Jefferson Awards
154 M. D. Degrees

JEFFERSON’S living Alumni body was swelled to 6,674 as the 154 members of the Class of 1964 were awarded their degrees of Doctor of Medicine during the College’s 140th Commencement exercises.

President Bodine, delivering his convocation address from the flower-banked stage of the American Academy of Music, said that this Commencement marked the first time in the history of Jefferson that two degrees had been conferred on a student at the same time. The student, Dr. John Henry Maylock, was awarded both the degree of Doctor of Medicine and the degree of Master of Science. In summarizing the general history of the graduating class, Mr. Bodine stated that four years ago Jefferson received 1334 formal applications. Of that number 176 were admitted to the freshman class, representing 23 different states and 72 different institutions.

Following President Bodine’s remarks, Dr. William A. Sodeman, Dean and Vice President for Medical Affairs, presented the candidates for degrees, which were conferred by President Bodine. Two members of the Class were sons of faculty members. Dr. Richard Wolfe Keesal received his degree from his father, Dr. Solomon Keesal, Associate in Urology, and Dr. Elliott Mark Stein received his degree from his father, Dr. Bernard B. Stein, Assistant in Pediatrics.

Dr. Bernard J. Alpers, Professor of Neurology and Head of the Department, administered the Oath of Hippocrates to the graduating class at their request.

In addition to the 154 degrees of Doctor of Medicine which were awarded, 14 degrees of Doctor of Philosophy were awarded and five degrees of Master of Science.

President Bodine then conferred honorary degrees on three eminent medical figures: Miss Anna Freud, Direc-
tor of the Hampstead Child Therapy Clinic, Hampstead, London, England; Dr. Harold L. Stewart, Chief, Pathology Laboratories at the National Cancer Institute, United States Public Health Service, Bethesda, Maryland, and Jefferson graduate, Class of 1926; and Dr. William B. Castle, the Francis Weld Peabody Faculty Professor of Medicine, Harvard Medical School.

CITATIONS

In citing Miss Freud, who was awarded the honorary degree of Doctor of Science, Dr. Floyd S. Cornelison, Jr., Professor of Psychiatry and Head of the Department, praised her for adapting "psychoanalytic techniques, originally designed for adults, to the mind of a child.

"Anna Freud organized systematic and intensive studies of children who were subject to severe privation of injury. She has provided continuous leadership in many areas of normal and pathological child development. All her contributions are characterized by a rare combination of depth and lucidity. Her warmth, enthusiasm, and dedication have been admired by those who have known her and who have followed her endeavors."

Dr. Harold L. Stewart, recipient of an honorary degree of Doctor of Medical Science, was cited by Dr. John B. Montgomery, Professor of Obstetrics and Gynecology and Head of the Department, as a distinguished pathologist, scholar and teacher and a productive investigator. "He is known throughout the world for significant contributions to our knowledge of disease processes, especially that of cancer, and for his unusual dedication to the education of young scientists in the field of cancer research." Dr. Montgomery said that he is renowned not only as a scholar, but also as an ambassador of international goodwill.

Mr. James M. Large, Chairman, The Board of Trustees, read the citation of Dr. William B. Castle, who was awarded the honorary degree of Doctor of Laws. Mr. Large spoke of him as an outstanding physician and teacher and as a man responsible for one of the major breakthroughs in medicine. "By combining compassion for the sick with a burning desire for knowledge, he became the eminent clinical investigator who discovered the cause of pernicious anemia and established the crucial role of iron in bleeding anemia. By trusting simple observations and common sense he demonstrated that the shape and physical characteristics of the red cell determine the pathogenesis of hemolytic
anemia. By blending his clinical and biophysical knowledge, he provided the stimulus which led to the first electrophoresis of hemoglobin and opened the door to our present era of molecular medicine.'

VALEDICTORY ADDRESS

After receiving his degree, Dr. Castle remained at the podium to deliver the Valedictory Address to the Class of 1964. His talk investigated the varied careers open to the medical graduate—administration, clinical investigation, medical practice—and the opportunities afforded by each. He stressed the importance of Biology in each area of endeavor. He called Biology the "Queen of the Sciences", a science which has made great strides in alleviating human suffering.

In speaking of the environment of continuous flux, which today's physician will enter, he said, "It is the result of the principal novelty of the nineteenth century: The discovery of how to make discoveries; and this in turn has greatly accelerated the so-called Industrial Revolution with all its consequence for good and evil, for Western civilization and those civilizations that will evolve in other parts of the world. It is into this world of which the only constant is accelerating change and further specialization of human activity that you will now enter more fully; a world of which it has been said that the experience of the father is no longer of much use to the son."

He said that only through the sustained pursuit of new knowledge and its assimilation into an understood relation with that already acquired, can the new doctors ride the advancing crest of the wave of new knowledge as they become experienced in its application.

He projected that those graduates who seek a career in medical administration will be few and those who do will be propelled by the knowledge that the application
of medical science to human welfare frequently lags far behind the technical information available. He commented that the source from and way in which physicians are recompensed for their services will undoubtedly undergo change. Trained medical administrators will have an important part in shaping these guidelines for the future.

Dr. Castle proposed that more Americans will become involved in establishing the bases of medical education, medical science and public health in the underdeveloped nations overseas. A term of service by many young doctors is required for the welfare of the military abroad. A medical "Peace Corps" with overseas experience for all young physicians not required by military services, might well obviate inequities and be a great national contribution to their training and to their world.

To those who may decide to become clinical investigators and so concern themselves with biological systems and not directly with patients, he said, "You have acquired knowledge and perspective that may enable you to translate information from medicine to basic science and vice versa. If you become a member of a preclinical department in a medical school, you can then perform a useful duty in bringing additional meaning to the students from your past clinical experiences."

**PRACTICING PHYSICIAN**

Dr. Castle offered a special salute to those who will become practicing physicians. "Whether you become the modern equivalent of the country doctor, practice a specialty in a group, or join a clinical department in a medical school, you will be worthy of the great tradition of medicine only if you fully accept that responsibility. For the truly competent physician, there is no conflict between what is called the art and what is more tangibly the science of medicine. It is only when uncertainty or preoccupation in the application of medical science or its technology seems to distract the doctor from his concern for his patient as a human being, that science becomes no longer an articulate extension of the art. The science of medicine is part of the corpus of general science. It has no need of other authority, and knowledge of it alone distinguishes the physician from the quack whose apparent concern and confident manner find no embarrassment in his lack of scientific knowledge.

"Remember, however, that if the clinical investigator
pursues his studies too far from the bedside, he begins to compete with, or to duplicate the efforts of other workers in biology who have no opportunity to study patients, but have readily available to them laboratory animals, tissue slices and cell-free systems. For the inquisitive physician there are, of course, plenty of major problems requiring imagination and experimental skill even for palliation, such as those of the painful mysteries of rheumatism, cancer, and arteriosclerosis. We shall continue to need clinical investigators for the same reason that, despite the enormous advances in atomic physics, we still need engineers to conduct research on how best to build and to repair bridges, although these structures are, of course, merely composed of appropriately related and chosen atoms and molecules.” Dr. Castle concluded by saying, “People, like bridges, are also made of molecules, but they are, after all, arranged in rather special ways.”
THURSDAY afternoon witnessed the reinauguration of Class Day, preliminary to graduation. Dr. Sodeman in welcoming the graduating class together with their parents, relatives, and friends to the ceremonies, explained that while this was not the "first" Class Day to be held, it was the "first" to be held in recent years. He said that they had instituted it so students who are going to graduate, their families and faculty could gather for ceremonies without the formality of graduation.

Dr. Sodeman then turned the program over to Class President Dr. James H. Rumbaugh, who introduced the Class Speaker Dr. Elliott M. Stein, "a member known to the Class as one of its most outstanding contributors". Dr. Stein, speaking on "The New Physician" reviewed what the graduates had gained during their four years at Jefferson.

He spoke of the disillusionment which plagues the neophyte physician and the underlying causes and consequences of this sentiment. "It is only natural that the student coming to medical school should look upon it as the place where one can learn the science of the human body as taught by the noblest physicians of them all, those who have dedicated their lives to instructing the novice. For the first two years this concept was maintained.

"It has been in these last two years, the clinical years, that the disillusionment came that was to transform the idealist into the cynic. Suddenly the bubble burst, we were exposed for the first time to sick human beings. We discovered all too quickly from this exposure that something was amiss, according to our preconceived notions. First, the patients were not always the nice sweet-smelling cooperative persons, so anxious to get well, we once thought them to be. Some of them actually enjoyed the dependence of illness and resented our well-intentioned intrusion on their privacy. On trying to obtain a history some patients would talk on for hours and yet completely and adroitly avoid answering our well-planned questions. Other belligerent patients provided no history at all, as they were in coma, or did not speak that universal language, English. During the physical examination many patients, unaware of the obvious im-
importance, declined to be probed by our disease-seeking fingers.

"Some even refused to have a needle inserted into their arm for the fifteenth time to obtain blood for that academic lab test. And occasionally a sick person would actually refuse to come into the hospital to be cured.

"Second, the concept of pure science faded quickly when we learned that sick people are not always obliging enough to confine their symptoms and signs to classical textbook descriptions, making diagnosis not quite as scientific as working out that math problem or solving that chemistry equation. On the wards we also realized to our dismay that there are still many unsolved mysteries in medicine and often a patient could not be labelled with a specific disease entity. Sometimes the diagnosis was made and yet there was nothing to offer the patient for relief and he went on to die gradually before our disbelieving eyes. Many who were treated recovered only incompletely. A few even became sicker because they were treated. Medicine we found was not yet a pure science and perhaps never would be, but instead still to a great extent an art, based on science. In spite of this incomplete knowledge we were still expected to learn, classify and appropriately apply innumerable facts, contained in endless tests and countless journals. The more we learned, the greater was our ignorance.

"Third, the physicians and teachers of the clinical years were not as imagined. They were far from omnipotent, in fact they at times did not even know the correct diagnosis or proper treatment. Besides this inexcusable ignorance, they could not spend hours answering our many questions because they had office hours and private patients to see. Medicine was a livelihood to most physicians, not just a hobby where one could sit and ponder over patients' problems.

"Fourth, our clinical experience at smaller community hospitals soon demonstrated that it was not always possible to practice medicine the academic way we had been taught. It would be ideal to get all the laboratory tests we wanted and to do all the appropriate diagnostic procedures. But the patient was also a family member, often the wage earner, who could not afford to be out of work for that extra day or two or who could not afford to pay the remarkably high hospital expenses."

In summing up the two choices open to the graduate, Mr. Stein stated that he can remain a cynic and thus treat medicine as a money-making venture instead of a profession, or he can regard the cynicism as a stage in the development processes of the total physician. Those who choose the latter will realize that medical school represents the preliminary preparation for the life course in which they are enrolled.

STUDENT RESEARCHERS

Following Mr. Stein's talk, the keynote speaker of the occasion, Dr. Harold L. Stewart, was introduced. Dr. Stewart, who is Chief, Pathology Laboratories at the National Cancer Institute, United States Public Health Service, Bethesda, Maryland, spoke on "The Student as a Creative Scientist".

After congratulating the students on their contributions to science through their efforts in research, he told them, "Research accomplishments will determine the future of our civilization no less than they have determined our past progress. Research accomplishments are the product of Creative Scientists. By their investigations and discoveries, the Creative Scientists have over the ages harnessed many natural powers for the use of all."

In summing up many of the advances made through research, Dr. Stewart said that the credit for many important discoveries must go to student researchers. "Professor Gibson's admirable book entitled Young Endeavor, published in 1958, contains approximately
150 biographical sketches of medical student investigators and a later paper in 1960 adds another 50 examples to the original list. One of the most notable of these student researchers was Richard Bright, of Bright's Disease fame. Bright himself also afforded opportunities for the medical students under his tutelage to engage in research in the two wards that the wise governors of Guys Hospital in London had set aside for the clinical investigation of nephritic patients. This was in 1842, but the research that emanated from this group of student investigators established the basis for much of our modern knowledge of renal function and cardiovascular renal disease.

**VALUE OF DISCOVERY**

"The intrinsic value of the discovery is not the only profit that accrues from student supported research. Gibson's biographies reveal many other major benefits. One of the rewards is the realization by the student investigator, perhaps for the first time, of his potential for intellectual creativity. Thereafter he may pursue research throughout his professional career. Even though he may not give himself exclusively to research, still the experience itself will have increased the ability of the later physician for the practice of medicine and will enable him to interpret more reliably the research of others.

Student research also serves as a safeguard against the traditional conservatism of the university. While the rote learning with which a medical student fills his mind against the examination may be quickly forgotten, the design and conduct of a research problem and getting an answer is an experience that he will never forget. It gratifies the inquiring mind, molds the character of the later physician to influence his thinking and his actions all his life long."

Dr. Stewart pointed out that the most important segment of the world’s population at any given time is that body known as Creative Scientists. He said that this body, while relatively small, is indispensable to civilization, and as such should be given an ideal environment in which to flourish. Once an investigator has a project underway, he must be left entirely free to pursue it in whatever direction it leads him. Once the investigator has journeyed this far, imagination and self reliance must take over as his guidelines.

He concluded in saying, "All that a college can do is to provide the opportunity. The student must find out for himself whether he has a taste and aptitude for investigation. This is the opportunity that Jefferson’s faculty is providing and you young people of Jefferson’s student body are clearly taking full advantage of this opportunity. My best congratulations to you both."

**INDIVIDUAL AWARDS**

Dr. Sodeman then came forward to present the individual awards and prizes to members of the graduating class. Seniors who received awards were: John Philip Whitecar, Jr., awarded The Henry M. Phillips Prize in Medicine, The Henry M. Phillips Prize in Surgery, the W. B. Saunders Company Prize, The Edward J. Moore Memorial Prize in Pediatrics, and the William Potter Memorial Prize; Elliott Mark Stein, awarded the Practice Prize, Honorable Mention of the Clinical Surgery Prize, and the Alumni Prize for the best general average obtained in the examinations for the entire curriculum; Vern Hicks Horton, the Surgery Prize; Stanley Carlton Foster, the Clinical Surgery Prize, the Psychiatry Prize; David Paul Shreiner, the Psychiatry Prize; Robert Carl Mackowiak, the Obstetrics and Gynecology Prize; Bennett Michaels Shapiro, The Henry Keller Mohler Memorial Prize; David Michael Charles Capuzzi, The Lowell Ashton Erf Prize and the Gynec—
cology Prize; Harvey Michael Tucker, the S. MacCuen Smith Memorial Prize; Robert Charles Friedman, The Carroll R. Mullen Memorial Prize in Ophthalmology; William Albert Freeman, the Orthopedic Surgery Prize; William Lynn Milroth, the Pediatrics Prize and Honorable Mention for the Obstetrics and Gynecology Prize; Jerome Kosoy, Psychiatry Prize; and Stephen David Silverman, The Leandro M. Tocantins Memorial Prize.

The C. V. Mosby Company Prizes were awarded to Henry Irving Babitt, William Lynn Milroth, Charles Warren Nichols, Bennett Michaels Shapiro and David Paul Shreiner. Concluding the list of award presentations are the following graduates who also merited Honorable Mention: Solon Lafayette Rhode, III, The Henry M. Phillips Prize; Harris I. Treiman, The Carroll R. Mullen Memorial Prize in Ophthalmology; and Alfred Joseph Cooke, Jr., the Orthopedic Surgery Prize.

Dr. Sodeman then presented The Christian R. and Mary F. Lindback Awards for Distinguished Teaching to Dr. John B. Montgomery, Professor of Obstetrics and Gynecology and Head of the Department, and to Dr. John N. Lindquist, Assistant Professor of Clinical Medicine.

Following the exercises in McClellan Hall, the graduates and their guests were served refreshments in the Library.
Alumni Activities

The 1964 round of Alumni activities began at 9:30 on June 10th with the first of the Class Reunion Day speakers. Alumni spent the morning listening to interesting and informative talks by representatives of each of the reunion classes. In mid-morning, Alumni exchanged conversation during a coffee break in the Students' Lounge. This provided many their first opportunity to greet old friends and classmates.

At the conclusion of the Class Reunion Day program, Dr. William A. Sodeman entertained the Alumni at luncheon in McClellan Hall. The bright red table cloths and red and white floral centerpieces set a festive note to the occasion, which all unanimously agreed was a most enjoyable one.

Dr. Sodeman took the opportunity of introducing seven faculty members who have recently achieved honorary status as far as their teaching duties are concerned. "Of the seven," he said, "there are five sitting here at the head table: Dr. Lester R. Wilson, Associate in Surgery, Honorary; Dr. Lorenz P. Hansen, Associate Professor of Biochemistry, Honorary; Dr. Thomas Aceto, Assistant Professor of Clinical Medicine, Honorary; Dr. W. Lawrence Cahall, Assistant Professor of Clinical Medicine, Honorary; and Dr. Alexander N. Peters, Instructor in Medicine, Honorary. Dr. Eli R. Saleeby, Instructor in Surgery and Instructor in Anatomy, Honorary, and Dr. F. William Sunderman, Sr., Clinical Professor of Medicine, Honorary, were unable to be present."

Dr. Sodeman then introduced others seated at the head table, after which he called on Dr. Marshall C. Rumbaugh, Chairman of the Alumni Advisory Council, to take a bow. Dr. Sodeman announced that the Council has three new members this year, Drs. Aaron Dietz, Frank H. Krusen, and Robert T. Wong. Also introduced was Dr. Harvey Perkins, Class of 1917, "a former member of the Dean's Office, who knows all the problems of running the office". Dr. Burgess L. Gordon, Class of 1919, and Dr. David B. Allman, Class of 1914, were called upon as "our pipelines into the AMA".

Dr. R. C. Rumbaugh, Chairman of the Alumni Advisory Council, to take a bow. Dr. Sodeman announced that the Council has three new members this year, Drs. Aaron Dietz, Frank H. Krusen, and Robert T. Wong. Also introduced was Dr. Harvey Perkins, Class of 1917, "a former member of the Dean's Office, who knows all the problems of running the office". Dr. Burgess L. Gordon, Class of 1919, and Dr. David B. Allman, Class of 1914, were called upon as "our pipelines into the AMA".
Seated at one table were 14 seniors with their fathers who are Jefferson Alumni. Dr. Sodeman also called attention to two members of the Class of 1964 who have remarkable Jefferson relationships: Dr. Joseph O. Beaucamp, whose father, Dr. Eugene W., is an alumnus, Class of 1923, and whose three brothers are alumni, Dr. Eugene W., Jr., Class of 1950, Dr. Charles J., Class of 1954, and Dr. David T., Class of 1959; and Dr. James S. Grim whose family numbers five Jeff graduates: an uncle, Dr. Mark D., Class of 1934, a great grandfather, Dr. George W., Class of 1859, and three great uncles, Drs. F. Harvey, Class of 1881, George M., Class of 1887, and Frank S., Class of 1895.

Dr. Sodeman concluded his introductions with the presentation of Drs. James H. Anderson and Frank Keagy, Class of 1904, who were celebrating their 60th anniversary.

Thursday morning the Alumni returned to the College to attend the Alumni Day Clinics. Those present witnessed a Clinico Pathologic Conference presented by members of the graduating class under the direction of faculty advisors Dr. Richard T. Cathcart, Associate Professor of Medicine, and Dr. Joseph Medoff, Assistant Professor of Clinical Medicine. Alumni also heard informative talks on the main theme of "Progress at Jefferson" by Drs. John E. Davis, Professor of Psychiatry, Laurence G. Wesson, Jr., Professor of Medicine, James E. Clark, Associate in Clinical Medicine, and John W. Goldschmidt, Associate in Medicine (Physical Medicine).
Alumni enjoy a coffee break in the Student's Lounge.

Alumni exchange conversation prior to the Dean's Luncheon.

Nearly 300 people were present at the Luncheon.
Two years ago a committee appointed by the Executive Committee of the Alumni Association made arrangements for conducting physical examinations for Alumni returning for commencement activities. Few Alumni have taken advantage of this opportunity for free physical examinations. Therefore, the committee feels we have failed to make this program known to the Alumni and this year we will give more frequent reminders. Final announcement of the program will be made in the May issue of the Bulletin.

The program is as follows:

When an Alumnus notifies us of his wish for a physical examination, we forward a Cornell Questionnaire to him. He returns the Cornell Questionnaire to the chairman of the committee prior to his arrival for the examination. On the day of the examination the Alumni present themselves at the Medical Clinic, 8th floor, Curtis Clinic, and procedure is as follows:

<table>
<thead>
<tr>
<th>Time</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>8- 8:30 a.m.</td>
<td>Complete blood count, urinalysis, electrocardiogram</td>
</tr>
<tr>
<td>8:30- 9:30 a.m.</td>
<td>Examination by internist</td>
</tr>
<tr>
<td></td>
<td>A. Examination by neurologist</td>
</tr>
<tr>
<td></td>
<td>B. Examination by urologist</td>
</tr>
<tr>
<td></td>
<td>C. Sigmoidoscopy by proctologist</td>
</tr>
<tr>
<td>10-10:30 a.m.</td>
<td>Breakfast served</td>
</tr>
<tr>
<td></td>
<td>Eye, Ear, Nose and Throat Examination</td>
</tr>
<tr>
<td></td>
<td>X-ray of the chest</td>
</tr>
</tbody>
</table>

Within a week following the examination, a complete report is sent to the physician.

The committee would be pleased if more Alumni participate. We feel it is a convenient way for the busy physician to get the examination he so often promises himself.

JOHN N. LINDQUIST, M.D.
Chairman, Committee for Physical Check-ups
Festivities culminated on Thursday evening with the Annual Alumni Banquet in the Ballroom of the Sheraton Hotel. Approximately 600 were present at the dinner, making it one of the largest in modern times.

Dr. Abraham Cantarow in his introductory speech said, "Several days ago Mrs. Mulone provided me with this program, which you each have, and I noticed that I was to be Toastmaster and being somewhat compulsive about details, I wanted to find out exactly what a Toastmaster was supposed to do. Therefore, I looked up the most authoritative definition I could find which was: 'a toastmaster is one who presides over and announces the toast'. For some reason, the Entertainment Committee neglected to provide us with the necessary ingredients. Since I can't function as a Toastmaster according to the Oxford definition, all I can do is see that there are no acts of violence and that there is no filibustering up here to interfere with the real business of this meeting which is to have a good time." Dr. Cantarow then congratulated the Class of 1964 and introduced the "Old Guard", "gentlemen who have somehow or other managed to survive for more than 50 years after graduation". He concluded his introductions by presenting those seated at the head table.

Following Dr. Cantarow's remarks, President Bodine addressed the group. After welcoming the returning Alumni and congratulating them on the excellent turnout, he addressed himself to the graduates, "As we all know, the Class of 1964 is the last all-male class to be graduated from Jeff. And in their own words as published in the Clinic last week, this fact in itself may not make them any better doctors, but we can all be sure they'll never let us forget the fact that theirs is the last class with hair on its chest. Congratulations, you hairy men and best wishes."

He then urged all the Alumni to support Dr. Gibbon and the Alumni phase of the Building Campaign, and reviewed the amount of contributions received to date.

Mr. James M. Large, President of the Board of Trustees, was then introduced. "Gentlemen," he said, "it is a very real privilege to stand before you tonight as a recent beneficiary of the advancement of medical science and medical care at Jeff. There is a little story involved in this. I recently spent three days racing a sailboat down the Chesapeake under a very bright sun, and I arrived home with badly blistered, very uncom-
comfortable lips. In such great suffering, my first thoughts were of Jefferson and so I called your distinguished Dean with the absolute certainty that Jeff had gone forward in this area and that he would come up with some sort of effective wonder drug that would bring me comfort. He came through by giving me the name of some sort of ointment that I could buy in a Rexall drug store, which I did, very inexpensively, and applied it lavishly. I didn’t notice much immediate effect, but when I got home that night I found that my wife had been just as concerned as I and had called our general practitioner, who is also a product of this great institution. He told her the name of something she could buy in a Wayne drug store, in a tube, very inexpensively. I sat down and looked at the labels on these new wonder drugs that came out of this great advancement in Jefferson’s approach to the problem. The label of the ointment suggested by your Dean said, ‘excellent for diaper rash’. And then I held up the other one and in large letters it said, ‘particularly good for softening nipples’. I am just delighted that this institution, whose Board I Chair, is making such tremendous strides in this very unusual affliction. So, if I greet you on behalf of the Board of Trustees tonight, and do so without a broad grin, you will understand that each of you shares the responsibility.’

He then told the Alumni of the worthwhile work being carried out by the Alumni Advisory Council and reviewed the recommendations the Council has presented to the Board, including university affiliation and Alumni representation on the Board of Trustees, to both of which problems the Board is seeking a solution. He then spoke of the physical changes which have been occurring at Jeff in conjunction with the Building Program.

Dr. Cantarow then returned to the podium to introduce Dean Sodeman. ‘Most of us who run around in academic circles can’t understand why anybody in his right mind would want to be a Dean. That probably is the basis for the general feeling that there are very few Deans who are in their right minds. Whether or not this is true, it is a fact, I am sure, that there are very few Deans that are in complete command of their Faculties. As you know, there have been innumerable definitions, facetious definitions, of Deans. Dr. Sodeman doesn’t conform to any of them that I have ever seen. We are extremely fortunate, in my opinion, that a man of his personal qualities and professional and academic attainments has been willing to take on this thankless job and to do it so effectively.”

Dean Sodeman, addressing his remarks to the graduates, said, “One thing that happened this year has been very heartening, the Class of 1964 hasn’t caused us much trouble. We didn’t have anyone flunk, which made it much easier on the Dean’s office, so I would like to congratulate the Class on having 100% of its group graduate.

‘Tonight I am going to confine my remarks to the changing patterns in students. We had a lot of dire problems predicted when girls were accepted. We haven’t had them. We have 27 girls now; we have lost five, one transferred, two withdrew, and two failed. Next year we expect to have 11 more young ladies as part of our student body.
Marital status seems to have caused more change in our pattern of students than anything else. About 20 per cent of the students who enter Jeff now are married at the time of admission. By the time they reach their senior year, 50 per cent are married. This has diminished the bands of hell-raisers, that many of you remember, and has also had its impact on fraternities.

"We lost one fraternity two years ago and it appears we will lose another one in the near future. One of our houses has 88 members, but only 22 of them live in. Another has 64 members and only 21 of them live in.

"These changes influence to a great extent our planning for the future. Dr. Conly tells me that students have little desire, in the plans for the future, for dormitory type of facilities. Today both married and single students want various kinds of apartment facilities.

"We have a lot of other changes too. We now offer basic instruction in psychology, behavior and psychiatry, among others. We have also experienced a change in the attitude of students toward research. Last summer 164 of our total of 649 students held paid positions in our research program. That is over 25 per cent of our student body. I think it important for the new physician to have an understanding of what various projects mean and the analysis of data as they see it recorded. I suppose in one way we have the curse of 'bigness'. In our new plans for our basic science building, they are dividing the students into groups of 16. This will assure a more intimate association between student and faculty."

Dr. Sodeman also briefly reviewed the new accelerated program being conducted with Pennsylvania State. He said that to date the program has produced enthusiastic results. He also spoke of future plans of incorporating into the teaching program at Jeff three types of programs: a program in which students may advance very rapidly, the standard program, and a tutorial system that will allow students to advance in accordance with their abilities.

Dr. Sodeman then presented the 50-year certificates, and the fifty-year buttons. Dr. Roy Deck received the certificate on behalf of the Class of 1914 and Dr. David B. Allman received the button.

ALUMNI ACHIEVEMENT AWARD

Dr. Cantarow then returned to the podium to present the Alumni Achievement Award to Dr. Henry L. Bockus, Class of 1917. In citing Dr. Bockus, Dr. Cantarow said, "This Class has contributed three members of our Executive Faculty—Harold W. Jones, Baldwin L. Keyes, and W. Harvey Perkins; a Dean of the College, Harvey Perkins; at least two department heads in other medical schools—Roy W. Schall at Harvard and Henry Bockus at Pennsylvania; and at least two others of full professional rank—Ed Weiss at Temple and our own Adolph Walkling. This is quite an illustrious aggregation, indeed, but none has achieved greater distinction than Henry Bockus.

"I don't know precisely what stimulated his interest in gastroenterology. It may have been exposure in those early days to people like Philip Hawk and Martin Rehfuss and Vincent Lyon who were beginning to chart the dark interiors of the human organisms that had not been explored. Knowing something of his wonderful sense of
Dr. Cantarow presents the Alumni Achievement Award to Dr. Bockus.

Dr. Bockus

humor, I think perhaps it might have been that masterful lecture a few years earlier by Robert Benchley with which many of you are familiar, entitled "Through the Alimentary Canal with Gun and Camera". This was expanded into book form a few years later and up until several years later it remained, I suppose, the definitive work on gastroenterology until Henry Bockus began to record his observations on his many explorations into the same dark interior.

"Robert Benchley was referred to as the Columbus of the Colon. Henry Bockus has been frequently referred to as the Galileo of the gall bladder and the Livingstone of the liver. I don't think there is any physician in the United States, or anywhere else for that matter, who is more widely known or who has influenced the professional lives of so many physicians throughout the world. He is an outstanding illustration of the enormous influence that a medical school, through one of its graduates, can exert upon hundreds of thousands of lives everywhere."

In a short talk sprinkled with humorous anecdotes, Dr. Bockus expressed his deep appreciation of the honor. "Ladies and gentlemen, I came here prepared to make a speech. Although I am not on your official agenda, I have been told by your President that I should graciously thank you and sit down. But I can't do that—I've never been able to say a word and sit down.

"I particularly am very proud to follow in the path of my dear old friend and famous Jeffersonian, Louis Clerf, who received this award this past February, because Clerf and Bockus do not believe in the old dictum—you can't teach an old dog new tricks. As a matter of fact, we (Clerf and Bockus) feel that we should very humbly follow in the footsteps of King David and King Solomon, who led merry, merry lives with many, many girl friends and many, many wives, until old age crept over them with many, many qualms. King David then wrote the Proverbs and King Solomon wrote the Songs. There is a little moral in that little ditty to the young men who are sitting up above, and the moral is: don't write too much too early in your lives, wait until there is not much else that you are capable of doing. I keenly appreciate this great honor from my first love, my Alma Mater."

25-YEAR SPEAKER

Following the award presentation, Dr. Paul Kennedy spoke for the Class of 1939. Dr. Kennedy said that on the occasion of the Alumni Banquet 25 years ago he had been privileged to speak for his Class and at that time had addressed his remarks to the Board of Trustees and the Faculty, expressing the gratitude of his classmates for the education they had received at Jefferson.

"Tonight," he said, "it is again my special privilege to speak for my Class which now, by their admitted ages, represent a strong and dependable link in the chain of Alumni. The Class of 1939 has made some progress and, I hope, in some way has contributed to the work of the school.

"I am not going to recite our accomplishments. I am not going to lament over any of our failures—but we do take pride in the fact that we have given to many communities doctors who are dedicated to their work and
willing and able to give good service. Unadorned by awards, as such service must always be, I think that this in itself is a contribution—one that Jefferson graduates have been making for 140 years.

"Tonight, with much of that future of which I spoke 25 years ago behind us, with confidence in ourselves occasionally shaken and with momentary dimming of that early eagerness, we again, with enthusiasm and great sincerity say to the Board of Trustees and to the Faculty, 'Thank you.' We say it with renewed vigor that youth and dreams cannot possibly know and we say it with the knowledge born of experience.

"I quickly add that it is not enough for us, somehow specially marked by these 25 years, to express our gratitude to Jefferson and then to quietly lose our identity. We feel that the debt we owe is too great. The contribution that Jefferson has made to us and is continuing to make, calls for a rededication on our part to the cause for which this school was founded—service through education.

REDEDICATION

"It is not enough for us to express gratitude nor is it enough for us to be nominalistic in our contributions to the Alumni Annual Giving Fund upon which so much depends—our efforts must be commensurate with the debt we owe and our ability to pay that debt. It is with these ideas in mind that we, the Class of 1939, must re-dedicate ourselves to the task that remains. The program that has been outlined tonight—the program for Jefferson's future—needs not only your support but also the recruitment and enlistment of others so that they too may have an opportunity to contribute. In the final analysis, the worth of any life is going to be determined by the contributions made—no matter the manner."

The recent Past President of the Alumni Association Dr. Benjamin Haskell then stepped forward to the podium to present the ceremonial gavel to Dr. Cantarow. Inscribed on the gavel are Dr. Cantarow's name and the dates of his tenure as President.

Dr. John H. Gibbon, Jr., Chairman of the Alumni Phase of the Building Fund Drive then brought the Alumni up-to-date on the campaign's progress. He pointed out that in six months' time $441,000 had been raised through the Alumni, which excludes the amount contributed earlier by the Alumni on the Faculty. He stated that approximately 54% of the $1 1/2 million goal had been achieved, with a balance of $577,000 still to be raised.
Dr. Cantarow then introduced Dr. Kenneth Fry who reported on the 16th Annual Alumni Giving Fund Drive. He announced that for the first time the goal of $175,000 had been realized with a total of $175,002. He thanked all those who had contributed to the Drive’s success and said he hoped it would prove to be even more successful in the years to come. He then awarded plaques to the classes who numbered first in amount, number of contributors, and percentage. (See page of this issue.)

Following Dr. Fry, Dr. Cantarow introduced James Rumbaugh, President of the Graduating Class. In speaking for the Class of 1964, Mr. Rumbaugh said, “I have had the pleasure of becoming an Alumnus three times during the past eight years, but this is the greatest thrill of them all. It is always exciting to be part of a growing, progressive institution, such as Jefferson, and to be graduating at a time when the plans of years are bearing fruit and when whole blocks are being razed in preparation for new buildings which are to come in two or three years. Enthusiasm is a beautiful word in the English language and I think enthusiasm is the supreme virtue of a growing institution. A great school, such as ours, has and must rely on the interest and support of enthusiastic Alumni. In speaking for the graduating class, I can say that we will be ready and willing Alumni of our Alma Mater, practicing the good medicine which we have been taught here and eager to support the school’s progress and contribute toward her goals. It is our pleasure to become a member of your group.”

At the conclusion of Mr. Rumbaugh’s speech, Dr. Cantarow thanked everyone for being present and adjourned the meeting.

Faculty Wives Club Sponsors Dinner

THE Jefferson Medical College Faculty Wives Club in conjunction with Jefferson alumni week entertained members and wives of Jefferson graduates at a dinner, held at the Sheraton Hotel, on June 11. One hundred and twenty members and guests attended. Mrs. Herbert Luscombe, president of the club, welcomed the group as did Mrs. William A. Sodeman, founder of the club and wife of Dean Sodeman.

Mrs. John J. O’Keefe, program chairman, presented members from the Matinee Music Club who gave a short program.

Mrs. Charles W. Wirts was in charge of arrangements for the dinner. Assisting her were Mrs. Benjamin Haskell, Mrs. John Dowling, Mrs. Sherman Eger, Mrs. T. Burritt Mervine, Mrs. Thomas F. Nealon, Jr., Mrs. Reynolds Griffith, Mrs. Warren Goldburgh, Mrs. John Griffith, Mrs. John Y. Templeton, 3rd, Mrs. Harry J. Knowles, Mrs. Carol Mullen, Mrs. Frederick Wagner, Jr., Mrs. Elmer Funk, Mrs. Harold Hinman and Mrs. Peter A. Theodos.

Mrs. J. Howard Anderson, wife of Dr. Anderson, Class of 1904, was presented with a corsage. Mrs. Hewitt Foster, whose husband is a member of the Class of 1919, won a mink collar which was donated by Gittelman’s Sons and Mrs. James Clark won a hat certificate from the Midette Millinery Shop.
Dr. Rakoff's Portrait Presented to College

"The Class of 1964 has been going to school for twenty years. Among other things, we have become professional students and, as such, have had the opportunity of being taught by a hundred to a hundred and fifty instructors. In such circumstances few things become more precious and refreshing than a dedicated, inspiring teacher, who has read and remembers the words of the Oath written over 2000 years ago . . . 'that by precept, lecture, and every other mode of instruction I will impart a knowledge of the art to my sons and those of my teachers and disciples.'

"In such an inspired teacher these qualities are quickly recognized and although difficult to describe, students make a special effort to attend this man's conferences where no roll is called, and when a conference is cancelled or missed, there is a sense of disappointment instead of relief. His enthusiasm is contagious to students, the easy discipline which commands respect is enviable and all would wish to imitate the easy expertise of his knowledge of his specialty. It is the easier task to make the student feel foolish; it is much more difficult to phrase questions as a challenge to learn and to encourage curiosity.

"It is with these feelings that the Class of 1964 wishes to respectfully present the portrait of Dr. Abraham Rakoff to Jefferson Medical College, with a whole-hearted thanks for his example."

With these words Dr. James H. Rumbaugh, President of the Graduating Class, presented the portrait of Dr. Abraham E. Rakoff, Professor of Obstetrics and Gynecology (Endocrinology), to the College in ceremonies held in the Clinical Amphitheatre on Friday, May 8, 1964.

Dr. Stephen Silverman, Chairman of the Portrait Committee, then introduced the artist, Mr. Walter Stempfig. Dr. Silverman pointed out that Mr. Stempfig has for many years been a member of the faculty of the Pennsylvania Academy of Fine Arts and, like Dr. Rakoff, his constant contact with young people has stimulated him to exploit his own imagination.

Dr. Rumbaugh then introduced Dr. Irwin J. Pincus, a close friend of Dr. Rakoff's who had come to Jefferson from Los Angeles to participate in the presentation. Dr. Pincus, a Jefferson graduate of the Class of 1937, is Director of Medicine, Cedars of Lebanon Hospital, Los Angeles, and Associate Clinical Professor of Medicine, University of Southern California.

Dr. Pincus said that he and Dr. Rakoff have been close friends since 1933, and that 31 years ago they had been occupying adjoining seats in the Amphitheatre. Commending the Class on their selection of Dr. Rakoff as subject of the portrait he said, "I would like to tell
you about Dr. Rakoff—much you know, much you have guessed, and perhaps some will help you to understand him better.

"He has an uncanny ability to strip from complex subjects all the essentials and to show their relationships and to inspire student investigators to further exploration.

UNDERSTANDING PHYSICIAN

"All who know him as a physician know his kindness. His strength invites understanding probing into patient's problems. He takes the problems of his patients to both the library and the laboratory. And he learns from each patient and takes his experience on to the next one.

"He holds membership in numerous scientific societies, too long a list to repeat here. It is sufficient to say that he has authored more than 240 scientific papers, chapters in a number of textbooks, and has co-authored two books. Here at Jefferson he has been recognized as the outstanding man in his field. He is Director of Research in the Department of Obstetrics and Gynecology and a Visiting Lecturer at the University of Pennsylvania."

Dr. Pincus spoke of the Rakoff family and the warm relationship of its members. Dr. Pincus said that he has known the Rakoffs for such a long time, he considers himself a member of the family. The Rakoffs have three sons—Jed, a graduate student at Northwestern University; Todd, a student at Harvard Medical School; and Jeff, a student at Swarthmore College.

"From all this you must gather that Dr. Rakoff is absolutely perfect, but actually he has been a bad quality. He is very absentminded, if one can call this a fault. He was invited to be a Visiting Lecturer for a week at an out-of-town hospital. He carefully marked the dates on his calendar, cleared off his appointments, prepared his lectures, packed his bags and left. The officials at the hospital were quite taken aback to see him because he was exactly one year early. He assures me, however, that he has been working hard to correct this fault and has succeeded in so doing. The same evening he assured me of his success in curing his absentmindedness, he left my home, leaving behind his pipe, tobacco pouch, and gloves."

Dr. Pincus concluded by pointing out that this award is usually made toward the end of a man's career, but in Dr. Rakoff's case, this award occurs at the height of his career.

In thanking the Senior Class for the honor paid him, Dr. Rakoff said, "I suppose that in the 30 years that have elapsed since I was a student, I have talked in this Pit a hundred times, but I have never found it so difficult to say anything as I do at this moment.

"I think all of you can appreciate, and certainly the members of the Senior Class can appreciate, that the greatest award and honor a teacher can receive is the esteem of his students and to have received it this afternoon in this tangible way touches me more deeply than anything I have ever received.

"When approached to be recipient of this honor, you must first convince yourself that you have made some small contribution to warrant it. After you have finally convinced yourself that you are in some small way worthy of this esteem, you then have to sit for the portrait, sit by the hour and heaven help you if you move a muscle.

LEARNING ABOUT ART

"Thank heavens the artist was a good conversationalist and a good listener. In the course of the sittings I learned all about art and he learned all about Endocrinology. If we had had several more sessions I am sure we would have been ready to collaborate on a paper on 'The Hormonal Aspects of French Impressionists'."

"Then comes the problem of finding someone who knows you well enough and who will come and say something nice about you. As you can see, I had to go all the way to California." Dr. Rakoff concluded in saying that the one person to whom all the honor should go, was his wife, without whom nothing would have been possible.

Dr. Silverman then unveiled the portrait and presented it to the College. Dr. Sodeman accepted the portrait on behalf of the Administration and the Board of Trustees.

"We would like to thank the Senior Class for honoring one of Jeff's own sons", he said, "a man who has brought to Jefferson from the outside and through his own extensive research, all that it is important in his field. Dr. Rakoff is a perfect representative of the Jefferson Medical College, of which we are all so proud."

Dr. Rumbaugh thanked the guests for being present and closed the ceremonies.
A Doctor's Experiences
Aboard the S.S. HOPE
by
Samuel D. Kron, M. D., J'44

When I was asked to write this paper, I welcomed the opportunity to spread the word about a project that I have found very exciting. On November 20, 1963, I sailed from New York aboard the S.S.HOPE for Guayaquil, Ecuador, where I remained until January 31, 1964.

I had heard about HOPE a few years ago and was impressed with its teaching aspect. Last year I volunteered for service and was appointed chief of surgery for the first "rotation" in Ecuador.

Briefly, this is the story behind the S.S.HOPE. A few years ago a Washington, D.C., internist, Dr. William Walsh, discussed with President Eisenhower the idea of sending a hospital ship to underprivileged countries, not only to treat but to teach. A foundation for this purpose was formed, to be supported primarily through private contributions. The government loaned the Navy hospital ship, the S.S. CONSOLATION. Money was raised to recondition the ship and the name was changed to S.S.HOPE—standing for Health Opportunity for People Everywhere. It was felt from the beginning that sending the ship through the support of the people of the United States, rather than the government or a religious organization, would allow for easier acceptance by people of other countries who are from their past experiences afraid of being exploited. This has proved to be true. And the ship HOPE is getting to be recognized more and more as probably the best good-will ambassador this country has.

The ship is 15,000 tons and has facilities for over 200 patients. It is as well-equipped as most hospitals this size in the U.S. The Grace Line is paid by Project HOPE to run the non-medical part of the ship. The ship spends about 10 months in one port. The nurses, technicians and other personnel sign up for the entire "voyage" and are paid about half what they could earn in the U.S. The doctors sign up for 2-month rotations and are not paid. There are about 40 nurses and 30 doctors on board. Although the living quarters are cramped they are comfortable; the ship is air-conditioned. Most of the necessary supplies and equipment are donated by drug and instrument companies in the U.S. and are plentiful.
There is a good medical library. As much as possible the ship is set up as a teaching hospital. There are specialists in all fields (except psychiatry) from all parts of the country. One of the pleasures of working on HOPE is the teamwork; the nurses and para-medical personnel are especially dedicated. I am told that there are thousands of applicants.

The HOPE made its first voyage in 1961 to Indonesia; in 1962 it went to Peru; it will stay in Ecuador until this September, and then in October it will go to the Republic of Guinea in West Africa. Many countries have asked for HOPE. Among other factors, the ship will go only to a country to which it is invited, and not only must there be a need, but a demonstration on the part of the country that it is willing to participate in a "self-help" type of program. In other words, one of the prime objectives of HOPE is to teach native doctors, nurses, technicians, dietitians, and all other personnel necessary for the running of a first-class hospital, so that when the ship leaves it will leave behind people who can carry on in some way the work of HOPE. (Project HOPE does leave a small team to see that the work that the ship has started is carried on.) One of the ideas behind HOPE is that it is much more logical to train people in the environment in which this training will be applied, rather than in a foreign situation that may not be applicable at home.

The teaching arrangement in Ecuador was set up as follows. Everyone on the ship who had a part in running the hospital had Ecuadorian "counterparts"; many of these live on the ship the full 10 months and others come on board in the morning and leave in the evening. There are Ecuadorian interns and residents living on the ship. In addition, each specialist has a counterpart who is a practicing physician in Ecuador and who is giving up his time also to learn what he can from us; as a rule the counterpart follows the HOPE specialist throughout his daily activities. For the most part the language barrier was not a problem; there always seemed to be an Ecuadorian doctor around who spoke enough English to act as a translator. In addition, before the ship arrived in Guayaquil, a large group of local women who were bilingual had organized a pool of interpreters from which we could draw when needed; (it was a mark of social prestige in Ecuador to be identified with HOPE).

Guayaquil is the main port of Ecuador; it lies about 40 miles up the Guayas River from the Pacific Ocean. It is hot and humid, especially starting in January through the rainy season. Although the population is about 500,000, more than half the people live in "barrios" or slums where there is little in the way of sanitation, and up until the arrival of HOPE little if any medical care. The news of the coming of HOPE had been in the papers for months. Thousands of patients were waiting to be treated. The problem lay in screening those patients for admission to the ship. This was done in clinics that were set up in the barrios and in the charity hospitals. Only the indigent were eligible, and of course at no cost. Cases were selected primarily for their teaching value.

Most of the surgery was done on board ship where there were 3 major operating rooms. The teaching program was patterned after those in this country, with the emphasis almost entirely on clinical teaching. In addition I had the opportunity to visit hospitals throughout the country to make rounds and operate, and to advise regarding improvements in teaching. A number of the cases that we operated on the ship were selected from the wards of hospitals throughout the country; the Ecuadorian surgeons were most cooperative.

What were some of the surgical problems peculiar to Ecuador? It is difficult to estimate the incidence of anything, because I saw no accurate statistics being kept. In fact I saw no hospital where it was required to send tissue removed at operation to the laboratory. We saw the same types of malignancy that we see here, except that many were much larger due either to ignorance on the part of the patient or neglect by the doctor—or
simply lack of medical care. Due to contaminated drinking water and general lack of sanitation most people had intestinal parasites. This caused a secondary anemia that was so severe that it was necessary to transfuse most of the major cases before operation. Getting blood donors was usually a problem; many patients came from distant places or said they had no family. And about 2/3 of those donors that did arrive had to be rejected because of anemia, positive serology, history of malaria, etc. The plastic surgeons were kept busy operating on neglected stoves are used under very crowded circumstances. Tuberculosis is very prevalent, some estimates as high as 50%. Every admission had a chest x-ray and those with active TB had to be turned away since there were no facilities for isolation of too many cases on the ship. The one surgical problem that is not seen often here but is very common in Ecuador is amebic abscess of the liver; it must be considered seriously in the differential diagnosis of every acute surgical abdomen.

Ecuador is a poor country, so that many of its problems are related to lack of supplies. The first day I made rounds in the large charity hospital in Guayaquil I wondered why an x-ray had not been taken in a particular case and was told that the hospital ran out of x-ray film 3 weeks ago. However, there are many defects that can be corrected, and that is where HOPE can help, by setting an example or by teaching or simply acting as a catalyst. For example, it is common practice to walk into the operating room with street clothes on; sutures are often only half-covered with sterilizing solution; in general, there is not good discipline in matters of sterile precautions. As a result, the incidence of post-operative infection is very high, and antibiotics are given almost routinely in all operated cases. I do not mean to be critical of Ecuadorians. I am certain that they would do as well as we if they had our opportunities. I found them to be warm, industrious, eager to learn and appreciative. HOPE should have accomplished much in raising the level of medical care by the time it leaves Ecuador. The one expression that I heard repeatedly was, "Do not send us money; show us what to do and we will do it." It is the technical help, as offered by HOPE, that is so earnestly desired—rather than monetary aid, which seems to get into the wrong hands and does little for the masses. One day I was taken on a tour of the laboratory in a children's hospital. The director pointed with pride at the beautiful new machines that were capable of doing work as good as any laboratory in the U.S. When I looked a little closer, I could see that the machines were covered in their original plastic protector and were not even plugged in. They were not being used simply because no one knew how. I'm sure their technicians will have learned by the time HOPE leaves.

THREE MEDICAL SCHOOLS

There are 3 medical schools in Ecuador; in Guayaquil, Quito and Cuenca. Medical school starts after high school and lasts seven years. Since there are no formal internships, students must obtain their hospital training during the last years of school. It was my impression that the clinical teaching program was deficient. And yet there is no shortage of clinical material—not teachers. There are a number of problems. There is a lack of close affiliation between the large charity hospitals and the medical schools. Many of the best trained doctors are not being utilized in the teaching programs because of politics, jealousy or fear of economic loss on the part of the "old timers." For these reasons, many of the doctors that receive their training in this country have difficulty in getting established when they return to Ecuador. (This is a problem that is not peculiar to Ecuador alone.) HOPE can sometimes act as the agent to solve these internal problems. For example, I took a team of doctors and nurses from HOPE to the capital, Quito, which is high in the mountains about 250 miles from Guayaquil. We not only did surgery but had many meetings with the dean of the medical school, the director of the large charity hospital and representatives of the various factions involved in teaching. We offered recommendations to improve the clinical teaching which have a good chance to be carried out—reorganization of the staff of the hospital to utilize young well-trained men, establishment of conferences, rounds, etc., and closer affiliation with the school. We also surveyed the residency situation. Until then there were no formal residencies in Quito. We formulated an arrangement whereby the dean of the medical school will act as the chairman of a residency program committee, and the various specialty societies will submit outlines for approved residencies. Once this is established it may eliminate the necessity for everyone who wishes specialty training to leave the country.

I am often asked whether I got out of HOPE what I had expected. The answer is yes. I enjoyed working with a wonderful group of people to help bring medical care where it is desperately needed, to help raise the level of the existing medical care through teaching and organization, and I particularly enjoyed the luxury of being able to select interesting and difficult operative cases from a variety of clinical material.
PROMOTIONS, NEW APPOINTMENTS, AND RESIGNATIONS

PROMOTIONS

WILLIAM C. FraYER, A.B., M.D., M.S., from Associate Professor of Ophthalmology to Professor of Ophthalmology.

Milton Toporek, B.A., M.A., Ph.D., from Assistant Professor of Biochemistry to Associate Professor of Biochemistry.

Abraham Freedman, M.D., from Assistant Professor of Clinical Psychiatry to Associate Professor of Clinical Psychiatry.

Farid I. Haurani, B.A., M.D., from Associate in Medicine to Assistant Professor of Medicine.

Leon N. Prince, B.S., M.D., from Assistant Professor of Clinical Obstetrics and Gynecology to Assistant Professor of Obstetrics and Gynecology.

George P. Studzinski, B.S., M.B., Ch.B., from Instructor in Pathology to Assistant Professor of Pathology.

Wallace B. Hussong, B.A., M.D., from Associate in Clinical Psychiatry to Assistant Professor of Clinical Psychiatry.

Luis Garcia-Bunel, B.A., B.S., M.D., from Instructor in Neurology to Associate in Neurology.

Stanley N. Farb, M.D., from Assistant in Otolaryngology to Instructor in Otolaryngology.

Eli B. Halpern, A.B., M.S., M.D., from Assistant in Otolaryngology to Instructor in Otolaryngology.

John T. Magee, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

APPOINTMENTS

Herman Ostrum, M.D., Visiting Professor of Radiology.

Guy J. Carnabuci, B.S., M.D., Research Associate in Dermatology.

Ralph V. Exline, A.B., M.A., Ph.D., Research Associate in Psychiatry (Psychology).

Aaron Finkelman, D.D.S., Associate in Clinical Surgery (Oral Surgery).

Clifford E. Backup, B.A., M.D., Instructor in Psychiatry.

Murray S. Caplan, A.B., M.D., Instructor in Psychiatry.

Ann M. Hirschhorn, A.B., M.D., Instructor in Neurology.

Malcolm Kates, B.S., M.D., Instructor in Medicine.

Michael A. Manko, A.B., M.D., Instructor in Medicine.

Karen J. Ott, A.B., M.S., Ph.D., Instructor in Microbiology.

Peter W. Reed, B.A., M.D., Instructor in Radiology.

Bernard Shuman, A.B., M.D., Instructor in Psychiatry.

Anthony J. Triolo, B.S., M.S., Ph.D., Instructor in Pharmacology.

Norman D. Weiner, B.D., M.D., Instructor in Psychiatry.

Rohlo A. Ardizzone, A.B., M.D., Assistant in Surgery (Plastic).

Jean Atwater, B.S., Assistant in Medicine.

Steven R. Homel, B.A., M.D., Assistant in Pediatrics.

Jane E. Kirk, Assistant in Medicine.

James H. Loucks, B.S., M.D., Assistant in Medicine.

Divo A. Messori, B.S., M.D., Assistant in Medicine.

William Stepansky, B.S., M.D., Assistant in Medicine.

Ronald E. Traum, A.B., M.D., Assistant in Obstetrics and Gynecology.

Nathan Zankman, A.B., M.D., Assistant in Pediatrics.

Kouichi Tokunaga, M.B., M.D., Research Fellow in Surgery.

RESIGNATIONS

Alfred G. Marshak, B.S., M.S., Ph.D., Professor of Radiology (Radiation Biology).

John Y. Templeton, III, B.S., M.D., Clinical Professor of Surgery.

Ruheri Perez-Tamayo, M.D., Associate Professor of Radiology.

Paul B. Johnston, B.S., M.S., Ph.D., Assistant Professor of Microbiology.
Senator Stiefel Introduces Resolution

State Senator Israel Stiefel introduced a Resolution dealing with the world-famous painting, "The Gross Clinic," in the Senate of the General Assembly of Pennsylvania on May 4, 1964. Senator Stiefel described the painting, which hangs on the second floor of Jefferson Medical College, and its background and proposed that the same information be printed thereafter together with an explanatory article in the Pennsylvania Manual.

Senator Stiefel said that the inclusion of a reproduction of "The Gross Clinic" would be a symbolic tribute to the leadership of Pennsylvania in World Medicine. The Resolution was unanimously adopted and two Senators-Morris and Hall—requested that their names be added to the sponsorship of the Resolution since several generations of their families have been Alumni of Jefferson Medical College. The Pennsylvania Manual is the official digest of information of the Commonwealth of Pennsylvania and its institutions.

Proctologic Society Meets in Philadelphia

The American Proctologic Society and the Section of Proctology of the Royal Society of Medicine held a scientific meeting in Philadelphia at the Bellevue Stratford Hotel, May 9-14.

Dr. Nicholas A. Michels, Professor of Anatomy Emeritus, presented "The Variant Blood Supply of the Descending Colon, Rectosigmoid and Rectum" at a scientific session on May 10. Dr. Henry L. Bockus (Jeff '17) moderated a panel discussion on "Regional Entero-colitis" on May 11. Dr. Benjamin Haskell (Jeff '23), Clinical Professor of Surgery (Proctology); Dr. Harold Rovner (Jeff '49), Instructor in Surgery; and Dr. John Goldschmidt (Jeff '54), Associate in Medicine (Physical Medicine), presented a scientific exhibit entitled "The Use of Electromyography in the Management of the Incompetent Anal Sphincter". Concluding the list of Jefferson participants is Dr. Sherman A. Eger (Jeff '29), Clinical Professor of Surgery, who had his paper "Early Diagnosis of Colon Cancer" read by title.
ADMINISTRATION

DR. WILLIAM A. SODERMAN, Dean and Vice President for Medical Affairs, attended a convention of premedical and predental honor students sponsored by the Lehigh University Chapter of Alpha Epsilon Delta at Lehigh University April 16, 17, and 18, 1964. Dr. Sodeman was the opening speaker at the Saturday session. On April 15, he participated in a panel on "Medical Education in Israel," sponsored by the Philadelphia Physicians Committee, American Friends of the Hebrew University. Dr. Sodeman was recently installed as Vice President of the Heart Association of Southeastern Pennsylvania.

MEDICINE

DR. ALLAN J. ERSLY, The Thomas Drake Martinez Cardeza Research Professor of Medicine (Hematology), authored a paper for the AMA's Council on Drugs. The paper dealt with the fact that 299 cases of aplastic anemia have been "associated with" use of the antibiotic Chloromycetin.

DR. W. PAUL HAVENS, JR., Professor of Clinical Microbiology and Professor of Medicine, addressed a scientific meeting of the Lackawanna County Medical Society on May 26. Following a dinner held in Dr. Havens' honor, he addressed the group on "Differential Diagnosis and Treatment of the Jaundiced Patient."

DR. C. WILMER WIRTS, Professor of Clinical Medicine, was featured in the Sunday Bulletin Magazine, April 19th, in an interview on ulcers. He presented with DR. FRANZ GOLDSTEIN, Assistant Professor of Medicine; DR. CHARLES FINEBERG, Assistant Professor of Surgery; and DR. JOHN Y. TEMPLETON, III, Clinical Professor of Surgery, "Correction of Postgastrectomy Malabsorption by a Jejunal Interposition Operation", at the Annual Meeting of the American Gastroenterological Association, in Dallas, Texas, on April 25. On April 29, Dr. Wirts presented "Malnutrition and Gastrointestinal Disease" to the Queens Chapter of the A.A.G.P. in Elmhurst, New York. On May 6, he addressed the staff of the Uniontown General Hospital on "The Differential Diagnosis of Jaundice."

DR. HAROLD L. ISRAEL, Clinical Professor of Medicine, spoke on "Asthma, Bronchitis, and Emphysema" at a meeting of the Mercer County Component Medical Society on May 13th at the Trenton Country Club.

DR. LOUIS A. KAZAL, Associate Professor of Medicine (Research Hematology), presented a paper entitled "Preparations of Proteins-Lipid Complexes, Active in Thromboplastin Generation Test, by Interaction of Cephalin with Gastric Juice, Pepsin or Trypsin" at the Federation of American Societies for Experimental Biology meeting on April 15th in Chicago. The paper was authored by Dr. Kazal and three other doctors. He also presented a paper entitled "Blood Coagulant Properties of Human Gastric Juice" at the Philadelphia Gastrointestinal Research Forum on May 13 at the Northern Division of the Albert Einstein Medical Center, Philadelphia.

DR. JOHN H. KILLOUGH, Associate Professor of Medicine, discussed "Management of the Patient in Intractable Failure" on May 20th at a Physicians' Seminar at Ohio Valley General Hospital.

DR. DANIEL W. LEWIS, Assistant Professor of Clinical Medicine, lectured on "Medical Aspects of Rehabilita-
tion of the Heart Patient’ at the Central Pennsylvania Nurses’ Seminar held in State College, Pa., on April 29.

DR. HERMAN L. RUDOLPH, Assistant Professor of Medicine (Physical Medicine), attended the New York University Post-graduate Refresher Course on Prosthetics relating to total contact, above-knee limbs, April 24 and 25.

DR. NATHAN M. SMUKLER, Assistant Professor of Medicine, has been elected President of the Eastern Pennsylvania Chapter of the Arthritis and Rheumatism Foundation at its recent annual meeting. Dr. Smukler has served with the chapter as Vice President and Chairman of the Chapter’s Patient Care Committee.

DR. PETER A. THEODOS, Assistant Professor of Clinical Medicine, was recently re-elected as Treasurer of the Philadelphia Tuberculosis and Health Association.

DR. JAMES E. CLARK, Associate in Clinical Medicine, spoke on “Acute Renal Failure” at the spring meeting of the Philadelphia Regional Committee on Trauma of the American College of Surgeons on May 8th held at the Veterans Administration Hospital Auditorium. Dr. Clark is also head of a team which includes DR. LAWRENCE G. WESSON, JR., Professor of Medicine, DR. JOHN Y. TEMPLETON, 3RD, Clinical Professor of Surgery, and DR. MILES H. SIGLER, Instructor in Medicine. The team is the recipient of a three-year $273,307 research grant from the John A. Hartford, Inc., Foundation for investigation into the feasibility of patients suffering from a chronic kidney failure to treat themselves at home once they receive special instruction and when their progress and reparation permit.

DR. JOHN WILLIAM GOLDSCHMIDT, Associate in Medicine (Physical Medicine), has been appointed to serve as a member of the Coordinating Committee on Nationwide Stroke Programs of the American Heart Association. He has been named Chairman of the Sub-Committee on Community Programs and also serves on the Sub-Committee on Public Education. The Committee is charged with responsibility for initiating, developing, and guiding a nationwide stroke program involving prevention, diagnosis, management and rehabilitation of patients afflicted with cerebrovascular disorders. He has also been appointed by the Secretary of Public Welfare, Arlin M. Adams, to serve on a Task Force on Rehabilitation Facilities in the development of a Comprehensive Mental Health Plan for the Commonwealth of Pennsylvania. Dr. Goldschmidt was visiting Professor at the Lovelace Clinic, Albuquerque, New Mexico, April 24-26 on the occasion of the dedication of a new building housing the Lovelace Foundation’s Rehabilitation Center. While there he spoke on “Principles and Practices in Medical Rehabilitation”, “Physical Management of the Rheumatoid Arthritis Patient”, “Physical Management of the Painful Shoulder”, and “Rehabilitation of the Stroke Patient”. On June 2nd he spoke on “Rehabilitation of the Arthritic Patient” before a conference and workshop held at the Rheumatology Unit of the Seton Hall College of Medicine. On June 19 he addressed the Staff Meeting of the Chester County Hospital, West Chester, Pa., on the subject “Physiologic Basis of Rehabilitation Techniques”.

DR. WILLIAM ELIADIES, Instructor in Medicine, completed a three week Medical Qualification Course for Diagnostic Use of Radioisotopes at the Oak Ridge Institute of Nuclear Studies in Oak Ridge, Tennessee, during January, 1964.

DR. LUIGI A. PRINCIPATO, Instructor in Medicine, was principal speaker at a fat-controlled diet luncheon on April 29, sponsored by the Camden County Heart Association. Dr. Principato discussed medical aspects of a fat-controlled diet.

NEUROLOGY

The annual meeting of the American Neurological Association was held in Atlantic City, June 15-17, 1964, and was attended by all members of the Department of Neurology. DR. BERNARD J. ALPERS, Professor of Neurology and Head of the Department, was Chairman of the first morning session which was a Symposium on the Presenile Dementias. DR. LEWIS M. WIENER, formerly of the Department, and DR. RICHARD G. BERRY, Professor of Neurology (Neuropathology), presented a paper entitled “Intracranial Circulation in Carotid Occlusion”.

“The Alpers Silver Stick Society” was formed on June 15. Its membership is limited to those who have gone through the Neurology program at Jefferson. It will meet
annually during the ANA meetings. Its program will consist of a scientific session followed by a social hour and dinner to which the wives are invited. This continues the family friendships formed during the years at Jefferson. Its primary purpose is to serve as a living, growing tribute to Dr. Alpers as "chief", "teacher", and "friend". Three honorary members were elected at the first meeting—Dr. Nathan Schlezinger, Professor of Clinical Neurology, Dr. Hyman E. Yaskin, Clinical Professor of Neurology, and Mrs. Kahn. It was attended by doctors from the area as well as Connecticut, Virginia, and Louisiana.

Dr. H. Edward Yaskin, Clinical Professor of Neurology, was given a testimonial dinner on June 24th celebrating his 25 years of service as Psychiatric Director of the Camden County Psychiatric Hospital and his many civic activities in Camden. The dinner was attended by many New Jersey officials and by the Doctors Alpers, Fry, Mandel, and Sokoloff and their wives. Dr. Alpers and Judge Mitchell Cohen of the U. S. District Court of New Jersey were the speakers.

Dr. Nathan Schlezinger presented a paper in Atlantic City for the New Jersey Academy of Ophthalmology and Otolaryngology in May, 1964. His paper was entitled "Neurologic Problems of Interest to Both Eye and E.N.T. Physicians".

Dr. Frederick Horner, Associate Professor of Neurology, presented a paper entitled "Observations on Brain Abscesses Due to Broken Pencil Points" during the American Academy of Neurology meetings in Denver, Colorado, April 1964.

OBSTETRICS AND GYNECOLOGY

Dr. Warren R. Lang, Professor of Obstetrics and Gynecology, spoke on May 4th before the Staff and Residents in Obstetrics and Gynecology at Albert Einstein Hospital, Northern Division, Philadelphia, on "Adult and Pediatric Vaginitis". On June 10th he addressed the Seton Hall Medical College Department of Obstetrics and Gynecology on "Gynecologic Problems of Childhood and Adolescence".

Dr. Abraham Rakoff, Professor of Obstetrics and Gynecology (Endocrinology), is one of three Philadelphia physicians serving on the Conference Committee of the Fifth National Cancer Conference, co-sponsored by the National Cancer Institute and the American Cancer Society, to be held at the Bellevue-Stratford September 17 through 19. The Conferences, initiated in 1948 and held every four years, are designed to bring research progress into focus and make it meaningful to the medical and dental practitioners.

Dr. George A. Hahn, Professor of Clinical Obstetrics and Gynecology, spoke on March 12th before the Aldon March Society of New York on "Lymphangiography in Surgery". On March 17th he appeared over WCAU-TV on the John Facenda News Program where he spoke on "High Cost of Cancer Quackery". On March 18th he spoke before the Annual Meeting of the Bucks County Unit of the American Cancer Society on "Advances in Cancer". Dr. Hahn was elected to Active Membership in the American Association of Cancer Research, Incorporated.

Dr. Paul A. Bowers, Assistant Professor of Obstetrics and Gynecology, spoke on "The Why and How of Physiologic Obstetrics" before a meeting of the Camden County Unit, New Jersey Association for Retarded Children, on April 23.

Dr. Alvin F. Goldfarb, Assistant Professor of Obstetrics and Gynecology, spoke at the International Fertility Association meeting in Acapulco, Mexico, on February 4th on "Clomiphene in the Treatment of Anovulation". On February 28, he spoke on "Dysfunctional Uterine Bleeding" at the Monmouth Medical Center, Long Branch, N. J. On March 5, he spoke before the Memphis (Tenn.) Gynecologic Society on "Cytohormonology in Menstrual Dysfunction". He spoke on "Advances in Menstrual Physiology" on April 20th at Middlesex Memorial Hospital, Middletown, Conn. And on April 25th he spoke on "Progestins" at the Monmouth Medical Center.

ORTHOPEDIC SURGERY

Dr. John J. Gartland, Assistant Professor of Orthopedic Surgery, attended the combined meeting of the

DR. JAMES M. HUNTER, Instructor in Orthopedic Surgery, has been appointed Coordinator of the House Staff Education Program. Dr. Hunter is associated with the Veterans Administration Hospital and Philadelphia General Hospital as an attending staff member and serves as Orthopedic Consultant to both Valley Forge General Hospital and the State Hospital for Crippled Children at Elizabethtown. He is Chief of the Compensation Hand Clinic of Philadelphia, Chief of the Hand Clinic at Philadelphia General, Chief of Hand Service and Clinic at Elizabethtown, and Chief of the Ortho-Hand Clinic at Jefferson.

OTOLARYNGOLOGY

DR. FRED HARBERT, Professor of Otolaryngology and Head of the Department, was elected and installed as President of The American Otorhinologic Society for Plastic Surgery, Inc., on May 6, during the group’s scientific meeting in Philadelphia.

DR. JOSEPH SATALOFF, Associate Professor of Otolaryngology, participated in the third annual Institute of Industrial Medicine held at Colby College, Waterville, Maine, August 3-7. Conducted as part of an experiment arranged by the College’s Department of Adult Education, the course is designed for the full-time as well as the part-time industrial physician. Dr. Sataloff also participated in a panel discussion on “Industrial Hearing Loss Problems” at a meeting of the Industrial Medical Association and Subcommittee on Hearing Problems—P.C.M.S. on May 20.

DR. JOHN B. REDDY, Assistant Professor of Otolaryngology, was re-elected for a one-year term as Eastern Regional Vice President of the American Otorhinologic Society for Plastic Surgery at the group’s annual meeting on Grand Bahama Island.

PATHOLOGY

DR. GONZALO E. APONTE, Associate Professor of Pathology, presented a paper entitled “Neoplastic and Non-Neoplastic Responses of the Rat Pancreas to Whole-Body Irradiation” at the meeting of the Mexican Association of Gastroenterology in Mexico City on July 3.

DR. SIEBERT BORNSTEIN, Assistant Professor of Pathology, spoke on “Problems of the Blood Bank” before the Optimist Club of Hackensack, N.J., on June 24.

DR. THEOLOGOS I. A. IOSIFIDES, Assistant Professor of Pathology, at a meeting of the Association of Clinical Scientists on May 2, spoke about recent investigations in treating radiation exposure victims by injecting them with bone marrow that has not been irradiated. It is hoped that this marrow will produce healthy red blood cells until the patient’s own cell factories recover.

PEDIATRICS

DR. HANS G. KEITEL, Professor of Pediatrics and Head of the Department, participated in the Hahne-mann Symposium on “Anabolism and Catabolism” on May 4th at the Sheraton Hotel. On May 18 and 19, he was a participant in a Symposium on “The Non-Allergist Discusses Allergy and Asthma” during the First Annual Seminar on Allergy at the Betty Bachrach Home. On June 5th he participated in the International Symposium on Pyelonephritis at the Boston City Hospital. Dr. Keitel spoke on “Fluid Therapy in Pediatrics” at the Seoul National University Hospital, South Korea on June 12; spoke on “Recent Advances in Fluid Therapy in Infancy” at the Japanese Pediatric Congress in Sapporo City, Japan on June 15; and presented a Seminar on “The Feeding of Premature Infants” on June 18 before the Pediatric Department of the University of Tokyo.
He also spoke before the Hawaiian Pediatric Society on “Learning Disability.”

Shown on the campus of Tokyo University are (from left) Dr. Masanobu Shigeta (Dept. of Pediatrics, 1961-63), Dr. Keitel, Mrs. Shigeta, Mrs. Takeda, and Dr. Misa Takeda (Dept. of Pathology, 1958-63).

During his recent lecture-tour, Dr. Keitel met Jefferson Alumni in all areas. They were eager to know of the Building Program and of its rapid progress. In Korea, he met with two Dr. Moons; one had been with Dr. Jaeger in the Department of Surgery. He is extremely busy with a heavy clinical and teaching schedule. The other, Dr. Hyong Moon, who had his pediatric training at Jefferson, is now an Assistant Professor of Pediatrics at the Seoul National University. He is also Secretary of the Korean Pediatric Association with a membership of over 500, due in no small measure to the dedication of Dr. Moon. Unfortunately tuberculosis and malnutrition still are some of the common medical problems in South Korea. The widely publicized military curfew was of minimal consequence—the sirens blew at 11 p.m.

In Japan, Dr. Jo Ono, a Bronchoesophagologist at the Keio University School of Medicine, sent his best wishes to Dr. Fred Harbert and the members of his Department. Dr. Takeda, previously with Dr. Herbut, sent his best wishes to Jefferson and Dr. M. Shigeta, previously a Research Fellow in the Department of Pediatrics, also sent his best wishes to his friends at Jeff. Dr. Shigeta is in practice and teaching at the University of Tokyo.

DR. ROBERT L. BRENT, Professor of Pediatrics and Professor of Radiology (Radiation Biology), reported on “The Production of Congenital Malformations with Tissue Antisera” at the 74th annual meeting of the American Pediatric Society in Seattle, Wash., June 16 through 18.

PREVENTIVE MEDICINE

DR. E. HAROLD HINMAN, Professor and Head of the Department of Preventive Medicine, has been appointed to a three-year term on the Committee on International Medical Activities of the American College of Physicians.

DR. C. EARL ALBRECHT, Professor of Preventive Medicine (Public Health), was guest speaker at the 120th annual meeting of the Pennsylvania Association of Dental Surgeons on May 12. A former Commissioner of Health for the State of Alaska, he discussed his "Highlights of 20 Years in Alaska." On May 25th he was a speaker at commencement exercises of the University of Alaska. Dr. Albrecht was invited to participate by University President William R. Wood on behalf of the Board of Regents of which Dr. Albrecht is a former member. The University conferred an honorary doctor’s degree on Dr. Albrecht in recognition of his distinguished career in medical science, his contribution to the development of public health in Alaska, his work on tuberculosis, and his success in establishing the Native Hospital in Anchorage. Dr. Albrecht was elected first vice president of the Pennsylvania Health Council at its annual meeting.

DR. HEINRICH BRIEGER, Professor of Preventive Medicine (Occupational Medicine), presented the following papers at the American Industrial Hygiene Conference in Philadelphia on April 29: "Synergistic Effects of Aerosols: IV. Therapeutic Elimination of Inhaled
Radioactive Particles,” prepared in conjunction with the late Dr. Charles W. LaBelle, and technician Dorothea M. Bevilacqua and “Diurnal Variations in Urinary Excretion of Mercury” in cooperation with Dr. Fredric Rieders. Dr. Brieger was recently elected to membership in the American Academy of Occupational Medicine.

PSYCHIATRY

DR. FLOYD S. CORNELISON, JR., Professor of Psychiatry and Head of the Department, spoke at the annual dinner of the Monmouth (N.J.) County Mental Health Association on April 30. Dr. Cornelison’s topic was “Research Progress and the Research Outlook in the Fight Against Mental Illness.”

DR. JOHN E. DAVIS, Professor of Psychiatry, lectured on “State and Local Resources for the Mentally Retarded” at a graduate course in mental retardation for residents and interested professional personnel at the Elwyn School in Media, Pa., on April 29.

DR. ROBERT WAELDER, Professor of Psychiatry (Psychoanalysis), was chairman of a three-day meeting at the Center for Advanced Psychoanalytic Studies in Princeton, N.J., February 27 through March 1. He was also Chairman of a symposium on “Infantile Trauma” sponsored by the Fund for Psychoanalytic Development and Research in New York, April 3-5. On May 20th he presented a lecture entitled “The Mark Motif in the Development of Psychoanalytic Thought” before the Boston Psychoanalytic Society and “Psychoanalysis and History” before the Boston Psychopathic Hospital.

DR. PAUL J. POINSA RD, Clinical Professor of Psychiatry, addressed the staff of the George F. Geisinger Memorial Hospital and the Foss Clinic in Danville, Pa., on April 13 and 14 on “General Psychiatric Considerations.”

DR. CLAUS B. BAHNSON, Associate Professor of Psychiatry (Psychology), spoke on “Transference and Counter-Transference” at the Philadelphia Society of Clinical Psychologists meeting on February 14, 1964. He delivered a paper on “Emotions, Ego Defenses, and Asthma” at the first annual meeting of the Association of Convalescent Homes and Hospitals for Asthmatic Children, Inc., in Atlantic City on May 15-16. On June 18th Dr. Bahnsen assumed the Presidency of the Philadelphia Society for Projective Techniques.

DR. SAMUEL A. GUTTMAN, Associate Professor of Clinical Psychiatry, was recently named Vice Chairman of the Educational Committee of the Philadelphia Association for Psychoanalysis. He was also recently appointed ex officio member of the Committee on Post Graduate Development of the American Psychoanalytic Association. On May 1, he chaired a discussion group during the annual meeting of the American Psychoanalytic Association in Los Angeles.

DR. ABRAHAM FREEDMAN, Associate Professor of Clinical Psychiatry, arranged the program for the Philadelphia-Cleveland-Baltimore Psychoanalytic Congress in Hershey, Pa., on June 6. At the American Psychoanalytic Association meeting in Los Angeles May 7-9, 1964, he participated in a discussion group on teaching psychoanalytic concepts to medical students.

DR. IVAN BOSZORMENYI-NAGY, Assistant Professor of Psychiatry, was a discussant at a conference of approximately 40 specialists in the treatment of schizophrenia April 10 and 11, at Eastern Pennsylvania Psychiatric Institute. On May 15 he participated as a member of the Task Force on Adult Out-Patient Clinics and Facilities for the Commonwealth Mental Health Planning Program. On May 25 he presented a paper on “Family Investigation and Therapy” at the Medical Staff meeting at EPPI.

DR. ROBERT A. CLARK, Assistant Professor of Psychiatry, spoke on “Can We Change Man’s Thinking—A Psychiatrist Looks at War and Peace” at the May Forum of the Northeast Unitarian Universalist Fellowship on May 14.

DR. BARRY BRICKLIN, Associate in Psychiatry (Psychology), has been elected President of the Philadelphia Society of Clinical Psychologists. He recently spoke on “The Psychology on Under-achievement” at the Walter Miller School in Levittown, Pa.

DR. WILLIAM A. RUTTER, Associate in Clinical Psychiatry, spoke on “The Changing Roles of Psychiatry” during the annual Alumni Association homecoming week-end at Immaculata College, West Chester, Pa., April 3-5, 1964.
DR. MARGARET O. TSALTAS, Associate in Clinical Psychiatry, was guest speaker at the third session of the "Kaffee Klatch Series of 1964" of the Association for Jewish Children on March 30. She spoke on "The Meaning of Sex to Children".

DR. ROBERT S. GARBER, Instructor in Psychiatry, spoke on April 3rd before the Mid-Hudson District Branch, American Psychiatric Association, Matteawan State Hospital, Beacon, New York, on "The Workings and Functions of the Assembly of District Branches of the American Psychiatric Association". On April 9, he spoke on "The District Branch and Its Implementation of the Ten Point Program" before the Delaware District Branch, American Psychiatric Association, DuPont Hotel, Wilmington, Del. On May 3, 4, and 5, he presided over a meeting of the Association District Branches, American Psychiatric Association, Los Angeles, California. On May 7, Dr. Garber spoke on "Legal Implications of Hospital Administration" before the annual meeting of the American Psychiatric Association in Los Angeles. On April 11th he spoke on "History of the American Psychiatric Association" in Tarpon Springs, Fla. And on May 12, he spoke before a joint meeting of the American Psychiatric Association and the Mexican Society of Neurology and Psychiatry, Mexico City, on "Alcoholism—Management in a Private Psychiatric Hospital".

DR. JACK E. GITTERMAN, Instructor in Psychiatry, spoke on "Self Acceptance" before a session of the Institute for Adult Jewish Studies on April 3.

DR. GASTON G. TRIGOS, Instructor in Psychiatry, presented a paper entitled "Community Psychiatry in Non-Urban America" at the First International Congress of Social Psychiatry held in London, England, August 17-22. Dr. Trigos' interest in community and social psychiatry stems from his early work in the "therapeutic community" while serving in the U.S. Navy. His interest was further encouraged by the teaching and guidance of the late Dr. Robert A. Matthews. Dr. Trigos was given the 1959 award by the American Fund for Psychiatry to further encourage and develop his interest in community psychiatry. In 1960 he developed the first Day Hospital in the City of Philadelphia for the Veterans Administration. He later became Medical Director of the Gloucester County Guidance Center in Woodbury, N.J. In addition to his duties as Director of the Center, he is also Chief of Psychiatry at the Underwood Hospital. Dr. Trigos is responsible for the Jefferson service at the Philadelphia General Hospital.

DR. CHARLES M. TUCKER, Instructor in Psychiatry (Psychology) and Instructor in Pediatrics (Psychology), spoke at St. Christopher's Hospital on June 2 on "Group Psychiatry with Latency Aged Boys" at the presentation of results of a year's experiences with children at Jefferson.

DR. W. WILSON WREN, Instructor in Psychiatry, presented a paper entitled "Summary of a Dissociative Reaction" at the meeting of the Medical Correctional Association in New York on April 12. On April 22nd, he participated in a seminar on "Signs of Emotional Illness in Children and Adolescents" at the Elwyn School training program in Elwyn, Pa.

RADIOLOGY

Jefferson participants in the 49th annual meeting of the Pennsylvania Radiological Society held at Buck Hill Falls, Pa., May 22nd and 23rd, included DR. GERALD D. DODD, Clinical Professor of Radiology, who moderated a film reading session; DR. KENNETH E. FRY (Jeff '31), Professor of Clinical Surgery, who was a panel member at a Mammography Symposium; and DR. C. JULES ROMINGER (Jeff '48), who with an associate presented an exhibit entitled "Congenital Right Diaphragmatic Hernia". DR. ROY R. GREENING, Professor of Radiology, was Chairman of the Special Awards Committee. Dr. Greening was recently elected President of the American Registry of Radiologic Technologists.

DR. PHILIP J. HODES, Professor of Radiology and Head of the Department, was a Visiting Professor at the
Alumni Giving

Increases 54% Over Past Five Years

"Something magnificent is taking place here amid the cruelties and tragedies, and the supreme challenge to intelligence is that of making the noblest and best in our curious heritage prevail."—C. A. Beard. One of the magnificent things is certainly the growth of Annual Alumni Giving. This is shown most definitely by an increase of 54% in the total over the period of the past five years.

There are still questions as to how this money is used. Of the total sum of $176,789. raised this year, $13,789. was designated by the donor to particular areas other than preclinical salaries. The remainder totaling $163,000. has been designated by the Executive Committee on recommendation of the Annual Alumni Giving Fund Committee to be used for salaries of the preclinical departments. When I tell you that the budget, for the school year of 1964-65, of these six preclinical departments for professional personnel alone totals $617,700., you can see that our Alumni are making a most worthwhile contribution.

Since I will not head the Annual Alumni Giving Fund Committee during the coming year, I feel that I should thank you or rather those who have contributed to any of the past campaigns for your support of Jefferson. The percentage of our alumni body which contributed to this last drive was 51.0%. Since Annual Alumni Giving began 85% of our Alumni have given at some time and it has disturbed me that in no one year has our percentage risen to the figure of 70 to 75% where it really should be. Such high percentage is possible. The Class of 1946 during the past campaign, with an extremely hard-working Class Agent, had gifts from 83% of its members. I trust that you will continue to give support to Jefferson through Annual Alumni Giving by supporting your Class and your Class Agent, with special emphasis during your fifth-year reunion years.

Dr. J. Wallace Davis has been appointed Chairman of the Annual Alumni Giving Fund Committee and I am sure that under his direction and with your increasing support it will enter a period of still more rapid growth.

As Daniel Webster said: "If we work upon marble, it will perish. If we work upon brass, time will efface it. If we rear temples, they will crumble to dust. But if we work upon men's immortal minds, if we imbue them with high principles, with the just fear of God and love of their fellow men, we engrave on those tablets something which no time can efface, and which will brighten and brighten to all eternity."

KENNETH E. FRY, M.D.
Chairman
Annual Giving Fund Committee

ALLOCATION OF SIXTEENTH FUND

By Resolution passed by the Executive Committee of the Alumni Association, it was agreed that "Contributors to Annual Giving Fund Drives should be given the following choices of the use to which their contributions will be put: Unrestricted Funds, Pre-Clinical Salaries, Research, and 'Other' (to be specified by donor)."

The following is a recapitulation of contributors' choices in the Sixteenth Drive:

- **Unrestricted Funds** .......... $158,196.78
- **Pre-Clinical Salaries** .......... 4,804.00
- **Research** .......... 1,298.00
- **Other** .......... 12,490.00

**Total** .......... $176,788.78

**TOTAL OF FUNDS**

- **1st Roll Call** .......... 54.2% 3,209 gifts $108,313.87

Sixteenth Annual Giving Fund Drive

HONOR ROLL OF DONORS

During the 16th Drive the following loyal alumni, faculty members, and friends contributed a total of $176,788.78 to the Annual Giving Fund. Of the 6931 living alumni with known addresses, 3538 were contributors, making our percentage of participation 51.0%. Contributions to Jefferson through the American Medical Association Education and Research Foundation totaled $6,642.71 and are listed separately on page 15a.

To all we wish to express our sincere thanks.

Dr. Davis Appointed Chairman, Annual Giving Fund Committee

Dr. Abraham Cantarow, President of the Alumni Association, has appointed Dr. J. Wallace Davis as the new Chairman of the Annual Giving Fund Committee, succeeding Dr. Kenneth Fry who is President-elect of the Alumni Association.

A member of the Class of 1942, Dr. Davis served his internship at Jefferson and became Assistant Chief Resident in 1943. He served as a Plastic and Reconstructive Surgery Resident from 1946–1949 and as General Surgery Resident from 1949–1951. Dr. Davis, who is presently an Associate in Surgery (Plastic), is Chief Plastic Surgeon at Misericordia Hospital, Assistant Plastic Surgeon at Philadelphia General Hospital, a Consultant in Surgery at Nazareth Hospital and Attending Physician in Plastic and Reconstructive Surgery at Veterans Administration Hospital.

He belongs to numerous medical societies and has served as Co-Chairman of the Alumni Phase of Jefferson's Building Fund program and as Secretary of the Alumni Association.

Dr. Davis assumed his new duties on July 1st and presided at the first meeting of the Annual Giving Fund Committee on August 5. At that time it was unanimously agreed that the goal for the 17th Drive should be set at $200,000, which is an increase of $25,000 over the previous year. Alumni are urged to respond to their Class Agents' appeals as generously as possible this year. With the increased faculty and expanding research, Jefferson, more than ever, needs the support of all her graduates.
Lovelace Foundation in Albuquerque, New Mexico, April 24 and 25, where he was one of several guest speakers at a series of lectures for physicians and biological scientists. Also present was Dr. Roy Greening who discussed the future of Radiology. From May 13 through June 8, Dr. Hodes was on a professional visit to Europe. He spent several days in London where he delivered two lectures at Guy’s Hospital. From there he flew to Russia where he conferred at the Pavlovian Institute in Leningrad, the purpose of which was to set up an international symposium on the stomach to be held at Jefferson in February 1965. His next stop was Paris where he spoke at the University on “Body Section Radiography” and “Post Graduate Medical Education in the USA”. He concluded his trip with a visit to Rome where he participated in the planning of the next International Congress of Radiology.

Dr. Philip D. Gilbert, Associate Professor of Radiology, was inducted as President of the Radiological Society of New Jersey on May 19, 1964, in Trenton. Dr. Gilbert has also been appointed commissioner for the Radiation Protection Commission of New Jersey and secretary of the New Jersey Radiation Protection Committee.

**SURGERY**

Dr. John H. Gibbon, Jr., The Samuel D. Gross Professor of Surgery and Head of the Department, spoke of the recent success in transplanting the heart’s aortic valves from one person to another at the California Heart Association’s annual meeting in Coronado, California, on May 15th. Dr. Gibbon told the convention the transplants may be a much better answer to replacing damaged valves than the artificial valves now being used. He was elected President of the Society for Vascular Surgery at the annual meeting on June 21 in San Francisco.

Dr. Richard L. Rovit, Associate Professor of Surgery (Neurosurgery), presented a paper entitled “Cushing’s Syndrome and the Hypophysis—A Revaluation of Pituitary Tumors and Hyperadrenalism” at a meeting of The Harvey Cushing Society, Los Angeles, Calif., from April 19-22. On May 9th Dr. Rovit presented a paper entitled “The Neurosurgical Relief of Pain in Cancer Patients” at the Jefferson-Penn State Symposium on Cancer in Pocono Manor, Pa. In November 1963, he spoke at Conemaugh Valley Hospital on “The Surgical RX of Focal Cerebral Seizures” and at a meeting of the Radiological Society of North America on “The Value of Hg-203 Neohydrin Brain Scars in Patients with Intracranial Hematomas”. In March Dr. Rovit spoke at a meeting of the Eastern EEG Society in St. Adele, Quebec, Canada, on “Some Characteristics of Multiple Acute Focal Epileptoginal Lesions in Cats”.

Dr. Benjamin F. Lee, Jr., Associate in Clinical Surgery, was elected President of the Camden Medical Society at the group’s annual meeting on May 6th in Cherry Hill, New Jersey.

Dr. Richard A. Chodoff, Instructor in Surgery, recently returned from a one-month voluntary term of service in a Malaysian hospital. The hospital, a government institution, is one of a group included in the Medico-Care program instituted by the late Dr. Thomas Dooley. The 175-bed hospital at Kuala-lipis, is deep in the interior of Malaysia, 120 miles northeast of the capital, Kuala-lumpur. One native doctor administers the hospital with the help of two American physicians on a long-term contract with the Malaysian government plus the invaluable assistance of voluntary short-term visits of well-qualified medical and surgical personnel arranged by Medico-Care.

Dr. Chodoff found the hospital facilities to be crude in comparison with American standards and pathetically short of modern equipment. There are no specialist consultants available, so the staff is dependent upon its own resources. As the only surgeon within 150 miles, Dr. Chodoff had to function without trained X-ray and laboratory assistance. The patients, mostly Chinese, were cooperative, pleasant and appreciative. Dr. Chodoff combined his Malaysian tour of duty with a globe-encircling tour of medical centers. Everywhere he visited he found the goodwill generated by American doctors through Medico-Care and the Peace Corps very apparent.
UROLOGY

DR. THEODORE R. FETTER, Nathan Lewis Hatfield Professor of Urology and Head of the Department, and members of the Department attended the annual meeting of the American Urological Association, Inc., in Pittsburgh, May 11-14. Dr. Fetter participated in a discussion on Urologic Teaching in Medical Schools at a meeting of the Educational Committee of the A.U.A. Dr. Fetter will be formally received as a member in the Societe Internationale D’Urologie in London, England, on September 5, 1964.

DR. PAUL D. ZIMSKIND, Research Associate in Urology, was awarded the degree of Doctor of Philosophy at the 140th Commencement of the Jefferson Medical College. Dr. Zimskind is presently Abstracting Editor of Urological Survey. He recently presented a paper “Effects of Renal Vascular Occlusion on Pelvic and Ureteral Pressures”.

Alumni and Faculty Attend AMA Meeting

TWENTY-THREE Jefferson graduates and faculty members participated in the program of the 113th Annual Convention of the American Medical Association in San Francisco in June.

Papers were presented by Dr. Bernard J. Alpers, Professor of Neurology and Head of the Department, Dr. Leonard Apt, Class of 1945, Dr. J. Edward Berk, Class of 1936, Dr. Heinrich Brieger, Professor of Preventive Medicine with Dr. Jan Lieben, Visiting Professor of Preventive Medicine, Dr. Seymour L. Cole, Class of 1937, Dr. David A. Culp, Class of ‘44, who also had a scientific exhibit, Dr. George C. Griffith, Class of 1926, who also presided at a panel discussion and at a section meeting on heart disease, Dr. J. Rudolph Jaeger, Professor of Neurosurgery, Honorary, Dr. Warren R. Lang, Professor of Obstetrics and Gynecology, Dr. Jay Nadel, Class of 1953, Dr. Jo Ono, Class of 1928, who also gave the “Special Guest” address at a meeting of the Section on Laryngology, Otolaryngology and Rhinology, and Dr. Peter A. Theodos, Class of 1935, Assistant Professor of Clinical Medicine.

In addition, Dr. William A. Sodeman, Dean and Vice President for Medical Affairs, moderated a panel on Chest Disease and Dr. Oscar Creech, Jr., Class of 1941, moderated a panel on Cardiovascular and Respiratory Problems and also had two scientific exhibits.

The following Alumni and faculty members had scientific exhibits: Dr. J. Montgomery Deaver, Professor of Clinical Surgery, with Dr. Malcolm W. Miller, Assistant Professor of Clinical Medicine and associates; Dr. DeWitt E. DeLawter, Class of 1941, with associates; Dr. Alvin F. Goldfarb, Assistant Professor of Obstetrics and Gynecology; Dr. Everett J. Gordon, Class of 1937; Dr. Edmund L. House, Class of 1935, Associate in Clinical Medicine, with Dr. John J. Kelly, Jr., Class of 1954, Instructor in Medicine and Dr. James W. Daly, Class of 1948, Associate in Clinical Medicine; Dr. Hans G. Keitel, Professor of Pediatrics and Head of the Department, with associates; Dr. Kenneth M. Kron, Class of 1952, with Dr. Richard T. Smith, Class of 1941, Instructor in Medicine, and Dr. Irwin F. Hermann, Class of 1937.

The Alumni Association, with the cooperation of the College, entertained approximately 100 Alumni, their wives and guests at “Open House” in a suite at the Mark Hopkins Hotel on the four evenings of the Convention. Dr. and Mrs. Sodeman, Dr. and Mrs. John H. Gibbon, Jr., Dr. Hans G. Keitel, Dr. and Mrs. Richard T. Taylor and Mrs. Mulone, the Alumni Secretary, acted as hosts and gave the visitors news of the College.
President Johnson
Cites Dr. Sodeman

Dean William A. Sodeman recently received a plaque signed by President Lyndon B. Johnson, commending Dr. Sodeman on his volunteer duty as a member of the American College of Cardiology's International Circuit Course Faculty.

During the annual convention of the American Medical Association in San Francisco, Dr. Sodeman was elected a member of the AMA's Council on Medical Education. As a member of the ten-man Council, Dr. Sodeman will play an important part for the next three years in establishing standards for medical schools throughout the country. He is the only member representing the northeastern area of the United States, including the major medical centers of Boston, New York, and Philadelphia.

Following the AMA convention, Dr. Sodeman flew to Hawaii to participate in the second Hawaii Medical Seminar, sponsored by the Hawaii Medical Association. The Seminar was held in Honolulu June 26th through July 5th.

On Saturday June 27th, Dr. Sodeman presented "Management of Digitalis Intoxication" at a Breakfast Scientific Session, and on the morning of June 30th, he presented "Interpretation of Chest Pain". He also participated in two afternoon sessions. On July 2nd, he presented "Cor Pulmonale as a Problem in General Practice" and on July 3rd, "Acute Pericarditis—A Diagnostic Problem".

While in Hawaii, the Sodeman family were guests of honor at a dinner given by the Hawaii Chapter of the Alumni Association.

Dr. Moran's Laboratories Visited by Mr. Leader

Dr. John H. Moran, Assistant Professor of Pathology, is one of five American Cancer Society research grantees whose laboratories have been visited by George M. Leader, 1964 National Campaign Chairman of the American Cancer Society and former governor of Pennsylvania. Dr. Moran has received $12,358 from the Society to study "Methods and Significance of Tumor Cells in Circulating Blood."

The study of circulating blood offers hope of new follow-up methods on cancer patients, determining the ability of a patient to resist or destroy cancer cells, and detecting cancer in early stages. Dr. Moran showed Governor Leader how adding enzymes to circulating blood removes most of the normal cells and enables him to study the remaining, possibly malignant, cells.
Florida is Site of May Medical Meetings

THE American Society for the Study of Sterility held its 20th annual meeting at the Americana Hotel, Bal Harbour, Florida, May 15-17, 1964. And from May 16-22, the Americana Hotel was the site of the 12th annual Clinical Meeting of The American College of Obstetricians and Gynecologists.

Jefferson participants in the American Society for the Study of Sterility program included Dr. Alvin F. Goldfarb, Assistant Professor of Obstetrics and Gynecology, who presented “Laboratory Studies in Ovulatory Failures” at a luncheon seminar, “The Selection of a Progestin in Reproductive Problems” at a general session, and a scientific exhibit entitled “Progestins in Reproductive Problems.” Dr. Warren R. Lang (Jeff '43), Professor of Obstetrics and Gynecology, presented “Fertility in Adolescence” at a luncheon seminar and “Cervical Factors in Infertility” during a program of Clinical Research Correlates. During the same program Dr. Abraham E. Rakoff (Jeff '37), Professor of Obstetrics and Gynecology (Endocrinology), served as a co-chairman for a session on “Interpretation of Hormone Assays in Infertility.”

During the four and one-half days of the scientific meetings of The American College of Obstetricians and Gynecologists there were 389 total hours of scientific sessions comprised of 13 hours of formal papers, 15 hours of panels, six hours of forums, 19 hours of films and closed circuit television and 336 hours of special interest meetings—Breakfast Conferences, Round Tables, and Correlated Seminars. In addition, 96 hours of Postgraduate Courses were offered.

BREAKFAST CONFERENCES

Jefferson Alumni and faculty who participated in the May 19th Breakfast Conference included Dr. Paul A. Bowers (Jeff '37), Assistant Professor of Obstetrics and Gynecology, "The Role of the Obstetrician-Gynecologist in the Care of Breast Disorders"; Dr. Samuel M. Dodek (Jeff '27), "The Role of an Obstetrical Service in Community Population Control"; Dr. Alvin F. Goldfarb, "Amenorrhea—Diagnosis"; Dr. George A. Hahn, Professor of Clinical Obstetrics and Gynecology, "Lymphangiography"; Dr. Warren R. Lang, "Pediatric Gynecology"; and Dr. Leon N. Prince (Jeff '33), Assistant Professor of Obstetrics and Gynecology, "Premature Rupture of the Membranes."

During the May 21st Breakfast Conference Dr. Lang presented "Hormonal Cytology" and Dr. Joseph P. Long (Jeff '39), Assistant Professor of Obstetrics and Gynecology, presented "Follow-up of Conservation of Ovaries at Time of Hysterectomy." At the May 22nd Breakfast Conference Dr. John Edward Lynch (Jeff '35), Assistant Professor of Clinical Obstetrics and Gynecology, presented "Effect of Emotions in Obstetrics and Gynecology"; Dr. John B. Montgomery (Jeff '26), Professor of Obstetrics and Gynecology and Head of the Department, presented "Abdominal Myomectomy"; and Dr. Anthony J. Ruppersberg, Jr. (Jeff '33) presented "Problems in Maternal Mortality Studies."

EXHIBITS

Scientific exhibits included "The Selection of a Progestogen in Gynecologic Therapeutics" by Dr. Goldfarb and "Blood Volume Studies in Normal Pregnancy, Toxemia and Gynecologic Complications" by Dr. Lynch together with Dr. Jules Rominger (Jeff '48) and Dr. John A. Craig (Jeff '58).

Dr. Abraham E. Rakoff was co-leader of a Postgraduate Course on "Gynecologic Endocrinology," member of a panel on "Induction of Ovulation," and a participant in a Special Interest Meeting on "Management of Function Menstrual Disorders." Dr. Ruppersberg also participated in a Special Interest Meeting, a Round Table at which he presented "Organization and Operation of Maternal Mortality Committee."
Alumni Advisory Council Meets

Members of the Alumni Advisory Council are pictured as they formulate their report to the Board of Trustees following their visit to the College on June 7, 8 and 9. From left to right—Dr. Francis J. Braceland, Dr. Donald B. Davidson, Dr. David M. Johnston, Dr. Marshall C. Rumbaugh, Chairman of the Council, Dr. Henry L. Bockus, Dr. Anthony Ruppersberg, Dr. Aaron Dietz and Dr. Frank Krusen. Dr. Dietz and Dr. Krusen are newly-elected members of the Council. The third new member, Dr. Robert T. Wong, was unable to be present.

Canadian Gynaecological Fellowship Club Visits City

Dr. John B. Montgomery, Professor of Obstetrics and Gynecology and Head of the Department, was host to the Canadian Gynaecological Fellowship Club when the Club met in Philadelphia for its fourteenth annual meeting on April 15, 16, 17, and 18.

The Canadian Gynaecological Fellowship Club is a travel club of Canadian obstetricians and gynecologists. The Club was organized in 1950 and since then has met in Canadian and U.S. cities each spring. All members are Fellows of the Royal College of Surgeons of Canada and most have teaching appointments in Canadian medical schools.

In addition to their visit to Jefferson, the Club members also attended clinical programs at the Philadelphia Lying-In Hospital, the Hospital of the University of Pennsylvania, and the Temple University Medical Center.

Those who participated in the scientific program at Jefferson include Dr. Abraham Rakoff, Professor of Obstetrics and Gynecology (Endocrinology), "Clomiphene in the Treatment of Anovulation"; Dr. George A. Hahn, Professor of Obstetrics and Gynecology, "Lymph-angiography in Pelvic Cancer"; Dr. Alvin F. Goldfarb, Assistant Professor of Obstetrics and Gynecology, "The Selection of a Progestogen in Therapeutics"; Dr. Arthur B. H. Lee, Assistant in Obstetrics and Gynecology, Dr. Atef H. Moawad, Resident in Obstetric and Gynecologic Endocrinology, and Dr. Grafton Chase of the Philadelphia College of Pharmacy, "Analysis of Amniotic Fluid in Erythroblastosis"; Dr. Warren Lang, Professor of Obstetrics and Gynecology, Dr. Leon N. Prince, Assistant Professor of Obstetrics and Gynecology, and Dr. Daniel Rowe, Associate in Clinical Pediatrics, "Culture of Amniotic Fluid"; Dr. David M. Farell, Professor of Obstetrics and Gynecology, and Dr. Benjamin Kendall, Assistant in Obstetrics and Gynecology, "Fetal Electrocardiography"; Dr. Paul A. Bowers, Assistant Professor of Obstetrics and Gynecology, "Physiologic Obstetrics"; and Dr. A. T. Gregoire, Assistant Professor of Obstetrics and Gynecology (Physiology), "Biochemistry of the Rabbit Fallopian Tube."
DR. WILLIAM SUNDERMAN, SR., Clinical Professor of Medicine and Director of the Division of Metabolic Research, Honorary, was honored by the Association of Clinical Scientists at a banquet held on May 2 at The Union League of Philadelphia, in recognition of his contributions to the science of Medicine. The banquet marked the 15th anniversary and the 25th meeting of the Association, of which Dr. Sunderman was founder and first President. It was also the 15th anniversary of the Proficiency Testing Service, a system of laboratory quality control, which Dr. Sunderman instituted.

Dr. George F. Stevenson of Rockville, Md., served as toastmaster. The Right Reverend Oliver J. Hart, formerly Bishop of the Episcopal Diocese of Pennsylvania, gave the invocation. Present were representatives of many of the learned institutions in which Dr. Sunderman has taken an active part. After dinner each spoke briefly on his activities in their organization.

In addition to these speakers, the audience included representatives of corporations and groups for whom Dr. Sunderman has served as a consultant. These were introduced by Dr. F. William Sunderman, Jr.

SPARKERS AND PRESENTATIONS

Speakers and presentations included, among others, Mrs. Frank B. Lynch, President of the Women’s Auxiliary of the Association of Clinical Scientists, who presented Mrs. Sunderman with a pearl brooch of original design. Dr. Vernon E. Martens of Washington, D.C., spoke of the international seminars conducted under Dr. Sunderman’s guidance. His devotion to the literature prompted the presentation to him of a special gold-covered copy of the Handbook of Chemistry and Physics. General Joe M. Blumberg presented Dr. Sunderman with an engraved Honors Medal on behalf of the Armed Forces Institute of Pathology.

Dr. Robert P. MacFate, Secretary-Treasurer of the Association, presented a bound volume of testimonial letters to Dr. Sunderman. Approximately 400 congratulatory letters were bound in blue calf skin, imprinted with gold. The volume contained two dedicatory pages illuminated in gold and appropriate colors by an internationally renowned illuminator.

Association President Dr. Charles L. Blumstein presented an engraved gold-chased goblet, similar to that which is awarded annually by the Association to the "Clinical Scientist of the Year." This goblet is awarded for outstanding zeal in the pursuit of Clinical Science. The Executive Committee of the Association felt this was an appropriate time to present this richly-deserved award. At the conclusion of Dr. Sunderman’s responding remarks, Dr. Frank W. Konzelmann (Jeff ’19), recipient of the Association’s Award for 1957, proposed a toast to Dr. Sunderman, in which he was joined by all present.

ASSOCIATION'S 25TH MEETING

THE dinner honoring Dr. Sunderman was the highlight of the Twenty-Fifth Meeting of the Association of Clinical Scientists held at the Bellevue-Stratford Hotel on May 1, 2, and 3. The Association’s spring meeting is annually devoted to the presentation of scientific papers by members and invited guests. Many Jefferson Alumni and faculty members participated in the May meeting, which was entitled “Symposium on Recent Advances in Clinical Science.”

Those who presented papers include Dr. James E. Clark (Jeff ’52), Associate in Clinical Medicine, "Isolated Intestinal Loop Dialysis in Chronic Renal Failure"; Dr. Gonzalo E. Aponte (Jeff ’52), Associate Professor of Pathology, "Long-Term Effects of Whole Body Irradiation of Rats," and together with Dr. Walter F. Ballinger, II, Associate Professor of Surgery, "Alterations in Structure and Function of the Small Intestine After Vagotomy"; Dr. C. Wilmer Wirtz (Jeff ’34), Professor of Clinical Medicine, "Duodenal Trypsin Measurements in the Evaluation of Pancreatic Function"; Dr. Richard G. Berry, Professor of Neurology (Neuropathology), and Dr. M. H. F. Friedman, Professor of Physiology and Head of the Department, "Experimental Induction of Wernicke’s Encephalopathy"; Dr. Warren R. Lang (Jeff ’43), Professor of Obstetrics and Gyne-
Dr. McDermott Receives High Papal Honor

Dr. Vincent T. McDermott (Jeff '26), (far right) was presented with the Knight of St. Gregory Medal by Archbishop Damiano during a testimonial dinner in honor of Dr. McDermott on April 5. The award, one of the highest for a Catholic layman, was conferred by the Pope in the Vatican. Dr. McDermott, Chief of Staff at Our Lady of Lourdes Hospital, also received a gold watch for "outstanding service" and a scroll from the Sisters of St. Francis for his "guidance and service." Also pictured are (from left) Mr. Thomas Naughton, Chairman of the Committee which sponsored the dinner, Dr. John J. Litz, toastmaster, and Sister Paracleta, O.S.F.
CHAPTER MEETINGS

NORTH CAROLINA

THE North Carolina Chapter met on May 5th in conjunction with the annual meeting of The Medical Society of the State of North Carolina. The meeting was held at the home of Dr. George T. Wolff (Jeff ’52) in Greensboro.

The 50 members who attended enjoyed having representatives of Jefferson bring them information about the activities of the College. Dr. Robert Bruce Nye (Jeff’27) discussed the problems concerning the Office of Admissions. Dr. George Willauer (Jeff ’23) spoke about the Building Fund Drive and brought the members up-to-date on the progress of the expansion program.

Dr. V. Watson Pugh, Jr. (Jeff ’53) was the retiring President and Dr. Edward William Schoenheit (Jeff ’20) was the retiring Secretary-Treasurer. Officers elected for the coming year include Dr. Wolff, President, and Dr. C. Hal Chaplin (Jeff ’53), Secretary-Treasurer.

DISTRICT OF COLUMBIA

THE Army-Navy Club was the scene of the second annual meeting of the Jefferson Alumni Chapter of the District of Columbia on May 21st. Twenty-two of the Jefferson Alumni working and residing in the area of metropolitan Washington attended the affair, which customarily includes a formal dinner with wives followed by an informal stag meeting.

Among those present were Dr. Aaron Dietz, who was recently elected to the Alumni Advisory Council, and Dr. Samuel S. Conly, Jr., Assistant Dean. Dr. Conly addressed the group on current student activities at Jefferson.

Newly elected officers include Dr. Arthur I. Sims (’39), President; Dr. Simon C. Weiner (’39), Vice President; Dr. James Patrick Scanlon (’40), Treasurer; and Dr. John Thomas Lynn, Jr. (’53), Secretary.

NORTHEASTERN PENNSYLVANIA

THE Northeastern Pennsylvania Chapter of the Jefferson Alumni Association held its annual meeting on May 27th at Fox Hill Country Club. A day of golf preceded the 7 p.m. dinner meeting. During the dinner meeting chapter members heard talks by Dr. Abraham Cantarow and Dr. Thomas F. Nealon, Jr. Dr. Marshall C. Rumbaugh, Chairman of the Alumni Advisory Council, described the Council’s functions to the group. Dr. James J. Grace (Jeff ’32) was elected President and Dr. A. A. Berrettini (Jeff ’32) was elected Secretary-Treasurer.

FLORIDA

A SMALL but enthusiastic group of dedicated Alumni representing the Florida Chapter of the Jefferson Alumni Association met again this year in conjunction with the Florida Medical Association meeting at the Diplomat Hotel in Hollywood-by-the-Sea. In our area, where Tulane, Emory, Vanderbilt, and the University of Georgia boast large Alumni groups, the Jefferson group is always admirably represented. The group was extremely happy to have Dr. George Willauer with us this year and to view first hand in the animated slides and movie, the immediate and future development plans for the Jefferson Expansion Program. A new slate of officers was elected for the 1964-1965 season, which include Dr. William Abelove (Jeff ’51), President, and Dr. Edward Saltzman (Jeff ’49), Secretary-Treasurer. The meeting next year will be held again in the month of May, but in Miami Beach at the Americana Hotel.

ALBERT H. WILKINSON, JR., M.D.
HAWAII

THE Hawaii Chapter of the Alumni Association held a dinner in honor of Dr. and Mrs. William A. Sodeman at the Golden Dragon Room of the Hilton Hawaiian Village. The Sodemans were in Hawaii in conjunction with the second Hawaii Medical Seminar of the Hawaii Medical Association. Prior to the dinner—a nine course sumptuous repast of Chinese delicacies—Dr. Robert T. Wong '36, newly-elected member of the Alumni Advisory Council, and Mrs. Wong entertained the Sodemans and Alumni at a cocktail party at their Diamond Head home.

There were 66 present at the dinner including Dr. John F. Wilson, Associate Professor of Dermatology at Jefferson, Dr. Aaron Deitz '32 of Hyattsville, Maryland, also newly-elected member of the Alumni Advisory Council. Others present were Dr. Arthur Liu '31 of New York City, Dr. Edward Lipp '60 and Dr. Arnold Hollander '62 both of Tripler Army Hospital, Dr. Joseph Johnson '63 who is completing his internship at Queens Hospital, and parents of present Jefferson students from Hawaii.

Dr. L. T. Chun J'44, President of the local group, welcomed the Dean and guests and expressed the pleasure of the members in entertaining the first Dean from Jefferson ever to visit the islands, although many faculty members have been to Hawaii. Dr. Sodeman spoke to the group about present Jefferson plans and activities, and about the building program and need for supporting it.

It was a pleasure for the group to gather and meet the Dean, particularly since the Chapter is so far from Jefferson. The Sodemans left Hawaii on July 5th with, I am sure, thoughts of returning.

Dr. ROBERT LEE, '54
Secretary
JEFFERSON Alumni-Ohio held their 13th Annual Dinner on Thursday, 30 April 1964. As usual, the dinner meeting was held in conjunction with the Ohio State Medical Association annual meeting in Columbus.

Following customs initiated in the past, a get-together was planned for alumni, wives and their guests. As planned, the meeting was opened with a fellowship hour in the spacious and beautifully furnished lounge of the University Club, Columbus, Ohio. Long stories and short tales were transferred from one alumnus to the other amid “cocktail l’Universitie and Club”.

Following this initial introduction, forty-four delightful dinners were served to members present in the homey Grill Room of the Club. Featured was the Club’s specialty known as “larded tenderloin of beef with mushrooms”. Following dinner, announcements, and a roll call, alumni and guests were introduced individually. The distinguished portion of the evening was the introduction of the eldest alumnus present, Dr. Ralph C. Wise '01, of Mansfield, Ohio. The program continued with Dr. John H. Hodges, ’39, Professor of Clinical Medicine and Vice-President of the Alumni Association giving a brief résumé to greet the alumni. Dr. Hodges outlined briefly the current progress at Jefferson in the academic and social portion of its scheduling, including Father's Day program and the current status of various older members of the faculty. Policies of the administration and its adaptation to the modern day were covered in a most interesting manner.

Following this, Dr. J. Wallace Davis '42, Associate in Plastic Surgery at Jefferson and newly appointed head of the Alumni Giving Fund presented a brief illustrated lecture concerning "News from Jeff". Dr. Davis fully explained the Alumni Giving Fund and also gave a résumé of the planning concerning the building fund of Jefferson Medical College. With Kodachrome illustrations projected upon the screen, Dr. Davis fully recounted some of the old spots on 11th Street and Locust Street and then projected some of the newer buildings which are to be completed in the near future.

Many alumni plied Dr. Davis with pertinent questions concerning the expansion plan and the method for recruiting alumni donations. After a full discussion and detailed explanations the announcement of the next annual dinner meeting date was made. The next Jefferson Alumni-Ohio dinner will be held in Columbus, Ohio at the University Club, Thursday 13 May 1965. The meeting was duly adjourned.

ANTHONY RUPPERSBERG, JR., M.D. '33
Vice-President for Ohio
51st REUNION—CLASS OF 1913

On Wednesday, June 10th, Norman Quinn, John E. Livingood, and Ted O'Brien enjoyed the subjects presented by the eleven Class Day speakers. Our thanks to Dean Sodeman for his fine luncheon and Open House at the College. Later we walked over to Tenth and Eleventh Streets along Locust where the land has been cleared for construction of the Basic Science Building.

On Thursday we enjoyed the Alumni Day Clinics which were most interesting. At 2 p.m. our Class Day Reunion Luncheon in the Sheraton Hotel was enjoyed by (shown in photo, from left) Si H. Rosenthal, Howard R. Rarig, John E. Livingood, Mrs. Rarig, Theo W. O'Brien, Mrs. Rosenthal, Norman J. Quinn, William J. Goetz, and Louis W. Wright. A minute of silence was observed in honor of the following classmates who have died since June 1963—Benjamin D. Rubin, Eliah Kaplan, Walter R. Krauss, Robert Wayne Richards and Guy T. Haywood. Messages of regret were read from Drs. N. G. Allebach, William E. Grove, F. C. Freed, Karl D. Figley, John B. Flick, and Mrs. Richard C. Beebe. An afternoon of reminiscing was enjoyed by all.

The Alumni Banquet in the Ballroom of the Sheraton was enjoyed by Drs. Livingood, Quinn, Rarig, and O'Brien. Mrs. Rarig and Mrs. O'Brien enjoyed the ladies' festivities in the Pennsylvania East Room of the Sheraton.

Congratulations for the success of the Reunion go to those who contributed funds, messages, and were present. Many thanks, too, to Mrs. Joseph J. Mulone and staff for the fine planning and work.

We wish all of you "Old Guard" good health and hope to see you in June, 1965, at another Class Day Reunion luncheon.

Theo W. O'Brien, M.D.
50th REUNION—CLASS OF 1914

We have had our Fiftieth Anniversary and I’m so glad it’s over. Mabs (the gentle wife, that is) and I had a lovely time, and so did all those present, or at least they said so. Actually I have some very nice letters to prove it.

It was a very nice party. We had a large sitting room, hospitality room, attached to our bedroom at the Sheraton Hotel. My wife and I arrived on June 9th about 3 p.m. and from that time on (about 12 hours a day) the room and bar was open and active. About 14 of us had our wives with us, lovely ladies all looking much too young for us old men. There were many stories—the “do you remember when” type. Some of the “boys” I hadn’t seen in 50 years; I wouldn’t have missed the party for all the tea in China.

Then on Thursday evening there was the Alumni Banquet, one of the largest ever with over 600 present. While we were enjoying the Alumni Banquet, our wives had their own banquet.

Present, to name a few, were Allman, Griffin, Gilhool, Haines, Sharp, B. F. Morgan, Gasser, Tilly Glenn, and Opera Glass Bauer. Really, you never saw a younger or better looking bunch of doctors, all of whom have to be over 70 years of age.

And now the not so happy part. As you know Phillips and I were co-chairmen. We had several pleasant phone calls and exchange of letters. On June 3rd I received a letter from him saying he would not attend the luncheon because he had a good bit of cardiac arrhythmia lately and his wife and he decided it was not a good thing to do. On June 5th about 10 a.m. Mrs. Phillips phoned me and said Hayden had died during the night. And so my friends as it must to all of us.

I hope to see you all next year and the next and so on. Let me add this little verse which I like so much.

When time, who steals our years away,
Shall steal our pleasures, too,
The memory of the past will stay,
And half our joys renew.  

ROY DECK, M.D.
45th Reunion—Class of 1919

The Class of 1919 held their 45th Reunion on June 10, 1964, at the Warwick Hotel. The 25 who attended all agreed that it was a huge success. Those present included Dr. and Mrs. Russell Perry, Dr. and Mrs. George Cordonna, Dr. and Mrs. William E. Wrang, Dr. and Mrs. William L. Hiester, Dr. and Mrs. Hewitt H. Foster, Dr. and Mrs. William J. Jacoby, Dr. and Mrs. Morris Smith, Dr. and Mrs. Charles S. Holman, Dr. and Mrs. Milton B. Emanuel, Dr. Burgess L. Gordon, Dr. Gerald B. Smith, Dr. Dwight C. Hanna, Jr., Dr. E. Lloyd Jones, Dr. Ronald C. Moore, and Dr. Louis Brody and Miss Brody.

Dr. Perry represented the Class on Class Reunion Day and was Guest of Honor at the dinner on June 10. Dr. Emanuel emceed the affair which included a most delicious dinner preceded by cocktails. After dinner the fun began.

Class Historian Dr. Jones reviewed the Class from graduation to the present. Since graduation, the Class has lost 61 of its members. Conversation centered on the doctors’ sons and in particular, their grandchildren. Dr. Casey took first prize in this category with a total of 16 grandchildren. Those who attended heard letters from those who were unable to be present.

It was a memorable evening, long to be remembered. Everyone looked well and I am certain they will be back for the 50th (God willing) in ’69.

Milton B. Emanuel, M.D.

Class of 1919

40th REUNION—CLASS OF 1924

The Class of 1924 was represented at the Class Reunion Day program by “Spurge” English, who gave a talk on “The Essentials of a 10-Minute Bedside Psychiatric Examination”. Spurge is Professor of Psychiatry at the Temple University Medical School. In the evening 28 members of the Class, together with some of the wives, had a lot of happy recollections and visiting over cocktails; then on to just as noisy a dinner.

Jean (Brindy) Brindamour had come all the way from Palo Alto just for the Reunion, and that is quite a record. Lawrence (Larry) Shinaberry came all the way from Fort Wayne, also a record. The President of the Alumni Association, our distinguished classmate Abraham (Abe) Cantarow, was there, also Sam (Scotty) Scott, looking no older than us other young fellows. He still makes a dozen
house calls a day and carries on an active practice, an example for the faint-hearted. He started in medical school when he was almost 40. "Bake" was there, still a bachelor. He and Irwin Lape wowed the Class with some of their reminiscences, as did others. Abe and Spurge saw to it that we all understood how much reunions do and should mean to us. After that Alex Peters was responsible for having each classmate tell us why he was there and how he felt about it. At midnight the Class of 1924—the first to have a portrait painted of a Jefferson professor—stood adjourned, on a note of serene good fellowship. We stood 13th in the Giving Fund and 10th in participation, not bad for old duffers.

R. K. Y. Dusinberre, M.D.

35th REUNION—CLASS OF 1929

The Class of 1929 held a most successful 35th reunion. The reunion committee sponsored a cocktail party with Dr. and Mrs. Milton Harrison acting as host and hostess. Everyone who attended the reunion was amazingly spry, jovial and looked especially youthful. Perhaps those of us who have survived until now, will go on forever. Ace Nichols telephoned the group from Texas during the cocktail hour. It was a pleasant surprise to hear from him.

Alfred E. Troncelliti, M.D.
30th REUNION—CLASS OF 1934

Twenty-three members of the Class of 1934, 14 of whom brought their wives along, attended their 30th reunion at Williamson’s Restaurant atop the Barclay Building on June 10. Joe Coley, the loyal Oklahoman, who has never missed a reunion, kept his record intact and told some interesting stories about his activities. Mal Hawk, coming all the way from California, received the Gulliver Award.

JAMES J. RYAN, M.D.

25th REUNION—CLASS OF 1939

The Class of ’39 celebrated its Twenty-fifth Reunion on June 10-11, 1964. Many classmates met during the morning lectures and the Dean’s luncheon on June 10. At the same time, the ladies were enjoying a luncheon at the Bellevue Stratford Hotel. After a few hours of relaxation, the class members, with their wives, met for cocktails and hors d’oeuvres followed by a dinner dance in the Mirage Room of the Barclay, with 83 in attendance. We were honored to have as guests, Dr. and Mrs. William A. Sodeman, Dr. and Mrs. Hobart A. Reimann, and Dr. and Mrs. Nicholas A. Michels.

After the introduction of the guests, Dr. Michels, Professor of Anatomy, Emeritus, led off the “impromptu” guest speaking in his own special style that earned him the beloved nickname of “Bull”, which we knew him by as students. Dr. Reimann, Professor of Medicine at Hahnemann Medical College, formerly of Jefferson, gave a quackingly nostalgic and delightful re-run of one of his former clinics, complete with black roll box and such questions as “Put him on Penicillin?” Dr. Sodeman, Dean and Vice President for Medical Affairs, brought us up to date on the status and aspirations of Jefferson in his usual capable and inspiring manner. Paul Kennedy, our Class President, made the trip from California to favor us with a story and pertinent comments, saving his big artillery for the masterful speech which he delivered as our Class Representative at the Annual Alumni Banquet the following night. At this reunion at the Barclay, a delicious dinner, good music for dancing, and time for reminiscing made it an evening to be treasured.

On Thursday evening we had a good get together at a Hospitality Room set up at the Sheraton Hotel, complete with candid camera shots in color by our ace photographer, Norman Skversky. This party supplied the proper fortification for the ladies’ banquet in the Pennsylvania Room and for the Annual Alumni Banquet in the Grand Ballroom of the Sheraton Hotel.

The Class representation was excellent, and everyone enjoyed renewing friendships and meeting wives. The new class yearbook was enjoyed by all. This was a very successful and happy Reunion because of the excellent response from the class members, and because of the dedication of the members of the committee. The committee was comprised of Dr. John B. Alexander, Dr. and Mrs. James B. Carty, Dr. and Mrs. Isadore Cohen, Dr.
20th REUNION—CLASS OF S '44

The Twentieth Reunion of the Class of September '44 was held at Cherry Hill, New Jersey, on June 10, 1964. The Class gathered informally in the afternoon and that evening members and their wives attended a cocktail party and dinner at the Cherry Hill Inn. A total of 85 people attended the festivities following which the Class gathered for a picture to mark the occasion.

The following evening the men donned their 1944 hats while attending the Alumni cocktail party and dinner at the Sheraton Hotel.

Plans for the reunion were made by the Planning Committee which consisted of Drs. Burros, Conly, Derham, Dickensheets, Gartland, Hough, Hussong, Kain, Kapeghian, Kitei, Leute, Lipschutz, Manges, Packer, Pilla, and Pulliam headed by Dr. Thomas F. Nealon, Jr. Members of the Class came from as far away as Oklahoma, Texas, Iowa, North Carolina, Ohio, New York, and California, as well as from Delaware, Pennsylvania, and New Jersey.

THOMAS F. NEALON, JR., M.D.
Our very successful 20th Class Reunion was held at the Marriott Motel, City Line Avenue, on June 10. Forty members of the Class and their wives attended this gala evening.

George Packer of Beverly Hills, California, won the bottle of champagne for having come the greatest distance. For the most widely traveled, Paul Cutler of Atlantic City, New Jersey, won the bottle of Dramamine. He had just returned from a medical mission for CARE-MEDICO to Kabul, Afghanistan. Enovid was given to Bill Mills of Bristol, Pennsylvania, for having the most children—nine. He was tied by John Kellerher of Toledo, Ohio, who was unable to attend. Jack Movelle of Red Bank, New Jersey, and Ray McCormack of Trenton, New Jersey, ran second with seven each. Stacy Rollins of Washington, D. C., won a “Nutcracker” since he was our only Neurosurgeon. Since Bill Rongaus of Donora, Pennsylvania, was the only member of the Class to appear in LIFE magazine, a recent issue was given to him. Bob Porterfield of Columbus, Ohio, was given a bottle of hair tonic for you know what. A song book went to Charles Suttles of Ashtabula, Ohio, for being our best organ player. Bernie Braveman of Pittsburgh, Pennsylvania, received a pair of glasses. He was our only Ophthalmologist. The “shoe horn” given Sam Kron was to assist him into the largest shoes in the Class. The cigars were won by Glen Tymeson for being the best politician. He is the Coroner in Lisle, New York. As a retiring Army Colonel, we gave Clarence Hewitt a penny bank for having the most security. He will shortly join the Cleveland Clinic as their Urologist.

The three members from the 50th State, Hawaii, sent their regrets of being unable to attend. They are Dick Moore, Jimmy Wong, and Lindy Chun.

A second cocktail party was held at the Sheraton Hotel the evening of the Alumni Dinner. Everything went well until Samuel S. Conly, Jr. (Sept. ’44) our Assistant Dean, discovered that we had cheese. From then on we had the largest party in the hotel.

ROBERT L. BRECKENRIDGE, M.D.
16th REUNION—CLASS OF 1948

Thirty-three classmates and friends attended the 16th Reunion of the Class of 1948 held May 29th through the 31st, at Hershey, Pennsylvania.

Arrivals began on the 28th when Charlie Steinmetz and children and Joseph Bartos and wife registered. Joe was so anxious to get to the reunion he arrived a day early as did Betty Mae and Jim Kessel. This was Jim's first trip out of the hills of West Virginia since graduation. The Kessel Clinic in Ripley, West Virginia, felt he finally should have a vacation. By Friday evening, Gene Hughes, Henry Liss, Robert McCoy, Jim Daly, Bill Annesley, John Rushton, Cliff Lull, and Norm Quinn arrived with wives. Both the Annesleys and Dalys brought along the children. Jim now has two lovely daughters who are excellent dancers, tennis players and all around good sports.

MOMENTS OF GLORY

On Saturday morning, John and Eve Atkinson arrived. John won one of the class golf trophies last year and waited till the last minute to arrive to enjoy his last moments of glory. At 12:00 noon Arnold's Army arrived at the beautiful Hershey Country Club and assembled on the first tee. After many hard luck stories, and a moment of silence for those who never played before, the first man teed off. This happened to be Gene Hughes who condescended to play in spite of his numerous ailments (consequently he was given a large handicap—6). Gene went 250 yards down the middle. Next was Charlie Steinmetz who likewise went down the middle, 300 yards. Of course, we couldn't find his ball in spite of the fact he had painted it red. The others followed to the right and left.

As the sun settled behind the Chocolate Factory, the last golfer staggered up the 18th fairway. Our losses exceeded 16 golf balls, several tempers, a few egos, but no classmates. Earl Moyer who was unanimously elected to run the tournament utilized the clubhouse adding machine and the rest was history. Since Earl was the scorekeeper he naturally had the best score (and he really did). Our next best golfer was Gene Hughes. Both Earl and Gene took home the class trophies for one year and in our more truthful moments we all admitted they were justly earned.

With the assistance of first aid and oxygen, those who were unable to walk were carried back to the Hotel.

At 6 p.m. we assembled for cocktails. John and Betty Rushton arrived from Cherry Hill, N.J., just in time to have Rusty put the golf losers in analysis. With this expert psychiatric consultant's assistance all the lost egos were restored. Dick Landis, Roy Deck, Charles Francos, and Ted Lancaster, and their lovely wives arrived from nearby Lancaster to add much fellowship. Wine and champagne improved an already excellent steak dinner. Many of the good times from Jefferson were reviewed and often improved with each telling. The Class congratulated itself on obtaining first place in the 1963 annual Alumni Giving Fund. Following dinner, a four-piece orchestra provided excellent music. With the able assistance of the wives (and daughters) most of the old dance steps, as well as a few new ones, were exercised by our numerous talented classmates.

Amid the roaring applause and other odd noises, the golf trophies were awarded. There were no speeches, but upon the unanimous approval of all classmates present, it was decided to have the 17th reunion at the Greenbriar in West Virginia. Jim Kessel graciously agreed to act as our nominal host. With the national reputation of excellence which this resort center holds, there is little doubt the occasion will be something for all of the Class of '48 to look forward to during the coming winter.

WITH THE AID OF ASPIRIN

On Sunday morning with the assistance of aspirin and bandaids, some returned to the field of battle. Others played tennis or just relaxed. Following lunch, the group checked out. As with our 15th reunion at Seaview Country Club and our 16th at Hershey, all classmates left with a sense of well being stimulated in part by good fellowship and a pleasant weekend.

The dates for the 17th reunion at the Greenbriar will be July 16, 17, 18, 1965. More details will follow. Please remember to mark down the dates now. Also make your reservation early—directly with the Reservation Department, Greenbriar, White Sulphur Springs, West Virginia.

NORMAN J. QUINN, JR., M.D.
15th REUNION—CLASS OF 1949
The Class of ’49 began its get-together by watching the Phillies split a twin-night double header with the Pittsburgh Pirates. Hosted by Dr. Harry Hurley, a small but stout group dug divots at the Overbrook Country Club on Wednesday. On Wednesday evening, a cocktail party and dinner dance was held on the lawn of the Belmont Mansion. On Thursday morning a still smaller but even more select group toured the historic mansions of Fairmount Park, guided by Mrs. Roy Newman. Festivities concluded Thursday evening with the annual Alumni Banquet at the Sheraton Hotel.

Gerald Marks, M.D.

10th REUNION—CLASS OF 1954
Members of the Class of 1954 had reunion activities consisting of a picnic and a dinner dance.

The picnic was held at the Kelly farm and 15 couples and numerous children enjoyed a massive onslaught on hot dogs, hamburgers, varieties of potato salad, baked beans, and various beverages. Pony and mule rides were available for the children.

Forty-two couples and three stags attended the dinner dance at the Sheraton Hotel on the following evening. In addition to the regular orchestra, a barbershop sextet with Jack Loughead at the piano created further entertainment.

Our Class composed the largest single bloc at the auxiliary dinner and at the Alumni banquet. I would have to say that Jack Loughead’s trumpet was the hit of the evening entertainment.

Our special thanks go to Julie Greenbaum, Sharon Kelly, and Peggy Patterson, wives of the co-chairmen, and to Barbara Borkowski, Marie Forte, Marian Goldschmidt, and Joyce White, all of whom worked unstintingly for the success of the affairs.

John R. Patterson, M.D.
5th REUNION—CLASS OF 1959

The Class of 1959 gathered at Cinelli's Country House in Merchantville, N.J., on the evening of June 10th for a dinner dance. Eighty-eight persons attended the affair. Prizes were awarded to those who traveled the farthest and to those who had recently passed their Board examinations. Nat Ching and Red Phillips made the arrangements for the affair, and Larry Mellon was elected Chairman of our next reunion.

SANDY A. FUREY, M.D.

ALUMNI PLACEMENT BUREAU

Positions Available

GENERAL PRACTITIONER is needed in a small West Virginia community of 2300 located about 45 miles from Pittsburgh, Pa. The practice is about 95% office work. The retiring physician has done no surgery for two years and no obstetrics for nine years. There is no other M.D., but there is one osteopath. Purchase of equipment at a fraction of its cost and an automobile is all that is necessary.

THE Northern Potter area of Pennsylvania is in need of a General Practitioner. Community is within twenty to forty miles of three excellent hospitals. The community has good schools and offers abundant fishing and hunting and is located 15 miles from a popular ski resort.

SMALL clinic and hospital group located in a residential suburb of Oakland, California, desires a well trained Internist.

OPPORTUNITY to develop excellent practice in Obstetrics and Gynecology in area of great need. Presently no practicing Obstetricians and Gynecologists available in town of 10,000 with new 82-bed general non-profit hospital serving area of 20,000.

PRACTICE and home of Jefferson Alumnus (Class of 1913), recently deceased, available in Shinglehouse, Pennsylvania. No other physician in the community.

GENERAL Practitioner wanted to associate with an older doctor in a well-managed, active practice in Summit, New Jersey. Everything is there with nothing to buy. Will introduce the right man as associate and arrange for satisfactory terms.

THE metropolitan area of Butte, Montana (population approximately 50,000) is desirous of obtaining another obstetrician-gynecologist. This is principally a mining and cattle center, with an unusually high payroll. For a Board qualified or eligible obstetrician-gynecologist the salary is $20,000 per year.

A GRADUATE of the Class of 1938 is looking for a physician to join his group as an employee for the first year and working his way into a partnership. This group in southeastern New York state is very much over-worked and is in great need of assistance.

THERE is an opening for a Director of Medical Education in Springfield, Ohio, for someone of associate professorship or assistant dean calibre who has definite organizational ability and teaching ability. The salary is $25,000 per year with another $1,000 for insurance and other benefits.

THERE is an opening for a full-time medical director for a county hospital for the indigent in Northampton County, Pennsylvania. The salary is $25,000 per year. The duties would be limited to the medical aspect and there is an administrative director. A young internist who is interested in geriatrics and with the intention of making this his career would be preferred.

JEFFERSON Alumnus, Class of 1951, seeks a recent graduate to assist him in general practice in an island community on the west coast of Florida. Florida license is required.

JEFFERSON Alumnus, Class of 1953, has an office and practice available near Allentown and Bethlehem, Pennsylvania. The office is fully equipped and includes a spacious second floor apartment.
1901
DR. RALPH C. WISE, 24 W. 4th St., Mansfield, Ohio, was honored recently in an editorial in the Mansfield News Journal. The editorial read in part: "Dr. Wise is truly one of the young at heart. We are pretty sure that when the York Rite Association honored him the other evening for 50 years of membership he wasn't wasting any time moping over the half century that had passed. He was probably thinking of all the wonderful things that have happened in that time—and about getting back to the office on Monday morning and taking care of his patients as he has done for 60 years!

"Keeping abreast of the latest developments in Ophthalmology and Otolaryngology is just one of the hobbies of Mansfield's longest-practicing eye, ear, nose and throat specialist.

"Dr. Wise has had many honors. Some of those who have eaten lunch with him for a number of years would like to add another. It just says: 'To one of the finest!'"

1906
DR. FRANCIS F. BORZELL, Box 2051, R.D. No. 2, Browns Mills, N.J., was honored at a testimonial dinner by the Browns Mills Methodist Church on April 30, in recognition of his contributions to the community and church since his retirement from active medical practice in Philadelphia. Dr. Borzell was cited for his service to the church expansion program, to the Browns Mills Library, to the recreation commission, and to the Browns Mills Improvement Association. Nearly 100 persons attended the dinner in Dr. Borzell's honor.

1908
DR. MARSHALL C. RUMBAUGH, 10 West Dorrance St., Kingston, Pa., acting in his capacity as Chairman of the Board of Trustees of the Dorrancetown Methodist Church was present at the consecration of the new church building on April 12th. He presented the new building to the Rt. Rev. Fred Pierce Corson, Bishop of the Philadelphia Area of the Methodist Church, who officiated at the consecration. Dr. Rumbaugh was also an active member of the building fund committee for the new church. Construction of the new church began in June 1963 and the cornerstone laying took place December 1, 1963. The completion of the new building marked more than 41 years of planning by members of the church.

1909
DR. EMMORY R. PARK, 107 Broad St., LaGrange, Ga., received a Doctor of Humanities honorary degree from LaGrange College at its 133rd commencement on June 1. Dr. Park's 47 years of service (1916-1963) to the college is the longest affiliation in its history. The grandson of Dr. John Park, second president of the institution from 1836 until 1842, he continues to practice medicine in LaGrange, his hometown. Dr. Park has been president of both the district medical society and the Troup County Medical Society, was the first doctor named to the Troup County Health Board, and in 1959 was cited by the Medical Society of Georgia for 50 years as a physician.

1914
DR. EDWARD L. BAUER, Alden Park Manor, Wissahickon Ave. and School House Lane, Philadelphia, Pa., was a guest of the Philadelphia Library Association at their 1964 Author's Tea. Dr. Bauer reports that at the May meeting of the College of Physicians and the County Medical Society he and the other Philadelphia men from the Class of 1914 were presented plaques commemorating their 50 years of service to the medical profession.

DR. GALEN D. CASTLEBURY, 217 E. 3rd St., Williamsport, Pa., was one of three guests of honor at a testimonial dinner given by the Lycoming County Medical Society on June 19, in honor of each of the three doctors' 50 years of service to the medical profession. State recognition was paid in the form of 50-year Awards from the Pennsylvania Medical Society. He is presently an Attending Physician to the nursing home of the Lycoming District of Pennsylvania.

DR. ROY DECK, 1519 Valley Road, Lancaster, Pa., was honored for serving the medical profession for 50 years by the Lancaster City and County Medical Association at a meeting on June 3. The Association presented him with a plaque which commemorated his half-century of service.

DR. CHARLES R. DENGLER, 131 West Michigan Ave., Jackson, Michigan, writes, "I have enjoyed forty-five years of practice in Pediatrics in Jackson. In 1949 I suffered a severe coronary and consequently my last fifteen years have been limited to office practice, but my life in medicine has been a most rewarding one."

DR. AMBROSE E. EDGERTON, 45 Broadmoor Drive, San Francisco, Calif., writes, "I retired from the active practice of Ophthalmology five years ago. I was made an Honorary Member of the San Francisco County Medical Society, given an emeritus membership in the American Ophthalmological Society, and given emeritus status at St. Luke's Hospital in San Francisco."
Dr. Paul F. Kerstetter, Seymour Ave., Scranton 5, Pa., veteran member of the Lackawanna County Medical Society, was honored on May 12th at the annual smoker and reception. A special plaque commemorating his 50 years of medical practice was presented Dr. Kerstetter by the President of the Society.

Dr. Isaac J. MacCollum, 24 S. Railroad Ave., Wyoming, Delaware, was recently featured in the Delaware State News. The article outlined the highlights of Dr. MacCollum’s fifty years of service to the medical profession. One of three children of a steamboat captain and his wife, Dr. MacCollum was born on August 18, 1889. “My father advised me not to go to sea; it was a bad life because you were away from your family so much,” the Doctor recalls. Living across the street from the MacCollums was Dr. John W. James, cousin of Mrs. MacCollum. As a boy, Dr. MacCollum often accompanied Dr. James on his rounds. “By association I learned to like medicine,” he says.

Dr. MacCollum graduated from West Chester State Teachers College after working summers in the fields. At that time Delaware had no teacher’s college, so the state paid the tuition for students to go out of state. In 1910, he entered Jefferson, graduating on June 6, 1914.

On March 27, 1914, he obtained his license to practice in Delaware and opened his office in 1916. During the interim between 1916 and 1930 he served as Secretary of the Kent County Medical Society, then President of the County society, and in 1930 became the President of the Delaware State Medical Society. During World War I, he served on the medical advisory board.

Despite the relentless hours Dr. MacCollum dedicated to medicine, he was seriously ill only once, in 1918 when he was reported in the Dover papers as being dead. He had been a victim of the Spanish flu epidemic which swept the area during that year. Dr. MacCollum tells how an old blind man met him on the street after he had recovered from the influenza and said, “I guess when you read in the paper you were dead, you knew it wasn’t true!”

The doctor went on to put in many years of service to his patients and community, and continues to. On his busy schedule were activities such as staff member of Milford Hospital, surgical staff at Kent General, and Lieutenant Governor in 1940. He served as President of the State Board of Health for four years, a member of the board of trustees at Delaware State Hospital for nine years and a member of the State Parole Board for 20 years, 16 of those as President. He is still active as Chairman of the local board of Baltimore Trust Co., Chairman of the advisory board of the Camden branch of the Wilmington Trust Co., and a trustee of Wesley College for a second term.

Dr. Elliott H. Metcalf, 50 Elm Street, Rockville, Conn., was recently featured in the Rockville Journal. Dr. Metcalf has always been a hunting and fishing enthusiast. As a young man he was Connecticut state champion in trap shooting. He went to a trap shoot in Ohio, and was about to start his round with a one-yard handicap, when another Rockville resident recognized him and said, “That’s Harry Metcalf, he’s the Connecticut champion.” Dr. Metcalf was immediately given a seven-yard handicap, still shot 93 out of 100 tries. Next best was 91, but he got the prize because Dr. Metcalf wasn’t a state resident and therefore couldn’t be champion.

His first operation occurred just after the trap shoot in Ohio. The next morning the surgeon in charge told him, “If you can shoot, you can operate,” and had him do his first appendectomy.

“I had about 15 minutes to think about it while I was scrubbing up,” Dr. Metcalf reminisces with a smile. “I was trying to remember which muscles I had to separate, how to cut, what to lay aside.”

Dr. Metcalf’s early medical experience included internship at Philadelphia General Hospital in 1915, then surgery with the American Ambulance Corps with the French Army in 1916, and service with the U.S. Army from 1916 to 1920. He returned to his native Rockville to set up surgery and general practice in 1920.

He and his brother have inherited their father’s 42 acres in Tolland, to which they retire periodically for hunting and fishing, and Dr. Metcalf also makes an annual trip to Maine to fish for salmon and lake trout. Last month, as he was fishing, a four-pound salmon arched into the air and landed in his boat. Did he keep it? “Yes, and we digested it too.”
1917

Dr. Henry L. Bockus, 250 S. 18th Street, Philadelphia 3, Pa., was quoted in the April 26th issue of the Philadelphia Bulletin Sunday magazine in connection with the CARE-MEDICO operation. Dr. Bockus is Chairman of the MEDICO Advisory Board. Dr. Bockus said, "Understand, we're doctors, not politicians. But it's gratifying to know that in practicing our profession in these distant lands, we are winning friends for our country and way of life." The article said that a small portion of diplomacy and a large portion of medical science is standard traveling gear for MEDICO doctors.

1918

Dr. David R. Brewer, Box 166, Clear Springs, Md., writes that his wife suffered a stroke last year and is slowly recuperating. Dr. Brewer is partially retired.

Dr. Joseph S. McDaniel, 225 South State Street, Dover, Delaware, retired recently as President of the State Board of Medical Examiners and Secretary-Treasurer of the Medical Council of Delaware after 41 years of service. On the occasion of his retirement the Medical Council of Delaware and the Delaware State Board of Medical Examiners presented Dr. McDaniel with the following letter.

"Dear Joe:

Goodbyes are hard to say and harder to put into writing. But instead of a long series of Whereas and ‘Be it Resolved...etc.’ we feel that a personal letter to you is much better. We think that you are unique in Delaware medical history for both the length of time you have served and for the high quality which you have injected into the functioning of this Board and Council.

None of us have been around long enough to have known you all those years, but the record of continuing reappointment speaks loud and clear that you have had the confidence and respect of the Medical Society of Delaware and the successive Governors who have appointed you. The generally high calibre of the doctors in Delaware speaks for the sagacity with which you have guided the Board during these years, selecting the best and weeding out those who were not up to the highest standards.

"We know that the work involved on this Board has not always been easy. Difficult decisions have been made; everyone could not always be pleased. Much of your time has been given with insufficient remuneration for the demands made upon you. But this in no way diminished the excellence with which you have carried out your duties on this Board. On the other hand, you have known almost everyone practicing medicine in the State of Delaware and have earned their admiration and respect. Those who know you best know that you are also a good sportsman, a fine shot, whether it be rabbit, quail, ducks or geese. And now that you are retiring from this Board, we shall miss your untiring and perceptive concern that only the best qualified physician is licensed in Delaware. We shall also miss your friendly smile and jokes and your company for dinner where just about everyone in Dover seemed to know ‘Dr. Joe’ and you knew them.

"No one of us stands a chance of matching your record of service on the State Board of Medical Examiners or on the Medical Council. We salute you upon achieving a rare record of service, generally unrecognized except by those who will have to take over the job you have so ably done these past forty-one years. As colleagues and successors we express our admiration and love for a wonderful association with a wonderful man—Joseph S. McDaniel, M.D.

"We shall miss you, Dr. Joe."

1919

Dr. William J. Jacoby, 32 West Ave., Mount Carmel, Pa., and Mrs. Jacoby write to Dr. Emanuel: "Thanks again for one of the most pleasant evenings. We shall always cherish the hard work you put into Jefferson's 1919 45th Reunion, and hope we can all be together again for the next one. We attended Bill's 50th high school reunion the following Saturday night. They are a wonderful group too; we had a ball at the Pottsville Club. Their plans are to meet every two years from now on."

Dr. D. Russell Perry, 311 N. C. National Bank Building, Durham, N.C., writes to Dr. Emanuel. "Mrs. Perry and I had such a wonderful trip! I can hardly talk about anything else since getting back to Durham, telling our friends what a wonderful time we had with our friends, Dr. and Mrs. Mike Emanuel. You were just wonderful! To make things even better was the delight we had in seeing the gang. I'll tell you this, we are already beginning to make plans for 1969. Personally Mrs. Perry likes Philadelphia so well and had such a good time I hardly see how we can wait five years to return."

Dr. Max L. Durfee, Director of the Health Service, Oberlin College, presents the award to Dr. Palchanis as Mrs. Palchanis watches.
1921

DR. FRANK H. KRUSEN, Temple University School of Medicine, 3401 North Broad Street, Philadelphia 40, Pa., was recently appointed Chairman of the Committee for the Handicapped of America's People-to-People Program. Dr. Krusen, who is often referred to as "the father of physical medicine" is Professor and Coordinator of Physical Medicine and Rehabilitation at Temple.

1923

DR. LOUIS ANTUPIT, 242 Trumbull St., Hartford, Conn., writes that he just returned from a trip to Israel, Turkey, and Greece. Dr. Antupit reports that the trip was very exciting, both interesting and rewarding.

DR. JOHN M. BREWSTER, 311 Hilldale Road, Villanova, Pa., retired April 30th as Medical Director of the Pennsylvania Railroad. He joined the Pennsylvania Railroad in 1953 following a distinguished career in the Navy. With the railroad he served as medical officer at Philadelphia, and regional medical officer at Pittsburgh and at Philadelphia, prior to his appointment as medical director in 1961.

DR. WILLIAM C. WILENTZ, 188 Market St., Perth Amboy, N.J., has served for more than 30 years as Middlesex County's Chief Medical Examiner. Dr. Wilentz has won national acclaim for his continuing study of the alcohol factor in violent deaths, a study which he began in 1933. The year in which he first was appointed County Medical Examiner. Of the 4,233 autopsies he performed during a 30-year span, alcohol was a factor in 1,246 of the cases—519 had been under the influence of alcohol when they died and 727 had been drinking. Sixty per cent of these deaths had less than 0.15 per cent of alcohol in the brain, spinal fluid, blood or liver (0.15 is the amount of alcoholic blood content at which one is legally presumed to be under the influence).

Through Dr. Wilentz' efforts, New Jersey took the lead in showing the direct relationship between drinking and auto deaths. And in recognition for his work in reducing deaths and injuries on the highways, Dr. Wilentz was presented the Auto Safety Honor Certificate for 1961-62.

1924

DR. HENRY ANDREW BRODKIN, 365 Osborne Terrace, Newark 12, N.J., reports that he conducted a group of doctors behind the iron curtain through Czechoslovakia, Hungary, Romania, Central Asia, Samarkand, Tashkent, Kiev, Tbilisi, Moscow, and Leningrad. He also attended the 18th World Assembly of World Medical Associations at Helsinki June 15-19. Following the meeting he toured through Scandinavia, returning home the early part of July.

DR. EDWARD T. STREKER, 903A Broad St., Providence, R.I., writes, "I have been keeping moderately busy and enjoying good health. In my spare time, the Mrs. and I enjoy visiting our fourteen grandchildren, all of whom live in the general vicinity."

1926

DR. GEORGE C. GRIFFITH, 1136 W. 6th St., Los Angeles, Calif., delivered the address at the 75th anniversary commencement of Meyersdale Joint High School on May 26th in Meyersdale, Calif. Dr. Griffith spoke on "The Role of the Physician in Today's World" before the largest graduating class in the school's history.

1927

DR. FRANK L. BRYANT, The Willis-Knighton Clinic, 2748 Virginia Ave., Shreveport, La., presented a paper on socialized medicine at the 26th Annual Meeting of the Louisiana-Mississippi Ophthalmological and Otolaryngological Society at the Edgewater Gulf Hotel, Edgewater, Mississippi, on April 17th. Dr. Bryant is President of the Society.

1928

DR. JOSEPH ESCHBACH, 935 South Military, Dearborn, Michigan, writes, "Young Joe (Jeff '59) finished his residency last July and is back in Seattle on a two year fellowship. He is working with the artificial kidney machine and doing cross circulation of blood on patients prior to implantation of kidneys. He is quite immersed in the project."

1929

DR. JOHN M. ADAMS, Memorial Hospital, Winchester, Virginia, has succeeded DR. JOSEPH S. MCDANIEL (Jeff '18) as President of the Delaware State Board of Medical Examiners and Secretary of the Medical Council of Delaware. Dr. Gehret is the first Delaware physician to have the honor of being elected President of the Federation of State Medical Boards of the United States.

DR. ANDREW M. GEHRET, 1007 Park Place, Wilmington, Delaware, has succeeded DR. JOSEPH S. MCDANIEL (Jeff '18) as President of the Delaware State Board of Medical Examiners and Secretary of the Medical Council of Delaware. Dr. Gehret is the first Delaware physician to have the honor of being elected President of the Federation of State Medical Boards of the United States.
Dr. Edward B. Le Winn, Apt. 506 Wyncote House, Township Line and Washington Lane, Wyncote, Pa., has been appointed a special physician for former Ambassador Joseph P. Kennedy, Sr. Dr. Le Winn who is Director of the Institute for the Achievement of Human Potential was engaged to explore the possibility that treatment employing the institute's methods might help the elder Kennedy.

1930

Dr. Francis J. Braceland, The Institute of Living, 200 Retreat Ave., Hartford, Conn., delivered the commencement address at the University of Hartford graduation exercises on June 7, and received a Doctor of Letters degree from the University. Dr. Braceland, who is Psychiatrist-in-Chief at the Institute, holds honorary degrees from La Salle College, Canisius College, Manhattan College, College of the Holy Cross at Worcester, Mass., the Catholic University of America, Northwestern University, Trinity College, and Fairfield University.

1931

Dr. John N. Borbonus, Lago Oil and Transportation Co., Aruba, Netherlands West Indies, who has served for 20 years as an Obstetrician and Gynecologist at Standard Oil Co.'s Hospital in Aruba, was recently introduced as a sculptor at the Newman Contemporary Art Gallery in Philadelphia.

Whittling for a pastime while a Lt. Col. in the Army Medical Corps during World War II, Dr. Borbonus became fascinated by woods and taught himself to carve. He concentrated on the female form, "because that's what I know most about." That knowledge in one field can be applied to another, according to The Sunday Bulletin, is demonstrated in his deft shaping of the human figure from rough-hewn peasant types to the polished smoothness of sophisticated bathers. And there was only one male in his exhibition—an angel.

Dr. Joseph L. Farace, Bangor, Pa., and Mrs. Farace celebrated their 25th wedding anniversary on June 17.

Dr. John F. Giering, 84 James St., Kingston, Pa., was elected Treasurer of the Pennsylvania Society of Internal Medicine at the Society's annual meeting on May 16-17, 1964, in Hershey, Pa. Dr. Giering is also a member of the Society's Executive Council.

Dr. George W. Paschal, Jr., Medical Arts Building, 1110 Wake Forest Road, Raleigh, North Carolina, was chosen President-elect of The Medical Society of the State of North Carolina at its annual meeting in May.

Dr. Paul A. Sica, 450 Washington Rd., Mt. Lebanon, Pittsburgh, Pa., has been elected President of the Pittsburgh Academy of Medicine. Dr. Sica is senior attending physician at St. Francis General Hospital and St. Clair Memorial Hospital. He is also a visiting physician at Woodville State Hospital and a Fellow of the American College of Chest Physicians and the American College of Cardiology.

1932

Dr. David Gelfand, 1722 Pine St., Philadelphia 3, Pa., has been appointed a member of the Committee on Rehabilitation of the A.M.A. The Committee is concerned with the coordination of the A.M.A.'s interest in rehabilitation and with the dissemination of information to physicians on various aspects of rehabilitation.

1933

Dr. Edmund V. Matys, 215 Chestnut Street, Dupont, Pa., has been elected President of the Pittston Hospital Staff.

1934

Dr. Louis K. Collins, Glassboro, N.J., has been elected second Vice-President of The Medical Society of New Jersey. He presently serves on the staff of the Elmer Community Hospital and the Memorial Hospital in Woodbury.

Dr. Roscoe P. Kandle, 92 Wilburtha Rd., Trenton 8, N.J., New Jersey State Commissioner of Health, was principal speaker at the annual meeting of the Union County Tuberculosis and Health League on May 7 in Plainfield, N.J. Dr. Kandle spoke on "TB Control in Union County, and Guidelines for the Future." On May 14th he spoke on "No Truce for Tuberculosis" at the annual luncheon meeting of the Middlesex County Tuberculosis and Health League.

Dr. Irwin W. McConnell, 2532 Scottwood St., Toledo 10, Ohio, reports that he is now devoting all his time to Anesthesiology and is currently the Anesthetist for a group of three neurosurgeons in Toledo. Dr. McConnell's first grandson was born April 7, 1963.

Dr. Harry Stewart, Jr., 2320 Bath St, Suite 201, Santa Barbara, Calif., has been elected President of the Santa Barbara County Medical Association.

1935

Dr. J. Douglas Corwin, 20 S. Heraton Dr., Washington, Pa., writes that his son, Douglas, joined him in the practice of Orthopedics in July.

1936

Dr. David O. Helms, 419 Main St., Hellertown, Pa., reporting on his children says, "Vida is married, living in Bethesda, working for a Doctorate in Biochemistry and Microbiology; Pete is in his fourth year of a five year Electrical Engineering course at Rochester Institute of Technology; and Joe is in his second year at Johns Hopkins undergraduate where his main interests are biochemistry and the saxophone."

1937

Dr. William Tyler Douglass, Jr., 1926 Market St., Harrisburg, Pa., spoke on "Questions About Cancer: Answered and Unanswered" during the annual meeting of the Dauphin County Unit of the American Cancer Society on June 16.

Dr. Thomas W. Howell, 837 Tactical Hospital, Shaw A.F.B., South Carolina, recently was in the field with U.S. Air Force Tactical Air Command (TAC) units engaged in Exercise Desert Strike conducted by the U.S. Strike Command. The realistic combat operation was the largest joint air-ground training maneuver in the southwest since World War II. Colonel Howell, a surgeon, and other members of TAC's jet fighter, reconnaissance, air assault and support units provided firepower and other tactical air support for the U.S. Army battlefield troops participating.

Dr. Peter Iannuzzi, 445 Portage Road, Niagara Falls, N.Y., was received as an "affiliate" of the Congregation of the Mission (Vincentian Fathers) at Niagara University's 107th commencement on June 7. The distinction, one of the highest honors the Vincentian Fathers
may bestow upon one not a member of the Vincentian community, was given in recognition of the generosity characteristic of the services Dr. Iannuzzi has given the congregation and the university through the years. Dr. Iannuzzi is a Niagara University graduate and holds an honorary degree from the University. He is a member of the advisory board to the board of trustees and is serving as co-chairman of the professional committee of the University’s development fund campaign.

1938
Dr. Jerome Chamovitz, 17 Beaver Rd., Sewickley, Pa., was elected President-elect of the Pennsylvania Society of Internal Medicine at the Society’s annual meeting on May 16-17, 1964, in Hershey, Pa. Dr. Chamovitz is also a member of the Society’s Executive Council.

Dr. Edward J. Coverdale, 5417 Cedar Ave., Philadelphia 43, Pa., President of the La Salle College Alumni Medical Society, was honored by the college’s Sigma Phi Lambda alumni fraternity recently at a dinner at the Philopatrian Club, Philadelphia. He was presented with a plaque commemorating his contributions to La Salle College and the fraternity over the last 30 years.

Dr. Harrison F. English, III, 218 Parkside Ave., Trenton 8, N.J., has been elected President of the Trenton Civilian Club for 1964-65. Dr. English has also been elected President for 1964-65 of the Central New Jersey Chapter of the New Jersey District Branch of the American Psychiatric Association.

Dr. Isadore Gershman, 161 Waterman Street, Providence, R.I., has been elected President of the Medical Staff of Charles V. Chapin Hospital, Providence.

Dr. Albert J. Kaplan, Park-Towne Place, South, Philadelphia 30, Pa., is serving on the staff of Hahmemann Medical College as an Assistant Clinical Professor.

Dr. Louis S. Kaplan, 2102 Delancey Place, Philadelphia 3, Pa., is presently Clinical Professor of Psychiatry at Woman’s Medical College of Pennsylvania.

1939
Dr. Arnold V. Arms, 4320 Wornall Road, Kansas City 11, Mo., reports that he is in Internal Medicine in Kansas City. He attended the June reunion together with his son Richard, 23, who had just completed his Sophomore year in Medicine at Kansas University.

Dr. Vernon W. H. Campbell, Pinehaven Hospital, Charleston, N.C., was recently named Medical and Operational Administrator of the Hospital. His duties consist of supervising the million-dollar-a-year aid program for the medically indigent.

Dr. Henry A. Shenkin, Episcopal Hospital, Front St. and Lehigh Ave., Philadelphia 25, Pa., presented a paper before The Academy of Neurology in Denver, Colorado, on April 23. The paper described a test which enables the physician to differentiate between actual pain and pain that is feigned or psychoneurotic.

1940
Dr. George F. Lull, Jr., Noble Army Hospital, Fort McClellan, Ala., writes to Class Agent Dr. Mervine, "Young George is married and completed his last year at Texas Western College in June. Robert, the younger boy, will enter his senior year at Trinity University in San Antonio this fall. Neither wanted to study medicine, and I expect that both will end up in the Army via ROTC. I took command of this hospital in August 1963. My predecessor, whom I never met except on the phone, was also a Jeff graduate. I find the change in duties interesting."

Dr. Thomas B. Mervine, 1120 Wyndwood Road, Haddonfield, N.J., has been elected President of Laurel Oak Country Club for the 1964 golf season. Dr. Mervine’s golf credits include two annual championships in the Doctors’ Golf Association of Philadelphia.

1941
Dr. J. A. Collins, Jr., Department of Medicine, Geisinger Medical Center, Danville, Pa., was principal speaker dur-
1943

Dr. Clifford G. Byrum, 1221 Dixie Trail, Raleigh, N.C., is Board certified in Obstetrics and Gynecology and is practicing that specialty in Raleigh at Rex Hospital and Wake Memorial Hospital. Dr. and Mrs. Byrum have four children—Virginia, 16, Jeanette, 13, Cheryl, 7, and Clifford, Jr., 1.

Dr. Gerald Cessna, 510 Century Bldg., Pittsburgh 22, Pa., was guest speaker at the fourth annual Alumni-Senior Day Social held April 26 at Saint Francis College, Loretto.

Dr. James Kidney, Veterans Administration Hospital, Fort Lyon, Colorado, is presently serving at the hospital as a staff physician.

J'44

Dr. Paul Cutler, 39 S. Tallahassee Ave., Atlantic City, N.J., is currently serving as an Internist in Afghanistan under the auspices of the CARE-MEDICO operation.

Dr. Irvin M. Gerson, 1561 E. Tulpehocken St., Philadelphia 38, Pa., is very proud of his son, David. David, a student at Cheltenham High School, won the top boy award in the senior high category of the Montgomery County Science Fair. David was awarded $100 to be used for further study or purchase of scientific equipment and, in addition, his exhibit will be entered in the Delaware Valley Science Fair, co-sponsored by Franklin Institute and The Inquirer.

Dr. Clarence B. Hewitt, Cleveland Clinic, Cleveland, Ohio, retired from active military duty on July 1. Prior to his retirement Dr. Hewitt, a Colonel, was presented with the Legion of Honor on June 9, by General Henry S. Murphey, Commanding General, Walter Reed General Hospital, on behalf of the President of the United States. The citation which accompanied the award read: "Colonel Clarence B. Hewitt distinguished himself by exceptionally meritorious service while serving in positions of responsibility from September 1952 to June 1964. During this period, Colonel Hewitt served consecutively as Chief of Urology Service and as Assistant Chief, Department of Surgery, Madison Army Hospital, Tacoma, Washington; Chief of the Urology Section, Gorgas Hospital, United States Element, Canal Zone Government, Balboa Heights, Canal Zone; and as Chief of Urology Service, Walter Reed General Hospital, Walter Reed Army Medical Center, Washington, D.C. Colonel Hewitt's inspiring leadership, professional skill, and thorough knowledge of his specialty were evidenced by the smooth and orderly operation and continuous improvement of all activities within the areas of his responsibility. Through his personal example and dedication to his chosen profession, he inspired the maximum cooperation of his subordinates which insured the highest standards of medical and surgical care for military personnel and their departments. His administrative excellence, keen foresight, and positive approach to problems were reflected in an outstanding residency program which he directed at Walter Reed Army Medical Center and in distinct progress in clinical and research activities of major importance to human welfare and health. By his diligent efforts, professional acumen, and devotion to duty, he contributed materially to the attainment of significant medical objectives, enhanced the prestige and stature of the Army Medical Service, and earned the high regard of all associated with him. Colonel Hewitt's distinguished performance of duty throughout this period represents outstanding achievement in the most cherished traditions of the United States Army and reflects the utmost credit upon himself, the Army Medical Service, and the military establishment.

Dr. William L. Mills, 12000 Knights Road, Philadelphia, Pa. 19154, is Director of the Department of Radiology at Lower Bucks County Hospital. Dr. Mills, who has nine children, lists his hobbies as golf, painting, gardening, hiking, paying taxes, and swimming.

1944 S

Dr. Edward Feeley, 147 Hillside Ave., Succasunna, N.J., has been named Post Surgeon and Medical Director of Picatinny Arsenal.

Dr. Walter G. Fortnum, 5900 Taft Ave., Cornwells Heights, Pa., reports that he is now devoting full time to Industrial Medicine and disability evaluation in New Jersey. Dr. Fortnum's hobbies include gun collecting, hunting, and fishing.
Dr. Paul H. Wannemacher, 87 Valley Way, West Orange, N.J., has been appointed Senior Attending in the Obstetrics Department at Montclair Community Hospital and is listed in the 1964 issue of Who's Who in the East.

1945
Dr. Leonard Apt, U.C.L.A. Medical Center, Los Angeles, Calif., is Editor of a new book entitled Diagnostic Procedures in Pediatric Ophthalmology, published by Little, Brown, and Co.

Dr. Earl E. Brant, 11 Overbrook Terrace, Larchmont, N.Y., has been appointed Director of Radiology at Lenox Hill Hospital, New York.

Dr. H. Blake Hayman, 2 Silverbell Road, Levittown, Pa., received an honorary Doctor of Laws degree at LaSalle College's 101st commencement exercises on June 9th. Dr. Hayman graduated from LaSalle in 1941 with cum laude honors. Dr. Hayman is affiliated with Lower Bucks County Hospital, Mercer Hospital in Trenton, and Rancocas Valley General Hospital, where he established and was first chairman of the Department of Obstetrics and Gynecology in 1961.

1946
Dr. Charles C. Barringer, Duke Hospital, Dept. of Pathology, Durham, N.C., writes, "I began my Pathology residency at Duke Medical Center and the Durham V.A. Hospital in January 1963. By the time I finish this and my obligated time to the V.A., I will have more than 20 years of federal service, and probably then will remain with the V.A. I am very happy to see Jefferson's magnificent plans for the expansion of facilities."

Dr. Paul B. Heuston, 552 Shoup Avenue West, Twin Falls, Idaho, writes to Class Agent Dr. Mackell, "I have been exceedingly happy in somewhat of a 'general practice' of Radiology here in Twin Falls. It is a lovely community and my family and I are happy in our surroundings. I am about to complete my year as President of the Idaho State Medical Association which has been an interesting experience but consumes a lot of time, in addition to fulfilling the demands of a busy practice."

Dr. Richard T. Shugart, 4 Dinwood Ave., Columbia, S.C., is on the staff of the U.S. Veterans Hospital in Columbia, having left the Air Force in 1961. Dr. Shugart reports a recent promotion to Senior Grade.

1947
Dr. Robert H. Baker, 428 S. Main St., Greenville, Pa., is serving as an Orthopedist in Algeria under the auspices of the CARE-MEDICO operation.

Dr. William H. Gross, 562 W. Liberty St., Hubbard, Ohio, writes, "I have been practicing here in Hubbard with my father (Jeff '19) since 1947. We're now in the process of building a new office. "We have five children and it's unlikely that we'll catch up with Jack Rodgers."

1948
Dr. Robert L. Gatski, Superintendent, Danville State Hospital, Danville, Pa., was paid tribute in the June 8th issue of the Philadelphia Inquirer in an article by science writer Gary Brooten. The article, the second installment of a five-article series on mental health, described Dr. Gatski as "a rare symbol of a rare individual—one who will devote hard work and high talent to helping the mentally ill where help is most needed, in America's crowded State hospitals."

Dr. Robert C. Laning, Comdr., M.C., USN Hospital, Portsmouth, N.H., writes, "I am now Executive Officer and Chief of Surgery of this 110-bed active Naval hospital up in New England. Alec and I are enjoying our tour here, but are quite busy."

Dr. Ralph Lev, 562 Prospect Ave., Princeton, N.J., was among the speakers participating in the R. D. Institute for Industrial Management at the Brunswick Inn, East Brunswick, N.J., on April 9. Dr. Lev discussed "Introduction to the Respiratory Disease Problem."

1949
Dr. Mortimer T. Nelson, 59 Pine-wood, Levittown, Pa., spoke before the Newtown Junior New Century Club on April 14th. Dr. Nelson's topic was "How to Tell Your Children About Sex."

Dr. Henry M. Perry, 706 North Davis St., Bloomfield, Iowa, and Mrs. Perry have built a new home which they moved into on May 1. Dr. Perry writes that he met Tom Piekenbrock in Dubuque, Iowa, during October 1963.

1951
Dr. Richard DeB. Berretolette, 1003 Penn Avenue, Wyomissing, Pa., announces the association of Dr. Farrell R. Crouse (Jeff '58) in the practice of Psychiatry.

Dr. Calbert T. Seeber, University Hospital, University of Maryland, Redwood and Greene Sts., Baltimore 1, Maryland, has been promoted to the rank of Assistant Professor of Anesthesiology of the Medical College of the University of Maryland.

1952
Dr. Robert W. Counts, 302 Walnut St., Rochester, Michigan, was recently appointed to the associate staff of the Almont Community Hospital in Almont, Michigan.

Dr. Raymond L. Cunneff, Jr., 76 Branch Ave., Red Bank, N.J., was made a Fellow of the American Academy of Orthopaedic Surgeons in 1962 and a Fellow of the American College of Surgeons in 1963. Dr. Cunneff is presently an Associate Attending at Riverview Hospital, Red Bank and Monmouth Medical Center, Long Branch, N.J.

Dr. Kenneth Dollinger, 17 Bear Brook Lane, Livingston, N.J., has announced his candidacy for town councilman this November on the Democratic ticket.

Dr. Michael I. Dooley, Diamond Rock Hill, Malvern, Pa., writes, "I received a unique honor recently. The
combined clubs of Kiwanis, Rotary, Lions, etc., presented Dr. Vince Giacci (Jeff '42) and myself with a plaque and a testimonial dinner for our "outstanding contributions to Phoenixville in the past year with the anti-polio drive."

Dr. Robert C. Eyerly, Geisinger Memorial Hospital, Danville, Pa., presented at an educational program sponsored by the Northumberland County Unit of the American Cancer Society on May 8 at the Victoria Theatre in Shamokin, Pa. The program included the first showing of a film entitled "The Million Club." The film focuses upon seven people, all of whom have survived cancer for five years. It was made in Hollywood and includes a distinguished cast. Dr. Eyerly was present to speak and answer questions about cancer.

Dr. Leo C. Fartyka, 807th Medical Group, March AFB, California, recently graduated from the U.S. Air Force School of Aerospace Medicine at Brooks AFB, Texas. The primary course included nine weeks of advanced study in aerospace medicine.

1953

Dr. Charles V. R. Dauerty, Box 288 Central Square, N.Y., has been named an Assistant Professor of Anesthesiology at Syracuse University Upstate Center. His appointment became effective July 1.

Dr. John Levinson, 1708 Talley Road, Forest Hills Park, Wilmington 3, Delaware, spoke at a meeting of the Atlantic City Branch of the American Association of University Women on May 4. Dr. Levinson, who recently returned from Saigon, spoke on the South Viet Nam situation.

Dr. Frederick S. Wilson, 1338 Jericho Road, Abington, Pa., has been appointed Assistant Director of Clinical Investigation in the medical division of McNeil Laboratories, Fort Washington, Pa.

1954

Dr. Harold J. Byron, Wyndotte House, Washington Lane and Township Lane, Wyndotte, Pa., spoke on "Psychiatric Problems in the Community" before a meeting of the Holy Name Society of St. Francis of Assisi on June 14.

Dr. Thaddeus Frycznski, 502 E. 12th Street, Erie, Pa., spoke on the past, present, and future of the artificial kidney at the May meeting of the Erie County Pharmaceutical Society on May 28. Dr. Frycznski is consultant in medicine to the Hemo-dialysis Unit at Hamot and St. Vincent Hospitals.

Dr. Paul Dalton Griesmer, 7 Hedge Place, Kingston, Pa., has been appointed a lifelong Fellow of the American College of Obstetrics and Gynecology.

Dr. Warren W. Nichols, Kay Drive, Haddonfield, N.J., was unable to attend the Class Reunion in June, because he was in Sweden doing research. He left June 2, and plans to return in September. Dr. Nichols is doing full time research in cytogenetics, especially concerning virus chromosome relationships, and is working with Professor Albert Levan while in Sweden.

1955

Dr. Burton S. Benovitz, 272 Pierce St., Kingston, Pa., was recently board certified in Obstetrics and Gynecology.

Dr. Theodore G. Duncan, Pennsylvania Hospital, 330 S. Ninth St., Philadelphia, Pa., and Dr. Guy L. Schless announce the establishment of a partnership with Dr. Garfield G. Duncan for the practice of Internal Medicine at the Pennsylvania Hospital. Both Drs. Duncan and Schless are Associates in Medicine at the University of Pennsylvania School of Medicine.

Dr. Charles W. Georges, Jr., 2524 W. Diamond St., Philadelphia 21, Pa., was recently appointed Assistant Professor of Community Medicine at Temple University School of Medicine. The purpose of the newly-developed Department of Community Medicine is to define the health needs of an urban community through the study and analysis of illness and present health care patterns within the broad community of North Philadelphia. Dr. Georges has been a public health physician with the Philadelphia Department of Health in its Community Health Services Division since 1958. He has also served as Coordinator of Clinical Activities conducted by the City of Philadelphia in cooperation with Fife-Mamill Memorial Health Center and the Henry Phipps Institute.

Dr. Joseph Miller, 2801 Ti nghman St., Allentown, Pa., has been approved as a diplomate of the American Board of Obstetrics and Gynecology.

Dr. H. William Porterfield, 2090 Sheringham Road, Columbus 21, Ohio, won a gold medal for his exhibit, "Palate Problems Producing Cleft Palate-like Speech," which he presented at the 1964 annual meeting of the Ohio State Medical Association held April 26 through May 1, in Columbus, Ohio.

Dr. Thomas H. Voshell, 4504 Morgan Lane, Trent Woods, New Berr, N.C., sends news via his wife Evelyn, who writes, "Tom is still in the Mediterranean on the Aircraft Carrier Shangri-La. I have just returned from over there, having spent nearly four months with him at the various ports where the ship anchored."

1956

Dr. Eugene F. Bonacci, Monarch Lane, Vineland, N.J., recently entered partnership with another doctor in Vineland for the practice of Surgery.

Dr. Robert N. Cottone, 1515 Lawrenceville Rd., Trenton, N.J., recently completed residency training in Urology at Jefferson under Dr. Theodore R. Fetter. Dr. Cottone has been certified as a diplomate of the American Board of Urology. He is a member of the staff of St. Francis Hospital in Trenton, N.J.

Dr. Brian S. Harrold, USAF Hospital, Scott AFB, Ill., was recently graduated from the U.S. Air Force School of Aerospace Medicine's primary course at Brooks AFB, Texas.

Dr. Anthony F. Merlino, Jr., 55-13 Revere Rd., Drexel Hill, Pa., is engaged in the practice of Orthopaedic Surgery.
in Upper Darby, Pa., in association with Dr. William B. McNamee, Class of '50. Dr. Merlino is a member of the active medical staffs of Fitzgerald Mercy Hospital, Misericordia Hospital, and Riddle Memorial Hospital.

1957

Dr. Louis R. Baker, University Hospital, University of Maryland, Redwood and Greene Sts., Baltimore 1, Maryland, became a diplomate of the American Board of Anesthesiology, Inc., on April 24, and was promoted to the rank of Assistant Professor of Anesthesiology of the Medical School of the University of Maryland on July 1. His wife, Becky, who is completing an internship in Pediatrics at the Sinai Hospital of Baltimore will begin a residency in Anesthesiology at the University Hospital.

Dr. T. Clark Corson, R. D. #1, Catawissa, Pa., recently joined another doctor as a partner in the practice of Obstetrics and Gynecology. Their offices will be maintained at East Fifth Street in Bloomsburg, Pa.

Dr. Grafton F. Seiber, U.S.A. Hospital, Ft. Huachuca, Arizona, recently finished his Orthopaedic Residency and is now in the service stationed in Arizona.

1958

Dr. George F. Hewson, Jr., 10 Birchwood Drive, Short Hills, N. J., recently opened an office at 85 Woodland Rd., Short Hills, for the practice of Orthopaedic Surgery.

Dr. George E. Hudock, Berwick Hospital, Department of Pathology, Berwick, Pa., delivered the commencement address at the annual commencement exercises at Edwardsville High School on June 11. Dr. Hudock was recently notified of his certification by the American Board of Pathology. He is director of laboratories at the Bloomsburg and Berwick Hospitals and is an attending staff pathologist at the Veterans Hospital in Wilkes-Barre.

Dr. Thomas McGarvey, 2730 Clayton St., Philadelphia 15, Pa., spoke on "Cardiac Auscultation in Valvular Heart Disease" at a symposium for physicians sponsored by the Lackawanna County Heart Association on April 22 in Scranton.

Dr. V. Michael Vaccaro, 5336 N. Broad St., Philadelphia 7, Pa., writes to Class Agent Dr. Craig, "As you probably know, I completed my Residency in Psychiatry at Einstein Medical Center in 1962 and since then I've been practicing at the above address. I'm presently on the staff at Einstein, which has a Psychiatric In-Patient Unit, and Philadelphia Psychiatric Unit."

1959

Dr. Edward Baranski, Annie M. Warner Hospital, Gettysburg, Pa., joined the Surgical Staff there on July 1.

Dr. Douglas Corwin, 549 Franklin Farms Rd., Washington, Pa., reports that he is finishing up his Orthopedic residency and getting ready to start practice.

Dr. David M. Harnish, 111 Elfreth Alley, Philadelphia, Pa., is currently serving his final year of surgical residency at Veterans Hospital in West Philadelphia.

Dr. Francis J. Kazmier, Mayo Clinic, Rochester, Minn., has been appointed a Consultant in Internal Medicine at the Mayo Clinic. Dr. Kazmier became a Mayo Foundation fellow in internal medicine in July 1960 and has been an assistant to the staff since July 1963.

Dr. Milton L. Kolchins, 86th Tactical Hospital, USAFE APO #12, New York, N.Y., in writing to Class Agent Dr. Furey in May said, "Bill Sherwood has been assigned to an Army hospital only a short distance from my base and on the evening of the reunion, we'll be celebrating and thinking about you all here in Germany. I'll be stationed here another year and then return to the real world."

Dr. Edwin M. Marcus, 2050 N. Rodney Drive, Los Angeles, Calif., writes, "Finishing this year in GU. Expect to stay on c Permanente. Tom Morrow has started his Ortho. residency at the V.A."

Dr. David Meckler, Children's Medical Group, Akron, Ohio, completed his two-year tour of duty with the Air Force on August 5. He served as Base Pathologist at Bunker Hill Air Force Base in Peru, Indiana. He served his internship and residency in Akron previous to entering the service. Dr. and Mrs. Meckler and their children, Robbie, 4, and Keith, 2, are happy to be back to civilian life.

Dr. Alan J. Snyder, 705 Valley Road, Melrose Park, Philadelphia 26, Pa., completed his residency training in Urology at Jefferson Hospital in June. He plans to practice in the Philadelphia area.

Dr. Alfred C. Speirs, Dept. of Surgery, Henry Ford Hospital, Detroit, Michigan, writes, "I am enthusiastically involved in my Plastic Surgery Residency here at Henry Ford Hospital. It is a large and tremendously varied program and also includes an outstanding hand service. Carol and our three kids are happy here and I will probably stay on the staff after completing my training next year."

1960

Dr. Gene R. Adams, Boston City Hospital, Pediatric Dept., 818 Harrison Ave., Boston, Mass., in writing to Class Agent Dr. Lemmon in May said, "At present I am what the military calls
'phigo'. Meaning, I am in the last few working days of my tour at USAF Hospital, Wiesbaden, Germany. It has been an enjoyable and interesting three years for me working in the Pediatric Department. We have managed to go broke 'saving money on buys' and in touring Europe. Since graduation my harem has increased. It now consists of Karen, 5, Kimberly, 3, Kathleen, 1, and of course, my wife Fran.'

DR. DAVID BLECKER, Harrisburg Polyclinic Hospital, Harrisburg, Pa., writes, "After spending two years in the Army in Germany I returned to Harrisburg for a Pediatric Residency. I began my second year of residency in July. My family now includes a son, three-year-old Ronald, and a daughter, six-month-old Sheryl Joy."

DR. MARVIN E. JAFFE, 97th General Hospital, APO 757, New York, N.Y., writes, "I complete my military service in September and will begin a residency in Neurology at Jefferson beginning October 1. I need hardly mention that I look forward to this with ill concealed anticipation. Although my European tour with the Army has been broadening both culturally and professionally, I can hardly wait to get back."

DR. ARCH F. MEREDITH, JR., Letterman 7505 U.S.A.F. Hosp., APO 232, N.Y., N.Y., finished his Residency in Ophthalmology this month and is leaving soon for Burderop Park, England, where he will be stationed for three years with the U.S. Air Force. He writes that he has enjoyed being in San Francisco for the past four years.

DR. CHARLES J. MOROSINI, JR., Roosevelt Hospital, New York, N.Y., recently finished a two-year tour of duty with the U.S. Navy. In July he resumed his residency in Internal Medicine at Roosevelt Hospital. Dr. Morosini and his wife, Helen, have three daughters—Deborah, six, Dana, three, and Adrienne, one.

DR. ROBERT ALEXANDER NICHOLS, Mayo Foundation, Rochester, Minn., has been appointed a Resident in Neurology at the Foundation.

DR. JOHN R. PHILSON, 23 Bancroft Lane, Willingboro, N.J., entered the private practice of Internal Medicine on July 1, 1964, in Edgewater Park, N.J., Dr. and Mrs. Philson have a two-year-old son, Johnny.

DR. ULYSSES E. WATSON, Norristown State Hospital, Norristown, Pa., spoke on "Aftercare of a Discharged Mental Patient" at a meeting of the Perkiomen Branch, American Association of University Women, on April 8. Dr. Watson is Director of the Follow-Up Clinic of the Norristown State Hospital.

DR. WALTER YOUNG, 248 Seneca Drive, Syracuse, N.Y., is a Resident in Otolaryngology at the Upstate Medical Center.

1961

DR. LEWIS G. ANTHONY, U.S. Army Tripler General Hospital, APO 458, San Francisco, Calif., is presently serving a three year tour of duty in Hawaii. Dr. Anthony and his wife, the former Ellen Claire Wagner, have one son, Jeffrey Scott.

DR. LOUIS BROWN, Kings County Hospital, Brooklyn, New York, is presently serving a Surgical Residency at Kings County Hospital.

DR. FRANK T. CALLED, 637 Colonial Ave., York, Pa., joined DR. DAVID C. PEWTERBAUGH (Jeff '33) in the practice of pediatrics at Dr. Pewterbaugh's office at Springdale Medical Center, George Street and Rathron Road on July 6.

DR. JAMES A. WALSH, 111 Sherwood Dr., Havelock, North Carolina, writes, "Just a short note to let you know that the Walshes are faring well. I am currently serving as a Flight Surgeon in the Navy, and am attached to the 2nd Marine Aircraft Wing here at Cherry Point. Despite the abundance of free time, good golfing weather, and an overactive social life, I am eagerly awaiting my return to civilian life. In January I plan to begin a residency in Radiology at Bryn Mawr Hospital, and am looking forward to renewing old friendships in Philadelphia. My wife Connie, and our 15-month-old daughter Nancy Lynn are in good health.

"This alumnus is quite impressed with the quality and scope of the new Building Program. The future of Jefferson is truly in the hands of each of her Alumni; and once the plans materialize, the reputation of our school will be enhanced immeasurably."

DR. WILLIAM A. WIMSMATT, 314 Bedford Circle, N. Syracuse, N.Y., is presently serving with the 642nd USAF Dispensary at Hancock Field, N.Y., after graduating from the USAF's School of Aerospace Medicine, primary course.

DR. NATHAN ZANKMAN, 17 Scarlet Oak Rd., Levittown, Pa., recently opened an office there for the practice of Pediatrics.

1962

DR. WILLIAM G. GOTTFRIED, Great Ormond Street Hospital, London, England, is presently serving as an Exchange Resident at the Great Ormond Street Hospital. In addition, he is the recipient of a Fulbright Fellowship for pursuing studies abroad. Mrs. Gottfried was awarded a U.S. Public Health Pre-Doctoral Fellowship for research in Biochemistry. She is at the Hammersmith Hospital in London.

DR. PASCAL J. LAUFFA, Abington Memorial Hospital, Abington, Pa., recently finished his first year of Residency in Internal Medicine at Jeff. Dr. LaRuffa writes, "I will take my last two years of residency at Abington Memorial Hospital beginning in August, 1964, after a six-week trip to Europe this summer. Obviously, I am still single."

DR. HOBART JONES WHITE, San Diego County General Hospital, North End of Front St., San Diego 3, Calif., is completing his first year of a four year Surgical Residency at the San Diego County Hospital.

1963

DR. DAVID D. DULANEY, Mary Hitchcock Memorial Hospital, Hanover, N.H., began a Residency in Surgery there on July 6.

DR. PAUL J. HULL, Deaconess Hospital, Boston, Mass., began a Residency in Medicine at Deaconess Hospital on July 1.

DR. IRVING PHILIP RATNER, Squadron Medical Officer, Destroyer Squad 10, USS Forrest Sherman, Newport, R.I., reports that he is anticipating a cruise to the Mediterranean during the winter months.
ENGAGEMENTS

1960
DR. FRED CARPI CRISTOFORI to Roberta Holt.
DR. HARVEY DAVID SILVER to Jacqueline Phyllis Bialkin.

1961
DR. RICHARD CHARLES WAMSLEY to Pamela Ann Proudfoot.

1962
DR. JOSEPH SNYDER to Marian Carole Friedman.

1963
DR. CHARLES BADER KAHN to Elaine Cathrine Marghilano.

1964
DR. ARNOLD O. STEFFENS to Barbara Ann Voshell.

WEDDINGS

1956
DR. HENRY HUBER SHERK to Lea Carson, June 27, 1964.

1957
DR. ALEX J. KRAWCZUN to Dr. Mary A. Rorro, April 4, 1964.

1958

1959
DR. JAMES R. DELP to Doris Lorraine Kennel, June 13, 1964.

1960

1961
DR. JOHN PATRICK KEEFE to Beatrice Joan Manis, April 18, 1964.
DR. GORDON D. VIGARIO to Sharon Jane Sheils, June 20, 1964.

1962

1964
DR. VERN H. HORTON to Suzanne Ball, June 20, 1964.

BIRTHS

1946

1949

1951
Son to DR. AND MRS. THOMAS F. CLAUSS, April 18, 1964.

1954
Son, Mark Lawrence, to DR. AND MRS. W. ROBERT JACOBS, June 20, 1964.

1957

1959
Son, David Rollin, to DR. AND MRS. DAVID M. HARNISH, April 27, 1964.

1960
Son to DR. AND MRS. KARL F. FINNEN, March 22, 1964.

1961
Son, Michael Jeffrey, to DR. AND MRS. LOUIS BROWN, November 11, 1963.

COMMENCEMENT EXERCISES
Some Interesting Jefferson Alumni

The following is the sixth in a series of portraits of "Some Interesting Jefferson Alumni" which was introduced in the August, 1963, issue and will continue to be presented in future issues of the Alumni Bulletin. This material was compiled and written by Dr. Edward C. Britt, Class of 1933, and appeared in the 1940 Clinic. That same year it was also published in "The Medical Searchlight". We are deeply indebted to Dr. Britt for his keen interest in Jefferson's historical heritage and for bringing this material to our attention. This month's portrait is of Dr. John S. Bobbs.

John S. Bobbs, M. D.

A GREAT pioneer surgeon, like a Prophet, may be not without honor except in his own Alma Mater. John S. Bobbs (1809-1870), M.D. 1836, born in Green-village, Pennsylvania, left Jefferson to live in Indiana. It is not clear whether he actually received a diploma. According to Packard's "History of Medicine in the United States" he graduated in 1836. Other historians record that he attended two courses of lectures and studied under a preceptor here. His graduation date is officially unlisted. Albeit he received no other formal medical education and not until 1877, seven years after his death, did formal medical school graduation become a requisite for Pennsylvania state licensure. As late as 1871 Harvard found it impossible to institute written examinations because of the illiteracy of most medical students.

On June 15th, 1867, in Indianapolis, he performed an historic operation, the first modern cholecystotomy, removing the gall stones, from a Mary E. Wiggins, age 35 years. She made a splendid recovery.

Dr. Lawson Tait credited Dr. J. Marion Sims with the first cholecystotomy in 1878. However, both were unaware of Dr. Bobb's priority as reported in "The Transactions of the Indiana State Medical Society, 1868".

In 1869 he became one of the founders, first professor of surgery, and later dean of the newly re-organized Medical College of Indiana.
OFFICERS AND EXECUTIVE COMMITTEE FOR 1964-1965

OFFICERS

President: ABRAHAM CANTAROW, '24
President-elect: KENNETH E. FRY, '31
Vice President: JOHN H. HODGES, '39
Vice President: MARIO A. CASTALLO, '29
Vice President: EDMUND L. HOUSEL, '35
Vice President: HERBERT A. LUSCOMBE, '40
Treasurer: FREDERICK B. WAGNER, JR., '41
Secretary: JOHN N. LINDQUIST, '43
