Wishing you an "Old Fashioned" Merry Christmas and a New Year filled with happiness.
DEAN'S CHRISTMAS MESSAGE

My Dear Friends:

Would that I might play Santa Clause and bring to each of you that which you most desire. This, of course, is impractical; but I want you to know that I carry you in my thoughts and in my heart at this Season of Great Rejoicing throughout the World, and that I wish for you and yours a Most Joyous Christmas; filled with all the beauty of its original celebration and for a New Year with every happiness and the priceless jewel Peace. May I paraphrase Tiny Tim and say God Bless you Every One.

Cordially yours,

GEORGE A. BENNETT, M.D., Dean

GREETINGS

As President of the Alumni Association, I wish for you and yours a Very Merry Christmas and a Happy New Year.

We are mailing a Christmas issue, the fourth Bulletin to be published this year; we hope you will enjoy it and know that we at Jefferson are thinking of you.

You will be interested in learning that the dream of a new hospital is about to be realized. This will return to the College for its use the two floors which the Hospital had taken; one for the Obstetrical Division and the other for living quarters for residents and interns; thus giving the College much needed space for expansion.

We are looking forward to our FOURTH ANNUAL JEFFERSON GRADUATE ASSEMBLY January 30, 31st and February 1st, and hope that many of you are planning to attend. Our annual meeting and smoker will be held the evening of January 31. The business of the year and some changes in the by-laws will be taken up at this time.

The Fourth Annual Giving Fund drive is progressing well. Let us all make a special effort to send our contributions early; we must not forget we have made ourselves responsible for helping to support the pre-clinical departments.

Again all my personal good wishes for Christmas and the New Year.

Sincerely yours,

ADOLPH A. WALKLING

ADOLPH A. WALKLING, M.D., President

The second in a series of Personality Sketches of our distinguished teachers, who are retired from active service in the College.

LEIGHTON FRANCIS APPLMAN, M.D., '97

Dr. Appleman was born at Glenside, Pennsylvania on February 19, 1874 on the farm of his maternal grandfather, David Heist. He received his early education at the Cheltenham Public School, Friends Central High School, and Princeton Preparatory School. He entered Princeton University in 1892 and left in his Junior year to enter Jefferson Medical College, from which he was graduated in 1897.

After graduation he served an internship at the Reading General Hospital. The following year he opened an office in Philadelphia and became attached to the Out-patient Obstetrical Department of the Polyclinic Hospital on the service of Dr. Edward P. Davis. His connection with Obstetrics was short-lived. In 1899 he became associated with Dr. Hobart A. Hare in the Department of Therapeutics at the Jefferson Medical College—an association which was to continue until 1930. After Dr. Hare's death, Dr. Appleman served in the same capacity with Dr. E. Q. Thornton until 1934. Dr. Appleman was appointed Assistant Demonstrator in 1899 and was an Associate in Therapeutics at the time of his resignation in 1934.

During his association with Dr. Hare, Dr. Appleman acted as Assistant Editor of "Progressive Medicine" from 1911 to 1931. This periodical was edited by Dr. Hare and was published by Lea and Febiger.

Those Alumni who were graduated before 1934 will remember Dr. Appleman best for his concise course in Pharmacy and no doubt still retain the official English and Latin names and synonyms of all U. S. P. preparations: the composition of Basham's Mixture, Donovan's Solution, Spirit of Mindererus, Coxe's Hive Syrup,—and, "Gentlemen, that is not 'Hive's Coxe Syrup','" Dr. Appleman's favorite spoonerism.

Along with his work in Therapeutics he carried on an active practice in Ophthalmology beginning in 1899 when he was appointed Assistant to Dr. Howard F. Hansell in the Out-patient Department of the Polyclinic Hospital. He was Clinical Assistant to Dr. George E. deSchweinitz at the Jefferson Hospital from 1899 to 1902. He continued
the study of Ophthalmology under Doctors Hansell, Sweet and Reber in the Polyclinic Hospital until 1914. In this year he was appointed Associate Professor of Ophthalmology in the Graduate School of the University of Pennsylvania, and lectured on Ocular Therapeutics.

Dr. Appleman was appointed Attending Surgeon at Wills Hospital in 1924 and served until his retirement in 1939. He is still Consulting Surgeon at Wills. He served as Ophthalmologist to the Burd School, Douglas Memorial Hospital, and as Consulting Ophthalmologist to Mercy Hospital. Dr. Appleman served as Clerk to the Section on Ophthalmology of the College Physicians from 1926 to 1928, and was Chairman from 1932 to 1934.

Dr. Appleman is a Fellow of the College of Physicians of Philadelphia; Member of the American Ophthalmological Society; Member of the American Academy of Ophthalmology and Oto-laryngology; Member of Pennsylvania State Medical Society; Member of Philadelphia County Medical Society.

Dr. Appleman’s home is 308 S. 16th Street, Philadelphia, Pa. He will enjoy hearing from the Alumni and his former students.

**ANNUAL GIVING FOURTH ROLL CALL BEGINS**

**Theodore R. Fetter, M.D., Chairman**

The Fourth Annual Alumni Roll Call has recently gotten under way and as of December 7 there have been 295 contributions recorded for $11,358.85. First appeal letters of the Class Agents have only recently been sent to classmates and in the early returns the level of gifts holds up to prior years.

Leading at the start of the annual class reports are: First in Amount—Class of 1935 with Joseph L. Finn as Class Agent, $1,239; first in Percent, Class of 1894, Colonel Frederick H. Mills, Agent, 53.3%; first in Number, Class of 1924, Aaron Capper, Class Agent, 26 gifts.

We have a long way to go to exceed our total of last year, but we must concentrate on the necessity for maintaining the fine standards now established in the pre-clinical departments of the College. Again this year funds from the Roll Call will be used to support teaching salaries in the pre-clinical departments.

As will be noted in another article in this issue, members of the hospital staff and the teaching staff are in the midst of their drive in the campaign for the New Hospital Building. It is especially important that Alumni here and throughout the country maintain the excellent record of Alumni Annual Giving with its strength for the College.

As chairman of the Fund Committee, I am becoming concerned about the possible problem that may confront us in securing our usual high number of Alumni gifts, at the same time the American Medical Education Foundation is appealing to our graduates, and graduates of other colleges, for general financial support of the nation’s Medical Schools.

Our Annual Giving Committee gave this matter serious consideration last year and again recently. The problem becomes more specific in the light of the recent action of the Medical Society of the State of Pennsylvania in supporting a voluntary assessment of its members. It is my belief that certain other medical schools may be concerned about the same question.

Though the objectives of the A.M.E.F. in themselves are commendable it is our hope that a more harmonious method will be found for reducing competition from this quarter and preserving the vital direct support of Jefferson by her own graduates. We have taken steps in an attempt to clarify this situation.

Your Chairman has been given the privilege of stating the problem of Annual Giving Funds to the Committee on Hospital Service and Medical Education of the A.M.A. at the recent Meeting of the House of Delegates in conjunction with the Interim Clinical Session of the A.M.A. They were intensely interested in our presentation and agreed in principle with our contentions.

They assured us that an all out effort will be made to insure all the participants in the support of Medical Education will be given full publicity in the A.M.A. Journal. It was also agreed that all "earmarked" funds will be sent directly to the "designated" Medical School. In other words, an Alumnus of Jefferson who definitely marks on his card that his contribution is to be "earmarked" for Jefferson, the College will receive it. These "designated" funds, whatever the amount, will go to that School, irrespective of what the basic amount may be allocated to that School from "non-earmarked" funds. The chief point of contention is the lack of publicity which the non-contributor to the A.M.E.F. receives, yet he is a regular contributor to his Alumni Annual Giving Fund for the same purpose, namely to support medical education.

Many of the problems are expected to be ironed out in the near future. We will keep you informed. At present give to your own College through the means provided for you. Keep your Annual report in the Office Waiting Room so that your patients may recognize that you are a supporter of medical education despite the fact that your name may not be in the A.M.A. Journal.

I am confident that, as always, Jefferson’s Alumni will carry this year’s program to a successful conclusion.
CAMPAIGN FOR NEW HOSPITAL WING MOVES AHEAD

Although the campaign for the new hospital wing for Jefferson Medical College Hospital is only in its beginning phases, campaign leaders report good organization progress and a substantial basis for success.

The new 300-bed hospital wing, described in the last issue of the Alumni Bulletin, will cost approximately six million dollars, exclusive of the land which has been acquired by gift and by purchase. The new wing will contain seven floors of private and semi-private rooms, five floors of new technical facilities: Surgical operating suites, maternity delivery suites, heart station, X-ray, clinical, and blood laboratories—and a laundry and other mechanical facilities in the basement.

These laboratories and technical facilities will serve not only the new beds but all of the beds which will then be available in Jefferson Medical Center Hospitals.

Toward the $6,000,000 construction figure, Jefferson has institutional funds and credits amounting to $1,500,000 which can be applied to this project, thus bringing the goal down to $4,500,000 to be raised from the public, corporations, foundations, and other groups.

Jefferson alumni should be very gratified and appreciative to know that members of the board of trustees, through their contributions, have already contributed approximately one million dollars to show their own very strong leadership of the development program. Members of the board have also accepted key positions of responsibility in the campaign organization.

Another very encouraging sign for ultimate success is the enthusiastic and vigorous support now being given to the campaign by the medical staff of the hospital and the teaching staff of the college. Under the leadership of Dr. Thomas A. Shallow as chairman, the medical and teaching staff have accepted a quota of $675,000 or 15% of the total public goal. This phase of the campaign was launched at a breakfast for all members of the staff on Sunday morning, November 11, at the Benjamin Franklin Hotel. At the mid-way mark in the staff report meetings, the total now stands at $330,511. Some very generous contributions have been made by physicians on the staff and if the present rate is maintained as expected, the quota for this division should be attained by mid-December, the scheduled closing date.

Thus, Jefferson's "family" of trustees and staff would have contributed more than one-third of the campaign goal as a strong demonstration to the rest of the community and friends of Jefferson. It is highly important to the success of such a campaign in Philadelphia that the hospital campaign be opened in an atmosphere of success. By agreement with the United Fund, Community Chest, and the Hospital Planning Agency of Philadelphia, Jefferson was not permitted to advance its campaign organization and appeal prior to mid-December. The campaign will be developed progressively through six campaign divisions in the months from December to next June, with most of the intensive phases coming late next spring.

The campaign leadership already enrolled includes the following: chairman of the campaign is Revelle W. Brown, until recently president of the Reading Company, railroad executive and outstanding civic leader. J. Howard Pew of the Sun Oil Company, Jefferson trustee and noted benefactor, is honorary general chairman. Vincent P. McDevitt, vice president of Philadelphia Electric Company, is associated general chairman. Treasurer for the campaign is William F. Kurtz, president of the Pennsylvania Company for Banking and Trusts; chairman of the Rating Committee is James M. Large, Jefferson trustee and president of Tradesman's National Bank; and chairman of Public Relations is Al Paul Lefton, head of a leading Philadelphia advertising firm.

The Initial Gifts Division is headed by President James L. Kauffman as chairman and Percival E. Foerderer, chairman of the trustees as associate chairman. The Advance Gifts Division is headed by Edwin K. Daly as chairman; Brandon Barringer and D. Hayes Solis-Cohen as associate chairmen. All three are trustees of Jefferson. Chairman of the Commercial Division is J. Griffith Boardman, head of a leading insurance firm, assisted by Thomas A. Kennally, vice president of the Philco Corporation, J. Harold Poad of Moore Business Forms, and A. Dean Swift, Jr., of Central-Penn National Bank.

An outstanding member of Jefferson's Women's Board heads the Women's Division. Many alumni will know Mrs. P. Brooke Bland, who has been identified with Jefferson for many years through her husband, Dr. Bland, and her father, Dr. E. E. Montgomery. Mrs. Bland has as associate chairmen Mrs. J. Howard Pew, Mrs. G. Ruhland Rebmann, Jr., Mrs. Percival E. Foerderer, and Mrs. Norman F. S. Russell.

Assisting Dr. Shallow in the leadership of the Staff Division are Dean George A. Bennett, Drs. Bernard J. Alpers, Henry B. Decker, John T. Eads, John H. Gibbon, Jr., Harold W. Jones, Baldwin L. Keyes, William H. Kraemer, William T. Lemmon, Martin E. Rehfuss, Lewis C. Scheffey, and Paul C. Swenson. There are 33 captains and 91 workers in this division. A campaign soliciting organization of 1,650 leaders and solicitors will carry the appeal to the sources of Jefferson's potential support.

The Board of Trustees is so aware of the pressing need for the building and is confident enough of the ultimate campaign success that it has authorized construction to start in the very early spring of 1952.
REPORT OF THE ACTIVITIES OF THE DEPARTMENT OF MEDICINE

By the Committee in Charge

Following the resignation of Dr. Reimann, the Board of Trustees selected a Committee of four to administer the Department of Medicine until such time as a new professor or professors could be appointed. The Committee consists of Drs. Harold Jones, Garfield Duncan, Leandro M. Tocantins (executive secretary), and Martin E. Rehfuss (Chairman).

The Committee immediately took up the problem of filling the teaching assignments of the Magee Professor. The Medical Clinics, some 36 in number, throughout the year were tentatively filled by various members of the Department. It was deemed advisable to select the best men, regardless of rank, and assign to them this important phase of medical teaching. The Committee called together all those of the rank of assistant professor and above, some 24 men in number, representing all the specialties in medicine, and placed the plans for operation of the Department before them. There was free discussion and every man was willing to fulfill his assignment. In fact, to create no unfairness in these allotments, the Committee decided to call upon those men whose special fitness made them available for this purpose. Every physician called upon has agreed to do his part and, at present writing, the program is in full operation. It is our hope to have some of the well known teachers of other schools address our students so as to make them conversant with viewpoints other than our own. Some progress has been made in that direction and we have the promise of several representative teachers who will fill such assignments.

The second step was to fill the Monday and Tuesday grand ward rounds which were part of the duties of the professor of Medicine. At present writing such rounds have been arranged with various men acting as Chief Consultants for the day. The organization of the ward services was placed in the hands of Dr. Duncan who drew up a tentative schedule which was submitted to all those of professorial rank. It was agreed that we return to a rotating schedule of Ward Chiefs, who would be responsible not only for the care of the patients but also for assistance in teaching of students in the wards. It should be noted that not a single man refused to accept such responsibility. Such a system, which prevails in most teaching institutions, insures closer cooperation between the various men in the department and provides an outlet for their activities. All executive details and assignments have been placed in the hands of the executive secretary of the Committee, Dr. Tocantins, who occupies the offices of the Department on the 8th floor of the College. This arrangement has been
made by and with the consent of Dean Bennett. The Committee meets once weekly to dispose of pending matters affecting the conduct of the Department.

At present we have been lacking an adequate number of Internes, but we are hoping that this problem will be corrected within the next year. There is every indication that we shall have a full complement of Internes in the following year.

The present system is only a tentative one over the next few months and has been in operation since the first of November. Within two months any changes that seem desirable can be adjusted in order that we shall have effective service not only to patients but to students as well. We are grateful for the whole hearted cooperation we have received from those who have been willing to assume this work.

The Medical Department at Jefferson has 142 men and 8 affiliated institutions. This is a widespread domain, so organized as to present the largest possible teaching service to the medical student: At present we have:

a) Jefferson Hospital with 72 beds in three Wards and at least 8 separate out-patient departments representing the various specialties in Medicine. Each of these has a Chief and a Staff of competent men, many of them recognized specialists in their line.

b) Pennsylvania Hospital with 40 beds for teaching Jefferson students under the guidance of Drs. Duncan, Carey, MacNeal, Parkhurst and others.

c) Philadelphia General Hospital with 60 beds in the Medical Ward under the guidance of Drs. Loewenberg, Goldburgh, Kramer, Wirts and De Berardinis.

d) The Methodist Hospital with 43 teaching Medical Ward beds under the guidance of Drs. Robertson, Keeler and Lindquist.

e) The Germantown Hospital with 48 teaching Medical Ward beds under the guidance of Drs. Mays, Wilcox, McCune, Cahall, Truitt and others.

f) The Lankenau Hospital with 56 teaching Medical Ward beds under the guidance of Drs. Hartmann, Bortz, Pierson, Angelides and others.

g) The Cooper Hospital in Camden with 30 teaching ward beds under the guidance of Drs. Sharp, Murray, Crist, Snape, Principato and others.

h) Barton Memorial Hospital and i) White Haven Sanatorium, the former with 70 patients and the latter with 160; teaching material is abundant in both institutions but they are grossly understaffed. With the loss of Dr. Burgess Gordon to the Woman's Medical College, this branch of our Medical Department has been under the direction of Dr. Martin Sokoloff. In early conversations with the Board, Dr. Sokoloff called attention to the great need of more Staff appointments to both Institutions and the necessity for rotation of Residents through these Hospitals.

Our Hospital has, like most Hospitals, suffered from a shortage of Internes due to circumstances beyond our control, of nationwide character, a result principally of the military situation. A Committee of the Faculty and Hospital has suggested certain measures to render attractive an internship which only a few years ago was the plum of all appointments to Jefferson men. With overcrowding and inadequate facilities, it has been difficult to meet this problem but with the hope of renewed facilities, especially those which will be provided in the building for the new Hospital, the outlook is very promising. We can report that a large number of Senior students have signified their willingness to apply for Internship at the Jefferson Hospital.

The same situation applies in a certain degree regarding Residents. We have lost a certain number due to military exigencies and at present writing we do not have our full quota, but we have more applications than we can eventually satisfy. Dr. Tocantins is making an intensive study of the Residency training program, aiming to establish a rotation and allocation system, so arranged as to cover all those duties required by the American Boards as well as concentrated training in branches of Medicine elected by the Residents themselves. All of this will require patience and effort. Certainly in a Medical School like Jefferson, with all it has to offer, such Residency training should be at a premium.

Clinical investigation and fundamental research are an important part of the activities of the Medical Department. Following are some of the projects being actively worked upon in the various divisions of the Medical Department:

a) Cardiology—Cardiovascular Research Fund awarded by the National Heart Institute for the promotion and investigation of cardiovascular teaching and research.

b) Cardio-Respiratory laboratory, equipped by the United Miner's Fund, to study diseases of the respiratory system.

c) Clinical and Research laboratories of the Division of Hematology, supported by the Charlotte Drake Cardesa Foundation. Long range studies of leukemia and polycythemia have been under way for several years.

d) Endocrinology and Cancer Research. Studies on metabolites of androgens and progesterone, of dienestrol and other endocrine compounds. The work is supported by Eli Lilly, Ciba, Upjohn and Squibb Pharmaceutical houses and the National Cancer Institute.

e) Gastroenterology laboratory. Studies on pancreatic function, effects of various foods on digestion. Supported by private grants to the Division.

f) Studies on the Mechanism of Blood Coagulation and the Pathogenesis of Hemorrhagic Disorders. Supported by the National Institute of Health.
g) Development of methods for measurements of serum electrolytes and of protein bound iodine in the Division of Metabolic Research.

h) Studies of the action of certain drugs and surgical procedures for alleviating hypertensive disease. Carried out under the guidance of the Hypertension Clinic.

The therapeutic division has possibly the largest lecture schedule and the teaching is so arranged as to cover the whole field of general medicine. This year, 31 men recruited from the Medical Department, many of them representing the various Medical specialties will present all the practical procedures used in the practice of Medicine. The Monday Therapeutic Clinic like the Surgical and Medical Clinics embraces the third and fourth year classes, stressing modern Medical management in the whole category of conditions which the physician will ordinarily encounter. These clinics are allocated to the Senior Medical men and so arranged that there will be no overlapping. Our aim has been to cover as thoroughly as possible those subjects of importance to the Student. With 36 lectures, it is impossible to cover the entire gamut of Medicine, but we try to make these subjects as practical and as complete as possible. For that reason the assignments cover the various diseases in groups (cardiovascular, gastrointestinal, metabolic, allergic, respiratory, hematologic, infectious, etc.). It is the privilege of the Lecturer to recruit his material from the entire Ward Service as well as any unusual or interesting cases which he may wish to present. Occasionally an unusual case may appear and we have tried to make it clear that, regardless of previous arrangements, the Lecturer is privileged to present them.

The schedule for therapeutics is usually completed before the beginning of the academic year so that each Lecturer will know precisely what he must discuss and, in recent years, we have posted both the name of the Lecturer and the subject on the Student's bulletin board. Modern therapy like modern Medicine has advanced all along the line and become increasingly more complex. The specialties, practically all of them, have gone ahead with unprecedented speed, in the last decade. We have no wish to make specialists out of our Students, but we do want them to be initiated into the fundamental principles and to be conversant with their possibilities. The Tuesday hour is an introduction into the general therapeutic procedures, many of them by the Junior Members of the Medical Staff. The Conferences on Wednesday are destined to supplement and amplify the material given in the Medical and Therapeutic Clinics. It represents a series of conferences on practical therapeutics. For many years the Friday lecture was both Medical and Therapeutic, and devoted to the enunciation of cardinal principles in Medicine and their practical application. The early part of the first semester is devoted to a course on dietetics. Owing to the progress of Medicine, many subjects have had to be amplified or included, such as a course in electrocardiography, lectures on radioactive isotopes, radiation therapy, physical therapy, modern antibiotic therapy, steroid therapy and all those subjects which have assumed such an important part in modern Medicine. We have been fortunate in having on our Staff men of national reputation who could present these subjects authoritatively. The men who are responsible for therapeutic instruction have all been recruited from the Medical Department. Adjacent to the offices of the therapeutic division are the laboratories which have been devoted to gastroenterology. In the last year and a half, under the able administration of Dr. Wirts, nearly a dozen papers have appeared, devoted mostly to gastroenterologic subjects. We consider ourselves fortunate at Jefferson in having a Physiologic Department under Dr. Earl Thomas, which has been second to none in gastrointestinal research in this country. Their cooperation has been of the greatest help not only in training Residents, but in making available all the resources of that splendid Department. At present, researches on pancreatic function, cancer research (under the Damon Runyon Cancer Fund) and, through another sponsor, studies on the effect of tea on the gastrointestinal tract are being made. We have been fortunate in having Residents who have been specially trained in gastroenterology, and in the last year the number of consultations throughout the Hospital has more than doubled.

All of this simply emphasizes some of the problems of the Medical Department. Obviously the most important considerations are: a) adequate and complete teaching of our Student Body and b) efficient and adequate care for the patients both in the Ward and Out-Patient Services. We have received the wholehearted cooperation of the Staff which should go a long way to attaining this end. Our purpose is to turn out efficient practitioners of Medicine. This has been the reputation of Jefferson Medical College since its inception and we hope to continue that work.

With each passing year, Medicine has crystallized into separate subdivisions or specialties, but our aim has been to have a thorough grasp of the fundamentals and only an introduction into some of the highly specialized divisions of the healing art. No one person can ever hope to attain perfection in all of these, but we pride ourselves on the fact that in our department we possess men who are qualified to present these subjects in such fashion that our Students are familiar with the trends in modern Medicine. To do this without overemphasis is possible if we evaluate the time and the resources at our disposal. Our Students come in contact with men of many various interests and attainments. For many years, we at Jefferson, tried to improve our schedule; certainly we have the manpower and the resources. It is the hope of this Board that with the selection of the future Professors of Medicine, they will find an efficiently going concern.

With the assistance of the Dean, it is contemplated to study the personnel and teaching schedules of the leading Medical Schools with the avowed purpose of improving our own course in Medicine. Jefferson for many years has
lacked large endowments, though requiring full time men for this work. We have been fortunate in recruiting our Department from men on the active firing line of Medical practice. So many men have given unselfishly to our Institution, which owes its very inception to a group of Medical leaders who are not only great practitioners but great leaders in Medicine. It is our hope that among our younger men are those who will carry the torch and light the way even as their predecessors have done. The Board of Trustees have decided that Jefferson will not stand still. They have embarked on an era of expansion which deserves the wholehearted cooperation of all who cherish the ideals and aspirations of this, one of the largest Medical Schools in this country.

**DR. MARTIN E. REHFUSS**

Dr. Martin E. Rehfuss was born August 8, 1887. He was educated in the public schools of Philadelphia, and after graduating from Central High School, went to the University of Pennsylvania and was graduated in Medicine in 1909. He served two years as an interne in the University of Pennsylvania Hospital, and then Dr. John H. Musser sent him to Paris where he served for two years (1911-1912) as Resident Physician to the American Hospital. In Paris he was a member of the class of the Pasteur Institute and the University of Paris. He studied gastroenterological roentgenology under Dr. Jaugeas and Dr. Beclere. Other noted teachers with whom he studied were Metchnikoff, Roux, Laveran, Besredka, Borrel, Delezenne and Widal.

He spent a year in Germany and studied esophagoscopy with Dr. Gluckmann in Berlin. In Munich he studied intestinal diseases, and he was with Dr. Haudek in Vienna for six months. During his three years in Europe, he spent most of his time either in internal medicine or the study of digestive diseases. While there, he invented the stomach tube which bears his name and also devised the fractional method of gastric analysis.

Dr. Musser had died in the interval and on his return to America Dr. Rehfuss joined Dr. Philip Hawk, his old teacher, and Dr. Thomas McCrae at the Jefferson Medical College. For a period of more than eight years Dr. Hawk put the entire resources of his department into a long period of work on normal and pathological gastric digestion. These were the first complete studies on food digestion in the normal untraumatized human stomach. Dr. Rehfuss has been at the Jefferson Medical College since 1913 (38 years).

He is the author of "The Diagnosis and Treatment of Diseases of the Stomach" which Saunders published in 1927; "The Medical Treatment of Gallbladder Disease", with Dr. Guy Nelson, published by Saunders in 1935; "Indigestion" by Saunders in 1943, and the textbook "Practical Therapeutics" in which he collaborated with Dr. Albrecht and Dr. Price in 1948, the Second Edition of which has just recently appeared.

He has contributed to many different works such as Nelson's Encyclopedia; Sajous Cyclopedia, and up until 1934, Cecil's Practice of Medicine (biliary tract). He aided Dr. McCrae in the revision of Osler and McCrae during that period of time when Dr. McCrae was still active at Jefferson. He has written many reviews and wrote the review of Gastroenterology for Progressive Medicine for almost a dozen years, and contributed Diseases of the Stomach for the Early Oxford System.

His medical contributions cover many articles on the digestive tract. The early studies were largely devoted to gastric digestion.

He was appointed Professor of Clinical Medicine in charge of Therapeutics at Jefferson in 1936. He was Chairman of the Committee on Gastroenterology of the American Medical Association and the American Gastroenterological Association. During the First World War, he was a Captain in the United States Army.

**DR. HAROLD WALTER JONES**

Dr. Harold Walter Jones was born in 1891 and graduated from Jefferson Medical College in 1917. He was Interne and Chief Resident Physician at Jefferson College (1918-1921). He was in the U. S. Army from August 1918 to May 1919 when he was honorably discharged as Captain. During his Army Service Dr. Jones was Instructor, School of Military Medicine, Fort Oglethorpe, Ga., Consultant to General Hospital #14 during influenza epidemic and in charge of Section on Nephritis, General Hospital #9, Lakewood.

He became Director of the Clinical Medicine Laboratory, Jefferson, 1921-1937 and rose from Assistant Demonstrator in 1919 to Associate Professor in 1928. He is now Professor of Clinical Medicine and Hematology, Director of the Charlotte Drake Cardeza Foundation and Laboratories of the Division of Hematology. He has been Hematologist for Jefferson and Beebe Hospital and Physician Roxborough Hospital, 1926-1940; Assistant Physician, Philadelphia General Hospital, 1921-1929.

Dr. Jones is a member of the Association of American Physicians, Interurban Clinical Club, Fellow of the American College of Physicians, the American Board of Internal Medicine; Fellow of the College of Physicians of Philadelphia, American Association of the History of Medicine, Physiological Society of Philadelphia, Philadelphia County Medical Society, Founder and first President of Jefferson Society for Clinical Investigation and Member of the Board of Corporators, Peddie School, Hightstown, N. J.

Dr. Jones has contributed extensively to medical literature, especially dealing with blood disorders.
DR. GARFIELD G. DUNCAN

Dr. Garfield G. Duncan, born in Ontario, Canada, in 1901 received his medical degree from McGill University in 1923. He began to practice in Philadelphia and joined the Staff of the Pennsylvania Hospital in 1926 under the tutelage of Dr. Thomas McCrae. He became a member of the Faculty of Jefferson Medical College in 1927. Dr. Duncan is now the Director of the Medical Services of the Pennsylvania Hospital and the Benjamin Franklin Clinic and is Clinical Professor of Medicine at Jefferson. In January 1942, he entered active duty with the rank of Lieutenant Colonel and Chief of the Medical Service of the 52nd Evacuation Hospital and served in the South Pacific. In August 1943, he was made Consultant in Internal Medicine for the Sixth Army and in April 1944, was promoted to Colonel and decorated at Finchhafen, New Guinea, with the Legion of Merit for his research in malaria and the improved control of this malady in the Pacific Theatre. He was made Consultant in Internal Medicine to the Second Service Command, and it was during this tour of duty that he received the Army Commendation Medal for his part in reducing the mortality from viral hepatitis from 6.3 to 0.9 per cent.

Dr. Duncan is the author of Diabetes Mellitus and Obesity, 1935; Diseases of Metabolism, 1942, revised in 1947 and a new revision will appear early in 1952 (Editor and Co-Author); Diabetes Mellitus—Principles and Treatment, 1951. His papers have dealt for the most part, with diabetes, hepatitis, undernutrition, malaria, tularemia, scrub typhus, and diet in the control of disease.

In addition to membership in the county and state associations and Fellowship in the A.M.A., Dr. Duncan is a Fellow of the American College of Physicians and of the College of Physicians in Philadelphia. He is an active member of the Association of American Physicians and has just retired from the Presidency of the Association of U. S. Medical Consultants of World War II, in which he continues as an active member. Dr. Duncan is Consultant in Internal Medicine for the Washington Area of the Veterans Administration and is Expert Consultant in Internal Medicine to the Surgeon General of the U. S. Army. It was in this capacity that he made a teaching tour embracing the U. S. Army Hospitals in Europe in 1948, and to the Far East, including Hawaii, Japan, Korea, Guam and the Phillipines in 1950.

DR. LEANDRO M. TOCANTINS

Dr. Leandro M. Tocantins was born in 1901 in Para, Brazil, attended Cornell University (1919-1922), graduated from Jefferson Medical College in 1926 and served a one year rotating Internship in the Chestnut Hill Hospital. Between 1930 and 1937 he was a J. Ewing Mears Research and Teaching Fellow in the Department of Medicine of Jefferson Medical College. He was appointed Associate in Medicine in 1936, Assistant Professor of Medicine in 1939 and Associate Professor of Medicine in 1941. He is Assistant Physician at Jefferson Hospital and Assistant Director of the Division of Hematology. Since 1950 he is Physician to the Pennsylvania Hospital and head of the Department of Hematology of this Hospital. He has served as Consultant to the Brookhaven National Laboratory (Atomic Energy Commission), to the U. S. Army and is Consultant in Hematology to the U. S. Naval Hospital in Philadelphia.

Dr. Tocantins is Associate Editor of BLOOD—the Journal of Hematology, and is on the Editorial Board of the American Journal of Physiology. He was (1946-1948) Chairman of the Section on Medicine and, since 1948, Secretary, of the College of Physicians of Philadelphia. He is now Associate Director of the Postgraduate Institute of the Philadelphia County Medical Society, a member of the Sub-Committee on Blood Coagulation of the National Research Council, and of the following Societies:

American Society of Clinical Investigation, American Physiological Society, Society of Experimental Biology and Medicine, American Medical Association, American Association for the Advancement of Science, International Society of Hematology, Societe d’Hematologie Francaise, College of Physicians of Philadelphia, Pennsylvania State Medical Society, Philadelphia County Medical Society, Alpha Omega Alpha and Phi Chi Medical Fraternities.

He has contributed sections to Duncan’s "Diseases of Metabolism," Reimann’s "Medical Treatment," Sunderman and Boerner’s "Normal Values in Clinical Medicine" and papers on hemorrhagic diseases, blood platelets, prothrombin, blood coagulation, absorption of substances through the bone marrow and pathogenesis of hemophilia.
We are glad to announce to the Alumni that the Radiation Physics Laboratory is now an established fact in actual operation. The laboratory is under the supervision of a committee of the faculty with Dr. Abraham Cantarow, Dr. Harold Jones, and Dr. Paul C. Swenson, Chairman. A sub-committee comprising all those approved by the above committee and Atomic Energy Commission as capable of working with isotopes clinically and experimentally are actually participating in this work. After several years of anxious waiting, a most necessary adjunct to our institution is now a reality and Jefferson can point with pride to as complete a setup of this type as exists any place in the Eastern United States.

Jefferson has often suffered from the fact that it is an independent institution not associated with an Undergraduate School or University. This has made it impossible for various departments including radiology to recruit help from various undergraduate departments. During the past years we have had a consulting physicist from the faculty of the University of Pennsylvania help us. Now with the erection of this new laboratory, we have a full-time physicist and a technician in charge of the laboratory activities, assisted by the various staff men who are interested in the various ionizing radiations and nuclear physics. We are proud that Jefferson has finally acquired the service, tardy though it is.

The laboratory was constructed at a cost of approximately $40,000. This sum was very generously appropriated by the Board of Trustees and ear-marked for this purpose.

Since 1943, Doctor S. Reid Warren, Jr., of the Moore School of Engineering, has been our consulting physicist. He remains at this post, but in addition, we have Mr. James N. Bierly as our physicist "on location," and Miss Gloria Stallsmith as our technician. She primarily serves as a technician, but in addition serves in other capacities, such as, secretary-receptionist-clerk, and aide.

While the primary purpose of this laboratory was to straighten out the Isotopes Program, its potentialities are
much more far-reaching. It stands ready to serve any and all departments that might have some research or therapy problem dealing with any ionizing radiation or nuclear physics.

Not only is it important for a Department of Radiology to have a consulting physicist "on the grounds" so to speak, but the handling of isotopes will be greatly facilitated by our modern devices. The safety factor to both patient and operator are cared for, dosage is better controlled and all convenience of handling is better supplied through a central location such as this.

Various individuals who are approved by the local Isotopes Committee and the A.E.C. will be the consultants to the laboratory. Our service has been broadened to include all sister institutions in the neighborhood.

Aside from the clinical handling of patients receiving Isotopes and the research problems, the laboratory will become an integral part of our teaching program. Already

our physicist, Mr. Bierly, has taken part in the teaching program this fall when the curriculum was lengthened to include some material on Disaster Preparedness and Atomic Bomb Effects. He will also take part in our regular teaching curriculum throughout the school year. The resident and intern program will include a rotation of the men through a service in the new laboratory. It should be borne in mind that the laboratory is located in the college and is primarily a function of the college.

In designing the laboratory, two factors were of prime importance — health hazards to the individuals working in the laboratory, and contamination. The health hazard in-
volved in isotope work is hard to evaluate at present because no concrete rules have as yet been established. Certain recommendations as to the maximum or minimum exposures (300 milliroentgens) per week have been adopted.

To keep exposure to individuals down to the recommended level, several methods are used. For very active isotopes, Na 24, I-131, and Au 198, all handling of the material is performed by means of long tongs and remote pipetting devices and as much work as possible is done behind a two inch thick lead shield.

There are two special fume hoods for handling materials that may evaporate or sublime, thereby presenting a health hazard via the lungs. These hoods are lead directly to the fifteenth floor to prevent the isotopes from entering any other laboratory.

Contamination is the greatest hazard in a radio isotope laboratory, both from a health standpoint and because of increased difficulty in making accurate physical measurements later.

To limit contamination as much as possible the best method is extreme care. However, in case of a spill, special absorbent material and stainless steel trays are used under all equipment. In the fume hoods a special "stripable" paint is used which can be discarded when contaminated.

To minimize the chances of contamination the amount of isotopes used in each room is limited. All very active shipments from Oak Ridge are processed in the "hot" lab, and nothing over milli-curie amounts leaves this room. In
Dr. Epstein and Dr. Paschkis are studying the effects of various drugs in regulating the uptake of radioactive iodine I\textsuperscript{131} in the thyroid.

Dr. McCall is studying uterine blood flow by means of radioactive sodium-Na\textsuperscript{24}, while Dr. Eberhard and Dr. Scheffey are interested in studying radium dosages to the cervix by means of a photographic densitometer technique.

Again Jefferson has taken a great step in modernizing her service to the public and profession.

The instruments are used to measure thyroid uptake of radioactive iodine, to study distribution of isotopes in the body for clinical work, and for research.

At present there are several research projects under way. Dr. Houseburger is interested in studying fat metabolism using radioactive carbon-C\textsuperscript{14}.

When Dr. Joseph H. Cloud, '92, visited patients in this picturesque way in the 90's, it must have added fun to a sometimes tedious routine.
DR. HAROLD L. FOSS, M.D., '09, HONORED

The Alumni Association congratulates Dr. Foss on the honor recently conferred upon him by the American College of Surgeons at their meeting held in San Francisco by electing him President Elect. He will be inducted into office at the Annual Congress to be held in New York City in late September, 1952.

This honor comes soon after that conferred upon him by the Board of Trustees of the Geisinger Memorial Hospital.

Dr. Harold Leighton Foss was born in Malden, Massachusetts. He received his degree in medicine from Jefferson with the class of 1909. Following graduation he spent eighteen months at the Philadelphia General Hospital as an interne. On completion of this service and at the suggestion of one of his Blockley chiefs, he spent a winter in Northwestern Alaska organizing the Fairhaven Hospital at Candle, the most northern hospital in the Western Hemisphere. While in the Arctic Dr. Foss became interested in the Eskimo problems, carrying on extensive correspondence with the Department of Indian Affairs which ultimately resulted in the development of several hospitals for the Alaskan Eskimos who heretofore had been rather neglected.

Returning to the States, Dr. Foss spent a year at the University of Pennsylvania engaged in graduate work in pathology and experimental surgery, spending most of the time in the dog laboratory with Dr. Sweet and the laboratory of pathology with the late Professor Allen J. Smith. He then went abroad for some work in Vienna and Berlin and on returning, at the suggestion of Professor W. W Keen, entered the Mayo Clinic where he remained for the next two years, ultimately becoming first assistant to the late William J. Mayo.

In the Fall of 1915, Dr. Foss left Rochester to organize the new Geisinger Memorial Hospital at Danville, Pennsylvania, where he has remained ever since as Surgeon-in-Chief and Chief of Staff. Early this year a new million and one-half dollar clinic building, integrated with the hospital, was dedicated and named by the Trustees the Foss Clinic in his honor.

Dr. Foss is a member of Montour County Medical Society, of which he has been President; the Pennsylvania State Medical Society of which he has been Chairman of the Section on Surgery; of the American Medical Association; the American Hospital Association; the American Society for the Study of Goiter; the Alumni Association of the Mayo Clinic which he founded and of which he was the first President; the Detroit Academy of Surgery; the Societe Chirurgie Internationale; the Americal College of Surgeons of which he has been for several years a Regent. He is Chairman of the Library Committee of the College of Surgeons and is a member of the Executive Committee. He is Vice Chairman of the Board of Regents. He is a member of the American Surgical Association; the Southern Surgical Association; the American Society of Railway Surgeons; the Society of Surgeons of the Pennsylvania Railroad; the American Cancer Society, of which he is a member of the Board of Directors. He is a member of the Founders Group of the American Board of Surgery.

Dr. Foss is consulting Surgeon to the Pennsylvania Railroad and the D. L. & W. Railroad. He was formerly consulting surgeon to the United States Federal Penitentiary at Lewisburg, Pennsylvania, and is Consulting Surgeon to the Pennsylvania State Hospital for the Insane at Danville. He has been the author of many papers dealing with problems of general surgery. Dr. Foss’ fraternities are Nu Sigma Nu and Alpha Omega Alpha.

Dr. Foss has long been interested in yachting and is a member of the Edgartown Yacht Club and the North American Yacht Racing Union. He has been an aviator for many years having flown his own planes over two thousand hours. He is a Captain in the Civil Air Patrol.

Dr. Foss married Isabel Grier Polk in 1917. They have two children, Mrs. Thomas B. Markle of Hazleton, Pennsylvania, and Mrs. Thomas B. Foster of Seattle, Washington.
The Interim Session of the A.M.A. was a real success. From every standpoint the Session was voted as the most successful Interim Clinical Session. The general lectures on sectional meetings were well attended. Jefferson men who participated were:

Dr. Theodore R. Fetter, '26, Professor and Head of Dept. of Urology, Jefferson Medical College, "The Recognition of Urological Malignancies by the General Practitioner."

Dr. George C. Griffith, '26, Professor of Medicine, Southern California Medical School, Symposia on "Cardiovascular Diseases."

Dr. W. J. McMartin, '31, Associate Professor of Urology, Creighton University School of Medicine, Treatise on "Urologic Practice."

Dr. Vane M. Hoge, '28, Assistant Surgeon General United States Public Health Survey, "The National Hospital Survey and Construction Program — Its Relationship to the Doctor."

Drs. Mario Castallo and Amos S. Wainer, Exhibit on the use of Plastic Tubing in the Recanalization and Reconstruction of the Fallopian Tubes.

Dr. Joseph M. de los Reyes, '28, was a member of the General Arrangements Committee.

Jefferson men noted:

Dr. G. W. O'Brien, Dr. John R. Evans and Dr. Donald P. Franks, '50, recent graduates.

Dr. Stiles D. Ezell, '32; Dr. M. Brown, '09.

Dr. Burgess Gordon, '19, also attending American College of Chest Surgeons, where he gave a paper.

Dr. Stanley G. McCool, '34.

Dr. George Marcil, '26, who is not in active practice.

Dr. David B. Allman, Member of Board of Trustees A.M.A.

We hope you have enjoyed the cover picture of Dr. Charles B. Bertolet, '27, using the Gay 90's transportation on his farm, and the picture of Dr. Cloud in his sleigh that he used for home calls when first in practice.

Won't you look through your treasures to see if you can find among them old pictures or snapshots of Jefferson Alumni that might be of interest to our Bulletin readers?

DR. GEORGE C. LIPPINCOTT

It is with deep regret that we announce the death of Dr. George C. Lippincott on November 21, 1951, in his 102nd year; Jefferson's oldest living alumnus, having graduated in 1875. Dr. Lippincott died in his home, where he has lived since he was 10 years of age.

Dr. Lippincott was commissioned in the Navy in 1875, shortly after his graduation from Jefferson Medical College. His first duty was aboard the USS Vandalia for a cruise to the West Indies, returning to Philadelphia in July, 1876, for the Centennial Exposition. In September of that year the Vandalia sailed for Gibraltar, a 50-day trip.

During the Russian-Turkish War in 1877 Dr. Lippincott served at Constantinople, then was granted six months' leave to visit Paris and London.

Returning to the Vandalia in December 1877, Dr. Lippincott had as fellow passengers President of the United States Ulysses S. Grant and Mrs. Grant, who were touring Egypt, Palestine and Greece.

From 1879 to October 1880 Dr. Lippincott was on duty in the Navy Department Bureau of Medicine and Surgery, then went aboard the USS Galena for three years' sea duty and a 6000 mile cruise.

In the course of the cruise, Dr. Lippincott witnessed at close hand the British bombardment of the Fort at Alexandria, held by Arabi Yaski. He was at the island of Chios during the destructive earthquake of April 1881 and remained there for several weeks, attending the wounded at an improvised hospital.

Dr. Lippincott was born in Salem, New Jersey, in 1850, to the late Jacob and Anne Swing Lippincott. He was graduated from the Philadelphia College of Pharmacy in 1871. He retired from the Navy in 1886, and at the time of his death was the oldest living officer in the Navy. He was a lover of flowers and spent much time in his garden.

THOMAS F. MULLEN, '12, HONORED BY THE AMERICAN COLLEGE OF SURGEONS

We congratulate Dr. Mullen on his election as second vice-president of the American College of Surgeons.

Dr. Mullen is Associate Clinical Professor of Surgery of the University of California Medical School. He is attending physician St. Mary's Hospital and Chief Surgeon Franklin Hospital. He is Associate Surgeon of the University of California Hospital and Visiting Surgeon in charge of Surgery of the Outpatient Department.

He is a member of the American Medical Association, California Medical Association, San Francisco County Medical Society, American College of Surgeons (Governor), California Academy of Medicine, Pacific Coast Surgical Association, San Francisco Surgical Association and the Founders Group of the American Board of Surgery.

Dr. Mullen served two years during World War I as a Major MC USA. He served one year in the French Army at the American Red Cross Military Hospital #1 at Neuilly, as Chief of Surgical Service Base Hospital #101, at St. Nazaire A.E.F. He is Surgeon in Reserve United States Public Health Service.

ALUMNI PLACEMENT SERVICE

POSITIONS AVAILABLE

Wanted: Surgical Assistant in a small Pennsylvania town by a well qualified Surgeon. Please contact the Alumni Office.

Wanted: Associate in General Practice in Philadelphia leading to eventual partnership.

Wanted: An Associate in Ophthalmology or Oto-Laryngology or in Combination in Eastern North Carolina.

Preceptorship available in O.B. and Gyn. to Staff Member of the Jefferson Faculty.

Wanted: Young pediatrician in New Brunswick, New Jersey, connected with large obstetrical and gynecological practice.

POSITIONS WANTED

Wanted: Recent graduate wishes one year General Residency.

Wanted: Recent graduate finishing internship would like to enter General Practice in some community in Pennsylvania or vicinity.

Wanted: Graduate Class of 1950 wishes to locate in a General Practice preferably in a rural district.

Wanted: Preferably in Europe, Residency in O.B.-Gyn. and Internal Medicine.

Retiring Ear, Nose and Throat Alumnus in Williamsport, Pa., wishes to sell office equipment.

FACULTY NEWS

Dr. George A. Bennett, Dean of Jefferson Medical College, attended the meeting of the Association of American Medical Colleges held at French Lick Springs, Indiana, during the week of October 29th, 1951.

Dr. Bennett, attending the annual Dinner-Meeting of the Hospital Staff Physicians of the Reading Hospital on November 7th, spoke on "Medical Education and Some of the Problems Confronting It."

Dr. Bennett will speak at the joint meeting of the Medical Society of New Jersey and the New Jersey State Dental Society, which will be held at the Hotel Robert Treat, Newark, N. J., December 19, 1951, at 3:00 P.M.

Dr. Robert B. Nye, Assistant Dean, Jefferson Medical College, spoke at Muhlenberg College, Premedical Society, Allentown, Pennsylvania, on November 9, 1951.

Dr. John B. Montgomery, Clinical Professor of Obstetrics and Gynecology at Jefferson Medical College, was Guest Speaker at the Annual Meeting of the Berks County Medical Society and The Reading Obstetrical Society on Tuesday, November 6th. Dr. Montgomery spoke on "The Toxemias of Pregnancy."

During the 19th Annual Post-Graduate Assembly of the Harrisburg Academy of Medicine, the following Jefferson men spoke:

Dr. Abraham E. Rakoff, Clinical Professor of Obstetrics and Gynecological Endocrinology, presented a paper entitled "Pitfalls in Endocrine Diagnosis in General Practice."

Dr. Anthony F. DePalma, Professor of Orthopedic Surgery and Head of the Department, gave a talk on "Injury about the Shoulder Joint."

Dr. John J. O'Keefe, Associate in Otology and Laryngology and Broncho-Esophagology, "The Diagnosis of Lung Cancer."

Dr. Franklin R. Miller, Associate Professor of Medicine, illustrated his 40 minute talk with slides depicting "The Physiology of ACTH and Cortisone with Special Reference to Blood Formation."

Dr. William L. Schmidt spoke to the staff of the Valley Forge General Hospital, Phoenixville, Pa., on Wednesday evening, November 28, 1951, on "Physical Medicine."

Dr. Martin J. Sokoloff, Associate Professor of Medicine at Jefferson Medical College and Director of the Division of Tuberculosis of the Philadelphia Board of Health, was guest speaker at the Christmas Seal Sale Meeting of the Cape May County Tuberculosis and Health League on Tuesday, November 13, 1951.

Dr. Robert S. Brookhammer, Assistant Professor of Psychiatry at Jefferson Medical College, spoke at the regular Monthly Meeting of the Juniors of the Women's Club of Frankford at the Historical Society of Frankford. His subject was "How to be Happy Mature Adults."

Dr. Kenneth E. Fry, Associate Professor of Surgery, spoke at a meeting of the Surgical Officers and Interns of the Valley Forge General Hospital, Phoenixville, Pa., on the "Diagnosis and Treatment of Parathyroid Adenomas."

Dr. James R. Martin, Associate Dean, spoke at the Second Annual Eastern Pennsylvania Premedical Conference on "Life of a Medical Student."

Dr. Louis B. LaPlace, Assistant Professor of Medicine, President of the Philadelphia County Medical Society and President Elect of the Pennsylvania Heart Association, spoke at a meeting of the Tri-County Heart Association, November 1, 1951, in Harrisburg, Pennsylvania.
Dr. Theodore R. Fetter, Professor of Urology, attended the A.M.A. Interim Session held in Los Angeles, California, December 4th to 7th.

Drs. Mario A. Castallo and Amos S. Wainter have been invited to present their exhibit on 'Experimental Recanalization of the Fallopian Tubes' at the Interim Session of the American Medical Association in Los Angeles on December 4th.

The exhibit won honorable mention at the A.M.A. Convention in Atlantic City in June. It demonstrates the use of plastic tubing in Recanalization and Reconstruction of the Fallopian Tubes.

Dr. David M. Davis, Emeritus Professor of Urology, reports the following activities:

In May, 1950, he spent a week in Ann Arbor, Michigan, as Guest Speaker at the Medical School of the University of Michigan.

In December, 1950, he spent a week in Los Angeles as a member of the Faculty of the Los Angeles Urological Research Convention.

In April, 1951, he attended the annual meeting of the Mid-Atlantic Section of the American Urological Association, and was re-elected to the Editorial Committee of the Section and to the Editorial Board of the Journal of Urology.

On May 17, 1951, he presented a paper on Hypospadias before the American Association of Genito-Urinary Surgeons, and showed a motion picture of the operative procedure.

On June 13, 1951, he discussed a paper by Dr. Hamilton McKay on Kidney Surgeon before the Section on Urology of the American Medical Association in Atlantic City, N. J.

On October 10, 1951, he conducted the session on Urology of the Graduate Education Institute of the Pennsylvania State Medical Society at Reading, Pa.

On November 5, 1951, he addressed the Academy of Surgery of Philadelphia on the Results to be Expected of Prostatic Surgery, based on a Personal Series of 469 Consecutive Operations without Fatality.

On November 14, 1951, he addressed the New York Urological Society on Intubated Ureterotomy, and showed a recently revised motion picture of the operative procedure.

Dr. H. L. Rudolph, 400 N. 5th Street, Reading, Pa., Clinical Assistant in the Department of Physical Therapy, Jefferson Medical College, presented a talk November 13, 1951, at Bryn Mawr Hospital on "Physical Medicine and Rehabilitation in the General Hospital" before a joint meeting of the Hospital Staff and the Main Line Branch of the Montgomery County Medical Society.

THE JEFFERSON GRADUATE ASSEMBLY

The Fourth Annual Jefferson Graduate Assembly will be held January 30, 31st and February 1st, 1952, at the College.

The annual Alumni Meeting and Dinner will be held the evening of January 31st at the Barclay, Rittenhouse Square, Philadelphia.

DEATHS

The following deaths have been reported since the October Bulletin was issued:

1875 Dr. George C. Lippincott . . . . . . . . . . . . . . . . Died 11/2/51
1892 Dr. Will F. Hassenplug . . . . . . . . . . . . . . . . Died 5/15/51
1894 Dr. Frank McKee . . . . . . . . . . . . . . . . . . . . . Died 7/5/51
1894 Dr. Alexander M. Stevenson . . . . . . . . . . . . . . . Died 10/24/51
1901 Dr. Louis Halpert . . . . . . . . . . . . . . . . . . . . . . Died 11/7/51
1908 Dr. James J. Dougherty . . . . . . . . . . . . . . . . . Died 11/12/51
1910 Dr. Charles E. Forcey . . . . . . . . . . . . . . . . . . . . . . Died 10/26/51
1912 Dr. Ira Mann . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . Died May 1951
1917 Dr. Herbert M. Vann . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . Died 10/14/51

CORRECTION

We regret that in the publishing of the Alumni Annual Giving Report the following names were incorrectly listed as deceased.

1894—Dr. Joseph A. Lethiecq
1912—Dr. Thomas F. Mullen
1913—Dr. George R. Storm

In printing, the asterisk was slipped to the line below after the proof was read and returned. We are more than sorry that this error occurred.
CLASS NOTES

1880 A letter from Dr. William H. Ziegler, 3127 Frankford Ave., Phila., Pa., thanking us for the flowers sent by the Alumni Association on his 96th birthday reads as follows: "Just another one of those things that the Alumni Association of Jefferson College have shown to those who have from time to time evinced an interest for the great work that Jefferson stands for."

1883 Dr. Dorsey P. Fitch, of 112 Adams St., Fairmont, West Virginia, still serves on the Marion County Sanitary Commission and still takes an interest in what is going on despite the fact that he is no longer active in public affairs. He had the honor of representing the famous painting "The Country Doctor."

Dr. Julius Way's, Romney Place, Cape May Court House, N. J., daughter writes "I want to express our appreciation of the thoughtfulness of the Alumni Association in remembering my father's 91st birthday. He never fails to be interested in his Alma Mater."

1886 Dr. Chevalier Jackson, R.D. #2, Schwenkville, Pa., writes as follows: "The beautiful Chrysanthemums that reached me on the 86th anniversary of my birth touched me profoundly; that the great Alumni Association of the great Jefferson College thought it worth while to remember me is a distinction I shall always appreciate to the utmost."

Dr. Joseph B. Morris, 803 E. Mahoning St., Punxsutawney, Pa., writes us "This will acknowledge receipt of your kind letter of September 12, 1951. I also wish to acknowledge receipt Sunday morning, last, my ninety-first birthday, of the very beautiful bouquet of chrysanthemums sent by your Association. The expression of your greetings on my ninety-first birthday touched me very deeply, and for all of it, I wish to thank you for remembering me at this time. My health is reasonably good considering my age. I walk about a mile each day, sleep well, eat sparingly, and I refuse to do any worrying in spite of the world's troubles. Possibly that helps me to enjoy good health."

Dr. J. Elmer Porter, 344 High St., Pottstown, Pa., says "Thanks very much for the beautiful roses. I was surprised and much pleased. Thanks again."

1887 Dr. John T. Waltemeyer, of 1475 Humboldt St., Denver, Colorado, writes us as follows: "I was seated in my chair resting when the doorbell rang and in came a young man bearing a handsome bouquet of flowers. I thought he had made a mistake and asked him where he came from: He replied 'Alumni Association of the Jefferson Medical College.' I was very much surprised as I never thought they would think of me."

1888 Dr. John L. Bower, R.D. #2, Birdsboro, Pa., says "The flowers sent me by the Association on my 86th birthday were gorgeous. I am grateful beyond expression."

1889 Dr. Harry L. Walker, 1800 "B" Ave., N. E., Cedar Rapids, Iowa, writes "I wish to thank the Alumni Association for the beautiful floral gift and letter of congratulations. This is certainly a fine gesture and greatly appreciated. Your letters and flowers mean much to me. I hope sometime to attend the Jefferson Alumni Medical Meeting in June."

1890 Dr. James M. McNall, 131 S. Potomac Ave., Waynesboro, Pa., writes "I thank our Alumni for the beautiful floral remembrance sent me on my 86th anniversary. To one who has outlived his day and generation and feeling the loneliness of old age, your thoughtfulness is much appreciated. My wife joins me in my thanks, and I join her thankfulness in still having 'something alive around the house' for such remembrance."

1891 Dr. Edgar W. Tully, 7125 Lincoln Drive, Phila., Pa., writes "My 85th birthday has been made a very special event in my life, by your beautiful flowers expressing the congratulations of the Alumni Association. I am indeed grateful to the Association for the interest in an 'old fellow.'"

1892 Dr. Joseph H. Cloud, 111 St. Paul's Rd., Ardmore, Pa., has given us some pictures of Jefferson Societies and some of the Alumni in the 90's, which we will print from time to time in the Bulletin. We appreciate Dr. Cloud's gift.

1893 Dr. William H. Bodenstab, 207 Broadway, Bismarck, N. D., says 'I was very glad to get your kind words of congratulations to 'an old timer.' I don't know how long I can keep going, although I am still working eight hours a day."

Dr. Amos W. Botkin, 323 Apperson St., Oregon City, Ore., writes "I wish to express to you my surprise and delight upon receiving the floral token on the occasion of my 87th birthday. It was indeed a pleasure; one long to be remembered."

1894 Dr. Joseph A. Lethiecq, 178 Wilson St., Brewer, Maine, writes "I wish to thank you most sincerely for the beautiful bouquet of mixed fall flowers which arrived on the occasion of my birthday. They are really lovely and gave me plenty of pleasure."

Dr. Thomas H. Hazel, 430 W. Lockwood Ave., Webster Groves, Mo., writes "I want to thank you for the beautiful flowers. It was such a pleasant surprise and served two purposes: to celebrate my birthday and to cheer my wife's sick room. I don't know what class you were in, but in my class, '94, we had the pleasure of listening to my favorite, Professor Parvine, whose fatherly action and words appealed so strongly to me."

We are sorry to hear of the illness of Dr. Lewis K. Austin, of Blackstrap Rd., Cumberland Center, Maine. We hope he will improve each day until he regains his usual good health.

Word received from Dr. Edward B. Babcock, '46, tells us that his grandfather, Dr. Joseph A. Lethiecq, Class of 1894, is well and still active and practicing in Brewer, Maine.

Dr. John J. Barclay, Grinnell, Kansas, writes "Have just returned from a trip to my old home at Bethany, W. Va. While there I received a 50 year Masonic Pin from the Bethany Lodge which I prize very highly."
Dr. Samuel Coons, of Dry Run, Pennsylvania, has been ill since the death of his wife. We are sorry to hear this and want to express our sincere sympathy to Dr. Coons.

We regret to hear of the death of Dr. Joseph H. Krape's, 131 Columbus Ave., Kent, Ohio, wife, and extend our sincere sympathy to Dr. Krape in his bereavement.

We regret to hear that Dr. William A. Marsh, 729 W. Main St., Mt. Pleasant, Pa., has not been well, and trust that he will improve rapidly until he is again restored to health.

In a letter to Dr. Frederick H. Mills, Dr. Charles P. Robbins writes the following: "It is generous and kind of you to continue as our 'class agent,' and I, for one, certainly appreciate your contribution in time and effort to the good cause. I wish that I might be able to do more than sit back on the side lines and cheer; my heart is still in Old Jeff's most successful as always." Dr. Robbins enclosed his contribution.

Dr. Claude W. Gillette, 110 Charles St., Westport, Conn., writes on his 85th birthday: "To bring the occasion more forcibly to my attention was a lovely bouquet of chrysanthemums on the morning of his birthday. I know that you will convey our thanks to the other members of the Association. You all helped to make one 86th birthday a day long to be remembered."

Dr. Alexander H. Brown's, 304—2nd Ave., S.W., Pipestone, Minn., daughter writes us: "I want to thank you and the members of the Alumni Association for remembering my father's 86th birthday. It was a happy surprise to hear from you and to receive the lovely bouquet of chrysanthemums on the morning of his birthday. I know that you will convey our thanks to the other members of the Association. You all helped to make one 86th birthday a day long to be remembered."

"Before me is my 1895 diploma with the faculty names of Keene, Forbes, Chapman, Parvin, Wilson, Montgomery, Coplin, etc. What fond memories it brings back. I was greatly impressed with a picture of a painting in the American Medical Journal recently of John Chalmers Da Costa. What a brain in that high forehead and shapely head. Distinguished in appearance and profound diagnostic ability. His brain was like a storehouse file, in that he could bring forth anything he had occasion to use relative to the case under examination. This was very ably illustrated at a clinic he gave at the Pottsville Hospital many years ago under the auspices of the Schuylkill County Medical Society. A patient was brought in who had been struck by lightning and believe it or not survived. Dr. Da Costa gave a ten minute talk on the effects of lightning stroke quoting various authors and results. To me it was remarkable as a spontaneous lecture on a subject I knew very little."

Dr. Philip B. Williams, R.D. #1, Rome, Pa., in a letter from Mrs. Williams say: "Dr. Williams wishes me to thank you for remembering him on his birthday by your greetings and the beautiful red roses. He was quite overcome with emotion as everything relating to Jefferson is dear to him. He has been confined to a wheel chair for nearly four years."

Dr. Harry W. Fleck, Pauline St., Lordship Stratford, Conn., has been ill since 1949, is still unable to carry on his practice. We all trust that Dr. Fleck will continue to improve and have a complete recovery.

We have heard that Dr. Clifford E. Henry, of 403 S. Franklin St., Kirksville, Mo., has retired. We trust he may enjoy his hobbies or particular interest for which he did not have time during his years of practice.

Dr. Hugh D. Fraser, Ridley Park, Pa., writes: "The flowers are still very beautiful, and I want to thank the members of the Alumni Association for their very kind birthday greetings."

Dr. Edward H. Wiggins, 4415 N. Uber St., Phila., Pa., in a letter says: "Thank you very much for the lovely flowers you sent me on my 85th birthday. It is nice to be remembered, especially when you are growing old." Dr. Wiggins at 85, is still practicing in the community where he started his medical career over half a century ago.

Dr. F. Mortimer Cleveland, 5051 Walnut St., Phila., Pa., writes: "Just a few lines to express my appreciation of your letter of good wishes and congratulations on this my 80th birthday. I have never had occasion to regret my decision to become a General Practitioner, which has ever been extremely interesting and fascinating. Jefferson has always been my ideal and her progress during the past fifty years to me has been a source of deep satisfaction."

Word received from Dr. Francis W. Goddard, 136 Foster Ave., Valley Stream, N. Y., "I am indeed sorry that I could not have enjoyed a good time with all the 12 who were with you during our reunion. I was particularly interested that H. W. Murray from California was there. During our college days we saw quite a bit of one another. I am still in excellent health and in practice, but by appointment only."

We are glad to learn that Dr. Robert L. Dubbs, 1622 S. 18th St., Phila., Pa., has sufficiently recovered from his recent illness to resume office practice. We hope he will continue to improve.

We are all sorry to hear of the illness of Dr. E. M. Ellis, Ellsworth, Pa. We hope it won't be too long before Dr. Ellis is quite well again and working in his garden.

We are sorry to hear that Dr. Willard H. Kinney, 7300 Atlantic Ave., Ventor, N. J., has been ill, and we hope it won't be long before he is well again.

Dr. John O. Mellor, State Bank Bldg., Idaho Falls, Idaho, writes: "I am still active in my practice as a General Practitioner, and do some major surgery from time to time."

Dr. Alfred L. Rhoads, Tobyhanna, Pa., says "We should have reunions more often," and adds "I expect to leave for Florida about December 1st, and am looking forward to coming to Philadelphia in the Spring."

Dr. Asa B. Carmichael has moved to 7027 Willoughby Ave., Hollywood, California.

Dr. Frederick C. Turnbull writes us his appreciation of his re-election as vice-president of the Alumni Association for Australia. Dr. Turnbull writes: "I have not met any Jefferson graduates this year. During the war, of course, there were a good many in Australia from time to time. It is a pleasure to wish the Alumni every success."
We congratulate Dr. Pascal F. Lucchesi, Phila. Gen. Hosp., Phila., 4, Pa., on his new appointment as Executive Vice-President and Medical Director of the Albert Einstein Medical Center. He will assume his new duties as head of the Medical Center on January 8, 1952.

Dr. Pyn Muangman is Dean of the Faculty of Medicine and Siriraj Hospital, University of Medical Sciences, Bangkok, Thailand, the second Jefferson man to hold this position, the first being Dr. Aller G. Ellis, 1900. He is also Professor of Radiology of the Medical School, the oldest in Siam.

Dr. J. William White, Scranton, Pa., has been appointed chief of staff of the Wayne County Memorial Hospital, Honesdale.

John S. Purnell, Jr., the son of Dr. John S. Purnell of Millinburg, Pa., married Miss Barbara E. Jones of Mount Carmel, Pa., on August 11. The groom is attending Jefferson. Congratulations!

Dr. Herschel S. Murphy, 320 Chestnut St., Roselle, N. J., has been appointed District Chief of Rescue and Hospitalization Services in the civil defense organization for the metropolitan district of New Jersey.

Dr. Francis B. Rafferty, 103½—9th St., Willimantic, Conn., became President of the Connecticut State Medical Society on May 1. Our sympathy is extended to Dr. Joseph Russo, Norristown, Pa., whose wife died August 22.

Col. Lawrence A. Matternas assumed command of the Asaka Army Hospital. In addition to his being C.O. of the hospital, Col. Matternas is also Chief of Surgical Service.

Dr. Cecil D. Snyder, Winfield, Kansas, heads a research staff of 12 medical specialists employed by the H. L. Snyder Foundation for research concerning the problems of medicine and surgery and the dissemination of knowledge thus acquired.*

*The Foundation has made rapid strides in the cancer, infantile paralysis and other fields, which studies have won the praise of the medical profession throughout the world.

Lt. Col. Carl R. Darnall, MC USA, new address is Army Hospital, 5016th ASU, Camp Crowder, Joplin, Mo.

The Honorary Degree of Doctor of Science was conferred on Dr. Hugh G. Grady, of Washington, D. C., "one of the Nation's top experts on Cancer Research."

Dr. Irvin W. McConnell, 2532 Scottwood St., Toledo, Ohio, writes "that he is well and busy doing General Practice and Neuro-Surgical Anesthesia."

To Joseph Finn: "I hope we have a very successful year in the Annual Giving Fund. You are to be commended for doing an excellent job in keeping the Class of '35 in the upper brackets, and I for one, want to thank you."

Word received from Dr. Joseph L. Finn tells us that "Al Blair has been in Military Service since the fall of 1950. His latest assignment has been with the 110th Infantry Regiment of the 28th Division."

It is of interest to note the Westward trek of the following:

Charles Bender—Ohio to Seattle, Washington.

Thomas Brandon—Pennsylvania to Alaska.

Samuel Brownstein—Merwin Chappel, Ohio, to Lynwood, Calif.

Richard Kredel—Pittsburgh to Pasadena, Calif.

Seth Revere—To Chickasha, Oklahoma.

Dr. Charley Smyth is associated with the University of Colorado, in the Department of Medicine, 4200 E. 9th St., Denver, Colo.

Dr. Arthur Erickson, 1817 Olive St., Reading Pa., was elected President of the Reading Hospital Alumni Association, organized by 135 Doctors who served the Hospital as Resident Physicians or Interns during the last 40 years.

Dr. John J. Gompertz announces the removal of his office to 3420 Webster Street, Oakland 9, Calif.

Dr. Thomas R. Hepler, 606 Valley Rd., Havertown, Pa., is taking a three year Fellowship in Radiology at the University of Pennsylvania.

Dr. Robert R. Muschliitz, Slatington, Pa., and Miss Doris E. Frantz, Allentown, Pa., were married June 9. Dr. Muschliitz, who is a veteran of World War II, is clinical assistant at the Allentown Hospital eye clinic and has an office in the Medical Arts Bldg., 122 E. Airy St., Allentown, Pa.

The engagement is announced of Dr. Pincus Sobie to Miss Agnes Rosen. The wedding will take place December 16, 1951. Our best wishes.

Announcement is made of the engagement of Miss Jean Ann Fuert to Dr. Albert Schowitzz. Dr. Schowitz completed his internship at Wilkes-Barre General Hospital. He served over five years in the U.S. Army and is now on the Surgical Staff of the Wilkes-Barre General Hospital.

Dr. Charles N. Burns, Chief of Urology at the Wilkes-Barre Veterans Administration Hospital, has resigned and will enter private practice in Canton, Ohio.

Dr. Eugene V. Higgins says "I'll continue to maintain my part time practice office at Raymond Commerce Bldg., Newark, N. J."

Dr. Albert J. Kolarsick announces the opening of his office for the practice of General Surgery at Shrewsbury, N. J.

Dr. John H. Shackleton and his family moved from Springfield, Pa., to Catherine Court Apts, Jacksonville, Fla., to spend a three year training program in Obstetrics and Gynecology at St. Lukes Hospital.

Dr. George W. Hager, Jr., Superintendent of the Lake-land Mental Hospital, Camden Co., N. J., resigned May 22 in order to devote all his time to the private practice of psychiatry.

Dr. Walter M. Uhler, a native of Pennsylvania, has accepted the post of Resident Pediatrician at the Governor Bacon Health Center, Delaware City, Del.
1944 Dr. Robert Mackenzie Kerr, Wilkes-Barre, Pa., and Miss Mary Harriet Zeller, Kew Gardens, New York, were married July 29 at Forrest Hills, New York. Dr. Kerr has been appointed assistant in the Department of Medicine at Wilkes-Barre General Hospital.

Dr. Robert H. Lamb, 220 Boston Bldg., Salt Lake City, Utah, is specializing in Orthopedic Surgery.

Dr. William S. Rothermel has been appointed Chief of the Department of Radiology at Conemaugh Memorial Hospital, Johnstown, Pa.

1945 Dr. Daniel E. Brannen, Bellaire, Ohio, is now associated with Dr. Richard N. Nailling of Asheville, N. C., in the practice of surgery.

Dr. Kent Cooper, Maplewood, N. J., and Millerton, N. Y., and Miss Lois Fitton, Fall River, Mass., were married June 16. Congratulations!

Dr. Patrick J. Lavelle, Jr., is Chief Resident in Urology, Kern County, Bakersfield, California.

Dr. William L. Ross, Jr., has sent us a change of address as U. S. Public Health Hospital, Lexington, Ky.

Dr. Herbert Unterberger, Drexel Hill, Pa., was awarded the degree of Master of Science for advanced work in Internal Medicine by the University of Pennsylvania. He is a member of the staff of the Delaware County, Woman's Medical College, and Philadelphia General Hospitals.

Dr. F. William Henderson and Miss Jane Carr Charlton were married Saturday, September 1, in St. Paul's Methodist Church, Pittston, Pa. Following a wedding trip to Canada they will reside on Bedford Street, Forty Fort, Pa. Congratulations.

Dr. Robert A. Murphy, Florence, N. J., has been appointed head of the department of anesthesia at Burlington County Hospital, Mount Holly, N. J.

Dr. John H. Petre, Jr., 832 W. 7th St., Erie, Pa., has been appointed to the medical department of the Hammermill Paper Co., as part-time assistant to the medical director, Dr. James D. Stark.

Dr. Joseph S. Puleo, 502 Haws Ave., Norristown, Pa., was named Chief Medical Inspector of the Norristown public schools by the Norristown School Board at their business meeting June 15.

Dr. Robert H. Baker (Major M.C., USA) after having served a number of months in Korea at the beginning of the war there, has been assigned to St. Louis University, to continue his Orthopedic Residency Training.

Dr. John R. Bowen, 1st Lt., USN, USS Rebobeth, AGS-50 c/o Fleet Post Office, New York, N. Y. He is married and has a two year old boy.

Dr. Lawrence F. Casale (Lt. MC USA), a veteran of World War II, ended his practice in Portage, Pa., for active army duty, June 1.

Dr. Melvin E. Haas (1st Lt. MC USAF) is doing internal medicine in Air Force Hospital in Amarillo, Texas. He is married and has one child.

1946 Dr. Chester F. Cullen is a Resident in Neurology at Jefferson.

Dr. James T. Helsper (Lt. (jg) USNR), 187 Montague Place, S. Orange, N. J., married Miss Mildred Ann Belinsky, of Norwalk, Conn., at Port Hueneme, Calif., on July 11.

Dr. and Mrs. John A. Koltes, Jr., of Trevose, Pa., announced the birth of a daughter, Karen Marie Koltes, on September 7. Congratulations!

Dr. Charles L. Miller (1st Lt. MC USA), 241 E. Broad St., Bethlehem, Pa., left his general practice in Hacketstown, Pa., in March, 1951, to enter service in the Army Medical Corps, and has been in Korea since June, 1951. Dr. Miller is married and has two boys.

Dr. Laurence A. Mosier's new address is: 1st Lt. MC USA #A02215397, Prov. Sq 975, APO #757, c/o PM, New York, N. Y.

Dr. Chester L. Schneider, Central Alaskan Mission, writes a splendid letter giving us news of his work and the building of a new hospital. He has two children, Barbie and Judy.

Dr. George F. Tibbens, Washington, Pa., and Miss Nancy Kostenbauer, Hazleton, Pa., announced their engagement.

Dr. William J. Woodward, of New Jersey, has been appointed to the staff of the Palmerton (Pa.) Hospital in a medical rather than surgical capacity.

1948 Dr. Ellsworth R. Browneller's new address is CVG3, c/o F.P.O., New York, N. Y. (Did not include rank.)

Dr. Sydney R. Cable is a 1st Lieutenant Medical Corp., stationed at Valley Forge Army Hospital, Phoenixville, Pa.

Lt. C. Harold Cohn, MC USA, may be addressed as follows: USAH Fukuoka, APO #1105, c/o Postmaster, San Francisco, Calif.

Dr. Chester F. Cullen is a Resident in Neurology at Jefferson.

Dr. James B. Loftus sent us his new address—Mitchell Field Base Hospital, Hempstead, L. I., N. Y. (He did not give us his rank.)

Dr. George J. O'Donnell, who has opened offices at 272 S. River Street, Wilkes-Barre, Pa., for the practice of Pediatrics, has been appointed assistant in the Department of Pediatrics at Wilkes-Barre General Hospital.

Dr. Roberto C. Rodriguez's new address is Rodriguez Army Hospital, Fort Brooke, Puerto Rico. (He did not include his rank.)

Dr. Edward Scull, 135 E. 92nd St., New York, N. Y., is a Resident in Rheumatology in Bellevue Hospital.

Dr. and Mrs. Howard L. Shaffer, Hondo Air Base, Hondo, Texas, announce the birth of a daughter, Christine Louise, on November 7, 1951. Congratulations!
Dr. William B. Shope (Lt. (jg) USN), Greensburg, Pa., was the first medical man from Westmoreland County to be returned home under the Army rotation plan after serving for six months with the Army Medical Corp in Korea. Dr. Shope and Miss Katie Gaskin were married October 1st in Greensburg. Our best wishes.

Dr. Thomas C. Turner (Lt. (jg) MC USN) is stationed at the U. S. Naval Hospital, Bethesda, Md. He is engaged in research in bone and tissue graft. He recently gave a paper in London and expects to present a paper before an orthopedic society in Chicago in the near future.

Dr. William E. Hart, Jr., West Hartford, Conn., and Miss Kathleen M. Walter of Meriden, Conn., were married June 23 in Meriden. Congratulations!

Dr. Roland J. Johnkis’ new address is Walter Reed Army Hospital, Washington 12, D. C.

Dr. Duane R. Larkin’s new address is 1st Lt. AO 2212690, 86th Medical Corps, APO #65, c/o Postmaster, New York, N. Y.

Dr. Eugene L. Childers, a native of Fresno, Calif., has opened an office on the Lincoln Highway in the Washington Park section, Raritan Township, N. J.

Dr. Albert C. Haas is now a 1st Lt., MC USA, #01918570. His address is 7004th ASU USA Dispensary, The Pentagon Bldg., Washington, D. C.

Dr. Bernard V. Hyland, Jr., opened his office for the Practice of Medicine at Tobyhanna, Pennsylvania.

Dr. James B. Jamison, Patterson Heights, Beaver Falls, Pa., and Miss Doris Fairfield, of Wilkinsburg, Pa., have announced their engagement. Congratulations.

Dr. Edward L. Pennes announced the opening of his office for General Practice at 699 Mayfair Street, Philadelphia 24, Pa.

Dr. Aris M. Sophocles has opened offices for the General Practice of Medicine at 4469 S. Broad Street, Yard-ville, N. J.

Dr. Robert S. Stein has opened his office at 800 Northampton Street, Easton, Pa.

Dr. Darrell C. Stoddard’s new address is 6006 ASU, Fort Lewis, Washington. (Did not include rank.)

Dr. J. Richard Titus is now on active duty, assigned to the USMC, Lt. jg. MC USNR, Second Br, 3rd Marine Brigade FMF, Camp Pendleton, Oceanside, California.

Dr. and Mrs. Frans Vosseberg, of Valley Stream, Long Island, N. Y., announced the birth of a daughter, Andrea, on June 25th. Congratulations!

1951

Dr. John T. Douglas was married to Louise Hoffman on September 1 in St. John’s Chapel, Del Monte, Calif. Following a wedding trip to Carmel, Calif., Dr. Douglas and his bride will reside at 2965 Clay Street, San Francisco, Calif., where he is interning at Southern Pacific Hospital.

Dr. Victor F. Greco, Hazleton, Pa., and Miss M. Jeanne Yackshaw, Hazleton Heights, have announced their engagement. — Our best wishes.

Dr. George M. Meier, Haskell, N. J., and Miss Charlotte Monstrastelle, Riverdale, N. J., were married June 16. He is the son of Dr. William U. Meier, ’15, Haskell, N. J. Congratulations!

Dr. and Mrs. Dean B. Olewiler, of New Orleans, formerly of Philadelphia, are receiving congratulations on the birth of a daughter, Deborah Fern, August 28.

Dr. Richard H. Small, the son of Dr. and Mrs. Louis Small, of Passaic, N. J., married Miss Sally Rubin, of Orange, N. J., on June 17th. Congratulations!

Dr. Fred W. Wachtel, Elizabeth, N. J., and Miss Miriam Rados, Newark, N. J., were married June 7th. Congratulations!

We are called upon so often for information concerning our graduates. Won’t you please fill in the questionnaires we sent you? Be sure to give your specialties, etc., so that our files may be complete and up-to-date.

Please address all communications to the Alumni Office, 1025 Walnut St., Philadelphia 7, Pa.
Another year has passed, and we are sending you our second Christmas number. We hope you have enjoyed the Bulletins issued during this time; we have tried to give you the news of your Alma Mater as it has occurred; we have welcomed your suggestions and trust that you will continue to send them to us; we are always interested in making the Bulletin just a little bit better each year, keeping in mind, especially, those of our Alumni who do not have the opportunity to visit the College.

We hope that Christmas will be a joyous one for you and yours, and that the New Year will bring you much happiness. We like to feel that this Season draws us all closer in the great hope that Peace may again come to the World and that Good Will Toward Men exists through all the nations. Until that day when all mankind may again say, in truth, “God’s in his Heaven, All’s right with the World.”
