadership in development of a fire resistant finish for textiles; his early activity as President of the American Automobile Association; and his leadership of Jefferson.

Mr. Hooper has been a member of the Board of Directors of The Lumbermens Mutual Casualty Company and the National Retailers Mutual Insurance Company of Chicago; The Excess Insurance Company of America, New York City; and the Philadelphia Automobile Club Insurors.

He is a member of long standing of many prominent Clubs. He has belonged to the Merchants Club in New York City since 1907. He is a member of the New York Yacht Club. In Philadelphia he belongs to The Racquet, Midday, Union League and the Corinthian Yacht Club, and is a member of the Maryland Club in Baltimore, Maryland.

Though retiring from constant activity in behalf of Jefferson, Mr. Hooper's interest and support for Jefferson's progress will continue.
WILLIAM HARVEY PERKINS, M.D.
Dean
Dear Fellow Alumni:

There has been much smoke during the past year that has clouded the situation in regard to support of medical education, but to date little flame to illuminate our position.

The future seems to lie in a division of responsibility between private funds, student tuition, State and Federal support. This is not too satisfactory a picture because it divides loyalties, produces conflicts of interests, and brings out difficulties inherent in the distribution of responsibility.

The general difficulty for us is the possibility that the realistic necessities of today may force a readjustment of the amount by which any of these sources of revenue may feel it necessary to increase or decrease its share.

At the moment the burden on student tuition is about as heavy as it can bear; private funds and endowments cannot be expected to increase sufficiently to restore the happier situation of other days; our State support has been increased greatly in the last two biennia, but should go higher; Federal aid is still in the discussion stage only.

Assuming that tuition and private funds cannot be significantly augmented, we are left with the problem of State and/or Federal balance of support. How much of either or both is beclouded by the social and financial issues involved; no one can predict how this may all come out.

This all points up the invaluable service the Alumni Annual Giving Fund has contributed to our year-by-year support. We must depend on it and hope that your enthusiasm will continue to grow and help us do the things still undone that we must do for Jefferson.

Sincerely,

Dean.
GREETINGS TO MY FELLOW ALUMNI:

It is an extraordinary privilege to serve as your President during the one hundred and twenty-fifth anniversary of the College. The loyalty of our alumni during these one hundred and twenty-five years has never been in doubt. Their interest in the College is deeply rooted in personal reminiscences. Their resentment of any derogatory remarks about the College is a byword among their medical colleagues. It is readily understandable therefore that Jefferson alumni are vitally concerned today about the future of their College.

It is a fact that colleges all over the country are finding it increasingly difficult to keep the wolf from the door. Jefferson is no exception. In order to help, we, the Alumni, are asked to participate in an annual giving campaign fund. You, as an alumnus, are naturally elected to the job. And you, as an alumnus, are already doing it fairly well. It is necessary that you continue your annual giving so that your College may not only be maintained but indeed survive.

You are always welcome at the College. The College needs you. They are most grateful for your enthusiasm and interest, and would like to have you drop in for a visit. Place your College in your annual giving budget.

Theodore R. Fetter, M.D.

President
At the Annual Meeting of the Jefferson Alumni Association, held February 2, 1950, Theodore R. Fetter was elected President of the Jefferson Medical College Alumni Association.

Dr. Fetter has been associated with many of the activities of Jefferson over a period of years. We congratulate him and hope that his term of office will be a very successful one.

Theodore R. Fetter was born in Heidelberg-Schaefferstown, Lebanon County, Pennsylvania.

He attended primary and secondary schools of Schaefferstown and high school in Lebanon, Pennsylvania, also Lafayette College (1919-1922) and Jefferson Medical College (1922-1926).

He entered Jefferson Medical College Hospital as a Resident Intern from 1926 to 1928 and served as special assistant to Professor Hiram Rittenhouse Loux, Professor of Genito-urinary Surgery at Jefferson Medical College to 1930. He continued as special assistant to Professor Thomas C. Stellwagen, Professor of Urology to 1935 inclusive. He served as President of the Jefferson Society for Clinical Investigation, 1938-1939.

**Member of:**
- Philadelphia County Medical Society—(Member of Board of Directors 1940-1947, President-Elect 1947, President 1948)
- Medical Society of the State of Pennsylvania—(Chairman of Disaster Medical Service Committee—1950 and Consulting Editor of the Journal of the State Society)
- American Medical Association
- College of Physicians of Philadelphia
- Philadelphia Urological Society—(Secy.-Treas. from 1935-1940, Vice-President 1940-1941, President 1941-1942)
- Mid-Atlantic Section of the American Urological Association—(Secretary-Treasurer 1941-1947, Vice-President 1947-1948, President 1948-1949)
- Medical Club of Philadelphia—(Director, Vice-President 1950)

**Fellow of:**
- American Urological Association (Since 1934)
- American College of Surgeons (Since 1936)

**Diplomate of:**
- American Board of Urology (Since 1936)

**Director of:**
- Associated Hospital Service of Philadelphia

**Member of:**
- J. Aitken Meigs Medical Society
- Sydenham Medical Coterie (Secretary)
- Theta Kappa Psi Medical Fraternity—(Vice-Gran Prytan—1948)
- Union League
- Maroon Club of Lafayette College

**Assistant Urologist:** Jefferson Hospital

**Consulting Urologist:** Delaware County Hospital, Drexel Hill, Pa.
- Wills Eye Hospital, Philadelphia, Pennsylvania
- Grand View Hospital, Sellersville, Pennsylvania

**Secretary:** Jefferson Medical College Alumni Association 1934-1941

**Vice-President:** Jefferson Medical College Alumni Association 1947-1950
The present department of surgery has been completely unified, and is headed by Dr. Thomas A. Shallow, the Samuel D. Gross Professor. The former separation into “A” and “B” services with independent chiefs and policies has been largely abandoned in favor of a single department. Although an “A” and “B” service are still designated, the purpose of the division is to facilitate the teaching of students, the training of surgical residents, and the clinical management of a large group of ward patients.

Within the department of surgery is the recently created division of research, directed by Dr. John H. Gibbon, Jr., Professor of Surgery. The activities of this division as well as other clinical research within the department, will be discussed later. The department of surgery includes the neuro-surgical division (described in the January, 1950, issue of the Bulletin), the division of proctology, and the division of plastic and reconstructive surgery.

Teaching Program

Teaching of students is conducted at Jefferson by a staff of forty members, aided by certain of the surgical residents. The mechanical facilities consist of the surgical wards, fourth floor operating rooms, out-patient department of the Curtis Building, the clinical amphitheater of the Hospital, and lecture rooms of the College. With the institution of the “block system” of instruction, emphasis has been placed upon earlier and more prolonged exposure of students to actual patients. With increasing numbers of students
on the wards there has been a demand for more clinical material. While the wards are filled even beyond capacity, the fixed physical restrictions of space have prohibited further expansion. The need for more beds for teaching, as well as more space for students, has been met by using the facilities of our three affiliate hospitals—Pennsylvania, Germantown, and Lankenau. The need must eventually be met at Jefferson, however, with an increase in the number of beds, as well as the addition of rooms for conferences, demonstrations, and student laboratory work.

The plan of senior student instruction, according to the block system with use of affiliate hospitals, was organized by Professors Thomas A. Shallow and John H. Gibbon, Jr. This new scheme of teaching, as it applies to the department of surgery, was described in detail in the January, 1950, issue of the Alumni Bulletin. To date, the results of this plan are encouraging, but there are many difficulties to be ironed out. Maximum effectiveness of the block method for seniors demands (1) a large variety of patients, representing an abundance of the commonly encountered conditions as well as many of the less common ones; (2) close supervision of small groups (three to six students) by adequately trained instructors; and (3) intense collateral reading by the students to compensate for loss of lectures. The two main concerns to the teaching staff are whether the students are seeing a sufficient number of patients and whether they are reading enough. The students are encouraged to read not only the subjects represented by their patients, but
systematically as well.

Two clinics a week are held in the hospital amphitheater by Professors Shallow and Gibbon before the senior and junior classes. Common as well as unusual cases are exhibited and discussed from the practical standpoint. Operating in the pit has been discontinued, since students have ample opportunity to assist at the operations on their assigned patients. Furthermore, many of the standard operations are now available on motion picture film and are shown during ward conferences.

Junior students still receive a series of lectures, attend pit clinics, and carry out operative surgery on the cadaver. A recent innovation has been a substantial increase in the number of hours spent in the out-patient departments. Students observe and treat patients not only in the general surgical clinic, but in the rectal clinic, tumor clinic, and varicose vein clinic as well. There is a possibility that eventually the block system will be used also in the junior year.

Sophomore students still receive a systematic series of lectures dealing with the principles of surgery.

Training of Residents

At the present time there are fourteen residents in general surgery, two in neurosurgery, and one in proctology. The residency in general surgery covers a period of five years. The program allows considerable variation in time spent in the basic sciences, and also allows considerable choice of elective specialties. So rapidly has the training program been expanded and improved, that it can safely be said no two men have been exposed to exactly
SURGICAL RESIDENTS

Sitting: Rudolph H. Hecksher, Jr., W. Bosley Manges, Laurence A. Mosier, William P. Coghlan, Robert H. Holland. The following were not able to be present when the photograph was taken: George J. Genseemer (Fellow), John Y. Templeton III (Resident), J. Elder Bryan, Jr. (Resident), Donald R. Watkins (Resident).

The same course. Ample opportunities are given for development as teachers and investigators, as well as operators. In spite of the wide latitude given the men to develop their individual talents, a basic program does exist and will be described.

All the activities of the resident’s first year are under the direct supervision of the head of the department. Special emphasis is placed upon the study of surgical diagnosis and pre- and postoperative management of surgical patients (average daily census is 50 to 60). The resident assists at operations to observe the methods used in treating general surgical lesions, and is assigned to the study of the surgical technique of operations pending. A study is made of the gross and microscopic pathology of cases under observation and treatment. He is assigned to reviews of surgical literature for presentation at conferences, and as a supplement to the clinical research of the senior residents and staff members. He attends and participates in surgery, pathology, and roentgenology conferences.

The second year is arranged in three periods of four months each. One period is spent on the women’s ward, another on the men’s, and the third circulating among the private patients of the various staff surgeons. The resident performs minor surgical procedures and certain major procedures as herniorrhaphy and appendectomy under supervision in the early months.
He assists in the surgical out-patient department, rectal clinic, and varicose vein clinic. As basic training in surgical pathology, he assists in the teaching of this subject to medical students by demonstration of gross specimens and histologic sections. This feature of his training is supervised by Dr. Peter A. Herbut, Professor of Pathology. Additional time may be spent during this year in cadaver dissection in the department of Anatomy. Teaching duties consist of participation in the program for junior medical student clerkships in the out-patient department, and in the program for senior medical student clerkships according to the block system in the wards. Active participation in clinical surgical research is encouraged under supervision. The resident also assists in answering interdepartmental consultations under supervision of the ward chief.

Much of the third year is spent rotating through certain surgical specialties which are elected by the resident. No less than three months each are spent on two or more of the following: orthopedics, plastic and reconstructive surgery, proctology, neurosurgery, urology, thoracic surgery at Barton Memorial Hospital, or gynecology. A period of six to nine months is spent on these special services, with the remaining three to six months spent on the mother service. The purpose of this year is to broaden the resident's knowledge of the entire field of surgery. In addition, by the exchange between services, residents in surgical specialties receive training in general surgery.

The first six months of the fourth year are spent on ward services, and the resident may elect to take an additional three-month period on one of
the surgical specialties. His operative opportunities now include more advanced procedures, such as cholecystectomy, radical mastectomy, thyroidectomy, and intestinal resection. The last six months are spent at Germantown Hospital, where he performs a wide variety of general and special surgical procedures.

During his last year, the resident spends his entire time upon the mother service, acting as head resident and supervisor of many of the activities of the junior residents. His opportunities at the operating table are at their peak in volume and responsibility. He is encouraged to present an original paper on clinical investigation before an extra-mural surgical society. He finishes his residency with the realization that his experience has been merely an introduction to the study of surgery which entails a lifetime of endeavor for further improvement.

Surgical Research

The division of surgical research, under the direction of Dr. John H. Gibbon, Jr., occupied a 3,000 square foot section of the eighth floor of the medical school building in February, 1947. Previous to this time some investigative work had been in progress on the twelfth floor of the medical school building. Considerable difficulty had been encountered in obtaining adequate equipment for the department as an aftermath of the war scarcity of equipment for scientific research of all types.

Projects for investigative work undertaken by the division of surgical research have been as follows:

1. The maintenance of extracorporeal circulation and oxygenation of blood. This project was aided by grants from life insurance funds set up by the Life Insurance Companies of America and by grants from the National Public Health Administration and with the cooperation of International Business Machines Corporation. Various phases of the problems involved have been studied. This work has been the subject of several publications.

2. A method for the implant of valve leaflets within the heart has been devised. Valve grafts have been substituted for normal valve leaflets on the right side of the heart in animal experiment work.

3. The reaction of tissues to polyethylene tubing has been studied. Vascular reactions to implants of tubing in experimental animals have been established.

4. Absorption of fats from the gastrointestinal tract have been the subject of investigation.

5. Blood loss during major intrathoracic procedures has been studied by measurement of sponge weights and changes in the blood volume of patients.

6. Blood loss between stages of thoracoplasty and changes in blood volume of tuberculous patients have been investigated. Means of adequate replacement have enabled a greater number of patients with far-advanced tuberculosis to withstand surgical treatment.

7. Studies in blood gases and acid-base equilibrium during major intrathoracic operations have been studied. The effects of inadequate ventilation during operation procedures have been clearly demonstrated and the necessity for adequate ventilation proven.

8. The method of determining blood gases in the presence of small concentrations of ether has been devised.

9. The mechanism of the acute toxic action of thiocyanate was studied.

10. Clinical investigation of the problem of carcinoma of the lung has
been undertaken. The lymphatic spread of carcinoma of the lung is now under current investigation by a fellow of the National Cancer Institute.

11. Studies on potassium and sodium changes in surgical patients are under investigation by use of a flame photometer.

12. A method for the determination of the circulation time of the blood has been devised by use of a modified Millikan oximeter. This provides an objective means of determining circulation time.

13. Cardiac catheterization studies are now possible in the department with intravascular pressure measurements being determined by means of strain gauges.

14. Studies in pulmonary edema in the experimental animal with grossly diminished lung volume and produced by intravenous injection of blood are being conducted.

15. Pericardial anatomy and its relation to resectability of carcinoma of the lung has been studied.

16. The problem of carcinoma of the esophagus has been investigated and methods of treating cervical esophageal carcinoma have been devised.

Other investigative work within the department of surgery includes the following:

1. Improvement in the technique of repair of pharyngeal diverticulum.

2. Technique for wider biopsy of breast lesions and particularly of the duct system. The relationship of fibrocystic disease of the breast to cancer has been the subject of special interest.

3. A review of all cases of acute intestinal obstruction at Jefferson Hos-
pital during the past 15 years has been made, to evaluate the effect of newer adjuncts in pre- and postoperative care, as well as improved methods of anesthesia, on the mortality rates.

4. Surgical alleviation of portal hypertension by portacaval anastomosis or splenorenal shunt operations.

5. The etiology of varicose veins has been investigated by gross cadaver dissection and by histologic study of saphenofemoral junctions removed at autopsy.

6. Improvements in the techniques of blood vessel visualization by roentgenologic means (angiography) are under investigation. This includes not only venography and arteriography, but abdominal aortography and angiocardiography with use of the seriograph pictured in the January issue of the Bulletin.

7. The problems in the clinical management of patients with thromboembolism are under investigation.

8. The surgical aspects of 75 cases of Meckel’s diverticulum encountered at Jefferson Hospital have been analyzed for presentation as an exhibit at the forthcoming meeting of the Pennsylvania State Medical Society.

9. The clinical problem of acute pancreatitis is under investigation from the standpoint of earlier diagnosis and improved surgical treatment of the complications.

10. Improvements in anesthesia, such as use of continuous spinal
anesthesia, curare, and controlled respirations for upper abdominal and thoracic operations, are under continued investigation and analysis.

11. The tumor clinic is investigating the effect of chemotherapy in the treatment of cancer. It has also rendered invaluable aid in the follow-up study of cancer patients.

12. The problem of achalasia is under clinical investigation in collaboration with the department of Bronchoscopy and Otolaryngology.

13. The division of proctology is investigating the problem of ulcerative colitis, with particular reference to its treatment by intestinal extracts. The problem of pruritis ani is also under intensive investigation at the present time.

14. The division of plastic and reconstructive surgery has devised a new machine for skin grafting which simplifies the procedure and gives extraordinary results. The machine has proven its versatility in a large series of skin grafting cases, and has been found extremely useful in burn cases in which large areas of skin have been lost.

15. The research activities of the neurosurgical division were described in the January issue of the Bulletin.

The investigative work just outlined represents only a broad highlighting of the activities within the department. To mention the individual names of the investigators might add too much emphasis to some, with slight to others. All members of the teaching staff are engaged in some form of research, whether it be purely clinical or supplemented with experimental work in the laboratory. A list of the published articles from the department in 1949 appears in the March issue of the Bulletin.

ALUMNI PLACEMENT SERVICE

For some time the Executive Committee of the Alumni Association of Jefferson Hospital has been formulating an Alumni Placement Service. This service is now being provided to our alumni, and it is hoped that frequent use will be made of it. The purpose of this service is (1) to aid our alumni in securing residencies, fellowships and positions in private practice, institutions or industry, and (2) to assist our alumni in securing trained and qualified Jefferson graduates to fill positions or vacancies in general practice or the specialties.

A central agency has been established in the Alumni office to correlate requests from individuals for information or positions. All inquiries received at Jefferson will be turned over to this bureau, and it is requested that all future correspondence from our alumni concerning this matter be sent directly to the Alumni Placement Service, Jefferson Medical College, 1025 Walnut Street, Philadelphia 7, Pa.

Listings of positions available or desired should include (1) type of physician wanted (general practitioner, specialist, diplomate, resident, etc.); (2) type of position desired or to be filled; and (3) whom to write for further information.

The function of this service will be that of a clearing house so that interested individuals can be placed in contact with each other. The use of this service is voluntary, and there will be no attempt on the part of this agency to fill a vacancy or supply an alumnus for any type of practice. Arrangements for such placement must be a personal matter, by the interested parties, and definite commitments made by them.

The Placement Service will handle correspondence necessary for the listing and bringing interested individuals in contact with each other. It assumes no responsibility, and neither does it endorse or guarantee any of the listings.

At frequent intervals positions available will be published in the Alumni Bulletin. No specific names will be published in the Bulletin, but further information can be secured from The Alumni Placement Service.

POSITIONS AVAILABLE

The Black Hills Ordnance Depot located at Igloo, S. D., is interested in securing a civilian physician. The practice is largely general in nature and includes medicine, obstetrics, radiology, minor surgery and out-patient service.
The Firestone Tire & Rubber Co. would like to engage two men for their hospital staff in Liberia, West Africa. One doctor would work as a general practitioner while the other would devote most of his time to major surgery. The hospital is modern and consists of 102 beds with usually five doctors in attendance. The contract is for a period of 2 years with home and transportation furnished along with automobile, recreational facilities and a substantial salary.

The Mercer Sanitarium, Mercer, Pa., is desirous of obtaining a physician to fill a vacancy on the medical staff; the nature of the work is general medical. The position could be handled by a young man who is just beginning practice, or it might appeal to an older man who might need more leisure time, or relief from the pressure of an active private practice. In addition to the staff position an opportunity for private practice could be arranged if desired.

Wanted: Physician to practice from June 15th to September 15th in combination with vacation at Eaglesmere, Pa.; summer population around 2500. Must reside in locality for the full 3 months, with professional activity taking up about \( \frac{1}{2} \) time. Seasoned active physician desired.

*General Practice:*

The town of Bramwell, W. Va., serving a population of about 4000 people desires a young doctor.

Retiring from practice in Bradford, Pa., physician leaves a vacancy in this locality. House with office available.

General practitioner desired in the towns of Franklinville and Cedar Falls, N. C. There is also a need for a general physician in the towns of Catawba and Claremont, N. C.

General practitioner desired in farming community of south central Pennsylvania.

Position available in Bigler, Clearfield County, Pa., with a drawing population of 12,000-15,000. Doctor’s quarters with combination office, waiting room and garage provided rent free for one year.

General practice vacancy in Carlisle, Pa. Office space available at site of previous physician's office.

Position vacancy in Selbyville, Del.
Opening in general practice at Frenchtown, N. J.

Craig, on the west coast of Alaska, needs a physician. Community depends upon salmon canneries, fish buying and logging. Local hospital has been started.

Vacancy in general practice at Indian River City, Fla., with a drawing population of around 10,000.

Ophthalmology and/or Otolaryngology:

The staff of the Lewistown Hospital, Lewistown, Pa., is interested in having a man certified in ophthalmology and otolaryngology locate in Lewistown. If not certified in both specialties they would prefer board certification in otolaryngology.

Opening for ophthalmologist, diplomate or Board eligible as associate in private practice in Anderson, S. C.

Group clinic position available for a certified ophthalmologist or one qualified and eligible for Board certification in Madison, Wis.

Well qualified otolaryngologist is desired in Evansville, Ind., to join office of three men, well established in eye, ear, nose and throat work.

Group clinic position available for young otolaryngologist with Board certification or equivalent training in Marsh Field, Wis.

Veterans Hospital of Dayton, Ohio, is desirous of obtaining a full-time certified resident ophthalmologist. Hospital contains 750 beds and is affiliated with the Medical College of the University of Cincinnati.

The Hatfield Research Fellowship in Urology is being established at the Jefferson Medical College and Hospital in the immediate future. This Fellowship can be filled by a Jefferson Alumnus. The position will carry a stipend of approximately $100.00 per month. Because of the urgency of filling this position, interested alumni will please contact Dr. David M. Davis, Professor of Urology, immediately.

Marshall College, Huntington 1, West Virginia, is interested in employing a full-time Director of Student Health, at a substantial salary. In addition to the salary there will be provided a small apartment close to the health clinic.
"Homenaje a Finlay" (Honor to Finlay) is inscribed on two new postage stamps just issued by Panama. They pay tribute to Dr. Carlos Juan Finlay ('65), Cuban physician who first suggested the theory of propagation of yellow fever by means of the mosquito.

A two centesimos stamp carries the portrait of Dr. Finlay. A five centesimos stamp pictures *Aedes aegypti*, the mosquito which transmits yellow fever.

Dr. Finlay, son of a doctor, was born in Puerto Principe, Cuba, December 3, 1833. He received his preliminary education in Rouen, France. He was graduated from Jefferson Medical College in 1865.

He began his practice in Havana. In 1881, he promulgated his theory that a mosquito was the means whereby yellow fever was conveyed from person to person. His articles in support of this theory appeared in medical journals of the world in succeeding years, but they were not regarded seriously. Nevertheless, he persisted.

After the withdrawal of United States troops from Cuba in 1920, Dr. Finlay succeeded Dr. Gorgas as chief health officer of Cuba. Later, he retired on a pension from the Cuban government. He died in Havana, August 20, 1915, at the age of 81.

In chronicling his death, The Journal of the American Medical Association of August 28, 1915, said: "Dr. Finlay was an enthusiast, thoughtful and kindly. He lacked the genius for self-exploitation and having established his doctrine, modestly lived on with no thought of further recognition."
I KNEW HIM

When I look about this auditorium and see so many persons on the younger side of life, I feel somewhat like a primeval medical patriarch.

The supportive evidence is that I was graduated in medicine in 1888.

Early on November 1st of that year, 61 years and 10 days ago, I left my home to assume my work of resident physician, as we were then called. The term was 15 months. There were 16 resident physicians.

Blockley was gas lighted. There was but one telephone in the institution and that was outside of Superintendent George P. Romey's office.

The characteristic Blockley odors of that era were much in evidence and these odors were not exactly of the geranium type.

Dr. Osler was a Chief at that time but went to Johns Hopkins the next year. Looking backward through my little odyssey of a long life—one of my great satisfactions is that—I knew Osler.

He seldom missed a day at the hospital, he spent a large part of the time in the "post" room, since he was greatly interested in pathology, thus we saw much of him.

He was about average height, rather slender but withal quite well built, quite dark complexioned, deep brown eyes, hair black as was his rather big and drooping mustache.

He seemed to be rather serious but not solemn, for he had a fine and subtle sense of humor.

Dr. Llewellys F. Barker in his book, "Time and the Physician," tells how Dr. Osler used jokingly to say that ⅔ of the women of the first class in the Medical School of Johns Hopkins married a professor, ⅓ entered practice and ⅓ entered Christian Science.

There were but three women in the class.

He delighted to get off barbless quips with little or no change of countenance. He was not above playing jokes on his intimate friends.

Never did I hear him utter an unkind or an unclean word.

In my early "post" experience, aside from the attendant, Dr. Osler and I were alone in the room.

He was examining a specimen on his side of the table. I was on the other side trying to open the chambers of the heart without doing violence to the valves and was not succeeding too well. I saw he was eyeing me closely. Finally he could stand it no longer and said, not unkindly—"Boy, Boy, what would Virchow say if he could see you?"

At that time Dr. Osler was very much interested in pneumonia and after all these years I can visualize him seated by the autopsy table cutting a thin section from a portion of hepatized lung, turn it over in his hand, pull the edge of the knife in a scraping way toward him and as the bubbles of air followed the knife, I can hear him say, "Fine, fine fine."

He called pneumonia, the old man's friend, since so many elderly persons contract it in one form or another and usually pass out of life rather
speedily and painlessly. Pneumonia with complications caused his death in his 71st year.

He taught his students in the ward and not in a didactic fashion.

His examination of the patient was most thorough and his diagnostic acumen was extraordinary, despite elemental, laboratory diagnostic aids.

His patients were treated as human beings and not as case or ward numbers.

He had a light, airy and often prankish way with his patients. His therapy was simple in those days, long before the modern miracle drugs. Ofentimes he would prescribe a simple tonic, like Tincture of Nux Vomica but with “plenty of time in divided doses,” so as to give Nature a full opportunity to help effect a cure.

He was a humanist.

He practiced that which is recorded in Holy Writ: “Pleasant words are as an honeycomb, sweet to the soul and health to the bones.” Proverbs 16:24.

He knew that to have a friend one must be one and that “the paths of kindness are paved with happiness.”

A story is told by his cousin who was with him at the time and this story is to be found in the book entitled, “The Great Physician,” by Edith Gettings Reid.

It was in his McGill days. The day was cold and as they walked along the street he was accosted by an old and seedy looking man who asked him for money. The Doctor said, with a laugh, “You old rascal, why should I give you money to drink yourself to death?”

The beggar replied, “Well, Sir, it lightens the road going.”

Dr. Osler said, the only thing about you worth while is your hobnailed liver. However, he gave him some silver with the advice to get some soup before starting in on gin.

The doctor looked after him pityingly and noticing he had no overcoat he ran after the beggar and said, “Here, take this, I have a father of my own,” and he gave him his overcoat, his only one, and said, “You may drink yourself to death but I cannot let you freeze to death.”

Dr. Osler told him not to forget to leave him his liver.

Two weeks later the doctor had the liver and his overcoat. After the latter was thoroughly cleaned and disinfected it was again used by the doctor.

Buddha, who lived 600 years B.C., a great teacher whatever else he was, millions living today worship him as a Messiah, believed that every man carried a bit of heaven in him and when he gave it to the world it came back in friendship.

Dr. Osler had a great bit of heaven in him and I am sure when his end came as he passed over the border the trumpets sounded triumphantly on the other shore as the soul of this incomparable Master Physician and great lover of mankind winged its way to Paradise.

THE 125TH ANNIVERSARY

Previous issues of the Alumni Bulletin have reported the events that are planned in celebration of this important anniversary. Plans are being made for a large attendance at the alumni affairs, especially the Alumni Dinner at the Bellevue-Stratford Hotel on the evening of June 8th.

Alumni may be interested also in some of the plans for publicity and public relations during this period of public attention toward Jefferson. An outline of the program follows:

**Events**

1. (Nurses' Graduation, Hospital—May 4)
2. Luncheon for Press—Week of May 15
3. Newcomen Society Luncheon—May 25
4. Alumni Clinics—June 6, 7, and 8
5. Dean's Luncheon and Reception—June 8
6. Class Reunions—June 7 and 8
7. Alumni Day and Dinner—June 8
8. Commencement—June 9

**Press and Publications**

**Press**

- Feature Story on George McClellan-John McCullough, Philadelphia, Sunday, May 21
- Spot News Story on Each Event
- Feature Story on Jefferson (possibly Sunday, June 4, Philadelphia Bulletin)
- Editorials and Columnists
- Associated Press—State wire
- Story to home town papers of every graduate

**Periodicals**

- Full Page—Philadelphia Medicine (County Medical Society)
- Feature in Journal of General Practice
- Feature in MD—Journal for Internes and Students
- A.M.A. Journal and Other Medical Journals
- State Medical Journal
- "Philadelphia"—story in Chamber of Commerce Magazine
- Philadelphia Forum—story
- Company House Organs—Example: The Extract—Sharp and Dohme
- Community Papers

**Radio and Television**

- Dramatization of Dr. McClellan's Founding of Jefferson—"Within our Gates" Program—Sunday, June 4, 11:30 A.M.—WFIL-560 on dial
- Commentary on Jefferson by certain radio personalities
- Fidelity-Philadelphia Trust Program—honoring institutions
- Governor Alfred E. Driscoll—TV—from Commencement Scene
- Roy Neal Program—Corn Exchange Bank, Special program interview

**Display**

- Exhibit for Alumni in College
- 125th Anniversary to appear on letterheads and publications of the College

**Special Printing**

- Newcomen Society Booklet mailed to each graduate
- 1950 Clinic—125th Anniversary Edition
THE COLLEGE LIBRARY

The past year has marked several changes of note in the College Library; changes of personnel, techniques and increased holdings that show this year to be one of conspicuous progress.

Mr. Joseph J. Wilson, the librarian for thirty-two years, was retired with the close of the last school year. Mr. Wilson saw many changes in the library and was responsible both for its growth over a long period of time and for the planning of the library quarters in the present building. He will long be remembered for his service to the college and for his friendly help to the many students and alumni with whom he worked. The present librarian, for many years his assistant, desires that the same warm feeling with members of the Alumni Association will be maintained. New members of the library staff include Miss Adeline Redheffer as the Assistant Librarian, and Miss Helen A. Morrison and Miss Alice Bruce as Library Assistants.

A rather significant change in our program has been to increase our hours extensively. During the school year the library is now open continuously from 8:45 a.m. until 9:00 p.m. Monday through Friday and until 5:00 p.m. on Saturday. These added evening and Saturday afternoon hours have apparently met a need, for our attendance at these times has increased over the average attendance when the library was open but two evenings a week.

Current books have come to us from several sources as well as by purchase. The following medical publishers continue to contribute copies of their new books: Appleton-Century-Craft, The Blakiston Company, F. A. Davis Company, W. B. Saunders Company, C. V. Mosby Company and J. B. Lippincott Company. Gifts have also come to us from many of the Alumni and from staff members who have donated books of interest as well as from several who have published new books or editions, copies of which they have donated to the library. Books coming from these several sources make it possible for us to maintain a comprehensive and up-to-date collection.

During the past year the predominant increase in our acessions has been in the field of new periodical subscriptions. Ninety-two journal titles were added to our subscription list, bringing our number of periodicals regularly received to 476. Many of the new journals are the basic foreign periodicals in medicine, surgery, the specialties and basic sciences. Included in this list are fifteen sections of EXCEPTRTA MEDICA, the outstanding abstract journal for the broad field of medical literature.

During the year we have begun to publish a bimonthly book-list showing both the new books and periodicals added to our shelves. These lists have helped the faculty, staff and students to know of new publications and to realize that they are available in the library.

Two outstanding contributions received during the past year were a large collection of journals in the field of ophthalmology which was received from Doctor Charles R. Heed, and 418 volumes of bound journals and a number of unbound journals from the Jacob da Silva Solis-Cohen Collection of the Philadelphia Laryngological Society. These gifts helped us to complete back files of the important periodicals in the fields of ophthalmology and laryngology.
In order to make space in the reading room for the many new journals that will be coming to our library it has been necessary for us to shift some of our material. Many of the older monographs and texts are being retired to our stacks and the remaining books in the reading room will be consolidated to make space for many more bound periodicals on the first floor.

The members of the library staff desire to express their appreciation to the Administrative Staff of the College, the Library Committee and the many interested alumni and friends who have helped us in furthering our plans for the growth of the library.

ROBERT T. LENTZ,
Librarian.

ALUMNI ANNUAL GIVING
LOUIS H. CLERF, M.D., Chairman

The Second Annual Alumni Giving Drive will end at the Alumni Dinner on June 8th. The goal of $125,000 set by the Committee for our 125th Anniversary has not been met. The Class Agents have worked hard but there still remain a large number of Alumni who have not responded.

At this point 2,853 donors, or 47.6%, have contributed $99,513.10 to this year's Fund. At the same time last year $102,714.87 had been given by 3,029 graduates. Final totals last year were: 3,209 donors, or 54.2% of graduates giving $108,313.87.

Leading classes are:

Amount
1st—1933—Charles W. Semisch III ......................... $4,415
2nd—1908—Marshall C. Rumbaugh ........................... 4,072
3rd—1932—John C. Ullery ................................. 4,019

Number
1st—1942—J. Wallace Davis ............................... 103
2nd—1944—J—Edward J. Murphy ............................ 95
3rd—1935—Joseph L. Finn ................................. 90

Percent Participation
1st—1942—J. Wallace Davis ............................... 81.0%
2nd—1894—Col. Frederick H. Mills ......................... 79.0%
3rd—1937—Robert C. McElroy ............................ 68.4%

The needs of Jefferson still are as great as when Alumni giving was first inaugurated. They must be met if we are to carry on and maintain our reputation as a teaching institution. The needs are particularly urgent in the pre-clinical departments and these need your help.

If you have not contributed to the Second Alumni Giving drive get in touch with your Class Agent immediately and give. Don't let him down and don't forsake your Alma Mater.

CLASS REUNIONS

The Class of 1890 will hold its 60th Reunion at the Alumni Dinner on June 8th, at 7:00 P.M.

Dr. F. Kline Baker, Chairman

The Class of 1895 will hold its 55th Reunion at the Alumni Dinner on June 8th, at 7:00 P.M. The Chairman would like very much to have as many members present as possible. They will be notified if any further plans are made.

Dr. Julius Wolfson, Chairman

The Class of 1900 will hold its 50th Reunion at the Alumni Dinner on June 8th, at 7:00 P.M.

Dr. D. Randall MacCarroll
Dr. Silas E. Robinson | Co-Chairmen

The Class of 1905 will celebrate its 45th Reunion at a Luncheon at the Barclay Hotel, 18th & Locust Sts., June 8th at 1:00 P.M. Up to the present time about 20 class members have indicated that they will attend. Additional reservations may be made until June 5th.

Dr. Robert T. M. Donnelly, Chairman

The Class of 1906 is holding a Luncheon at the Bellevue-Stratford Hotel on June 8th at 1 P.M.

Dr. Fielding O. Lewis, Chairman

The Class of 1910 will hold a Luncheon on June 7th at 1 P.M. to celebrate its 40th Reunion. Members of the class will be informed at a later date where the Luncheon will be held. Thirty members are planning to attend.

Dr. John S. Fielden, Jr., Chairman

The Class of 1915 will meet for cocktails before the Annual Alumni Dinner on June 8th to celebrate its 35th Reunion.

Dr. Harold S. Davidson, Chairman

The Class of 1920 is planning numerous activities for its 30th Reunion. The Committee reports as follows:

“Acting as a reunion committee, we are planning a two-day affair that should prove attractive to all. On Wednesday, June 7th, on the day that Class Reunion Clinics are held in the morning at the Jefferson Hospital, we will gather in the mid-afternoon and be transported by bus to the Silver Lake Inn, New Jersey, not far from Philadelphia. This is an ideal spot for the first
day get-together with recreation before a fine dinner; floor show and music scheduled for the evening. Return by bus to Philadelphia at our convenience.

On Thursday, June 8th, after the Alumni Day Clinics at Jefferson, a luncheon party will be held at 1:30 P.M. at Lew Scheffey’s in Merion, where we got together in 1935 and 1940, having had a jolly time on both occasions. The afternoon entertainment there remains a surprise, but it will prepare all of us for the grand reunion dinner of the Alumni Association at the Bellevue-Stratford Hotel that same evening.

Arrangements will also be made for a supper party for the ladies who may accompany you. This will be at a nearby Country Club on Wednesday evening while we are celebrating at Silver Lake.”

Dr. Lewis C. Scheffey, Chairman

The Class of 1925 will celebrate its 25th Reunion at a Luncheon to be held on June 8th at 1:15 P.M. at the Union League.

Dr. Clyde M. Spangler, Chairman

The Class of 1930 has planned the following for its 20th Reunion:

June 7th: Cocktails and Lunch at the Philadelphia Country Club.
The recreational facilities of the Club will be used for the rest of the afternoon, including golf, swimming, etc.
Cocktails and dinner at 7:00 o'clock, Philadelphia Country Club.

June 8th: Cocktails before the Alumni Dinner at the Union League.

Dr. V. William Weakley, Chairman

The Class of 1935 has planned to celebrate its 15th Reunion with a Luncheon at the Warwick Hotel at 1 P.M., June 7th, and a Cocktail Party preceding the Alumni Dinner, 5 to 7 P.M., June 8th, place to be designated later.

Dr. John A. McCormick, Chairman

The Class of 1940 will celebrate its 10th Reunion with a Cocktail Party at Henri’s, 1330 Walnut St., Philadelphia, 4 to 7 P.M., June 8th.

Dr. Francis X. Bauer, Co-Chairmen

The Class of 1945 will hold a Cocktail Party at the Bellevue-Stratford Hotel preceding the Alumni Dinner on June 8th, 5:30 P.M. in the Green Room, to celebrate its 5th Reunion.

Dr. Francis J. Murphy, Chairman

COMMENCEMENT
JUNE 9th
12:00 Noon
AMERICAN ACADEMY OF MUSIC
HONORABLE ALFRED E. DRISCOLL
Governor of the State of New Jersey
will be the guest speaker
Considering the large number of graduates of Jefferson, there have been comparatively few of them who have joined the Public Health Service. The files from 1897-1948 show only 41 graduates of Jefferson on the rolls of the Public Health Service.

The Public Health Service is the oldest of the various departments of the government having to do with medical care.

It was organized more than 100 years ago for the treatment of the sailors of our Merchant Marine and was called the U. S. Marine Hospital Service. Its functions have been increased until now they cover practically the entire fields of Research, Prevention, Treatment and Education in Medicine.

Whereas, in its early days, the aim was to train officers to be all round medical men, the trend now is to train them in the various specialties of medicine, and among the officers of the Public Health Service are some of the foremost specialists in the various branches of medicine.

The following is the list of Jefferson Medical College graduates who have served the Public Health Service from 1897-1948.

Some of our graduates in the Public Health Service have attained considerable fame in the field of medicine. The following are the names of some of them.

Victor G. Heiser, Med. Director (Ret.), graduated 1897, served actively with the Public Health Service from 1898 to 1915 and then joined the Rockefeller Foundation.

He is one of the foremost Sanitarians and Hygienists in the world and the author of many scientific articles and of the best seller “The Odyssey of an American Doctor.”

Louis Schwartz, Med. Director (Ret.), graduated 1905, served actively from 1906 to 1947 when he was retired having reached 64 years. He attained prominence in the field of Industrial Dermatology and is the author of many scientific publications including two books “Occupational Diseases of the Skin” and “Cosmetics and Dermatitis.”

Dr. Schwartz is now in active practice in Washington, D. C. as a Consultant Dermatologist.

Vane M. Hoge, entered the Public Health Service in 1928 and is now Assistant Surgeon General of the P. H. S.

Robert L. Allen, Med. Director (Ret.), graduated 1913. He was Supervisor of all Quarantine Stations on the Mexican Border.

Karl Habel, Med. Director, graduated 1933. Now chief of the Laboratory of Infectious Diseases in the Nat. Institute of Health, Bethesda, Md.

John R. Murdock, Med. Director, graduated 1926, Was Assistant Director of the Pan American Sanitary Bureau.

William Nesbit, Med. Director, graduated 1926, now in charge of Marine Hospital, New Orleans, La.

Thurman H. Rose, Senior Surgeon, graduated 1929. Now Program Director, Hospital Survey and Construction, San Francisco, Calif.

Solomon Axelrod, Senior Surgeon (Reserve), graduated 1938. Now Assistant to Prof. of Med. Economics, University of Michigan.

The Public Health Service now offers an interesting career to young physicians who are scientific minded. The grades and salaries are the same as those of commissioned medical officers of the Army and Navy. More Jefferson graduates should seek to enter the Public Health Service.
THE JEFFERSON MEDICAL COLLEGE

CLINICAL AMPHITHEATRE — JEFFERSON HOSPITAL
EX-INTERNES’ AND EX-RESIDENTS’ DAY

JUNE 6, 1950

10:00 A. M. Dr. Joseph Ricchiuti, Pottsville, Pa.
Reactions in Penicillin Therapy.

Medical Aspects of Atomic Energy.

11:15 A.M. DR. LOUIS H. CLERF
The Cytological Diagnosis of Bronchogenic Carcinoma.

11:30 A.M. DR. JOHN H. GIBBON, JR.
Cancer of the Lung.

11:45 A.M. DR. LEWIS C. SCHEFFEY
Present-Day Status of Uterine Cancer Therapy at Jefferson.

12:00 Noon. DR. THOMAS A. SHALLOW
Carcinoma of the Right and Left Colon.

12:15 P.M. DR. PAUL C. SWENSON

12:30 P.M. DR. HOBART A. REIMANN
Case Presentation.

1:00 P.M. DEAN'S LUNCHEON—McClellan Hall, Second floor of the College.

7:00 P.M. ANNUAL ALUMNI BANQUET—Bellevue-Stratford Hotel, Broad and Walnut Streets.

JUNE 9—COMMENCEMENT DAY

12:00 Noon. Commencement exercises of the Class of 1950, at the Academy of Music, Broad and Locust Streets.
BRANCH CHAPTER NEWS

On April 26, 1949, the New York Chapter of the Alumni Association held a dinner meeting in the Officers’ Club at the Navy Yard, New York. Dr. Peter A. Herbut and Mr. Paul F. Rake were guest speakers. Twenty-four alumni attended.

President .................. Thomas F. Duhigg ’02
Secretary-Treasurer ............ Adolph J. Musante ’23

The Annual Session of the North Carolina State Medical Society was held at Pinehurst, N. C., May 9th to 11th, 1949 during which time the Jefferson Alumni held its Annual Meeting and Luncheon at the Carolina Hotel. About 50 members were present. Dr. George Willauer of the Jefferson Medical College attended. Officers were elected as follows:

President .................. Edward W. Schoenheit ’20
Secretary-Treasurer ............ Seba L. Whitehead ’21

On May 18, 1949, a meeting of the Northern New Jersey Chapter was held at the Essex Club in Newark, N. J. There were 27 alumni present. The faculty guests were Dr. Adolph A. Walkling and Dr. John J. O’Keefe. Officers were elected for the year as follows:

President .................. Joseph W. Hurff ’13
Secretary-Treasurer ............ Frederick C. DeTroia ’35

On September 28, 1949, the Southwestern Pennsylvania Chapter held a dinner at the Duquesne Club in Pittsburgh during the Medical Society of the State of Pennsylvania Convention. This was attended by 76 Jeffersonians. Dr. John A. O’Donnell, First Vice-President of the Chapter, presided. He introduced Dr. Wm. Harvey Perkins, Dean, who talked on the problems of admitting new students to Jefferson, and on the recent appointments to the faculty. Dr. Perkins read a letter of greetings to the Alumni from Vice-Admiral James L. Kauffman, U.S.N. (Ret.), President of Jefferson Medical College. Dr. Thaddeus L. Montgomery, President of the Alumni Association brought a message from the Alumni Association. Dr. Francis Borzell, Speaker of the House of Delegates of the American Medical Association, brought greetings from the A.M.A. Dr. W. Paul Havens, Assistant to the Dean, spoke a few words. Dr. Lowell A. Erf and Dr. Roy W. Mohler, also from Jefferson were present. There were no officers elected at this meeting. Dr. Philip J. Morgan, State Vice-President and Dr. Lester L. Bartlett, Chairman, were in charge of the arrangements for the dinner, and the evening was very much enjoyed by all present. The chairmen are to be congratulated.
On October 26, 1949, a meeting of the Northern New Jersey Chapter was held at the Essex Club, Newark, N. J., at which Drs. Peter A. Herbut and Thaddeus L. Montgomery spoke on the progress of The Jefferson Medical College. Thirty-five members of the alumni group and guests attended the meeting.

On December 16, 1949, the Puerto Rico Chapter had a meeting and social gathering. This meeting was held during the Puerto Rico Medical Association Convention December 14 to 18. Of the 32 Jefferson graduates practicing in Puerto Rico, the following were present:

Pablo Bonelli Gonzalez '06
Nicolas Sanabria '12
Armando Garcia Soltero '16
Hilario Caso '17
Calixto Rodriguez '17
Juan C. Rodriguez '18
Jenaro Barreras '18
Vicente Font-Suarez '19
Cesar Dominguez '20
Julio Palmieri '20
Jose Rodriguez Pastor '21
Manuel M. Maeso '21
Mario C. Fernandez '24
Enrique C. Koppisch '27
Juan A. Pons '28
Antonio Ramos Oller '36
Enrique L. Matta, Jr. '40
Frank J. Veve '42
Armando Garcia Castillo '43
Juan E. Veve '49

On January 10, 1950, our Alumni in Honolulu organized a Chapter, with 25 Jefferson men in attendance.

Congratulations and all good wishes for a strong and active Chapter go to this newly organized group.

On Sunday, February 12, 1950, the Puerto Rico Alumni Chapter held an informal reunion in a home in the midst of the mountains of Bayamon. The wives and children joined with the members as guests of Dr. Juan C. Rodriguez '18 and Dr. Antonio Ramos Oller '36. Those in attendance were:

Jose S. Belaval '04
Enrique Matta '12
Armando Garcia Soltero '16
Jenaro Barreras '18
Vicente Font-Suarez '19
Cesar Dominguez '20
Antonio Navas '20
Jose Rodriguez Pastor '21
Manuel Maeso '21
Enrique L. Matta, Jr. '40
Armando Garcia Castillo '43

The following Resolutions were approved:

Dr. J. Rodriguez Pastor was appointed to prepare for the next meeting which will be held in June, a code of rules that will govern future meetings.
During the next regular meeting to be held in December during the celebration of the Annual Meeting of the Puerto Rico Medical Association, a new Governing Board will be selected.

It was decided to meet informally in June after Dr. C. Dominguez returns from the 30th reunion of his class at Jefferson. At that time the Chapter will be the guest of Dr. J. Barreras and Dr. C. Dominguez.

Inasmuch as most of the members belong to the different sections of the Puerto Rico Medical Association where scientific meetings are held every month for the benefit of their members, it was decided that the Alumni Association meetings would be of a social nature only.

On May 3, 1950, the North Carolina Chapter will hold a luncheon meeting at Pinehurst, N. C. during the State Medical Meeting May 1st to 3rd. Dr. Anthony F. DePalma from The Jefferson Medical College faculty will be the guest speaker.

On May 3, 1950, the New York Chapter will hold a dinner at the New York Yacht Club, 37 W. 44th St., New York City, at 6:30 P.M. The faculty guest from Jefferson will be Dr. Thaddeus L. Montgomery.

On October 15, 1950, the Southwestern Pennsylvania Chapter will hold a meeting in Greensburg, Pa.

Note: It is important that Chapter meetings and changes in officers be reported to the Alumni Office as soon as possible so that they may be included in reports during the year and incorporated in the Alumni Bulletin Chapter news.

Other Meetings

On June 2, 1949, Alumni Day, the Dean entertained at Luncheon in McClellan Hall in the College following Clinics. All those who attended had a most enjoyable time and expressed a wish that this would be an annual event.

On June 8, 1949 during the American Medical Association Convention June 6 to 10, the Alumni Association held a Buffet Supper and Smoker at 6:30 in the American Room of the Hotel Traymore, Atlantic City, N. J., of which Dr. David B. Allman was in charge. Dr. Allman gave to the Alumni Association a check for $105.33, which was the amount left in the Treasury after the expenses had been met. We are especially grateful to Dr. Allman for his effort in making this meeting a very successful one.
The Eighth District Medical Society held a meeting in Asheboro, N. C. April 5, 1950. At the Scientific Session Dr. H. Holt Bradshaw '27, Professor of Surgery, Bowman Gray School of Medicine, Winston-Salem, N. C., and Dr. Ralph M. Tyson '15, Director of the Department of Preventive Medicine, St. Christopher's Hospital for Children, Philadelphia, held interesting discussions.

The Medical Society of the State of Pennsylvania will hold its Convention in Philadelphia October 15 to 19, 1950. Alumni activities in connection with this meeting will be announced at a later date.

**METHODIST HOSPITAL AFFILIATES WITH JEFFERSON HOSPITAL**

Methodist Episcopal Hospital will affiliate with Jefferson Medical College and Medical Center, it was announced jointly by officials of the two institutions recently.

Although there will be coordination of activities, each institution will maintain complete autonomy, with Methodist Episcopal Hospital maintaining its standing as a sectarian institution and its relation to and support by the Methodist Church.

Under the affiliation agreement signed by the two institutions, Methodist Hospital will make its ward facilities and staff available for clinical teaching purposes by The Jefferson Medical College.

Jefferson will assist Methodist Hospital in helping to provide a more complete house staff of physicians and in enlarging the medical staff with more attention to specialization. Five medical heads of departments at Methodist and eight other staff physicians are on the present faculty and staff at Jefferson.

The two institutions would plan for the assigning of small blocks of undergraduate Jefferson medical students to Methodist Hospital for clinical clerkships and routine training in taking histories and in management of patients under supervision. Certain cooperation between the two schools of nursing might be planned for the future.

Methodist Hospital has noted that it is not feasible to maintain all of the specialized facilities that a very large teaching hospital must have. In such cases it would utilize the facilities or personnel of Jefferson Hospital, saving the cost of expensive duplication of equipment and facilities.

The agreement provides for a joint committee composed of three members of each board to supervise the cooperative program to be instituted promptly.
1880—William H. Ziegler has been ill, but we are happy to hear that he is improving daily.

1888—John L. Bower writes, “Fortunately age is not measured in years, but in ability to have interest in our surroundings.” He says he is not old enough to brag about his age since he is just nearing 85.

1890—A. G. Horine writes that he has “been off the job for 10 years.”
W. B. Keene has not practiced medicine for two years.
Ludwig Loeb was a founder of Mt. Sinai Hospital, Philadelphia and for many years was chief surgeon of that hospital.

1896—Harry W. Fleck retired from practice ten years ago due to illness.
M. J. Karpeles writes that he is still active.
J. A. Moenig tells us that he has not been a practicing physician since the end of World War I. He spends most of his time traveling.
G. F. Dandios still practices medicine.

1898—W. W. Crawford had operated his own infirmary for 45 years, but has retired from practice after having lived a very active life as a surgeon.
He was a Lt. Col. in World War I and Chief Surgeon to Base Hospital #79 in France.
E. A. Nicodemus has retired from practice. He will be 80 in May and expects to attend the June Dinner.

1901—E. W. Diggett, England, is retired from practice. He enjoys his cabin cruiser.
S. H. Post spent some months in California, Mexico and Death Valley. He is a horse fancier.

1902—E. W. Collins recently celebrated a birthday. He is spry and active as a youngster of 50, we are told.

1903—Quoting from a letter recently received, “I am glad to be able to have even a tiny part in perpetuating the school which gave to the world of suffering humanity a man of such worth.”

1905—A. J. Orenstein was a recent visitor at the College. It was Dr. Orenstein’s first visit to the country in 37 years. He was impressed with the way Jefferson had grown.

1906—R. C. Adams of Bird Island, Minn. has retired from practice after 43 years. Sports are his favorite hobby. Dr. and Mrs. Adams have just recently celebrated their 40th wedding anniversary.

1908—F. L. Burks left for a trip in the Mediterranean and Near East. He probably will make a trip around the world before returning home.
H. S. Kice has been ill for some months at his home.
R. T. Killips has been ill for several years and is confined to his bed.

1910—H. E. Carruth has been made Assistant Professor of Otolaryngology at the Oregon School of Medicine.

1911—H. L. Foss is Surgeon in Chief and Chief of Staff of the Geisinger Memorial Hospital, Danville, Pa.
1912—Louis H. Clerf was presented with the La Salle College Alumni Association’s highest award, the Signum Fidei Medal, on March 26th.

J. M. Shields has resigned as Professor of Ophthalmology at the University of Colorado, but remains in private practice.

1913—Cleon Colby of Exeter, N. H., has retired from practice.

A. W. Gottshall, of West Chester, Pa., is now serving on the Staff of the Delaware State Hospital, Farmhurst, Del.

Col. F. E. Weatherby, retired from the Army, is now serving on the Staff of the State Hospital, Wernersville, Pa.

Jacob Walker is retired and now lives in Margate, N. J.

1916—W. T. Palchanis retired from active practice on Jan. 1, 1947 to accept a full-time appointment as Assistant Professor of Clinical Medicine at Ohio State University in charge of Tuberculosis Control Work at the University Health Service. He was also appointed a member of the Department of Preventive Medicine in the College of Medicine of Ohio State University in 1949.

He was elected Secretary-Treasurer of the Ohio College Health Association, the Ohio Section of the American College Health Association for the year 1949-50.

You will recall “Hank” Wallhauser who has had a very colorful career, but due to illness was forced to retire nearly three years ago and since then had been living on the Eastern Shore of Maryland. “Hank” passed away the early part of April and his funeral was held in Newark.

1918—J. Barreras has contributed to the Alumni Annual Giving Fund for two of his classmates.

Paul B. Reisinger has again contributed to the Alumni Annual Giving Fund in memory of two of his classmates, Henry K. Seelaus and James C. Harmon.

1920—Cesar Dominguez is looking forward to attending the 30th reunion of his class in June.

W. H. Parsons of Vicksburg, Miss., and two of his assistants have turned over to the Lutheran Layman’s League, his fine 100 room hospital, in Vicksburg. The gift is being made by Dr. Parsons outright.

1921—F. H. Krusen is Head of the Department of Physical Medicine at Mayo Clinic.

R. W. Mohler received a citation on March 30, 1950 for being a member of the Board of Directors of the Pennsylvania Blue Shield for the past six years at the tenth anniversary meeting of the organization. He has been on the Executive Committee for the past four years.

1926—Adrian E. Davis was recently appointed a member of the Health Commission of Akron, Ohio. He is one of three Akron doctors who were honored by the American Medical Association in 1941 for their research on osteomyelitis.

1927—Frank L. Bryant, Shreveport, La., is attending the Tricological and Bronchoscopic meeting in San Francisco during the month of May.

F. L. Kneibert is putting on an extension program for the Kneibert Clinic in Poplar Bluff, Mo.

Robert B. Nye, Philadelphia, Pa., participated in the Annual Convention of the American College of Physicians in Boston, Mass., from April 17th to 21st.

Frank Turchik, Bridgeport, Conn., is attending the Tricological and Bronchoscopic meeting in San Francisco during the month of May.

Joshua N. Zimskind of Trenton, N. J., writes that his two sons are now in college. One is a student at Rutgers, while the other one attends Princeton.

1928—Robert A. Matthews has been appointed Professor of Psychiatry and head of the Department of Neuropsychiatry at the Louisiana State University School of Medicine, New Orleans, La.

H. S. Murphy was elected President of the Union County Medical Society at its annual meeting on April 13, 1950, at Muhlenberg Hospital, Plainfield, N. J.
1929—Lt. Col. William C. Burry, Medical Corps, is director of Professional Services of the U. S. Army of the Caribbean.

D. D. Dunn has opened his office for the practice of general surgery at 230 West 8th St. in Erie, Pa.

Arthur Wertheim is an instructor in the Department of Medicine in Long Island College of Medicine.

1930—A. L. Ormond is doing general practice in Hickory, N. C. with special reference to chest diseases.

1931—George K. Tyau was renominated State Vice-President of Hawaii.

1932—F. D. Maloney and Miss Isabelle Robertson were married in the St. Brigid's Roman Catholic Church in Westbury, Conn. on February 11, 1950. Dr. and Mrs. Maloney reside at 160 Hilton Ave., Hempstead, L. I.

S. B. Rosenbluth has been appointed Assistant Clinical Professor of Medicine at the New York Medical College.

1934—James A. Glenn, Jr., Watertown, Mass. has been appointed Assistant in Radiology at the Harvard Medical School, it was recently announced by Dean George P. Berry.

1935—Charley J. Smyth is Assistant Director of the Graduate and Post-Graduate Medical Education Department at the University Colorado School of Medicine.

1936—P. M. L. Forsberg is practicing in Concord, N. H. He practices internal medicine. Recently he was made Medical Director for the United Life and Accident Insurance Company.

1940—F. A. Dickerman is a specialist in Ophthalmology in Manchester, N. H.

D. K. Webster is doing Orthopedic Surgery in Manchester, N. H. He teaches Orthopedic Surgery to the Occupational Therapy Classes of the University of New Hampshire. He also commands the 310th Station Hospital ORC.

1941—Howard Possner, who had a busy practice in Canton, Ohio, has been quite ill, but is much improved.

1943—Harry Armitage is a surgical resident at the Robert Packer Hospital, Sayre, Pa.

F. R. Kinsey has been appointed radiologist of the Lewistown, Pa. Hospital.

A. E. Hamburg was awarded the Master of Science Degree (Orthopedics) at the State University of Iowa.

J-44—Charles H. Edwards and Miss Betty Genevieve Shea were married at the Little Church Around the Corner on March 11th. Dr. Edwards is a resident at Halloran V. A. Hospital.

Robert McLemore finishes his residency the first of July.

John A. Martin, Boston, Mass. has been appointed Research Fellow in Radiology at the Harvard Medical School, Dean George P. Berry announced recently.

Joseph O'Hanlan is hoping to open practice of surgery in Waynesboro, Va. in the very near future.

S-44—James Beebe, Jr. is in his fifth year of a surgical residency at the University of Pennsylvania. When he is finished he expects to take his Boards and return to practice at the Beebe Clinic.

James Berry has a surgical residency in Boston.
Robert Derham has a fellowship in surgery at the University of Vermont.
W. F. Dowdell is a resident in medicine at the Crile V. A. Hospital. He has one more year to go before completing his formal training.
W. D. Dunavant is in his third year of a surgical residency at the University of Tennessee.
Herbert Hunter is Chief of the ENT Service at the Crile V. A. Hospital.
R. M. Kerr expects to do some post-graduate work at the University of Pennsylvania in the Fall.
R. J. Lempke finishes his residency in June, then expects to do internal medicine in Jersey City.
C. L. Liggett is a resident in Gyn.-O.B. at Jefferson Davis Hospital, Houston, Texas.
John S. Monk is in general practice in Glen Rock, Pa.
W. A. Morton, Jr. has a urology residency at Guthrie Clinic at Sayre, Pa.
C. M. Murry writes, "things continue to go good with us here in the Deep South (Oxford, Miss.)."
R. E. Rich is now in his second year of surgical residency.
Stephen Sorokanich is in general practice in Old Forge, Pa.
J. T. Spencer writes, "My bronchoscopic work is increasing, with considerable foreign body work." He is in Charleston, W. Va.
Harold Wilf is concentrating on E.N.T. and will be ready for his Boards in 1952.

1945—Stephen F. Balshi is doing a general practice in Bethlehem, Pa.
J. C. Koch has a general practice in Pottsville, Pa.
J. H. Lee, Jr. is a resident in OB-GYN at the Naval Hospital in Boston.

1946—G. W. Anderson is expecting to come to Jefferson after July 1, 1950 for a residency in neurology.
G. A. Lemmon begins a surgical residency at Philadelphia General Hospital in July.
Duncan Walker is a resident at the Ear, Nose and Throat Hospital, Washington, D. C.
J. Donald Wentzler is still practicing in Alaska and likes it very much. His address is Box 489, Ketchikan, Alaska. He is Vice President of the Alumni Chapter of Alaska.

1949—James J. Rafter has been appointed to the Staff of The American Hospital, Paris, France.

B. B. Vincent Lyon, M.D. of Philadelphia, former Clinical Professor of Medicine at The Jefferson Medical College, on Saturday April 29th, was awarded the Julius Friedenwald Medal by the American Gastroenterological Association. This award is made each year for an outstanding contribution by a member of the Gastroenterological Association. It was awarded to Dr. Lyon this year for his original work in non-surgical drainage of the gall bladder. Dr. Henry L. Bockus of Graduate Hospital made the award at the meeting of the Association in Atlantic City.

Virgil H. Moon, M. D., Emeritus Professor of Pathology of The Jefferson Medical College has accepted an appointment as Professor of Pathology in the Medical Research Unit at the University of Miami. This post will provide Dr. Moon an opportunity to complete some investigations on shock which were interrupted by his retirement two years ago.
