New President Welcomes Guests

In a warm and informal manner, Jefferson’s new President, William W. Bodine, Jr. welcomed the incoming Class of 1963 and the other guests who attended the Opening Exercises of the 136th Annual Session of the College on September 14, 1959, and then introduced the members of the Board of Trustees and Faculty seated on the speakers’ platform.

"As the newest members of our far-flung Jefferson family," Mr. Bodine said, "it will interest you gentlemen of the Freshman Class to know that you number 177; that you represent the top 12% of the 1,489 applicants carefully screened by our Committee on Admissions; that you have come from 16 States and Puerto Rico; and that you include amongst your group representatives of 70 Colleges.

"The fact that 29 of you are sons of physicians," he continued, "and that 38 members of the Class have Jefferson relationships in their background, with 19 sons and 7 brothers of Jefferson Alumni, is striking proof of the pride that physicians have in their profession, and the loyalty of Jeffersonians to their old School.

"It is worthy of note, I believe that almost 70% of you are residents of the Commonwealth of Pennsylvania, which is as it should be, for Jefferson, along with the five other Medical Colleges in the Commonwealth, receives substantial financial aid from the State.

"Because of that support and the generous endowments given down through the years by its many benefactors, Jefferson is, today, able to provide you with the finest medical education for a tuition charge of $900 annually, compared to our actual costs per student of $5,559.00.

"Thus, you will have the friendship and the extensive professional knowledge of one of the most outstanding and dedicated Medical College Faculties in this country, with the facilities and equipment necessary to complete your medical training during the next four years.

"Our primary mission is to do everything we possibly can to assist you, but to a very large degree it is up to you to
get the most out of your time here at Jefferson, so that upon graduating you will be equipped to the maximum of your abilities to carry on the great profession of medicine which you have chosen as your life work.

"You must realize early," Mr. Bodine admonished, "and this very evening is none too soon—that you are entering an honored profession which demands a high degree of responsibility, not only to those individuals who solicit your medical care, but to all members of the community. In times of disaster, whether local or national, physicians are called upon to contribute their knowledge and time for the common good. They alone have the scientific training necessary for safeguarding the health of their fellow-men and for administering to their needs during periods of incapacity. They must, by a free application of their unique qualities, contribute their share towards maintaining the high standing and dignity of the medical profession.

"And so," he concluded, "in what has been termed 'the golden age of medicine,' let us all together—to the glory of Jefferson—employ wisdom in moving ahead to longer life, less disease, better international understanding, and the kind of superlative quality of health for all men for which mankind has worked so long."

(above) President Bodine welcomes guests

Dr. Sodeman Greets New Students and Their Families

Dean Sodeman then added his greetings and welcome to the new students and their wives "who," he said, "will spend an unofficial four years at Jefferson, sharing the work and burdens of their spouses. Most of all, I want to let those parents who are here know how appreciative we are of their visit. Too often this is the only visit we have with them until Graduation day, and we wish we could know you better."

In speaking of the number of acceptances as compared with the number of applicants for admission, Dr. Sodeman said that while this may seem a small percentage, Jefferson is the largest of private Medical Colleges, with only three schools, all of which are State institutions, being larger. He pointed out that we have the largest number of living alumni, having graduated almost 20,000 over the years.

Of the new Class, Dr. Sodeman said that we hope to keep all of them through the entire four years and graduate them, since medicine, the Commonwealth of Pennsylvania and the Nation need every physician we can produce. "To lose one," he said, "deprives some community of 30 to 50 years of a physician's services.

"We want all of these first year students here, and hope that they can and will measure up to Jefferson's high standards. To our new Jeffersonians—and they are already a part of the medical profession, having had eight hours of work in medical school today, with only 4800 more hours to go—we wish Godspeed and success in their new life."

Dr. Sodeman then called on Mr. J. Howard Pew, member of the Board of Trustees, who announced the action of the Board in appointing William Warden Bodine, Jr. to succeed Admiral Kauffman as President of The Jefferson Medical College and Hospital. He characterized Mr. Bodine as an aggressive and active leader in civic and cultural affairs of this city and said, "Mr. Bodine brings to the Presidency of Jefferson an enthusiasm for her future and a fine background of educational and hospital activities in Philadelphia."

In a lighter vein, Mr. Pew said that in 1900 he had gone to work for Mr. Samuel T. Bodine, who was the largest owner of Sun Oil Company. "A number of years ago," he continued, "I retired but I now find myself serving his grandson, William Warden Bodine, Jr."

Dr. Sodeman then announced the deaths which have taken place on the Faculty since last September and a moment of silence in memory of these men was observed.
He then made announcement of the new appointments to the Faculty and introduced Dr. Robert I. Wise, Magee Professor of Medicine and Head of the Department; Dr. Philip J. Hodes, Professor of Radiology and Head of the Department and Dr. Herbert A. Luscombe, Professor of Dermatology and Head of the Department.

Gold Omega Wrist Watch, awarded by Hoffman-LaRoche, Inc. to a Sophomore Student, demonstrating outstanding scholarship, character, personality and seriousness of purpose, to Kenneth Marshall Given.

*(below)* Mr. Large with undergraduate prize winners

(The full list of Promotions, New Appointments and Resignations appears on page 25 of this issue of the BULLETIN.)

**Undergraduate Prizes Awarded by Mr. Large**

Mr. James M. Large, Chairman of the College Committee of the Board of Trustees, then awarded the following undergraduate prizes: **APPLETON CENTURY-CROFTS, INC. PRIZE**—Medical publications to the student who passes the best general examination at the end of the Junior Year, to William Thomas Lemmon, Jr.; **PHYSIOLOGY PRIZE**—a Gold Medal, awarded by bequest of Dr. Francis W. Shain, for the best Essay, or the best examination on a subject pertaining to Physiology (open to undergraduates of the First Year) to Stephen Gosin, with Honorable Mention of Robert Brown Matthews and Ronald Franklin Green; **ANATOMY PRIZE**—a Gold Medal, awarded upon the completion of the Freshman Year, to the student who has the highest grade in the Anatomical Subjects of the Freshman Year to Joseph Snyder; **ROCHE AWARD**—a

Mr. Large pointed out that William T. Lemmon, Jr. is the son of Dr. William T. Lemmon, Professor of Surgery and member of the Class of 1921, and he congratulated Dr. Lemmon on his son’s achievement.

**Dr. Herbut Introduces Speaker of the Evening**

Dr. Peter A. Herbut, Professor of Pathology and Head of the Department, and Chairman of the Executive Faculty, then introduced the principal speaker of the evening, Dr. Fred Harbert.

After Dr. Harbert’s name on the program for Opening Exercises, the following appear “A.B., M.B., M.D., M.Sc. (Med.), D.Sc. (Med.), Professor of Oto-Rhino-Laryngology and Broncho-Esophagology, and Head of the Department” and Dr. Herbut said that actually Dr. Harbert’s entire career is thus described.

He went on to tell the audience that Dr. Harbert had been born in Detroit, Michigan, and upon completion of his public school education there, he enrolled at Wayne University where he received his A.B. and M.B. degrees in
1928 and his M.D. degree in 1929. After graduation he joined the Navy, where he remained for over twenty years. He is married and has six beautiful daughters.

"His whole medical career has been devoted to the study of diseases of the Eye, Ear, Nose and Throat," Dr. Herbutt continued. "In the Navy, as would be expected, he had many assignments and positions and ended his career here as Captain. Among other places, he obtained postgraduate training at the Endaural Institute in New York, and at the University of Pennsylvania. At the latter he was awarded the degrees of Master of Science and Doctor of Science. He belongs to the usual score of medical societies and has contributed significantly to medical literature.

"As far as Jefferson Medical College is concerned, Professor Harbert was appointed Head of the Department of Otology on February 6, 1951 to succeed the late Professor Williams, and Head of the Department of Broncho-Esophagology on September 10, 1954 to succeed Professor Emeritus Clerf. Both of these were most difficult assignments because of the eminence of his predecessors. But, Dr. Herbut concluded, "our distinguished speaker has filled the positions well."

Dr. Harbert Speaks on "Your Chosen Profession"

Dr. Harbert’s subject was "Your Chosen Profession" and his remarks were directed to the Class of 1963.

"The Profession you have chosen," said Dr. Harbert, "is one of the three learned professions; namely, theology, law and medicine. A profession may be defined as 'A vocation in which a professed knowledge of some department of learning or science is applied to the affairs of others.' In the case of medicine, this implies first that you have a keen interest in the basic biological sciences, and secondly, that you are interested in using this knowledge for the benefit of people."

Dr. Harbert then contrasted medical education in the past with our present-day methods. "The earliest training in medicine in this country," he said, "was a system of apprenticeship, whereby a young man spent three to seven years under the guidance of a physician preceptor. During the 19th century, 457 medical schools mushroomed. A typical curriculum consisted of a course of lectures covering a period of four to six months. The 'student heard much, saw little, and did nothing' under this system. The development of laboratories and hospitals, and well-earned criticism hurried the closure of weak schools. At present about 7,000 new doctors of medicine are graduated every year from 79 medical schools. It is estimated that by 1975 this number must be increased to at least 9,500.

"The intellectual content or field of knowledge a profession embraces must first be mastered before it can be applied to human affairs. Scientific knowledge, according to
reliable estimates, doubles about every 15 years. We can readily see why specialized bodies of knowledge remain the province of a small group of experts, not because they selfishly hoard it, but simply because everyone will not or cannot devote the necessary time to acquiring it. None of you will be able to embrace all of the knowledge pertaining to your profession. It will be one of the functions of your teachers to point out the essential cores of this knowledge, but since you are graduate students, emphasis will be on learning by the student, rather than teaching by the faculty.

"The purpose of a medical school is to create an environment which stresses science as related to the ills of mankind. In this environment you will also develop skills and habits, attitudes such as personal responsibility and compassion, and an understanding of the high professional, social, economic and ethical principles characteristic of our profession. The object is not to produce a physician who can render all types of professional care, but a person who can begin practice as a well-rounded, competent, conscientious and safe general practitioner or continue specialization in a more limited field."

"As long as society expects the best possible service," Dr. Harbert stated, "we shall not have less, but more specialization in medicine as well as in other services. An ancient tradition of medicine is consultation. Not only do our best practitioners seek the advice and services of specialists for their patients, but specialists in the same area consult and refer freely between themselves. While the patient or his family may initiate such requests, the vast majority originate with the doctor."

Dr. Harbert stressed the need for continuous self education, since the context of medicine is continually changing, and since we all stand on the shoulders of our predecessors to reach higher goals.

He pointed out that most educators agree that successful education comes from a spontaneous interest of the student who learns as he satisfies his curiosity, and promised that faculty members will try to fire that curiosity to know and add to knowledge.

"Learning medicine," Dr. Harbert said, "is like acquiring a new language. During the first years you will be busy acquiring a vocabulary of words and meanings. You will be acquiring knowledge. Also, you will be perfecting skills and techniques which is training. These, however, are only means to the end we are all striving for: namely, wisdom which is the ability to judge and deal with facts, especially as they relate to life and conduct. The development of judgment, meaning the ability to make evaluations and take proper action, is never complete. When we are in this stage of medicine it is comparable to such familiarity with a language that great prose and poetry can not only be read but produced."

(right) Mr. Bodine, Dr. Sodeman and H. Glenn Hostetter, student council president, greet guests at reception
Dr. Harbert warned the students of having conflicting interests since, he said, "medicine is jealous of other loves and will not tolerate the philanderer who neglects her for other interests."

At the same time, he advised the students to develop a hobby or special interest outside of medicine or on its fringes, since often hard work in one field seems to make more energy available for another.

"Your teachers now and patients later will demand certain things, expect some, and appreciate others. The more successful of you will be those who are not niggardly in the last category," was Dr. Harbert’s further advice to the Freshman. He said that he felt that the laments about the passing of the old-time family doctor were unjustified, since modern prophylaxis of disease and efficient treatment with modern drugs and surgery, seem more appealing than the traditional picture of the old family doctor as he holds a sick child’s hand for hours on end with a hopeless and helpless stare.

He pointed out, however, that the physician must not only treat the disease but must also care for the patient, and that many times the physician’s personality is a useful therapeutic agent, since if the physician is truly interested and concerned in his patient’s welfare the patient will sense this attitude and respond to it.

"In your studies," said Dr. Harbert, "you will often be confronted with conflicting evidence. In evaluating such situations, I would like to tell you the story of the shield. One person said it was black and another white. Since neither could convince the other, they appealed to an impartial third party. This party said I know you both as truthful witnesses; since gray is a mixture of black and white, the shield is obviously gray. This is the armchair philosopher type of compromise. Instead of this approach, I recommend that of the fourth party who went with each observer and found each correct, thereby concluding that the shield was black on one side and white on the other. Realities have many aspects, which can only be appreciated by views that are not identical. In binocular vision, for example, we gain the sensation of depth only because we fuse two different images of the same thing. You will get this stereopsis in color by studying different disciplines and viewpoints."

Dr. Harbert stressed the importance of the student’s learning how to think, as well as what to think. He pointed out that in contacts with instructors and literature the student would be called upon to distinguish between conclusions based on observation and reasoning and those of rhetoric, and warned about post hoc ergo propter hoc reasoning which, literally translated, means "before this, therefore, because of this." "We like to use this reasoning" remarked Dr. Harbert, "when we give a patient a treatment and he gets well, but do not approve when the patient uses the same logic to blame us if he becomes worse!" He stated that a knowledge of statistics would not only point up significant correlations but also that numerical correlation
does not necessarily indicate a cause and effect relationship. Experience in research methods, he said, was also invaluable in analyzing reports and preventing unwarranted conclusions.

Dr. Harbert then discussed rules of conduct for the professional man. "The fundamental rule stated so well by Hippocrates," he said, "is that professional knowledge and techniques will be used solely for the benefit of the patient. Basic to professional conduct is professional independence. By this I mean individual or collective control of the methods used in the profession. For example, neither the patient, his family, or an employer should dictate whether a course of treatment should be given or how it be done."

In talking of the high costs of medical service, Dr. Harbert said he was reminded of a story about an expert's being called in to fix a broken-down assembly line which had idled hundreds of men. After peering here and tapping there, he asked for a hammer, struck a gear and everything began to work again. The management was delighted, but upon presentation of his bill for $300, the Treasurer decided to have some fun, so he marked the bill "please itemize." When the itemized bill was returned, it read "To hitting gear with hammer, $1.00; to knowing where to hit, $299."

"Behind our services," Dr. Harbert pointed out, "is a vast background of study, training and experience. The judgment and skills involved in the service should command a good price compared to other services. While the income of physicians as a group is high, no other trade or profession puts in a comparable number of hours. Besides, professional fees have not kept pace with commodity prices and other service fees.

"Traditionally," concluded Dr. Harbert, "we are dedicated to the prevention and correction of disease and the alleviation of suffering. As we improve in prevention we gladly lose in practice. In my specialty, for example, the antibiotics have nearly eliminated the need for acute mastoidectomy. Medicine is probably the only profession which is working hard to eliminate itself. Needless to say, this will not happen in your lifetime."

Following the formal program, a reception for the students and guests was held in the Library of the College.

(below) Faculty members, students and guests enjoy informal chats at the reception
A NEW LOOK FOR GRADUATE ASSEMBLY

Committee Announces Meetings to Be Held at Warwick Hotel

Many Other New Features

The Committee on Graduate Assembly of the Alumni Association is pleased to announce its tentative program for the three-day scientific meeting which will be held February 17, 18 and 19, 1960.

In addition to the interesting and stimulating papers and panels which will be presented, the program will include several new features which the Committee believes will meet with enthusiastic approval. The first major change over prior years is that the entire program, with the exception of the Clinico-Pathological Conference and the Surgical Clinic, will be held at the Warwick Hotel. Comfortable meeting rooms with ample space have been reserved, and the many exhibits which will be presented will be displayed advantageously in these meeting rooms. Each morning at recess coffee and pastries will be served, and on Thursday there will be a breakfast seminar, at which those in attendance may sit at a table of their choice to discuss with faculty members the particular subject in which they are interested. The total cost for the assembly, including three luncheons and one breakfast, will be $25.00.

Both the Dean’s Luncheon and the Business Meeting and Dinner of the Alumni Association will be held at the Warwick, and a block of rooms will be tentatively reserved so that anyone desiring to stay in the hotel will be assured of accommodations. All such requests for rooms, however, should be sent as soon as possible to the Alumni office so that the necessary arrangements can be made.

With these new features included in the program the Committee is hopeful that many of you will plan to attend.

The tentative program follows, and the December issue of the Alumni Bulletin will include any changes or additions which may be made in the interim.

REGISTRATION
8:30 to 9:00 A.M.
Wednesday, February 17, 1960

EDMUND L. HOUSEL, M.D.
Instructor in Clinical Medicine, Moderator

9:00 to 9:20 A.M. "Welcome"
Mr. William W. Bodine, Jr.,
President
William A. Sodeman, M.D., Dean
Anthony F. DePalma, M.D.,
President,
The Alumni Association

9:20 to 9:40 A.M. "What’s New in Occupational Disease"
Heinrich Briegeur, M.D., Professor
of Industrial Medicine

9:40 to 10:00 A.M. "Staphylococcus in Office Practice"
Francis J. Sweeney, M.D.,
Instructor in Medicine

10:00 to 10:30 A.M. "Advances in Antimicrobial Therapy"
Robert I. Wise, M.D., Magee
Professor of Medicine and Head
of the Department

10:30 to 11:00 A.M. "The Hyperventilation Syndrome"
William A. Sodeman, M.D., Dean

11:00 to 11:15 A.M. Coffee Break

11:15 to 12:30 P.M. Panel—Arthritis
Nathan M. Smukler, M.D.,
Assistant Professor of Medicine (Rheumatoid Diseases)
John William Goldschmidt,
M.D., Associate in Physical Medicine
John J. Dowling, M.D.,
Instructor in Orthopedic Surgery
J. Rush Shanahan, M.D.,
Instructor in Medicine

12:30 to 1:00 P.M. "Oral Treatment of Fungus Infections of Skin"
Herbert A. Luscombe, M.D.,
Professor of Dermatology and Head of the Department

1:00 to 2:00 P.M. Dean’s Luncheon

2:00 to 2:30 P.M. Visit Exhibits
2:30 to 4:30 P.M.
WARREN P. GOLDBURGH, M.D.
Instructor in Medicine, Moderator

2:30 to 3:30 P.M. CPC (Amphitheatre)
C. Wilmer Wirts, Jr., M.D., Associate Professor of Medicine

3:30 to 4:30 P.M.
Surgical Clinic
John H. Gibbon, Jr., M.D.,
Samuel D. Gross Professor of Surgery and Head of the Department

Thursday, February 18, 1960
8:00 to 9:00 A.M. Breakfast Seminar
JOSEPH L. WILKERSON, M.D.
Associate in Urology, Moderator

9:30 to 10:00 A.M. "Office Proctologic Procedures"
Benjamin F. Haskell, M.D.,
Clinical Professor of Proctology

10:00 to 10:30 A.M.
"Office Urologic Procedures"
Theodore R. Fetter, M.D., Nathan
Lewis Hatfield Professor of Urology and Head of the Department

10:30 to 11:00 A.M. "Nutritional Failure in Infancy"
Felix E. Karpinski, Jr., Clinical
Professor of Pediatrics

11:00 to 11:15 A.M. Coffee Break

11:15 to 11:35 A.M. "Recent Studies in Reproductive Physiology"
Abraham E. Rakoff, M.D.,
Clinical Professor of Obstetric and Gynecologic Endocrinology

11:35 to 12:30 P.M. Panel—"Obstetric and Pediatric Factors in Perinatal Morbidity"
Hematologic Problems
Infection
Trauma
Thaddeus L. Montgomery, M.D., Professor of Obstetrics and Gynecology and Chairman of the Department
Leon Prince, M.D., Assistant Professor of Obstetrics and Gynecology
Co-Moderators, Assisted by Members of the Departments of Obstetrics and Gynecology and Pediatrics

12:30 to 1:00 P.M. "Increasing Importance of Nickel Poisoning"
F. William Sunderman, M.D.,
Professor of Medicine and Director of Metabolic Research

1:00 to 2:00 P.M.
Luncheon
JOHN T. FARRELL, JR., M.D., Moderator

2:00 to 3:15 P.M. Panel—"Acute Traumatic Injuries"
John Y. Templeton, III, M.D.,
Clinical Professor of Surgery, Moderator
"Injuries of the Head"
J. Rudolph Jaeger, M.D.,
Professor of Neurosurgery
"Abdominal Injuries"
Kenneth E. Fry, M.D., Clinical Professor of Surgery
"Injuries of the Face"
J. Wallace Davis, M.D., Associate in Plastic and Reconstructive Surgery
"Injuries of the Chest"
George J. Haupt, M.D., Instructor in Surgery

3:15 to 3:30 P.M. Visit Exhibits

3:30 to 5:00 P.M. Panel—"X-Ray and Isotopes"
"Recent Advances in Radiology"
Philip J. Hodges, M.D.,
Professor of Radiology, and Head of the Department, Moderator
"Diagnostic Roentgenology in Adults"
Roy R. Greening, M.D.,
Professor of Radiology
"Diagnostic Roentgenology in Infants and Children"
A. Edward O'Hara, M.D.,
Associate in Radiology
"The Cobalt Bomb—As a Therapeutic Agent for Cancer"
Simon Kramer, M.B.,
Associate Professor of Radiology
"Radioactive Isotopes in Diagnosis and Therapy"
Stanley Dische, M.D.
"Radiation Biology: A New Discipline in Medicine"
Alfred George Marshak, M.D.,
Professor of Radiobiology
"Health Physics in Modern Medicine"
Robert O. Gorson, M.S.,
Associate Professor of Medical Physics in Radiology

6:00 P.M. Alumni Dinner
Friday, February 19, 1960

JOHN R. GRIFFITH, M.D.
Instructor in Clinical Medicine, Moderator

9:00 to 9:30 A.M.  "Cardiac Arrhythmias"
John H. Killough, M.D.,
Associate Professor of Medicine

9:30 to 10:00 A.M.  "Attempts at Bone Marrow
Transplantation"
Leandro M. Tocantins, M.D.,
Professor of Clinical and
Experimental Medicine and
Director of the Division of
Hematology of the Cardeza
Foundation

10:00 to 10:30 A.M.  "Unusual Lesions of the Pancreas"
Thomas F. Nealon, Jr., M.D.,
Associate Professor of Surgery

10:30 to 11:00 A.M.  "Modern Concepts of Thyroid
Disease"
Joseph J. Rupp, M.D., Associate
Professor of Clinical Medicine

11:00 to 11:15 A.M.  Coffee Break

11:15 to 12:30 P.M.  Panel—Orthopedics—"Mechanics
and Management of Lesions of
Osseous and Soft Tissue
Elements of the Cervical Spine"
Anthony F. DePalma, M.D.,
James Edwards Professor of
Orthopedic Surgery and
Head of the Department
John J. Gartland, M.D.,
Instructor in Orthopedic
Surgery
James M. Hunter, M.D.,
Assistant in Orthopedic
Surgery
Jerome M. Cotler, M.D.,
Assistant in Orthopedic
Surgery

12:30 to 1:30 P.M.  Luncheon

F. JOHNSON PUTNEY, M.D., Clinical Professor of
Laryngology and Broncho-Esophagus, Moderator

1:30 to 2:00 P.M.  "Diagnosis and Management of
Pulmonary Embolism"
Harold L. Israel, M.D., Clinical
Professor of Medicine

2:00 to 2:30 P.M.  "Subarachnoid Hemorrhage"
Bernard J. Alpers, M.D.,
Professor of Neurology and
Head of the Department

2:30 to 3:00 P.M.  "Tranquilizers and Energizers"
Robert A. Matthews, M.D.,
Professor of Psychiatry and
Head of the Department

3:00 to 3:15 P.M.  Visit Exhibits

3:15 to 4:30 P.M.  General Panel
W. Paul Havens, Jr., M.D.,
Professor of Microbiology and Professor
of Medicine, Moderator
Surgical—William T. Lemmon,
M.D., Professor of Surgery
Internal Medicine—John B.
Atkinson, M.D., Associate in
Clinical Medicine
Psychiatry—Paul J. Poinsard,
M.D., Clinical Professor of
Psychiatry
Obstetrics and Gynecology—John
B. Montgomery, M.D.,
Professor of Obstetrics and
Gynecology and Co-Chairman
of the Department of Obstetrics
and Gynecology
Pediatrics—Kalman Faber, M.D.,
Associate in Clinical Pediatrics

New Annual Giving Fund Chairman Announces 12th Roll Call Goal Set at $150,000

As new Chairman of the Annual Giving Fund Committee, I want to congratulate Dr. Gibbon, his Committee and Class Agents on the success of the 11th Drive. All of us have deep respect and admiration for those teams which have worked so diligently in the past to insure continued Alumni support of Jefferson, and it is with a feeling of humility and respect that I assume this leadership.

At the September meeting of our Committee, after long and serious consideration of Jefferson's needs, the goal for the 12th Drive was set at an unprecedented figure of $150,000.

This figure represents a substantial increase over generous amounts realized from previous Drives, but the Committee felt strongly that Jefferson's present requirements necessitated increased support. This ambitious goal is a challenge to all of us but I have every confidence that each of you will meet it—enthusiastically and generously.

I believe that all of you are cognizant of the changes which have taken place and which are continuing to take place in the field of medical education. The Administration at Jefferson is doing its utmost to keep pace with these changes, but the financial burden this progress entails is great, and they look to us for help. If Jefferson is to retain its high place among medical schools we must not fail to give this help.

The lengthened school year, more qualified teachers, additional laboratory space and better laboratory equipment require greater expenditure of money. Students' tuition and State appropriations are not adequate to pay for these very real necessities. Our Alumni must close the gap between needs and available funds if we are to safeguard our medical birthright.

In setting this goal of $150,000, the Annual Giving Fund Committee fully realized that a greater effort will be required on the part of Class Agents and, indeed, on the part of every one. But we set this goal enthusiastically—welcoming the challenge it poses and we are confident that this challenge will be a real inspiration to every Alumnus who is sincerely interested in Jefferson's welfare. We believe that efforts required to reach our goal will be great—the rewards will be greater.

Other medical schools have raised sights and achieved their aims and we are convinced that Alumni of Jefferson will assure her progress by their increased support so that we may always maintain our sense of pride in our Alma Mater.

We are asking each one of you—those who have given generously in the past—those who have given only occasionally—and those who have never given—to grasp this great opportunity to have a share in Jefferson's future. Some of you have not recognized the very real obligation you have to our school which so well provided you with knowledge and tools to assure your future, but we know that in this time of her great need you will begin repayment of your debt to Jefferson.

All who have achieved a measure of success owe it to future generations of doctors and, indeed, to humanity, to insure high academic standards, a fine physical plant and research facilities under which we were privileged to study.

To those of you who are at the peak of your earning power, we direct the strongest appeal. A really substantial gift to Jefferson will entail little if any sacrifice on your part, but it will mean a very great deal to Jefferson's future progress.

To those of you who have recently been graduated and are establishing yourself in your profession, and to those of you who are living on retirement incomes, we ask only that you participate to the best of your ability. We ask you to participate not only to help us meet this challenge of our ambitious goal, but for the personal satisfaction you will derive from this participation.

We know that we are placing a tremendous responsibility on our able and loyal Class Agents in setting our sights so high, but we have faith in them and in you, and we believe that you will meet the challenge.

With the help of God and the combined efforts of all of us, I feel that the success of the 12th Annual Giving Fund Drive will be assured.
Faculty Members and Alumni on Program of Medical Society of State of Pennsylvania

Faculty and Alumni of The Jefferson Medical College will be speakers, panelists and exhibitors at the One Hundred and Ninth Annual Session of the Medical Society of the State of Pennsylvania.

Dr. C. Earl Albrecht, Class of 1932, Deputy Secretary of Health, will speak on "The Role of the Family Doctor as a Public Health Physician."

Dr. Walter F. Ballinger, Instructor in Surgery, will present a paper on "The Complications of Esophageal Hernia."

Dr. Herbert J. Bowman, Class of 1947, Hematologist at the Harrisburg Hospital, will be one of the panelists who will discuss "Current Status of Fibrinolytic Agents."

"Psychosomatic Aspects of Gynecology" will be the subject of Dr. Mario A. Castallo, Class of 1929, Clinical Professor of Obstetrics and Gynecology.

Dr. John T. Farrell, Jr., Class of 1922, President of The Medical Society of the State of Pennsylvania, will preside at the General Session of the Society at which the Annual Oration will be given.

Dr. LeRoy A. Gehris, Class of 1935, will moderate a panel on Disaster Medical Care.

Dr. Louis J. Hampton, Professor of Anesthesiology and Head of the Department, will moderate a panel discussion of the "Evaluation of Newer Anesthetic Agents."

Dr. W. Paul Havens, Jr., Professor of Clinical Microbiology and Professor of Medicine, will participate in a symposium on Hepatitis. His subject will be "Hemagglutination in Viral Hepatitis."

Dr. Herbert C. Mansmann, Jr., Class of 1951, who is now Assistant Clinical Instructor in Pediatrics at the University of Pittsburgh School of Medicine, will discuss "Pre- and Postoperative Management of the Allergic Child."

"The Clinical Usefulness of Ear Oximetry" will be the subject of a paper to be presented by Dr. Seymour Schatz, Associate Professor of Clinical Anesthesiology, and during the same session Dr. Robert L. Patterson, Class of 1935, Clinical Associate Professor of Anesthesiology, University of Pittsburgh School of Medicine, will discuss "Resuscitation Equipment in Anesthesia."

Dr. Frederick L. Weninger, Class of 1937, will preside at the session on Psychiatry, and Dr. Richard H. Parks, Class of 1937, will present a paper entitled "A General Psychiatrist’s Experiences with Group Therapy" during this session.

Dr. C. Wilmer Wirtz, Jr., Associate Professor of Medicine, will preside at General Session and during this session Dr. Theodore R. Fetter, Nathan Lewis Hatfield Professor of Urinary Surgery, will moderate a panel on "Iatrogenic Aspects of Urinary Tract Infection."

During the meeting of the Pennsylvania Orthopedic Society, Dr. John J. Gartland, Instructor in Orthopedic Surgery, will speak on "Traumatic Dislocation of the Hip in Children. Dr. Henry H. Sherk, Class of 1956, Resident in the Department of Orthopedic Surgery here, will give a "Summary of Experiments on the Immunologic Mechanisms of Bone Homografts" during the same specialty meeting.

Dr. Jack Edleiken, Assistant Professor of Radiology, will participate in the Orthopedic-Radiologic-Pathological Conference sponsored jointly by the Pennsylvania Orthopedic Society and the Pennsylvania Radiological Society.

Doctors John H. Gibbon, Jr., Samuel D. Gross Professor of Surgery and Head of the Department, Thomas F. Nealon, Jr., Associate Professor of Surgery, and Edward D. McLaughlin, Resident, will present an exhibit entitled "Chemical Refinements of Bank Blood."

Also among the exhibits will be one on the "Pathogenesis and Therapy of Premenstrual Tension" by Dr. Alvin F. Goldfarb, Associate in Obstetrics and Gynecology.

CORRECTION . . . CORRECTION

We regret exceedingly that the name of Dr. Henry Pohl, Class of 1923, was omitted from the list of contributors to Annual Giving which was published in the August issue of the Bulletin. The name of Dr. William Pohl was listed rather than that of Dr. Henry Pohl.

In the Class Standings shown on page 39 of the August issue, the Class of 1944-S, Dr. John J. Gartland, Agent, should have been shown in second place in percentage, and on page 40 under the heading "Class Standings" the Class of 1941, Dr. John Y. Templeton, III, Agent, should have been listed in 9th place.

We are sincerely sorry for these errors.

LIBRARY NOTES

Clinical Orthopedics. The Hand. Editor-in-Chief, Anthony F. DePalma, M.D., James Edwards, Professor of Orthopedic Surgery and Head of the Department. DEPARTMENT OF UROLOGY

"I will not cut persons laboring under the stone, but will leave this to be done by men who are practitioners of this work." Hippocrates

Hippocrates recognized a group of men trained in Urology when he wrote the above words in his famous oath, now taken by every physician on graduation from medical school.

History records many noted Urologists, but until the turn of the century much of the urological surgery was performed by the general surgeons. We wonder and are amazed at the skill and diagnostic abilities of physicians and surgeons prior to the development and use of x-ray as a diagnostic aid, when they proved their point at operation. Removing a kidney, in years gone by, was in itself not a heroic feat, but imagine the peace of mind the Urologist enjoys today when he knows by x-ray, clearance and chemical studies that the remaining kidney can and will maintain life.

The specialty of Urology, even though ancient, is modern due to the invention of the electric lamp by Edison, the cystoscope by Nitze, the x-ray tube by Crooks, and retrograde pyelography by Volcher in 1904, and the intravenous use of contrast agents initiated by Von Lichtenberg and Swick. Needless to say, there are many who have contributed in many ways to the science of Urology. Wells, the discoverer of ether, Beer who employed unipolar (Oudin) current in the treatment of papillomata, and Stern and McCarthy with the resectoscope used today in transurethral resection of bladder tumors and in prostatic and vesical neck surgery.

The Urologist must be a renal physiologist whose primary concern is to preserve renal function. Not only must he be trained to detect renal disease, but also to correct the disease by drugs or surgery if necessary. He has learned from the teachings of others that a well taken history, a physical examination using all his senses, a proper interpretation of the urinary findings and chemistries of the blood, and the use of all the urological armamentarium at his command bring the art of Urology very close to a pure science. Furthermore, by diligently applying attention to all details, not only will the Urologist’s morbidity be very low, but the mortality rate will be practically nil.

The Urology Department at The Jefferson Medical College and Hospital has, through the years, continually performed a superior teaching assignment. Its well-rounded staff, composed of nearly all certified men, have, besides giving of their time in teaching, found time to write of their experiences in practice and in basic research. The staff has written extensively on all phases of Urology. They have presented papers to medical societies both here and abroad.

Headed by Dr. Theodore R. Fetter, Nathan Lewis Hatfield Professor of Urology and Head of the Department, the staff consists of: Walter W. Baker, M.D., Associate Professor; George H. Strong, M.D., Associate Professor; Nicholas R. Varano, M.D., Assistant Professor; Willard M. Drake, Jr., M.D., Assistant Professor; Louis G. Feo, M.D., Research Associate; Joseph L. Wilkerson, M.D., Associate; Jules H. Bogaev, M.D., Instructor; Eugene S. Felderman, M.D., Instructor; Salvatore A. Pennisi, M.D., Instructor; Joseph Aspel, M.D., Instructor; George Rouse, M.D., Assistant; Solomon Keesal, M.D., Assistant; Kenneth C. Warren, M.D., Assistant; Joseph J. Blanche, M.D., Assistant; Max Rosenzweig, M.D., Assistant; and John M.
Residents in Urology are: Bradford M. McCuskey, M.D., Senior Resident, and Robert N. Cottone, M.D., J. Amado Perez, M.D., Paul D. Zimskind, M.D. and Jose R. Yunen, M.D.

The Department has called upon and utilized the services of our basic and specialized colleagues in Anatomy, Radiology, Biology, Physiology, Bacteriology, Surgery, Medicine, etc., in an effort to provide facts from urological anatomy in all its spheres. In fact, the Urologist must use all the known aids, including the field of psychiatry, in dealing with urological problems, from the acute and chronic infections, the congenital malformation, the obstructing diseases, the various tumors—benign and malignant, as well as the functional disorders of the genito-urinary system and trauma. Conferences with all departments are carried on during the year, and all areas are explored in the management of urological problems, from simple nephrectomy through the problems of intersexuality and prostatectomy. Only in an institution such as ours is it possible to discuss any medical problem with a noted authority.

The Department of Urology with Doctor Theodore R. Fetter as its Head, maintains an outstanding position at Jefferson Medical College and Hospital. The Department is actively engaged in providing excellent teaching cases to Jefferson students; there are abundant clinical patients for students and residents in the Curtis Clinic, where patients are screened to provide surgical experience for our residents; the research facilities are of the highest caliber. All facets combine to produce a very high standard of urological care to Jefferson patients.

In earlier days the surgery of the urogenital organs was performed by general surgeons. Samuel Gross was an outstanding example of the general surgeon who took a particular interest in this field, and along with his many other interests published "Diseases and Injuries of the Urinary Bladder, the Prostate Gland and the Urethra" in 1851. This thesis was the authority of its time and further editions were printed in 1855 and 1876. Many surgeons found that genito-urinary surgery could occupy all their time. In recognition of this, in 1894 Orville Horwitz was appointed first Clinical Professor of Genito-urinary Diseases, but remained in the Department of Surgery until 1905, when an independent Department of Genito-urinary Diseases was established, with Dr. Horwitz as its Head as a full Professor. Professor Horwitz resigned in 1912, and was succeeded by Hiram Rittenhouse Loux. Professor Loux died while actively serving in 1930, and was succeeded by Thomas Cook Stellwagen. Upon Professor Stellwagen's death in 1935, David M. Davis was appointed Head of the Department. Dr. Davis retired in 1951 and Theodore R. Fetter was appointed Professor of Urology and Head of the Department.

*(below)* Urology Department staff and residents
Dr. Fetter was born at Schaefferstown, Pennsylvania, in 1903. He received his undergraduate education at Lafayette College and graduated in Medicine from Jefferson in 1926. He served his internship and residency at Jefferson Hospital and was special Assistant to Professor Loux until 1930, and continued until 1935 as Special Assistant to Dr. Stellwagen. He was Associate Professor of Urology until, upon the retirement of Dr. Davis in 1951, he was named to succeed him. In February, 1959, he was appointed Nathan Lewis Hatfield Professor of Urology.

Dr. Fetter is certified by the American Board of Urology, and is a member of the American Medical Association, The American Urological Association and the American College of Surgeons, the Philadelphia Urological Society and the College of Physicians. He has served as President of the Philadelphia Urological Society, of the Middle Atlantic Section of the American Urological Association, of the Philadelphia County Medical Society, of the Jefferson Alumni Association, the Medical Society of the State of Pennsylvania, the Medical Club of Philadelphia and the Jefferson Society for Clinical Investigation. He is a member of the Executive and Membership Committee of the American Urological Association and is also President of the Medical Staff of The Jefferson Medical College Hospital.

Dr. Fetter serves as Chief Attending Urologist at Jefferson Hospital, Consulting Urologist at Wills Eye Hospital and Grandview Hospital, Sellersville, Pennsylvania, and as Attending Urologist at Delaware County Hospital, Saint Joseph's Hospital, Philadelphia General Hospital and Veterans Administration Hospital, Philadelphia, Pa.

The Nathan Lewis Hatfield Professorship, to which Dr. Fetter was appointed last February, was established in 1946, under the bequest of Henry Reed Hatfield in memory of his father, an alumnus of Jefferson Medical College and, incidentally, the first President of the Jefferson Alumni Association.

The Nathan Lewis Hatfield Fellowship was also established in 1946 under the bequest of Henry Reed Hatfield in memory of his father. This Fellowship pays an annual stipend. To date there has been no Hatfield Fellow appointed primarily because sufficient money had not accumulated in the Fund. However the Fellowship is now available and it is inferred that anyone interested in this Fellowship would work on some subject allied with the genito-urinary tract.

Since 1952 a number of physical changes have been made in the Department of Urology. These changes serve to facilitate classroom teaching and give the medical students, both on the Junior and Senior level, an opportunity to work directly with the patient, resulting in greater experience in the recognition and management of urological problems. Our latest improvement is the installation of x-ray facilities in the Urology Clinic.

Urology at the Junior level consists of a total of 54
hours per student. Juniors are present in Urology Out-patient Department four mornings per week for three weeks. Lectures on selected topics are given by the Staff from 9 A.M. to 10 A.M. Following the lecture, each student is assigned an individual patient in the Clinic and under supervision of the Instructor, performs a complete physical examination including necessary studies and/or instrumentation, and arranges a return visit for the patient, preferably when the student may follow the progress.

While attending Urology Out-patient Clinic, the medical students have the opportunity of observing the attending staff and residents perform various diagnostic procedures, such as cystoscopy, cystography, pyelography, cystometry, etc.

In addition to this training in the Out-patient Department, the Junior students are required to attend eighteen lectures given by Professor Fetter.

Senior students are assigned in small numbers to a six-week clinical clerkship on in-patient service. Here the patients are individually assigned to students and the student, under supervision, is responsible for performing a complete physical examination, personally conducting necessary laboratory examinations, assisting with necessary emergency treatment and in operative and post-operative care. An attempt is made for the student to see the same patient in the Post-Operative Follow-up Clinic so that he will have seen the complete diagnosis, treatment and follow-up care. Seniors attend post-operative clinic on Thursday morning. During their training on the ward, Senior students attend formal ward rounds with Doctor Fetter on Wednesday mornings and with Doctors Baker and Strong, Friday mornings. Senior students attend Urology Staff conferences where interesting and unusual ward cases are discussed, and are given the opportunity to hear and participate in the discussion carried on by Staff members.

Adequate teaching material is provided both medical students and residents. Our Out-patient Clinic averages 450 to 500 patients per month; of these approximately 100 are post-operative follow-up patients. On the In-patient Service, approximately 100 to 110 urology patients are admitted to the hospital monthly, a third of these being ward patients. Aside from those in-patients admitted to Urology Service, our Department receives many consultation requests from other Services.

The first Urology Residency at Jefferson was authorized in 1939. The Urology residency training program now consists of four years; one year in general surgery, three years progressing through Second Assistant Resident, First Assistant Resident and Senior Urology Resident. Each year is graduated as to duties and responsibility. The first year resident spends six months on the Private "A" in-patient service. The remainder of the year is spent in two areas. In the morning, the resident is assigned to the Out-patient

(below) DR. BOGAEV conducts a class for junior students
Dr. J. A. Perez performing diagnostic uropathy under supervision of Dr. N. P. Varano

Dr. Fetter conducts conference in Urology Ward during rounds with senior students
Clinical where he becomes familiar with the various diagnostic procedures (cystoscopy, retrograde, pyelography, cystometric studies, urethrogramy, etc.). The afternoons of this period are spent in Surgical Pathology where the resident prepares and reviews all of the operative urological specimens. These specimens are carefully examined in consultation with a qualified Pathologist, and a microscopic diagnosis is made. Reports on these specimens are then dictated and described by the resident. Interesting or unusual specimens are discussed at the weekly Saturday morning Staff conference. Autopsy specimens with microscopy are reviewed by the Staff at the regular monthly mortality conference. The Urology resident assigned to Pathology attends all post-mortem examinations from Urology ward and private patients.

The second year resident assists the senior Resident on the ward service and also is active on the Private "B" service. He carries out diagnostic studies when called upon by the Senior Resident and assists in pre-operative and post-operative care of the ward patients. He acts as consultant on other ward services as delegated by the Senior Resident. He assists at all operative procedures both on the ward and on the Private "B" service.

The third year (or Senior) resident is directly responsible for all aspects of the ward service. In this work he is closely supervised by the attending Ward Chief and in all unusual or especially difficult decisions by the Head of the Department. He sees all ward consultations and personally is responsible for all in-patient pre-operative, operative and post-operative care. He assists at all operative procedures both on the ward and on the Private "B" service.

The residency program is geared to provide training second to none. It is unfortunate that excellent Jefferson men are at times turned down in applying for residency training in Urology. The men selected are in the enviable position of working with skilled men who take great pleasure in giving instruction. The residents spend ample time in the Department of Pathology and the Department of Bacteriology. The residents assist in operative procedures on the private service and the Senior Resident, under supervision of the staff, performs ward surgery. Approximately 100 operations per month are performed by members of the Urology Department. This affords the resident an opportunity to glean from the senior staff first-hand knowledge of urologic operative procedure and technique.

The Urology residents provide the Hospital at all times with a competent House Staff, and this in turn provides an extensive experience in all phases of Urology to the resident.

Headquarters for the Department of Urology are located on the Seventh Floor of the Curtis Clinic Building. To help with the many problems in the care of patients and to aid in the many details related to the teaching program, two secretaries, Mrs. Marie E. Clarke and Miss Evelyn Brady, are employed in the administrative office.

The Urology Out-patient Department, also located on the Seventh floor of the Curtis Clinic Building, is equipped
Urology Out-Patient Clinic in action. Male Treatment Room with DRS. VARANO, YUNEN and PEREZ in attendance

with two general examining rooms (one for male patients—one for female patients), one cystometric room, one large room fully equipped for all types of urological diagnostic radiologic techniques and a dark room for immediate film development. The Clinic has a complete laboratory where urologic tests can be assayed. Doctor Nicholas R. Varano is Chief of the Out-patient Clinic and is assisted by Miss Katherine Rhule, R.N., Peter O. Brown, male nurse, and a Clinic secretary. Urology Clinic treats approximately 450 to 500 patients per month, both acute and chronic cases, and refers patients in need of further study or surgery to the ward.

The Urology Ward for male patients is located on the fourth floor of the Hospital with Miss Jennie Kutz, R.N., in charge of nursing care. Under the able guidance of Miss Kutz, patients are given the very highest degree of nursing care, and students of nursing receive the best of instruction in urologic nursing. There are approximately forty admissions per month to the ward. Female urology patients are assigned to Women’s Special Ward, children to Children’s Solarium or Ward. The patients encompassed in these wards by no means comprise the entire work of the Urology house staff, as each month forty to forty-five requests are received from other services for urologic consultation. These run the gamut from cases of post-operative infections to anomalies in the new-born.

Numerous projects in urologic research are presently under study and investigation.

An exhibition of one project, “Reaction of Ureter to Intubation with Polyethelene, Polyvinyl, Red Rubber, Latex Rubber and Tygon” was presented at the American College of Surgeons, Forty-fifth Annual Clinical Congress in Atlantic City, New Jersey, from September 27 to October 2, 1959. This Exhibit, prepared by Doctor Willard M. Drake, Jr., in collaboration with Doctors Simon Soumerai and Francis F. Bartone is a facet of urologic research with dogs, the end objective of which is the hope of finding means of bridging portions of the human ureter.

Infections of the urinary tract, the pathogenesis of pyelonephritis, has excited the interest of Dr. Fetter for many years and numerous phases of this problem have been presented to many medical organizations during the past several years.

The problem of infection following operative procedures on the genito-urinary tract is at the present time receiving intensive study. It has been noted that certain strains of staphylococci and aero bacter aerogenes show a definite influence on post-operative recovery. We are now recommending delay of the operation if certain type organisms are noted pre-operatively.

The physiology of micturition has been studied by Dr. Willard M. Drake, Jr. for many years. The Uroflometer was the direct result of this study. At present we are using a newly developed Uroflometer for children.

The renal research program which was started by Professor Fetter in 1951 has been continued to a great extent by Doctor William Sunderman, Jr., who conducts a weekly clinic.
(above) Dr. Willard M. Drake, Jr., shown with Uroflometer which he developed

(below) Dr. Varano discussing microscopic finding with Dr. Perez and Dr. Zimskind
The artificial kidney will be located on the Fifth floor of the Hospital, close to the Infections Ward, Post-operative Recovery Room and Intensive Care Unit. This space will be equipped with a laboratory and such other facilities as will be necessary to maintain a well functioning unit. Doctor James E. Clark, of the Department of Medicine, will be in immediate charge, with Professors Wise and Fetter as Directors of the Unit.

The Operative Rooms, located on the fourth floor of the Pavilion, have been equipped with complete x-ray units. In the urological rooms two x-ray pyelographic-operative units have been installed. Physicians are cordially invited to inspect this area. There is no doubt that these rooms afford the finest in diagnostic and operative techniques.

Many members of the Urology staff are actively engaged in scientific projects which will culminate in the near future. Doctors Fetter and McCuskey are preparing a paper which will be presented at the forthcoming Mid-Atlantic Section Meeting of the American Urological Association, on "Hyperparathyroidism and Urolithiasis." Doctor Fetter will serve as Moderator on a panel discussion "Iatrogenic Aspects of Urinary Infections" at the Convention of
the Medical Society of the State of Pennsylvania.

Doctor Louis G. Feo will address and moderate a section of the First Canadian Symposium on Non-gonococcal Urethritis and Human Trichomoniasis in Montreal, Canada. Dr. Feo is Vice President of the International Study Group on Human Trichomoniasis.

Doctor David M. Davis, Professor of Urology, Emeritus, is actively engaged in working as Guest Editor of the Fall Edition of "The Medical Clinics of North America" in which Dr. Fetter is one of the contributors on "Urinary Infections."

Doctor J. Amado Perez, using the Uroflometer designed by Doctor Willard Drake, is testing large groups of children, both normal and abnormal to note variations in voiding pattern. This will aid in the early diagnosis of obstructive urological disease in children.

Dr. J. Louis Wilkerson presented an Exhibit on "Ureteral Injuries in Gynecologic Surgery" at the Scientific Meeting of the American Association of Obstetrics and Gynecology, Atlantic City, N. J., April 1959.

An Exhibit "Carcinoma of the Bladder: Sites and Incidence of Metastases" was presented at the 54th Annual Meeting of the American Urologic Association, Inc. The Exhibit was prepared by Drs. Theodore R. Fetter, Jules H. Bogaev, Bradford M. McCuskey and Joel L. Seres.

Dr. Jules H. Bogaev is reviewing cases of carcinoma of the genito-urinary tract admitted to Jefferson Hospital during the past twenty years, in research on "Carcinoma of the Kidney."

Dr. Bradford M. McCuskey, Senior Urology Resident, has been awarded an American Cancer Society Fellowship in the Diagnosis and Treatment of Cancer.

February 17, 18 and 19, 1960

Scientific Exhibits Breakfast Seminar

CLINICO-PATHOLOGICAL CONFERENCE
SURGICAL CLINIC
HAROLD W. JONES, M.D.

Harold W. Jones died on September 2, 1959. At the time of his death, Dr. Jones was Emeritus Professor of Clinical Medicine at Jefferson Medical College and Consulting Director of the Charlotte Drake Cardeza Foundation. His academic career is so well known to Jefferson alumni that it is superfluous to mention it here. We prefer to sketch the man's accomplishments and the extraordinary services he rendered the Institution.

Dr. Jones made a deep impression on Hematological Research and the professional life of our Medical College. He had a genuine interest in Clinical Investigation and was one of the first to implement that interest in the early days of his career at Jefferson. After his return from military service in World War I, he was distressed by the small amount of medical research going on in this institution. He proceeded to do something about it at once. With a few others sympathetic to his ideals (Lew Scheffey, Thad Montgomery, Burgess Gordon), he founded the Jefferson Society of Clinical Investigation which was for many years a strong influence in stimulating young investigators at Jefferson.

In the middle twenties, Harold was a busy practitioner whose advice and care was much sought after. Nevertheless, he found time to help in the careers of many Jefferson graduates, who still remember him for the numerous acts of kindness and thoughtfulness and continuous encouragement in their work. These might range from securing a desirable appointment for a young investigator, proposing him for membership in a society, to getting him out of a tight personal difficulty. His energy, devotion to his patients, keen diagnostic ability and personal charm early attracted to him Doctor Thomas McCrae, then Head of the Department of Internal Medicine. It was through Dr. McCrae that Harold had opened to him a wide and influential group of friends in Internal Medicine.

His personal qualities were best demonstrated during his efforts to obtain support for what was dearest to his heart, namely Research in Hematology. It was chiefly through his personal influence with Mr. and Mrs. Cardeza that his account of the needs and aspirations of Jefferson in this field received a sympathetic ear.

At the height of this personal triumph, Harold suffered one of his greatest misfortunes, the loss of his only son from, ironically enough, a rare disease of the blood, similar to those he had fought so hard to investigate and conquer. From this blow he never quite recovered his original fighting spirit.

Because he had struggled to obtain his medical education and had so many deep roots at Jefferson, Harold had an almost fanatical devotion to the Institution. Even though he had not been trained for research, there were few people in those early days who understood better its importance. He determined to see that men and equipment to carry out that work would some day be available to our College. The fruits of his early and insistent efforts are just beginning to appear and, considering the magnitude of their present scope, will not actually come to full fruition for many years.

We at Jefferson must forever remain indebted to Harold Jones for the tenacity of his will to enable others to accomplish what he could not accomplish himself.

LEANDRO M. TOCANTINS, M.D.
OPENING OF SESSION—September 14, 1959
(Promotions, Appointments, Resignations, Deaths and Leaves of Absence since September 8, 1958)

PROMOTIONS

Richard G. Berry, M.D., from Associate Professor of Neurology to Professor of Neuropathology (Neurology), with no seat on the Executive Faculty.

Harold Goldburgh, M.D., from Associate Professor to Clinical Professor of Medicine.

Simon Kramer, M.B., B.S., from Associate Professor to Clinical Professor of Radiology.

John J. O'Keeffe, M.D., from Associate Professor to Clinical Professor of Laryngology and Broncho-esophagology.

F. Johnson Putney, M.D., from Associate Professor to Clinical Professor of Laryngology and Broncho-esophagology.

Walter Wolf Baker, Ph.D., from Assistant Professor to Associate Professor of Pharmacology.

Winslow Joseph Borkowski, M.D., from Assistant Professor to Associate Professor of Neurology.

Rolf Freter, Ph.D., from Assistant Professor to Associate Professor of Microbiology.

Thomas F. Nealon, Jr., M.D., from Assistant Professor to Associate Professor of Surgery.

Joseph J. Rupp, M.D., from Assistant Professor to Associate Professor of Clinical Medicine.

Bernard Schepartz, Ph.D., from Assistant Professor to Associate Professor of Biochemistry.

Gonzalo Enrique Aponte, M.D., from Instructor to Assistant Professor of Pathology.

Willard Melvin Drake, Jr., M.D., from Associate in Urology to Assistant Professor of Urology.

James Valentine Mackell, M.D., from Associate in Pediatrics to Assistant Professor of Clinical Pediatrics.

Seymour Parker, Ph.D., from Cultural Anthropologist to Assistant Professor of Cultural Anthropology (Psychiatry).

Edwin W. Shearburn, M.D., from Associate in Surgery to Assistant Professor of Clinical Surgery (Lankenau Hospital).

Lawrence Singmaster, M.D., from Associate in Surgery to Assistant Professor of Clinical Surgery (Lankenau Hospital).

Harry L. Smith, Jr., Ph.D., from Instructor to Assistant Professor of Microbiology.

Nicholas Raphael Varano, M.D., from Associate in Urology to Assistant Professor of Urology.

William H. Whiteley, III, M.D., from Associate in Neurosurgery to Assistant Professor of Clinical Neurosurgery.

Albert A. Bockman, M.D., from Instructor in Medicine to Associate in Clinical Medicine.

Kalman Faber, M.D., from Instructor to Associate in Clinical Pediatrics.

Charles Fineberg, M.D., from Instructor to Associate in Surgery.

George J. Haupt, M.D., from Instructor to Associate in Surgery.

Robert G. Johnson, M.D., from Instructor in Surgery to Associate in Clinical Surgery.

Harry J. Knowles, M.D., from Instructor in Surgery to Associate in Clinical Surgery.

Howard C. Leopold, M.D., from Assistant to Associate in Medicine (Allergy).

William H. McFadden, M.D., from Instructor in Pediatrics to Associate in Clinical Pediatrics (Germantown Hospital).

John J. McKeown, Jr., M.D., from Instructor in Surgery to Associate in Clinical Surgery.

John B. Reddy, M.D., from Instructor to Associate in Otolaryngology.

Joseph W. Stayman, Jr., M.D., from Instructor to Associate in Surgery.

Saul Steinberg, M.D., from Instructor to Associate in Neurology.

Joseph Courtney White, M.D., from Instructor in Neurology to Associate in Clinical Neurology.

Arthur G. Baker, M.D., from Assistant to Instructor in Medicine (Allergy).

Arthur L. Bolden, M.D., from Assistant to Instructor in Medicine (Allergy).

Isadore S. Cohen, M.D., from Assistant to Instructor in Medicine (Barton Memorial).

John Joseph Dowling, M.D., from Assistant to Instructor in Orthopedic Surgery.

Edmund E. Ehrlich, M.D., from Assistant to Instructor in Medicine (Allergy).

William Fraimow, M.D., from Assistant to Instructor in Medicine (Barton Memorial).

Warren P. Goldburgh, M.D., from Assistant to Instructor in Medicine.

Edward C. Jennings, M.D., from Assistant to Instructor in Otolaryngology.

Russell Keselman, M.D., from Assistant to Instructor in Medicine.

Martin M. Mandel, M.D., from Assistant to Instructor in Clinical Neurology.

Gerald T. Marks, M.D., from Assistant to Instructor in Surgery.

William M. Perrige, M.D., from Assistant to Instructor in Surgery.
ALEXANDER M. PETERS, M.D., from Assistant to Instructor in Medicine (Allergy).
SAMUEL E. RYNES, M.D., from Assistant to Instructor in Medicine (Allergy).
JERRY E. SCHMITTENNER, M.D., from Assistant to Instructor in Medicine (Allergy) Lankenau Hospital.
GEORGE W. TRUITT, M.D., from Assistant to Instructor in Medicine (Allergy).
GEORGE C. WANG, M.D., from Assistant to Instructor in Medicine.

NEW APPOINTMENTS

WILLIAM WARDEN BODINE, Jr., President, appointed by the Board of Trustees, July 1, 1959.
W.M. HARVEY PERKINS, M.D. (Dean 1941-1950), Professor of Preventive Medicine Emeritus.
PHILIP J. HODES, M.D., Professor of Radiology.
HERBERT A. LUSCOMBE, M.D., Professor of Dermatology.
ROBERT I. WISE, M.D., Magee Professor of Medicine.
ROY RICHARD GREENING, M.D., Professor of Radiology (with no seat on the Executive Faculty).
ALFRED C. MARSHAK, Ph.D., Professor of Radiobiology (with no seat on the Executive Faculty).
STEVEN M. HORVATH, Ph.D., Visiting Professor (Physiology).
JOSEPH W. SPELMAN, M.D., Visiting Professor (Legal Medicine).
KARL HENRY BOYER, M.D., Professorial Lecturer (Physiology).
MARVIN E. ARONSON, M.D., Visiting Lecturer in Legal Medicine.
JOSEPH EDWARD CAMPBELL, M.D., Visiting Lecturer in Legal Medicine.
RICHARD JAMES COLFER, M.D., Visiting Lecturer in Legal Medicine.
ANNE CAROLINE DODGE HOOPER, M.D., Visiting Lecturer in Legal Medicine.
HAROLD LOUIS ISRAEL, M.D., M.P.H., Clinical Professor of Medicine (Philadelphia General Hospital).
ALLAN JACOB ERSLEV, M.D., Associate Professor of Medicine.
ROBERT OWEN GORSON, M.S., Associate Professor of Medical Physics (in Radiology).
JOHN H. KILLOUGH, M.D., Associate Professor of Medicine.
ENSIO K. F. RONKA, M.D., Associate Professor of Applied Anatomy.
ARTHUR ALLEN, Ph.D., Assistant Professor of Biochemistry.
JACK EDIEKEN, M.D., Assistant Professor of Radiology.
PHILIP DARRELL GILBERT, M.D., Assistant Professor of Clinical Radiology.
NATHAN M. SMUKLER, M.D., Assistant Professor of Medicine (Rheumatoid Diseases).
GERALD R. CLARK, M.D., Associate in Clinical Psychiatry.
HARRY R. DRAPER, M.D., Associate in Clinical Psychiatry.
RICHARD H. FLANDREAU, M.D., Associate in Surgery.
JOHN WILLIAM GOLDSCHMIDT, M.D., Associate in Physical Medicine (Department of Medicine).
ALBERT E. O'HARA, M.D., Associate in Radiology.
JAMES WILLIAM GODDARD, M.D., Research Associate in Experimental Medicine, Research Associate in Preventive Medicine (dual appointment).
CHARLES W. LABELLE, Ph.D., Research Associate in Preventive Medicine.
WILLIAM BERNARD ABRAMS, M.D., Instructor in Medicine.
GERALD R. ATKINSON, M.D., Instructor in Medicine.
WILLIAM F. BETSCH, M.D., Instructor in Medicine.
JOHN CAPUTI, M.D., Instructor in Surgery (Cooper Hospital).
LEONARD A. CINBERG, M.D., Instructor in Medicine (Germantown Hospital).
THOMAS N. DOWNS, JR., M.D., Instructor in Psychiatry (Eastern Pennsylvania Psychiatric Institute).
ROBERT S. GAMON, M.D., Instructor in Surgery (Cooper Hospital).
ROBERT ALLEN GREGG, M.D., Instructor in Medicine.
JOHN ESTAUGH PUTNAM, M.D., Instructor in Medicine (Lankenau Hospital).
AGNES L. MILAN, M.D., Instructor in Pediatrics.
HUNTER SHAINLINE NEAL, M.D., Instructor in Surgery (Lankenau Hospital).
JOHN M. PULLIAM, Jr., M.D., Instructor in Urology.
RICHARD COOK PUTNAM, M.D., Instructor in Medicine (Philadelphia General Hospital).
JOHN BERNARD REDDY, M.D., Instructor in Otolaryngology.
LEON R. ROBINSON, M.D., Instructor in Psychiatry.
DAVID H. ROSENFELD, M.D., Instructor in Medicine.
DANIEL SHADE ROWE, M.D., Instructor in Pediatrics.
FRANK JOSEPH ROWE, M.D., Instructor in Pathology.
MEYER STEINBACH, M.D., Instructor in Psychiatry (Veterans Administration Hospital).
KHUSHDARSHAN SINGH THIND, Ph.D., Instructor in Microbiology (full time instead of part time).
JOHN J. WALSH, M.D., Instructor in Medicine.
LAWRENCE J. ADAMS, M.D., Assistant in Neurosurgery.
ANTHONY M. ALBERICO, M.D., Assistant in Medicine.
JOHN JOSEPH BLIZZARD, M.D., Assistant in Medicine (Lankenau Hospital).
BERNARD B. BORKOWSKI, M.D., Assistant in Surgery.
JAMES R. BOWEN, M.D., Assistant in Medicine.
JAMES E. BRENNAN, M.D., Assistant in Otolaryngology.
RUDOLPH C. CAMISHION, M.D., Assistant in Surgery.
RALPH A. CARABASI, M.D., Assistant in Medicine.
JAMES FLOYD CARLIN, M.D., Assistant in Psychiatry (Ancora State [N.J.] Hospital).
RACHMEL CHERNER, M.D., Assistant in Medicine.
TED W. S. CHONG, M.D., Assistant in Obstetrics and Gynecology (Cooper Hospital).

STANLEY N. COHEN, M.D., Assistant in Medicine. 

ALDRICH C. CROWE, M.D., Assistant in Pediatrics (reapointment). 

PHILIP JUDSON DORMAN, M.D., Assistant in Medicine. 

ANTHONY L. FORTE, M.D., Assistant in Medicine. 

HOWARD FUGATE, JR., M.D., Assistant in Medicine. 

MEYER H. FRIEDMAN, M.D., Assistant in Medicine (Allergy). 

FRANK J. GILDAY, M.D., Assistant in Medicine (Allergy). 

BERNARD W. GODWIN, JR., M.D., Assistant in Medicine (Allergy) and Assistant in Pediatrics (dual appointment). 

CARL M. HIGH, M.D., Assistant in Medicine (Allergy). 

JAMES MEGARGEE HUNTER, M.D., Assistant in Orthopedic Surgery. 

RICHARD V. KUBIAK, M.D., Assistant in Orthopedic Surgery. 

THOMAS J. LEICHTNER, M.D., Assistant in Medicine (Physical Medicine and Rehabilitation). 

HOWARD LORENZ, M.D., Assistant in Medicine. 

JOHN CORNELIUS MCLOONE, M.D., Assistant in Ophthalmology. 

JAMES DOMINIC RIPEPI, M.D., Assistant in Neurology. 

F. LELAND ROSE, M.D., Assistant in Obstetrics and Gynecology (Cooper Hospital). 

PAIGE VICTOR SENCINDIVER, M.D., Assistant in Surgery. 

EMANUEL SUFRIN, M.D., Assistant in Medicine (Barton Memorial Hospital). 

JOHN TAGLIANETTI, M.D., Assistant in Medicine. 

GIANCARLO RAOLOTTI, M.D., Visiting Research Assistant in Medicine (Hematology).

RETIRED: 

ADMIRAL JAMES L. KAUFFMAN, President

HONORARY MEMBERS 

(June 12, 1959)

Dr. Muangman, '26, of Bangkok Honored by Executive Faculty and Classmates

Dr. Pyn Noyes Muangman, Class of 1926, was honored by the Executive Faculty of The Jefferson Medical College and by his Classmates during his recent visit to the United States. After the following resolution was passed by the Executive Faculty a very beautiful gold headed cane was presented to Dr. Muangman:

WHEREAS: The personal association of the people of The Jefferson Medical College of Philadelphia with medical education in Thailand has been long in duration and enormously important in achievement, and

WHEREAS: LUANG BINKAKYA BIDYABHED (PYN MUANGMAN) of the Class of 1926 has had a most important part in these developments,

NOW THEREFORE: This Executive Faculty presents its respects to PYN MUANGMAN in evidence of the high esteem in which he is held and in appreciation of his extraordinary career in Medicine.

His was the introduction into Thailand of the science of Radiology. His teaching with generations of medical students has illustrated the best principles of medical education. Both as Professor and as a Dean his objectives were the highest. Now as Undersecretary of State for Health he guides the medical destinies of Thailand and his wisdom is such that he has become as an elder statesman in Medicine, in Public Health, and in General Education. Adviser to kings and princes, a friend of everyman, his stature is a matter in which this faculty takes justifiable pride.

The gold headed cane is a symbol of integrity, of dignity, and of wisdom. May it stand also as a symbol of the invisible cords of destiny which bind our peoples.

The presentation was made by Dr. Kenneth Goodner at a dinner given for Dr. Muangman by Dr. John B. Montgomery at the Philadelphia County Club. Local members of the Class of 1926 attended the dinner.

Dr. Muangman, who is a member of the Faculty of Medicine & Siriraj Hospital, Bankok, and Undersecretary of State for Public Health for Thailand, has been traveling in Europe and the United States since August 20, when he left Bankok for Weisbaden, Germany, to attend a meeting of the World Federation of the Deaf. From Germany he flew to Chicago for a meeting of the Second World Conference on Medical Education at which he was a speaker.

Since that meeting Dr. Muangman has been visiting friends at colleges throughout the country, and after his visit in Philadelphia he will go to Washington, Winston-Salem, North Carolina, Lexington, Kentucky, New Orleans, Los Angeles and San Francisco. He will leave on October 30th from San Francisco to attend the first Asian and Oceanea Congress of Endocrinology at Kyoto, Japan. Dr. Muangman's son is a second year student at Jefferson and, of course, he enjoyed the opportunity of spending some time with him.
DR. JOHN B. ATKINSON, Associate in Clinical Medicine, has been appointed Director of the Department of Internal Medicine of Sacred Heart Hospital, Norristown, Pennsylvania.

On September 22, Dr. Atkinson addressed the Lackawanna County Medical Society at the Hotel Casey in Scranton, Pennsylvania, on the subject “Advances in the Study of the Ideology and Therapy of Leukemia.”

Among the 130 members of the National Advisory Committee for the White House Conference on Aging in Washington, D.C., next January will be DR. EDWARD I. BORTZ, Associate Professor of Medicine.

DR. HEINRICH BREIGER, Professor of Industrial Medicine in the Department of Preventive Medicine (with DR. CHARLES W. LABELLE), presented the results of a three-year investigation on “Retention and Effect of Radioactive Particulates in the Lungs” before the Industrial Health Conference in Chicago. The work reported was done under a contract with the United States Atomic Energy Commission and continues.

Dr. Brieger was also invited to speak on “Treatment of Occupational Metal Poisoning with Chelating Agents” at the Symposium on Metal-Binding in Medicine in Philadelphia.

DR. ABRAHAM COHEN, Associate in Clinical Medicine, will speak before the Illinois Academy of General Practice on November 12, 1959 in Chicago. His topic will be “What to Expect from Steroids in Treatment of Rheumatoid Arthritis.” He will also take part in a panel on “Steroids.”

Doctors LOUIS FE0, Demonstrator of Obstetrics and Gynecology and Research Associate in Clinical Urology, MARY A. FRITZ and WARREN R. LANG, Assistant Professor of Obstetrics and Gynecology, attended the First Canadian Symposium on Non-Gonococcal Urethritis and Human Trichomoniasis in Montreal, September 21 and 22, 1959.

Dr. Feo acted as Moderator of the afternoon session and presented a paper on “Treatment of Trichomoniasis in the Female.”

DOCTORS MARY A. FRITZ, WARREN R. LANG and HYMAN MENDUKE, Associate Professor of Biostatistics, presented a paper on “Bacteriologic and Mycotic Components of Trichomonas Vaginalis Vaginitis.”

DR. ELMER H. FUNK, JR., Assistant in Medicine, has been promoted to Assistant Cardiologist to the Hospital by the Pennsylvania Hospital.

DR. JOHN H. GIBBON, JR., Samuel D. Gross Professor of Surgery and Head of the Department, attended the American Medical Association Division of Scientific Activities Plenary Session held September 14th to 16th. On September 14th he spoke on “Clinical Medical Science Today and in the Immediate Future.”

He also attended the 45th Clinical Congress of the American College of Surgeons held in Atlantic City, New Jersey, September 28th to October 2nd. On September 29th he moderated a Post-graduate Course on “Pre- and Post-operative Care, Session on Problems of Extracorporeal Perfusion,” and on October 1st he spoke on “Basic Physiology of Cardiopulmonary Bypass.”

At the 15th British Congress of Obstetrics and Gynecology held at Cardiff, Wales, DR. LEIF J. GOLUB, Assistant Professor of Clinical Obstetrics and Gynecology, read a paper on “Psychogenic Dysmenorrhea.”

DR. JOHN H. HODGES, Associate Professor of Medicine, was Visiting Chief at the Atlantic City Hospital for the week of September 20.

DR. HAROLD L. ISRAEL, Clinical Professor of Medicine, is the recipient of one of 36 nationwide grants for research in tuberculosis and other related fields. He will conduct his research into sarcoidosis.

DR. SOLOMON KEESAL, Assistant in Urology, has been named chief of urology at Philadelphia General Hospital.

DR. DANIEL W. LEWIS, Assistant Professor of Clinical Medicine and Chief of the Heart Clinic, has been named to the board of the Heart Association of Southeastern Pennsylvania.

DR. HERBERT A. LUSCOMBE, Professor of Dermatology and Head of the Department, was guest speaker at a meeting of the Burlington County (New Jersey) Medical Society on September 10th. His subject was “Diagnosis and Treatment of Fungus Infections of the Skin.”

DR. ELLIOTT L. MANCALL, Assistant Professor of Neurology, conducted two clinical pathological conferences in neuropathology at the Second Annual Seminar of Muhlenberg Hospital, Plainfield, New Jersey.
DR. GERALD MARKS, Instructor in Surgery, has been made Consultant in Proctology at the Veterans Administration Hospital in Coatesville, Pennsylvania.

DR. ROBERT A. MATTHEWS, Professor of Psychiatry and Head of the Department, has accepted an appointment to serve on the Editorial Board of the "American Practitioner" for the next year.

At the 24th Annual Congress (North American Federation) of the International College of Surgeons, held at the Palmer House, Chicago, Illinois, September 13-17, 1959, DR. NICHOLAS A. MICHELS, Professor of Anatomy, addressed the General Assembly on "The Newer Anatomy of the Upper Abdominal Organs."

DR. CARROLL R. MULLEN, Professor of Ophthalmology and Head of the Department, delivered three talks at Charleston, South Carolina, on September 14, 15 and 16. The occasion was the Post-Graduate Convention in Ophthalmology and Otolaryngology sponsored by the North Carolina Eye, Ear, Nose and Throat Society and the South Carolina Society of Ophthalmology and Otolaryngology.

DR. THOMAS F. NEALON, JR., Associate Professor of Surgery, represented Jefferson on "Research" over WCAUTV at 11 A.M., Sunday, July 19th.

DR. ALBERT E. O'HARA, Associate in Radiology, recently addressed the Radiological Society of Hawaii.

DR. KARL E. PASCHKIS, Associate Professor of Medicine and Physiology, has been appointed North American Chairman of the Pan American Medical Association Congress to be held in Mexico, May 2 to 11, 1960.

DR. F. JOHNSON PUTNEY, Clinical Professor of Laryngology and Broncho-esophagology, presented three papers at the 33rd Convention of the Central Illinois Society of Ophthalmology and Otolaryngology on September 18, 19, and 20, 1959 in Decatur, Illinois. His subjects were: "Air and Fluid Sacs of the Pharynx and Larynx," "Benign Tumors of the Neck" and "Pre-malignant Laryngeal Lesions."

From a letter received in the Alumni Office from Dr. Harold R. Watkins, Class of 1920, a past president of this medical society, it was learned that the talks were very well received.

DR. ABRAHAM E. RAKOFF, Clinical Professor of Obstetric and Gynecologic Endocrinology, participated in the first annual cytology symposium of the Philadelphia Society for Cytologic Study held at Temple University Medical Center September 25, 1959.

DR. HERMAN L. RUDOLPH, Assistant Professor of Physical Medicine, attended the Annual Meeting of the American Academy of Physical Medicine and Rehabilitation in Minneapolis the week of August 31st. At the annual business session he was elected for a three-year term to the Board of Governors.

At the recent meeting of the Delaware Valley Chapter, American Medical Writers Association, Dr. AUSTIN T. SMITH, Clinical Professor of Laryngology, was the principal speaker. Dr. Smith is a former editor of the Journal of the American Medical Association.

DR. WILLIAM A. SODEMAN, Dean, presented two papers at the recent convention of the West Virginia State Medical Association which was held at The Greenbriar, White Sulphur Springs.

During the second General Session on Medicine, Dr. Sodeman spoke on "The Hyperventilation Syndrome," and at the section on Internal Medicine he discussed "Collagen: Concept, Diagnostic and Therapeutic Problems."

DEAN SODEMAN, DR. DANIEL W. LEWIS, Assistant Professor of Clinical Medicine, and JOHN Y. TEMPLETON, III, Clinical Professor of Surgery, addressed the Luzerne County Medical Society, Wilkes-Barre, Pennsylvania, on September 16. Dr. Sodeman's topic was "Physiologic Aspects of Hypertension"; Dr. Lewis spoke on "New Therapy in Hypertension"; Dr. Templeton, "Surgical Treatment of Hypertension."

DR. JOHN Y. TEMPLETON, III, Clinical Professor of Surgery, attended the meeting of the American Academy of General Practice held in Salisbury, North Carolina. The topic of his presentation was "The Surgical Treatment of Benign Lesions of the Esophagus."

On September 25th he attended the meeting of the International Surgical Group, giving talks on Clinical or Research subjects and laboratory demonstrations, and on September 29th he participated in a Panel on "Pulmonary Complications of Extra-Corporeal Perfusion" during the meeting of the American College of Surgeons held in Atlantic City, New Jersey.

DR. PETER A. THEODOS, Assistant Professor of Clinical Medicine, has been appointed Governor for Pennsylvania for the American College of Chest Physicians.

DR. ARTHUR J. WEISS, Instructor in Medicine, is one of ten local physicians who have received a grant from the American Heart Association for research.

DR. C. WILMER WIRTS, Associate Professor of Medicine, was elected President of the American Gastroscopic Society.

Dr. Wirts addressed the New Jersey Gastroenterological Association in Newark on "The Evaluation and Management of the Sequelae of Gastric Surgery."
Dr. Sodeman Is Guest Lecturer in Puerto Rico

From August 2 through August 9, Dean Sodeman was guest lecturer at the Medical Association of Puerto Rico. He delivered five lectures, each of which were attended by from 35 to 40 members of the Association.

In addition Dr. Sodeman lectured before the San Patricio Veterans Hospital staff on the subject of "Digitalis" and held ward rounds in the Department of Medicine on one morning. At the request of Dr. Rurico Diaz-Rivera, Head of the Department of Medicine in the School of Medicine of the University of Puerto Rico, he conducted a grand round session on the same morning from 10:00 to 12:00.

During his stay Dr. Sodeman also investigated an outbreak of bagassosis resulting from the disease in those handling bagasse at a plant in Arecibo. The findings of the investigation were discussed before a group of 40 physicians and members of the State Industrial Insurance group with a demonstration of cases in a two-hour session.

On August 8, Dr. Sodeman was the speaker at a luncheon given by the Puerto Rico Chapter of the Alumni Association, and on August 9 he and Mrs. Sodeman attended the Chapter's annual picnic at the San Juan Inter Continental Hotel. Wives and children of the members attended this delightful all-day affair which featured swimming, a barbecue luncheon and a business meeting.

PRESIDENT AND FACULTY MEMBERS VISIT LOVELACE FOUNDATION

President Bodine, Dean Sodeman and Doctors Thaddeus L. Montgomery and John H. Gibbon, Jr. visited Albuquerque, New Mexico, from July 9 through July 11 for conferences with members of the Lovelace Foundation.

On July 10 these representatives of the Administration and Faculty entertained six Jefferson Alumni from the Albuquerque area at a breakfast. Doctors Marshall L. Clevenger, Class of 1950, Burgess L. Gordon, Class of 1919, Albert L. Maisel, Class of 1919, Randolph V. Seligman, Class of 1940, Hugh B. Woodward, Class of 1950, and George Youngman, Class of 1941, attended and the affairs of Jefferson were discussed at length at the breakfast.

On July 11, Dr. Maisel entertained the visitors from Jefferson, Doctors Clevenger, Gordon and Woodward and their wives at his home and all had a most enjoyable evening.

EMERSON R. SAUSSER MEDICAL DENTAL CLINIC EDUCATIONAL PROGRAM

Dr. R. F. A. Colella, Director of the Emerson R. Sausser Clinic of The Jefferson Medical College, announces that for the academic year 1959-1960, Dr. Lester W. Burket, Dean of the University of Pennsylvania Dental School and Professor of Oral Medicine at both the Post Graduate School of Medicine and School of Dentistry at the University of Pennsylvania, will give a series of lectures on Oral Medicine at The Jefferson Medical College.

Under the sponsorship of the Dean of The Jefferson Medical College, the educational program of Dental Medicine, to provide a closer relationship and cooperation between physicians and dentists, has been in progress for several years.
Jefferson Alumni Participate in Trans-Oceanic Conference
Sponsored by Smith Kline and French

An hour-long program arranged by Smith Kline and French Laboratories will bring together by means of a two-way audio hookup the British Medical Association meeting in Norwich, England, and the Philadelphia County Medical Society at 301 South 21st Street on Saturday, October 24 at 12:30 P.M.

A panel of physicians from each of the participating groups will diagnose a problem case presented by the opposing panel during the meetings. The cases will involve gastroenterology and will be diagnosed solely on written clinical and pathological histories received prior to the meeting.

Dr. Henry L. Bockus, Class of 1917, Professor and Chairman, Department of Internal Medicine, University of Pennsylvania Graduate Hospital and Graduate School of Medicine, will head a panel on which Dr. C. Wilmer Wirtz, Jr., Associate Professor of Medicine, at Jefferson, will be one of the panelists.

Members of the panels will be identified to the audience on the opposite side of the ocean by means of large photographs hung behind their counterparts. As each member speaks a light will flash under his photograph on the other side of the Atlantic.

This is the fifth such trans-oceanic conference arranged by the Philadelphia pharmaceutical firm. The purpose of the trans-Atlantic “links” is to foster international understanding and to further post-graduate medical education.

FLORIDA CHAPTER INVITES JEFFERSON ALUMNI TO ATTEND 1960 A.M.A. MEETING IN MIAMI

Dr. A. Daniel Amerise, Class of 1922, has written to say that he has conferred with Dr. Leo M. Wachtel, Class of 1938, and Dr. Max Pepper, Class of 1931, President and Vice-President of the Florida Chapter, regarding plans of that group for entertaining Jefferson Alumni who visit Miami during the American Medical Association Convention in 1960.

Dr. Amerise says: “We will have many things to show you. We will have one of the most unique hospitals to show you here in Coral Gables, namely Doctors’ Hospital. This hospital is having a large addition added to it now which will be completed in the winter of this year and will be ready for showing when the Jefferson men come down. Across the street from it is the Riviera Country Club and I am hoping to make arrangements to have all the Jefferson men that care to play there for a period of two weeks. They should write me in advance if they are interested in playing or receiving a guest card.”

MICROSCOPES GIVEN TO COLLEGE BY 1959 CLINIC

The Class of 1959, through the successful efforts of the 1959 CLINIC, gave to the College two microscopes to be used in the Outpatient Departments of the Department of Medicine and the Department of Obstetrics and Gynecology. These microscopes were presented to Dr. John N. Lindquist and Dr. Thaddeus L. Montgomery at a public ceremony conducted by the Senior Class in June. It was felt by the graduating Seniors that the addition of equipment to the Outpatient Departments would be a continuing one, in that future classes might make more contributions.

Dr. Abraham Cantarow was honored by the Class of 1959 with the dedication of their yearbook in recognition of his many years at Jefferson, during which he has taught some 5,000 Jefferson graduates.

Dr. Lawrence J. Mellon, Editor of the 1959 CLINIC, joins with the rest of his Staff, in expressing heartfelt appreciation to the Yearbook Advisor, Dr. John P. Ferri, ’57, for his aid and assistance in the publication of one of Jefferson’s finest Annuals.
Chapter Notes

(above) Puerto Rico Chapter dinner in honor of DEAN SODEMAN.
Seated, left to right: DR. JULIO PALMIERI, ARMANDO GARCIA-CASTILLO; ANTONIO NAVAS (National Vice-President); WILLIAM SODEMAN; AUGUSTIN M. DE ANDINO (President of the Puerto Rico Chapter); PIO SANCHEZ-LONGO; JUAN VEVÉ
Standing, left to right: DR. MANUEL MAEZAO; JOHN F. SANABRIA; SIMON PIOVANETTI; ANTONIO RAMOS-OLLER (President Elect); GONZALO E. APONTE; ANTONIO RAMOS-BARROSO

Dr. and Mrs. Sodeman Are Guests of Honor at Puerto Rico Chapter Meeting

On August 9, 1959, the Puerto Rico Chapter of The Alumni Association gave a dinner in honor of Dean Sodeman at Cecelia's Place at Santurce, Puerto Rico. Dean Sodeman spoke to the group about recent appointments to the Faculty at Jefferson, plans for expansion at the College and for increased investigative work in the various departments.

The following day (Sunday) the Chapter held its formal meeting for the summer at the Hotel San Juan and Dr. and Mrs. Sodeman were the guests of honor. The activity was attended by about twenty-five members of the Chapter and their wives. A buffet dinner was served, and there was swimming at the beach and pool. During the business session officers were elected for the coming year. Dr. and Mrs. Sodeman were able to remain with the group most of the day until about five o'clock in the afternoon, at which time they left for the airport to take a plane to St. Thomas.
SOUTH CENTRAL PENNSYLVANIA
CHAPTER WILL MEET ON NOVEMBER 21

The South Central Pennsylvania Chapter will hold its fall meeting in Harrisburg on November 21. Dr. Anthony F. DePalma, President of the Alumni Association and James Edwards Professor of Orthopedic Surgery and Head of the Department, and Dr. Paul J. Poinsard, Clinical Professor of Psychiatry, will be guest speakers. Dr. DePalma will talk about "Important Happenings Around Jefferson During the Past Year" and Dr. Poinsard will discuss "Medical Hypnosis."

WASHINGTON, D.C., CHAPTER PLANS FOR COCKTAIL PARTY AND BUFFET SUPPER

Plans are being formulated by the Washington, D.C., Chapter for its fall meeting, which will be in the form of a cocktail party and buffet supper at the home of Dr. Everett J. Gordon. The affair will be held on either November 7 or November 21 depending on what arrangements can be made for guest speakers from Jefferson. Wives will also be invited to attend.

PLEASE NOTE

Orders for Jefferson chairs intended for Christmas gifts must be placed before December 1, 1959.
1905

GEORGE F. DOYLE, M.D., 7 W. Lexington Avenue, Winchester, Kentucky, who celebrated his 81st birthday, August 5th, is retired from active practice and spends his time compiling historical data on Clark County, Kentucky.

A few months ago he gave a sizable collection of historical books, manuscripts and records to the Winchester Public Library. The collection, called the George Ferguson Doyle Memorial Collection, contains information on Clark County and Kentucky in general.

Besides being a historian, Dr. Doyle is a collector. He has in his collection antique pistols, one dating back to the Revolution, two old grease lamps, candle snuffers and rifles from World War I. A separate collection of Indian relics includes skinning knives, bowls from pipes, ornamental beads and tomahawks.

Dr. Doyle, a native Philadelphian, was active in medical circles here after his graduation from Jefferson. He served as an instructor and in various other capacities at Jefferson until he married a Mt. Sterling girl and moved to Kentucky.

In addition to his historical work, Dr. Doyle has contributed articles to Sajous Analytic Cyclopaedia of Practical Medicine, the Cyclopaedia of Medicine and to various medical journals.

1906

MORRISON C. STAYER, M.D., 504 W. South Street, Carlisle, Pennsylvania, director of the State Health Department's tuberculosis control program for 13 years, announced his retirement from State service, effective September 4, 1959.

During his tenure in the Health Department Dr. Stayer supervised improvement and expansion of Pennsylvania's state tuberculosis hospitals which today rank with the most modern and efficient in the nation. His state-wide program of mass chest x-rays in cooperation with local tuberculosis associations is credited by health authorities with discovering hundreds of unsuspected cases of the disease and putting them under treatment.

Dr. Stayer was appointed to the State Health Department in August, 1946, following his retirement from a 38-year career in the Army Medical Corps. He entered the Army as a first lieutenant in 1908 and advanced through grades to major general. Actually Dr. Stayer's service in the armed forces began when as a boy of 15 he enlisted in the Army at the beginning of the Spanish-American War. He was released a few months later at the request of his father, a Blair County, Pennsylvania, physician.

Citations and decorations awarded to Dr. Stayer include: Distinguished Service Medal with Palm (U.S. Army); honorary commander of the Military Division Most Excellent Order of the British Empire; commander, Legion of Honor; Croix de Guerre, Legion of Merit; Royal Crown of Italy; war medal from Brazil; the Decoration of Grand Commander Acypuchu from Brazil.

1909

MANFRED H. KUDLICH, M.D., 65 N. Laurel Street, Hazleton, Pennsylvania, writes: "Fellow Jeffersonians:

"May I take this opportunity to express my gratitude and appreciation for the beautiful 50th Anniversary lapel button and the flattering citation which accompanied it?

It touched me deeply to be remembered by the Alumni Association, after all of these years. I wear the button proudly and have shown the citation to several of my colleagues and any number of my patients.

It is too bad that W. S. Carter and Peter Fagan, two Hazleton boys who went thru the four years with me, did not live to receive similar honors.

With sincere devotion to my Alma Mater to whom I owe so much, and dedication to my calling."

1911

ERWIN D. FUNK, M.D., 1435 Garfield Avenue, Wyomissing, Pennsylvania. Dr. Funk's outstanding career has taken him from Blooming Glen, Pennsylvania, where he was born, to Berlin, Germany, and Vienna, Austria, where he took post graduate work in Pathology.

He has served as Pathologist at Jefferson Hospital, Philadelphia General Hospital and as Chief of Pathology in the Reading Hospital. From 1925 to 1946 he served as Assistant Medical Director of the Reading Hospital and in 1946 became Medical Director.

Dr. Funk has authored many important articles on medicine and his honors and memberships include: Diplomat, American Board of Pathology, American College of Physicians, American College of Clinical Pathology, American Society of Bacteriologists, Philadelphia Pathological Society, American College of Pathologists, American Society for Study of Neoplastic Diseases, American Medical Association, Pennsylvania Medical Society, Berks County Medical Society.

(left) DR. DOYLE pictured with his pistol collection and some of the many certificates and awards he has received
1912

(above) DRs. LOUIS H. CLERF, Class of 1912, LOUIS M. ORR and CHARLES W. SEMISCH, III, 1933, at a meeting of the Pinellas County Medical Society in Clearwater, Florida

1913

LOUIS W. WRIGHT, M.D., 414 N. Second Street, Harrisburg, Pennsylvania, publicity director for the South Central Pennsylvania Chapter of the Alumni Association, writes he enjoyed the month of May traveling by jet and auto through southern Europe with visits to Turkey, Greece, Spain and Portugal. The Temple and Amphitheatre of Aesculapius in southern Greece was most interesting.

1916
ROSSO N. NITTOLI, M.D., 660 E. Jersey Street, Elizabeth, New Jersey, was appointed Senior Attending Physician in the Department of Surgery at Alexian Brothers Hospital at the quarterly staff meeting held recently at the Hospital.

Dr. Nittoli, who is President of the Elizabeth Board of Education, joined the staff of Alexian Brothers in 1919. He was presented with a motion picture camera and film by the medical staff of the Hospital.

Also an attending surgeon at Elizabeth General Hospital, Dr. Nittoli is a member of the New Jersey Society of Surgeons and a Fellow of the American College of Surgeons.

WILLIAM T. PALCHANIS, M.D., 194 Longview Drive, Dublin, Ohio, was made a full Professor in the Department of Preventive Medicine at the Ohio State University College of Medicine, effective July 1, 1959. Dr. Palchanis will continue with his duties as Associate Director of the University Health Service in addition to the above appointment in the College of Medicine.

1922
MARSHALL R. METZGAR, M.D., 41 N. 7th Street, Stroudsburg, Pennsylvania, recently received the Eleventh Annual Golden Deeds Award of the East Stroudsburg Exchange Club. It was given because of his “reputation as a tireless worker almost legendary among patients and fellow doctors.”

Dr. Metzgar has been practicing medicine in Monroe County for 35 years. He was appointed to a vacancy on the Stroudsburg School Board 20 years ago and has been elected to three six-year terms since then.

1926
PASCAL F. LUCCHESI, M.D., York & Tabor Roads, Philadelphia 41, Pennsylvania, was named second vice-president of the Hospital Association of Pennsylvania at its annual meeting in Atlantic City.

Dr. Lucchesi has also received an “Award of Merit” from the Philadelphia Fellowship Commission for his efforts “to help build a city which lives by the Golden Rule.” He is a member of the Committee on Membership and Finance of the Commission, which represents the united effort of the community to promote equal rights and opportunities for all people.

(above) DR. EN SHUI TAI, Class of 1928, pictured with his former classmate, DR. VANE M. HOGE (left) and Dr. H. DeLIEN, Chief of the Division of International Health, Public Health Service of the United States Department of Health, Education and Welfare

1928
VANE M. HOGE, M.D., American Hospital Association, 17th and Pennsylvania Ave., Washington, D.C., was appointed Assistant Director of the Washington Service Bureau of the American Hospital Association effective July 1. He resigned as Executive Director of the Hospital Planning Council for metropolitan Chicago to accept the AHA appointment. Dr. Hoge entered the Public Health Service as an intern in 1928.

1935
WILLIAM WINICK, M.D., Chief of Psychiatry and Neurology in the Veterans Administration’s area medical office in Trenton, New Jersey, has been appointed manager of the Veterans Administration Hospital at Brockton, Massachusetts.

Dr. Winick interned with the Public Health Service in Atlanta, Georgia, until 1938 and then entered the service of the Veterans Administration, being stationed at V.A. Hospitals in St. Cloud, Minnesota, Knoxville, Iowa, Sheridan, Wyoming, Augusta, Georgia, and Gulfport, Mississippi.

In March, 1944, he entered the United States Army and served until May, 1946, attaining the rank of lieutenant colonel. From May, 1946, until January, 1956, he served as director of professional services at
Coatesville, Pennsylvania, V.A. Hospital and then was assigned to the area medical office in Trenton, as Chief of Psychiatry and Neurology.

1937
FREDERICK M. KENAN, M.D., R.F.D. #8, Box #96, Tucson, Arizona, writes that for over 18 years he was in General Practice in his home town of Upper Sandusky, Ohio. In August 1957 he moved to Tucson, Arizona, where he is employed by Tucson Public School District #1, in charge of health program in elementary and junior high schools (there are 45 elementary and 10 junior high schools in District #1), assisted by a staff of 24 school nurses.

1940
THEO H. BOYSEN, III, M.D., Chief of Obstetrics and Gynecology at Man Memorial Hospital, Man, West Virginia, since 1956, has accepted an appointment as full-time director of the Division of Maternal and Child Health of the West Virginia State Department of Health.

1945
J. ELDER BRYAN, JR., M.D., 10802 Rives Downey, California, was recently promoted to Assistant Clinical Professor of Urology at the College of Medical Evangelists. He has also been elected Chief of Staff of the Downey Community Hospital and a member of the Board of Trustees of the Downey Community Hospital Foundation.

1947
GAIL G. L. LI, M.D., 56 S. Kukui Street, Honolulu 13, Hawaii, was recently certified by the American Board of Obstetrics and Gynecology.

1950
DONALD K. SASS, M.D., 169 East Avenue, Woodstown, New Jersey, recently passed the examination and was accepted as a Diplomate in the American Board of Obstetrics and Gynecology.

Dr. Sass began his obstetric and gynecologic practice in Salem (New Jersey) in 1956 as an associate to Dr. Harry W. Taylor. He holds membership in the American Medical Association and the Salem County Medical Society. He is a Fellow in the American College of Obstetrics and Gynecology, belongs to the Philadelphia Ob- stetric Society, is an Assistant Chief at the Philadelphia General Hospital and is on the active staff at the Salem County Memorial Hospital.

1951
EDWIN H. ABRAMHASEN, M.D., of 726 Scott Street, Stroudsburg, Pennsylvania, has left the practice of pediatrics and has accepted a position as Medical Director of the Devereaux Foundation for Mentally Retarded Children in Devon, Pennsylvania. He will also be associated with the School of Medicine of Temple University and the Department of Pediatric Neurology at St. Christopher’s Hospital for Children, Philadelphia.

Dr. Abrahamsen, who has been chief of pediatrics at Monroe County General Hospital for the past three years, became a Fellow of the American Academy of Pediatrics in 1957.

1952
WILLIAM K. CARLILE, M.D., has been appointed a Fellow in Pediatrics in the Mayo Foundation at Rochester, Minnesota.

ROBERT C. EYERLY, M.D., has returned to the permanent medical staff of the Geisinger Memorial Hospital and Foss Clinic, Danville, Pennsylvania, following a year’s post-graduate study in cancer surgery at the Memorial Hospital in New York City.

Dr. Eyerly’s year was spent in the famous Memorial Cancer Center which includes the Sloane-Kettering Institute of Cancer Research and the Ewing Hospital, almost completely devoted to treatment and care of cancer patients.

He returns as an Associate in Geisinger’s department of general surgery where he will coordinate treatment, care and advanced surgical programs for cancer patients at this hospital. He also expects to continue certain cancer laboratory research projects he began while at Sloane-Kettering Institute.

1953
JEROME ABRAMS, M.D., 323 W. 9th Street, Plainfield, N.J., has been appointed Assistant Director of Medical Education at Muhlenberg Hospital, Plainfield, N.J.

WILLIAM B. MILLBERG, M.D., has opened an office for the practice of general and thoracic surgery at 4425 Main Avenue, Ashtabula, Ohio. He joins his brother, Dr. Richard S., ’54, in offices formerly occupied by their father, the late Dr. William Millberg, ’25.

Dr. Millberg served his internship at Philadelphia General Hospital and a three-year general surgical residency at the Cleveland Clinic Hospital. Following this, he served a two-year general and thoracic surgical residency at Jefferson Hospital under Dr. John H. Gibbon, Jr.

He is a member of the Candidate Group of the American College of Surgeons, the American Thoracic Society, and a Diplomate of the National Board of Medical Examiners. He is also eligible for the American Board of General Surgery and American Board of Thoracic Surgery.

The Millbergs have two children, Catherine Janice and Constance Marie, and reside at 2006 Walnut Boulevard, Ashtabula.

1954
CHRISTOPHER K. HOOD, M.D., 5143 Bickford Drive, Charlotte, N.C., completed his Ob.-Gyne. Residency in June and will open an office in Charlotte around October 1, 1959.

ROBERT J. SORENSON, M.D., Captain U.S. Army, MC, 12918 Georgia Avenue, Silver Spring, Maryland, is one of twelve Army doctors who recently reported to Walter Reed Army Medical Center to attend the seventh class of the annual Military Medicine and Allied Sciences Course. He has just completed a tour of duty at Brooke Army Hospital, Ft. Sam Houston, Texas, where he was a resident in medicine.

Medical officers who have completed residency training in a specialty receive intensive instruction in the military aspects of medicine during the nine-month course at Walter Reed Institute of Research. Medical effects of radiation, radioisotopes, nuclear warfare, treatment of mass casualties, chemical and biological warfare agents and other related subjects are studied.

Entering the Army Medical Corps in March 1956, Captain Sorenson’s assignments include tours at the School of Aviation Medicine, Randolph Field, Texas, and the Army Medical School, Ft. Sam Houston, Texas.
Captain Sorensen is married to the former Miss Marie T. McCann of Cheltenham, Pennsylvania. They have four children, Mark 5; Mary Anne, 2½; Michael, 1; and Linda, 2 months.

JOHN R. LOUGHEAD, JR., M.D., recently opened an office at 38 S. 3rd Street, Lewisburg, Pennsylvania. His practice will be restricted to gynecology and obstetrics and he will be associated with the Evangelical Community Hospital, Lewisburg.

Dr. Loughead served his internship at Delaware Hospital, Wilmington, Delaware, and his residency training in obstetrics and gynecology was served at the Hospital for Women, Baltimore, Maryland, and at Duke University Hospital, Durham, N.C. He also attended a course in obstetric and gynecological pathology at Johns Hopkins, Baltimore, Maryland.

Dr. Loughead served as a Captain in the United States Air Force Hospital at Tucson, Arizona, and was released from the service in 1958.

He is married to the former Margaret S. DeLuca, of Wilmington, Delaware, and they have one son, John Sawyer, aged two.

HARRY WM. WELLER, M.D.—

The appointment of Dr. Harry W. Weller as Chief Medical Officer and Administrator of the United States Public Health Service, Pittsburgh, Pennsylvania, was recently announced by the United States Public Health Service.

Dr. Weller entered the Health Service four years ago, serving two years at the Washington, D.C., Clinic before being assigned to the government hospital at Detroit, Michigan.

He is married to the former Jean Hofer of Muncy, and they are the parents of three children.

1955

ROBERT J. SENIOR, M.D., has recently opened an office in the Lennox Building, Chapel Hill, North Carolina, for the practice of Pediatrics. He served his residency at the Buffalo Children's Hospital, and the last two years at the University Hospital in Chapel Hill, the past year as Chief Resident. Besides his practice, he will serve the University of North Carolina as a Clinical Instructor in Pediatrics.

ROBERT L. VANDERLIN, M.D., is associated with Dr. Sydney E. Sinclair in the practice of Pediatrics with offices at 414 Locust Street, Williamsport, Pennsylvania. After completion of his internship and general residency at Williamsport Hospital, Dr. Vanderlin spent two years of study in Pittsburgh where he served a residency at Children's Hospital and a teaching fellowship at the University of Pittsburgh School of Medicine.

Dr. Vanderlin is married to the former Marsha Rudinski. The Vanderlins have four sons, Robert, 2nd, 12; Keith, 10; James, 6, and Mark, 4.

1956

DR. AND MRS. EUGENE F. BONACCI have a daughter one year old and are expecting again in November of this year.

Dr. Bonacci is at the Kings County Hospital Center, 451 Clarkson Avenue, Brooklyn 3, New York.

GEORGE G. GIVEN, JR., M.D., has opened an office for General Practice at 144 W. Maple Avenue, Langhorne, Pennsylvania.

Recently released from the Air Force, Dr. Given is married to the former Carolyn Shuman. The Givens have one child, a son, Christopher, who is nearly two years old.

GORDON W. MELLA, M.D., U.S. Naval Support Activity, Station Hospital, Navy 510, F.P.O., New York, New York, his wife and two sons are stationed at the Naval Base Hospital in Naples, Italy, for a period of three years, where he is in charge of the Pediatric Service.

1957

JOHN M. BENDER, M.D., has accepted an assignment as Medical Director of a newly established hospital and clinic in Haiti. This is part of an effort of the Mennonite Church to bring medical service to a destitute area.

Dr. Bender, his wife and two daughters began a period of orientation and language study in Haiti in September. The hospital will begin operation on November 1st. His new address is: Hospital, Grande Riviere du Nord, Haiti.

ROBERT L. KASHOFF, M.D., is specializing in Psychiatry and is a Resident at Friends Hospital in Philadelphia.

JOHN F. KENNARD, M.D., Captain, United States Air Force, #A03079446, APO #731, Seattle, Washington, writes that his plans to enter the Service materialized and that he has just completed four weeks of Basic Orientation at Gunther Air Force Base, Alabama. His permanent duty station is Ladd Air Force Base, Fairbanks, Alaska.

WILLIAM P. MACKRELL, M.D., has opened an office at 417 Delaware Avenue, Olyphant, Pennsylvania, for the general practice of medicine.

LUCIUS F. SINKS, M.D., Captain, U.S. Air Force, #A03078213, 3913th ABS, APO 127, New York, New York, writes:

"We are living in England at this time, just outside Cambridge. I am a medical officer for one of the Air Force's establishments—not too stimulating medically but distinctly quite nice living here in England.

Beautiful country, wonderful people and a good medical establishment in Cambridge make it very enjoyable.

We now have two children, a boy and a girl."

LT. PENN P. SHELLEY, (MC) U.S.N.R., Navy Recruiting Station and O.N.O.P., Pittsburgh 19, Pennsylvania, writes:

"At the present time I am completing a two-year tour of duty in the United States Navy, having spent four months in the Bahama Islands as Medical Officer for Mobile Construction Battalion #7, Atlantic Fleet Seabees, prior to my present assignment as Chief Medical Examiner, Armed Forces Examining Station, Pittsburgh, Pennsylvania. I expect to be released from active duty August of 1960."

1958

HOWARD NATHANIEL EPSTEIN, M.D., has opened an office for the general practice of medicine and surgery at 2786 Princeton Pike, Trenton, New Jersey. Dr. Epstein recently completed his internship at St. Francis Hospital, Trenton, where he has a staff appointment.

FREDERICK W. FLOYD, JR., M.D., 334 Rosalind Avenue, Gloucester City, New Jersey, has been awarded a Wyeth Laboratories Pediatric Residency Fellowship. Announcement of the Award was made recently by Dr. Philip S. Barba, past president of the American Academy of Pediatrics and chairman of the selection committee.

Dr. Floyd, who recently completed his internship at Our Lady of Lourdes Hospital, Camden, New Jersey, will take his residency at Children's Hospital, Washington, D.C.

The pediatric program, sponsored by the Wyeth Fund for Postgraduate Medical Education, provides a grant of $4,800.00 to each physician, thus enabling him to spend two years of advanced study in the care and treatment of children.

The recipients, from 16 different states, are the second group to benefit from the program established last year by the Philadelphia pharmaceutical manufacturing firm. Selection is made on the basis of interest in pediatrics, character, able performance of duties and academic competence. The Wyeth fellowship winners may attend any hospital whose residency is accredited by the Residency Review Committee of the American Board of Pediatrics and the Council on Medical Education and Hospitals of
the American Medical Association.
The fellowship committee is composed of five eminent pediatricians from different sections of the nation.

**George Edward Hudock, Jr., M.D.**, has been appointed a resident in pathology at Wilkes-Barre General Hospital.

He is married to the former Helen M. Mesavitz of Kingston. They have one child, a daughter, Judy Ann.

**John Kuhns Kreider, M.D.**, recently assumed the duties of resident doctor at the Navajo Mission, Bloomfield, New Mexico.

Dr. Kreider is working under the Brethren in Christ Home Mission Board.

The mission hospital serves a widely scattered Navajo Community plus taking responsibility for the health of several hundred school children from local missions and government schools.

**Dr. Dominic F. Nappi** was honored on September 13 at a dinner given by a group of his friends at Palumbo's Restaurant in Philadelphia.

**Engagements and Weddings**

**1928**

**Miss Lenore Elsie Ornston**, daughter of Dr. Darius G. Ornston, '28, of Philadelphia, and the late Mrs. Ornston, was married on March 21, 1959 to Mr. David Kent Sheppard of Chester, England.

**1950**

**Dr. Bernard V. Hyland, Jr. and Miss Joan M. Ford** were married on June 20th in the Immaculate Heart of Mary Chapel of St. Patrick's Church, Scranton, Pennsylvania.

Dr. Hyland completed a residency in Radiology at Hahnemann and Jefferson Hospitals, Philadelphia, and maintains an office in the Medical Arts Building in Scranton.

**1956**

**Dr. Robert M. Pearl's engagement to Miss Reva Helene Green** of Houston, Texas, was recently announced.

**1957**

The engagement of Dr. John P. Ferri, Jr. and Dr. Helen Anne Noy was recently announced.

Dean Sodeman was one of the speakers at the dinner and Mrs. Sodeman and Dr. and Mrs. Samuel S. Conly, Jr., were among the guests.

Dr. Nappi is now Chief Resident at St. Agnes Hospital, and on June 28, 1958 he and his wife, the former Florence Donovan, became the proud parents of a daughter.

**James Myron Stern, M.D.**, his wife and son (born April 19, 1959) have gone to Southern Rhodesia, Africa, where Dr. Stern will be doing Medical Missionary work for two years or more. His address is: Mtshabegic Mission Hospital, Private Bag 101M, Bulawayo, Southern Rhodesia, Africa.

**Vernon G. Wong, M.D.**, 1447 W. Loudon Street, Philadelphia, Pennsylvania, received one of six 1959 Fellowships provided by the Ophthalmology Scholarship Fund of the Guild of Prescription Opticians of America, Inc. He will take his residency at the Graduate Hospital of the University of Pennsylvania, where he served his internship.
1957

The engagement of Dr. Bronson J. McNierney to Miss Jane Marie Canada of Titusville, Pennsylvania, was recently announced.

Miss Canada, a graduate of St. Joseph's Academy, will finish her senior year at Mercyhurst College, Erie, Pennsylvania, next spring.

Dr. McNierney is a second year resident in Internal Medicine at Jefferson Hospital.

Dr. John H. Mest was married on July 12, 1959 to Miss Eleanor Yvonne Benson.

Mrs. Mest is a graduate of the Geisinger Memorial Hospital School of Nursing, Danville, Pennsylvania. She has been employed at the hospital as a graduate staff nurse.

Dr. Mest, who recently completed a year of residency in Internal Medicine at Geisinger, plans to begin General Practice in White Sulphur Springs, Montana.

1959

The wedding of Dr. Joseph Baka to Miss Carol Janet Levy of Mt. Ephraim, New Jersey, took place on Saturday, June 13, 1959, following Dr. Baka’s graduation from Jefferson on June 12.

Mrs. Baka is a graduate of the Methodist Hospital School of Nursing, Philadelphia, and did graduate study at Johns Hopkins Hospital, Baltimore, Maryland.

Dr. Baka is interning at St. Luke’s Hospital, Cleveland, Ohio.

Walter Shaffer Bloes, M.D., was married on Friday, August 28, 1959, to Miss Judith Ann Wright, daughter of Mr. and Mrs. Johnson H. Wright, Forty Fort, Pennsylvania.

Mrs. Bloes is a graduate of The Jefferson Medical College Hospital School of Nursing.

Dr. Bloes is serving his internship at Wilkes-Barre General Hospital, Wilkes-Barre, Pennsylvania.

BIRTHS

1936

Dr. and Mrs. Leonard Parkhurst of Penn Valley, Pennsylvania, announce the birth of a daughter, Susan Carson, on May 25, 1959.

1950

A son, Thomas John, was born to Dr. and Mrs. Frank E. McElree, Jr., June 23, 1959. The McElrees have two other children, Lynn, 2½ years, and Nancy, 1½ years.

Dr. McElree is practicing general surgery in Greenville, Pennsylvania, where he is associated with another surgeon.

1952

Dr. and Mrs. B. M. Kennedy, Baraka Sanatorium, Box #1, Bethlehem, Jordan, announce the birth of a son, Douglas Craig, June 29, 1959.

The Kennedys have three other children, Kathy, Scotty and Nancy.

1955

Dr. and Mrs. Richard A. Cohen, 341 S. Rexford Drive, Beverly Hills, California, announce the birth of a son, Mark Howard, on July 7, 1959.

Dr. Cohen has completed his residency and is now with the Southern California Permanente Medical Group as an Internist.

1957

A son, Daniel Howard, was born to Dr. and Mrs. Robert K. Brotman on July 25, 1959.

Dr. and Mrs. Allan Lazar, 8313 S. Ingleside Avenue, Chicago, Illinois, announce the birth of their third child and daughter, Deena, on June 29, 1959. The other girls are: Jenny, 2½, and Julie, 1½.

Dr. Lazar is a Postdoctorate Fellow of the United States Public Health Service, Cancer Division, and will investigate the etiology of leukemia at the Department of Pathology of the University of Chicago.

1958

Dr. and Mrs. Herbert G. Hopwood, Jr., take great pride in announcing the birth of a son, Herbert Gladstone Hopwood, III, weight 8 lbs., 11 ozs., on June 15, 1959 at the United States Naval Hospital, Oakland, California, where Dr. Hopwood is a resident in general surgery.

Dr. and Mrs. Anthony T. LeDonne announce the arrival of a daughter, Marilyn Ann, Saturday, September 26.

Dr. LeDonne is presently serving a residency at Jefferson Hospital.

Dr. and Mrs. John Popowich, 4250—32nd Avenue, S., Minneapolis 6, Minnesota, announce the birth of a daughter, Janice Lee, on May 27, 1959.
Eleventh Roll Call Century and Five Hundred Donors
Alumni Annual Giving Fund

The names of the alumni and faculty members who have responded to last year's Fund appeal by contributing in one hundred dollar and over amounts are listed here in grateful appreciation. Your committee for the past seven years has invited all who could contribute in these more substantial amounts to give thoughtfully and proportionately and instituted the Century and Five Hundred group acknowledgment to these gifts. The four hundred and fifty-seven alumni recorded on this roll contributed approximately half of last year's Fund amount. The warm thanks are again expressed by the Alumni Fund Committee of the Jefferson Medical College for all of the gifts, regardless of size, made to advance the progress of our Alma Mater.

† In memory of by son-in-law and grandsons, J. Lawrence Evans, Sr., J. Lawrence Evans, Jr., Robert L. Evans.
‡ In memory of by Mrs. Don C. Lindley.

TO THE STUDENTS OF JEFFERSON

OUR MEDICAL COLLEGE WAS ESTABLISHED IN 1625 THROUGH THE VISION, INITIATIVE, AND GENEROSITY OF A SMALL GROUP OF PHYSICIANS. LOYAL ALUMNI AND FRIENDS HAVE SINCE CONTRIBUTED TO ITS SUPPORT AND TRADITIONS. THESE BENEFACTORS ASK US TO RETURN TO THE FAITH IN WHICH THEY HAVE HELD THEOPHILUM, TO PROVIDE AND THAT YOU, AS FUTURE ALUMNI, CARRY ON THEIR FAITH IN MEDICINE, AND IN JEFFERSON.

THE ALUMNI OF JEFFERSON
## Officers and Executive Committee 1959—1960

**President, Anthony F. DePalma, ’29**
