Improving Patient Outcomes and Student Learning through Interprofessional Collaboration

IPE EXPERIENCES IN PROGRAM YEAR 1 (January–June 2016)
• 77 Students and 8 faculty/staff attended IPE orientation
• 93 Nursing, Nurse Practitioner, Dental Hygiene, Exercise Science and Occupational Assistant students rotated through the family health clinic
• 18 Exercise Science, Occupational Assistant and Dental students rotated through the mobile health unit
• 33 Nursing students rotated through the dental hygiene clinic
• 84 IPC patients were seen in the family health clinic
• 70 IPC patients were seen in the mobile health unit

“An interprofessional team keeps the body connected.”

GOALS
• Integrate primary healthcare, oral health, exercise science, occupational therapy assisting, and mental health service at one site
• Promote interprofessional education opportunities for Lewis and Clark Community College and Southern Illinois University
• Provide health services to under served urban and rural populations utilizing the mobile health unit

INSTITUTE FOR HEALTHCARE IMPROVEMENT’S TRIPLE AIM OUTCOMES
• Increased healthcare to under served populations
• Integrated oral health and other healthcare services into a nurse-managed primary care practice
• Incorporated a clinical care coordinator to strengthen patient compliance and improve communication among care team members
• Provided early identification and intervention resulting in better patient outcomes and overall lower medical costs

This project is supported by the Health Resources and Services Administration (HRSA) UD/HP28525-91-00 for the Nurse Education, Practice, Quality, and Retention Program for an Intercollaborative Practice. Funds received for the three-year project are $1,430,548.00.
