MRS. JOSEPH J. MULONE, Editor
MRS. FRANK T. BELL, JR., Associate Editor
The Alumni Association of Jefferson Medical College
1025 Walnut Street, Philadelphia, Pennsylvania 19107
MORE THAN 100 fathers of second year students attended the Father’s Day program sponsored by the College and the Alumni Association on February 25, 1965.

Thirteen of the fathers attending were Alumni of Jefferson but, even though they had attended classes and lab sessions here, they too enjoyed the tours and seeing the innovations which have taken place since their days at the College.

The morning began with registration in McClellan Hall, followed by tours, with student guides, to the following areas of the College and Hospital: Curtis Clinic—8th floor, Pharmacology Laboratory, Clinical Pathology Laboratory, Physiology Laboratory, Library, Cardeza Foundation, Psychiatric Unit—14th Annex of the Hospital, a private floor—11th of the Hospital, Clinical Research Unit, Rehabilitation Unit, Barton Division and Heart Station, and the Radiology Department. Faculty members were stationed in each of the areas to answer the visitors’ questions and to discuss points of interest.

At 1:00 p.m. the visitors met with their sons and daughters for luncheon in McClellan Hall. Members of the faculty who teach second year students and representatives of the Administration and the Alumni Association also attended.

Dean Sodeman welcomed the guests and said that he was delighted at the number of fathers who had taken this day from their busy schedules to come to Jefferson. He said that he hoped the fathers, after the tours, had begun to see “Why your sons and daughters complain of the work load we subject them to. This we can’t help and this will be the tone of their lives from now on. It is a part of their life’s work and dedication to medicine.”

Dr. Sodeman said he also hoped that the tours had helped the fathers to understand why it costs so much to go to medical school.

“I know,” he said, “you all have to dig deep into your pockets for tuition fees and living expenses for your sons and daughters. With rising costs, our student aid requests are rising greatly. This year, 1964-65, we had 173 requests for a total of $199,670. Twenty-six percent of our total student body needed financial aid. Through our own funds and Government loans, we have met these needs but we have fears for the future.”

Dr. Sodeman pointed out also that, for each student, the College has serious financial problems. The total cost per student (which does not include hospital costs and losses for the teaching cases, which is $2,100,000) is $6,000. We get tuition from each student of $1,300, plus $3,000 per student from the Commonwealth of Pennsylvania making a total of $4,300, which means that the balance of $1,700 per student must be obtained from other sources. From this deficit of $1,700, the Administration depends heavily on Alumni Annual Giving, which last year provided a total of $176,000, on the National Fund for Medical Education, the American Medical Association Education and Research Foundation, on endowment income and on grant gifts.

“So,” he continued, “even with your heavy costs, $4,700 is provided by others to keep your son or daughter in school. For the sophomore class alone, with 164 members, $760,800 was provided by others, and for the four classes, the total is $3,000,000 which comes from outside sources.”

“Medical Education,” Dr. Sodeman stated, “is expensive if you want the best and that we believe we have. We want your sons and daughters to get all they can from medical school, so that they will become competent and skilled physicians. Both parents and faculty must work as a team to make this possible. Not only do we welcome you here, but we will welcome your advice and suggestions.”

Dr. Rakoff, who was in charge of the Fathers’ Day program, pins a name tag on a beaming father during registration.
Dr. Cantarow, President of the Alumni Association, greeted the fathers on behalf of the Association which, he pointed out, now numbers more than 6,600 living members. This is the largest Alumni group of any medical school in the country—perhaps in the world.

Dr. Cantarow said that over a year ago the Association had felt it would be a good idea to hold a Father's Day, but that there had been serious misgivings about the project, since we are dealing with graduate students who are far removed from sentimental college ties, ivy-covered walls, etc. However, our first endeavor last year was successful and this year's Father's Day is even more so. We are delighted with the response of the fathers and students.

"No one," Dr. Cantarow said, "who has not gone through a medical curriculum can appreciate what the student goes through and no one who does not practice medicine can appreciate the life of a physician. The life of a medical student is really the beginning of the practice of medicine and it is wonderful for the fathers to have some understanding of what their sons and daughters are experiencing in medical school."

Dr. Rakoff, who is Chairman of the Fathers' Day Committee which made all of the arrangements for the program, thanked the students for having encouraged their fathers to attend and the faculty and other groups who contributed their time and efforts to make the day a success.

Following the luncheon, the students and their fathers attended a Surgery Conference in the Hospital Ampitheatre.
Alumni to have Jefferson Board Representation

Alumni Association Conducts
Annual Business Meeting

ONE OF the highlights of the Annual Business Meeting of the Alumni Association, which was held at Williamson’s Restaurant on February 25, 1965, was the announcement by President Cantarow that the Trustees have agreed to Alumni representation on the Board of Trustees of the Jefferson Medical College and Medical Center. Steps are presently underway to have the institution’s Charter amended to permit term Trustees, as well as life Trustees. When this has been accomplished, the Alumni Association will have two representatives on the Board, serving for three year terms.

"I think," Dr. Cantarow said, "this is one of the greatest steps in advancement from our standpoint that the Alumni Association has made. This has been 'in the works' for at least 20 years and it has finally come to pass. I do not think that anyone in this institution, which is made up of the Administrative Divisions, the Board of Trustees, the Faculty, the Alumni and the Students, will ever have cause to regret this move."

Dr. Cantarow opened the business meeting by quoting briefly from the address by the late Dr. Samuel D. Gross in 1870 on the anniversary of the founding of the Jefferson Alumni Association.

**alma mater**

In comparing the College with a mother, Dr. Gross said “... mother and son are alike interested in each other's welfare, knowing that what affects the one must, to a greater or lesser extent, affect the other. Although they may be separated by time and distance, they never fail to exchange kindly offices and to breathe benedictions upon each other's heads.”

By way of introduction for the first speaker of the evening, Dr. Cantarow continued to give further excerpts from Dr. Gross' speech. Even in 1870 he spoke of the need for physical expansion, “... the need for private apartments for the accommodation of professors, for the operating and manipulation of students and for the reception of our patients.”

"From 1870 to 1964," Dr. Cantarow said, "our Board of Trustees has tried to supply Jefferson's needs and I am sure we can look toward the future with confidence."

He then introduced Mr. James M. Large, Chairman of the Board of Trustees, who spoke humorously of the prospects of the Phillies baseball club for the coming season and then, in a serious vein, expressed the gratitude of the Board of Trustees for the work of the Alumni Advisory Council during the past three years. He read the following Resolution of the Board which has been sent to Dr. Rumbaugh, Chairman of the Council:

"WHEREAS, the members of the Alumni Advisory Council for the Jefferson Medical College of Philadelphia have rendered distinguished service to their College since the Council's establishment in June, 1962, and by their own efforts have demonstrated an untiring and enthusiastic interest in the advancement of the College and in its academic and physical development and

"NOW, THEREFORE, BE IT RESOLVED that the Board of Trustees of the Jefferson Medical College does hereby express its appreciation to each member who served the Council in a significant undertaking and instructs the Secretary to deliver to all members a copy of the Resolution as evidence of an action by the Board of Trustees.”

"And we meant every word of it," Mr. Large added.

"I don't believe," he continued, "that any medical college in the United States has the support of its graduates that Jefferson has. Your
The Business Dinner featured speakers and speeches and news of Jefferson and gave everyone
the opportunity of renewing old friendships and making new ones

Dr. Haskell, Chairman, Committee on Incorporation

Dr. Sodeman, Dean and Vice President for Medical Affairs
Annual Giving and the Council's activities are good indications of this.”

Mr. Large spoke briefly of the progress which has been made in our expansion program and said that of the $7,000,000 needed from outside sources, almost $6,300,000 has been raised to date. He went on to say that the Trustees are in no way discouraged with the fact that of the $1,250,000 Alumni goal, only $800,000 has been raised, since only about 20% of the Alumni have contributed thus far, which is nowhere near the ultimate. He pointed out that $800,000 plus Alumni Annual Giving is a substantial amount of money from the group.
Dr. Cantarow then introduced the next speaker by saying that academic institutions in Europe have a different set-up from those in United States, in that the faculty elects the Dean. He said, however, that he was confident that if this were true at Jefferson the Faculty would elect the person who is our present Dean—Dr. Sodeman.

"The affairs of the Jefferson Medical College as a teaching institution and the Jefferson Medical College Hospital as a teaching hospital are showing significant progress," Dr. Sodeman stated. "These developments are bringing us, as they should, to the really meaningful concept of a true health center. For example, the Hospital Planning Committee, which has been actively at work now for two years, is concerned about many aspects of hospital development. This includes
the functional planning of departmental locations and the inter-relationships of clinic and research activities. This means the interdigitation of teaching, training and research. The opening of our Physical Medicine and Rehabilitation Unit on the third floor of the old hospital building in October 1963 gave Jefferson the most modern facility of this type available."

He went on to point out other advances along these lines, such as the opening of the Clinical Research Center which permits staff members of all departments with proper programs for research on the human subject to give the best of medical care at the time the patients are being investigated.

"We still need a number of things in our institution, however," Dr. Sodeman continued. "We need more beds. We need facilities for part-time teachers who are practicing medicine within the community to house themselves and to house their activities in their practices within the complex of Jefferson."

departmental changes

Dr. Sodeman then spoke of changes and progress in several of the College Departments. He introduced Dr. Roy Holly, who is succeeding Dr. John B. Montgomery as Chairman of the Department of Obstetrics and Gynecology.

"Sad as we are to see Dr. Montgomery reach the age of 65," said Dr. Sodeman, "we are glad that we can obtain an individual such as Dr. Holly to carry on for him, and we are happy that we will not entirely lose Dr. Montgomery's interest and activities in the future."

He spoke particularly of progress being made in the Departments of Psychiatry and Ophthalmology. "The affiliation developed by Dr. Cornelison with Friends Hospital for teaching, training, service and research is a major move forward. Research programs have been developed with Delaware State Hospital as well. Dr. Duane, in Ophthalmology, has completed his 18 month program as director of a national research study for research to prevent blindness. He is strengthening his program at the present time and evolving an expanding program in ophthalmology."

Dr. Sodeman said that the Department of Medicine has strengthened its programs in the areas of nephrology and rehabilitation and activities in hematology continue to advance. The Department of Radiology is moving forward, particularly in the area of radiation biology. Work is well under way on the Louis Stein Building to house radiation biology and radiation physics. The programs in Preventive Medicine have been extensive and penetrating. "Most gratifying," he said, "has been the interrelation with other departments, particularly in the Neurosensory program and with Medicine in the Home Care Program."

The Dean announced that activities in our Graduate School continue to increase and that this year we were admitted to membership in the National Council of Graduate Schools. We have also developed a joint graduate training program in biomedical engineering with Drexel Institute.

Dr. Sodeman complimented the Admissions Committee which did an outstanding job in selecting 165 males and 11 females out of the 2322 applicants. He pointed out that the quality of the applicants is exceeding that of previous years.

"The requests of student aid," Dr. Sodeman said, "are increasing remarkably, for many of the students with good minds come from families with little funds. In 1963-64 there were 194 requests for $172,000. Of this, $98,000 or 57 per cent of the need was met. For the year 1964-65, there were 173 requests for $199,670. For the 656 students, this represents 26% who requested aid for an average of $1,154. We have received loan funds through the Health Professions Assistance Act from the federal government which has made the needed amounts of money available to the students."

As another mark of progress, Dean Sodeman spoke of the Class Day for Seniors which was held for the first time last June and said that we plan to have another such day prior to Commencement this year. Dr. Francis J. Braceland will address the Seniors on that occasion.

Dr. Sodeman told the group that our faculty now numbers 875; that research activity continues to grow and will expand considerably when the Basic Science Building is completed.

"Teaching and research at Jefferson," he said, "are in sound balance. We hope to maintain it so in a way that Jefferson will have the prominence it deserves in research, at the same time it maintains its important reputation in the production of physicians for practice. The balance of our full-time and part-time faculty, which interrelates well and which should continue to develop in both areas to keep a satisfactory balance, is indication of this place of Jefferson in medical education."
"I have given you but a few examples of the multiplicity of areas in which Jefferson is actively moving and advancing," he concluded. "We have many problems for the future but we are meeting them 'head-on' and I feel and know, despite the great past of Jefferson, that its most glorious days lie ahead."

Following the report of the Secretary, Dr. Cantarow asked Dr. Lindquist to report as to Alumni deaths during the year. Since the Necrology list was too lengthy to be read in full, Dr. Lindquist summarized it by saying that 130 of our Alumni have died during the past year, including Dr. Edward Ford, a member of the Class of 1891, who was our oldest living graduate, having been 97 at the time of his death. Five of the Alumni who passed away were members of the Jefferson Faculty: Dr. Charles E. G. Shannon, Class of 1902, Professor of Ophthalmology, Emeritus; Dr. Arthur J. Davidson, Class of 1907, Clinical Professor of Orthopedic Surgery, Honorary; Dr. Sidney L. Olsho, Class of 1907, Assistant Professor of Ophthalmology, Honorary; Dr. Roy W. Mohler, Class of 1921, Clinical Professor of Obstetrics and Gynecology and Dr. Philip H. Geisler, Class of 1955, Assistant Professor of Pathology.

A moment of silence was observed in memory of all of these deceased Alumni.

(The full Necrology list will be found on page 12 of this issue.)

Dr. Cantarow then called on Dr. Rumbaugh, Chairman of the Alumni Advisory Council, and he reported briefly on the last visit of the Council to the College. In the Council's final report, they asked the Board's approval of their disbandment because, with Alumni representation on the Board, the Council would no longer be needed. As Mr. Large stated earlier, the Board has agreed to this.

In the absence of Dr. Gibbon, Dr. George J. Willauer reported on the Alumni phase of the Building Fund Drive. He stated that Alumni on the Faculty have contributed $231,574 and non-Faculty Alumni have given $551,837, for a total of $783,411. He pointed out, however, that there have been contributions by only 1,087 Alumni and urged everyone to give serious thought to how we can obtain additional gifts. Dr. Willauer announced that Jefferson has received a very large bequest from an Alumnus of the Class of 1910. In his will, Dr. Hershey E. Orndoff, of Glen Riddle, Pennsylvania, left the College $500,000. This bequest was not included in the $783,411 total of Alumni Giving to the Building Fund.

Following the reports of the Standing and Special Committees, Dr. Cantarow asked Dr. Willauer to read the slate of the Nominating Committee. Dr. Willauer announced that the nominees for offices are: Kenneth E. Fry, M.D., President; Mario A. Castallo, M.D., President-elect; Vice Presidents, John H. Hodges, M.D., Edmund L. House, M.D., Herbert A. Luscombe, M.D. and Vincent T. McDermott, M.D.; Secretary, Warren R. Lang, M.D. and Treasurer, Frederick B. Wagner, Jr., M.D. He said that there are seven new Candidates for membership on the Executive Committee: Doctors Ralph A. Carabasi, Jr., Raymond C. Grandon, James V. Mackell, Peter B. Mulligan, Rufus E. Palmer, III, Joseph F. Rodgers and Daniel L. Shaw, Jr.

The report of the Nominating Committee was unanimously accepted. (A full list of the Officers, Executive Committee and State and Service Vice Presidents will be found on page 65 of this Bulletin.)

Dr. Cantarow then escorted the newly-elected President, Dr. Fry, to the podium and, after thanking the Alumni for the opportunity to serve Jefferson in this capacity, he adjourned the meeting.

Among other groups, the Advisory Council met with members of the Administration, Mr. Bodine, Dr. Sodeman, Mr. Busick, and Mr. Coffee, during their semi-annual visit to the College, January 18th and 19th.
NECROLOGY

Deaths Reported Since Last Annual Business Meeting
February 27, 1964

1891—Edward W. Ford, died November 12, 1964
     Edgar W. Tully, died June 1, 1964
1894—John J. Barclay, Jr., died January 7, 1964
     John S. McCelvey, died January 19, 1965
1897—William A. Mitchell, died November 15, 1963
1899—Herbert N. Rafferty, died July 20, 1964
1901—James D. Heysinger, died July, 1962
     J. Arthur Metz, died June 1, 1964
     Joseph Bell Palmer, died November 1, 1964
1902—Edward W. Collins, died June 15, 1964
     Harry E. Kirschner, died February 25, 1964
1903—Samuel Baltz, died December 24, 1964
     Roy K. Ogilvie, died January 24, 1965
     Thomas H. Platt, Jr., died January 4, 1965
1904—Benjamin L. Crawford, died May 4, 1964
     William C. Hensyl, died September 2, 1964
     Harry A. Stembler, died March 16, 1964
1905—Clarence F. Bernatz, died February 17, 1964
     Charles Henry Harmon, died February 27, 1964
     G. Harvey Severs, died February 1, 1965
     Walter Franklin Wood, died June 24, 1964
1906—William F. Koegel, died February 22, 1964
     Andrew S. McKinley, died May 10, 1964
     Leroy B. Miller, died October 25, 1964
     Edward K. Mitchell, died December 5, 1964
1907—Nathan Blumberg, died December 28, 1964
     Arthur J. Davidson, died March 12, 1964
     Sidney L. Olsho, died October 7, 1964
1908—Wellington D. Griesemer, died October 24, 1964
     John W. Holmes, died June 7, 1964
1909—Adrian Van Bracklin Orr, died July 10, 1964
1910—Simon C. Brumbaugh, died June 11, 1964
     Charles N. Sprinkle, died July 1, 1964
1911—George E. Alleman, died May 9, 1964
1912—Lee J. Hammett, died December 4, 1964
1913—Luther T. Buchanan, Jr., died October 17, 1964
     Gustave A. Dapp, died June 27, 1964
     Guy T. Haywood, died May 11, 1964
     Robert Wayne Richards, died March 11, 1964
1914—George L. Armitage, Jr., died July 25, 1964
     Mitchell Bernstein, died March 24, 1964
     Rolland R. Gasser, died August 15, 1964
     Paul B. Means, died August 9, 1964
1915—Joseph F. Dolphin, died September 2, 1964
     William T. Lineberry, died November 22, 1964
     Samuel E. Rager, died April 4, 1964
     William W. Wilkinson, died July 24, 1964
1916—Albert A. Grossman, died December 21, 1964
     Delos H. Parke, died July 27, 1964
     A. Maxwell Sharp, died January 25, 1965
     Matthew F. Zubak, died April 3, 1964
1917—William L. Cunningham, died December 12, 1964
     James E. James, died April 29, 1964
     George A. Shuman, died August 30, 1964
1918—Joseph S. McDaniel, died September 14, 1964
1919—Samuel E. Fabricant, died October 22, 1964
     William L. Hiester, died February 5, 1965
     William J. Jacoby, died September 27, 1964
     Arthur L. Jones, died January 29, 1965
     Earl W. Mungle, died September 6, 1964
     Morris Smith, died July 16, 1964
     William E. Wrang, died January 29, 1965
1920—Maxwell Cherner, died January 5, 1965
     Eli W. Goldstein, died April 22, 1964
     Robert M. Grier, died August 29, 1964
     William S. Hawn, died April 19, 1964
     John F. M. Keane, died May 19, 1964
     Anthony S. Mallek, died July 2, 1964
     John Nelson, died September 29, 1964
     Russell C. Weimar, died August 29, 1964
     Joseph S. Wilson, died November 29, 1964
1921—Doff D. Daniel, died February 4, 1964
     Jerome L. Holzman, died March 6, 1964
     Roy W. Mohler, died August 6, 1964
     William G. Post, died December 30, 1964
     Ralph L. Slater, died February 1, 1964
1922—Donald J. McCormick, died May 21, 1964
     William R. Quinn, died November 3, 1964
1923—Ivan E. Fisher, died March 15, 1964
     James F. Hays, died December 18, 1964
     Max W. Heatter, died February 3, 1965
     William Matthews, died May 12, 1964
     Clifton A. Young, died March 20, 1964
1924—Frank L. Perry, died October 23, 1964
1925—Vincent T. Curtin, died September 29, 1964
     Ernest Shore, died August 18, 1964
1926—PHILIP S. CLAIR, died July 27, 1964  
   JOHN A. MARTIN, died September 4, 1964  
   WALTER H.Stubenrauch, died  
   September 11, 1964
1928—ALLEN A. GLEITZ, died December 28, 1964  
   CLARENCE J. M. HOFER, died August 28, 1964  
   HAROLD W. LAUWE, died December 19, 1964  
   JUAN A. PONS, died November 7, 1964  
   PAGE M. SCHILDNECHT, died March 5, 1964
1929—HERMAN KLEINMAN, died February 29, 1964
1930—ALBERT M. BIGLAN, died March 13, 1964  
   V. WILLIAM WEAKLEY, died April 17, 1964
1931—HARRY T. KESSLER, died November 15, 1964
1932—THOMAS J. COSTELLO, died July 25, 1964  
   EARL H. GRIM, died October 31, 1964  
   SAMUEL E. PACE, died August 12, 1964  
   MORRIS A. SILVER, died June 1, 1964  
   WILLIAM H. TOMASESKI, died April 15, 1964
1933—EARL S. LODER, died September 19, 1964  
   HERBERT W. MACKOWSKI, died July 14, 1964  
   HARRY PANDOLFO, died May 5, 1964  
   ROBERT STEELE, died April 10, 1964
1935—GLENN C. CAMP, died September 20, 1964  
   BENJAMIN FENICHEL, died June 30, 1964  
   LAWRENCE ROY FURLONG, died  
   January 18, 1965
1936—WILLIAM L. CONLON, died November 16, 1964  
   HARVEY F. DOE, died December 10, 1964  
   JOHN J. KEVENET, died June 8, 1964  
   JOHN F. LEHMAN, died October 5, 1964
1938—THOMAS P. BROWN, died June 23, 1964
1940—MORTON F. TRIPPE, died July 17, 1964
1941—JAMES H. MILLER, died September 14, 1964
1942—FRANK J. ZUKOSKI, died April 18, 1964
1943—HARTFORD E. GRUGAN, died March 8, 1964  
   CHARLES F. HAWKINS, died  
   September 23, 1964
1944—J. THOMAS T. TOBIN, died December 26, 1964  
1948—JOSEPH L. CARROLL, died August 14, 1964
1955—PHILIP H. GEISLER, died July 9, 1964  
   JOSEPH E. MURRAY, died April 18, 1964
1957—ROBERT L. KASHOFF, died December 29, 1964
1960—MICHAEL J. HADDEN, died January 9, 1965

These memorial notices were posted in the front hall of the College.

CHARLES E. G. SHANNON
Class of 1902
Born 1875  Died February 2, 1965
Professor Emeritus of Ophthalmology
Loyal Jeffersonian who inspired students for over 44 years as a member of the faculty.  
For 21 years Dr. Shannon was Professor of Ophthalmology and Head of the Department.  
Remembered for his genial personality, his wit and extreme devotion to Jefferson.

HARRY R. DRAPER, JR.
Doctor of Medicine
Associate Professor of Psychiatry
11 February 1921—13 February 1965
Dr. Kenneth Fry
Inducted as Association President

Dr. KENNETH E. FRY was inducted as the 1965-1966 President of the Jefferson Medical College Alumni Association at the Association's annual business meeting and dinner on February 25.

Dr. Fry is a well-known figure to Alumni, having served as Chairman of the Annual Giving Fund Committee from February 1961 until July 1964. Under his able administration, the 16th Drive topped its goal of $175,000.

Born in New Hartford, New York, Dr. Fry attended Whitman College in Walla Walla, Washington, with all intentions of becoming a lawyer. But it was medicine which claimed his interest and after graduating from Whitman, he attended the University of Pennsylvania, added the necessary pre-medical credits to his record, enrolled at Jefferson, and received his medical degree in 1931.

He served his internship from 1931-1933 in the Jefferson Medical College Hospital and was selected as Chief Resident at Jefferson in 1933. Upon completing his residency in 1935, he was appointed Chief of the Outpatient Surgery Department. As a member of the teaching staff, he rose from Assistant Demonstrator of Operative Surgery in 1936 to Professor of Clinical Surgery in 1963.

During World War II Dr. Fry was commissioned as a Major and first served as Chief of Surgery in the Station Hospital in Iran and then commanded four hospitals in the Persian Gulf Command and C.B.I. theatres. When he returned to the States in 1945, he was promoted to Colonel and stationed at Bruns General Hospital in Santa Fe as Chief of Surgery.

The new President holds membership in the county, state, and American Medical Associations and has served as Chairman of the Board of Censors of the Philadelphia County Medical Society. He is a member of the American College of Surgeons, the Philadelphia Academy of Surgeons, the Philadelphia College of Physicians, and is a member of the Board of Overseers of Whitman College. He has been an active contributor to scientific journals in his field.

Dr. Fry and his wife, the former Nora I. Smith, who was in charge of the Operating Rooms at Jefferson Hospital, reside in Philadelphia and have one daughter, Ann, who is presently teaching Zoology at Carleton College in Minnesota. Whenever he can, Dr. Fry finds time for his two favorite sports, hunting and fishing.
Jefferson’s Role in World Medicine

This article and the following three articles conclude the series of articles on Jefferson’s role in world understanding. The series began in the December, 1964, issue of the Bulletin.

UNITED STATES medical schools and medical centers annually attract large numbers of foreign doctors, researchers, and professors. Jefferson Medical College is no exception. Students come to study and train here from Europe, the Far East, South America, Africa, and Australia. The reason they find United States medical facilities so attractive is apparently because they have the benefit of sophisticated equipment and facilities. Also, many wishing to go into medical research would find it financially impossible to do so if they remained in their native countries. Then too, many come here to gain freedom from dictatorial governments.

Here at Jefferson we are fortunate in having attracted a select group in various fields of endeavor, who have brought with them experience and knowledge which has been valuable to Jefferson, and who, in turn, have learned new techniques and gained specialized training thus benefiting from their association with our faculty members.

Dr. Romano H. DeMeio, Professor of Biochemistry, has been at Jefferson since 1947. Born in Mendoza, Argentina, Dr. DeMeio came to the States in 1944 following the advent of Peron. “Under Peron’s regime, the loss of individual freedom made teaching, working, and living difficult. I came to the United States seeking the right environment and proper facilities.”

Previous to coming to the United States, Dr. DeMeio was on the faculty of Rosario Medical School, at Rosario, Argentina, where Biochemistry is taught, along with Physiology, Biophysics, and Topographic Anatomy, in the second year of medical studies. The students are admitted directly from secondary school and the full course of medical studies covers a period of six years (other schools in Argentina have as many as seven years of medical studies). One must understand that what is taught here in United States colleges, is part of the secondary school and medical school in Argentina. Actually the M.D. degree (Doctor en Medicina) can be obtained at 23 or 24 years of age, after 18 or 19 years of schooling, counting grammar school.

The enrollment is rather large, and from 200 to 250 are admitted to the second year. “I taught with the help of instructors and a group of outstanding 3rd and 4th year medical students, who were offered the opportunity of helping in the laboratory instruction.”

In Argentina the universities are autonomous, but are supported by the Federal government. In recent years a law was passed to allow the establishment of private institutions of higher learning, and several have since been established. The universities which depend on the Federal government for support are governed by a Rector (equivalent to the President of United States universities) and a University Council, elected by the faculty. The Medical School is governed by a Dean and a School Council, elected by the faculty. The President of the University and the Deans of the different Schools must be faculty members. The student body is also represented by two student members in every School Council; they are elected by the students and carry with them the power to cast a vote. In this manner students are given the opportunity of voicing their opinions in the administration of the medical school.

Support for research comes from government sources. Private contributions are rather limited.

The Universities of Argentina suffered a setback in the course of the 12 years of Peron’s dictatorship. Right after his overthrow, a National Research Council was established, with financial support from the Federal government, under the leadership of Dr. Bernardo Houssay, Nobel prize winner. The Council has helped considerably to further research in Argentina, by awarding fellowships for study abroad, providing salaries for “full time” scientists, and funds for equipping many laboratories throughout Argentina.

“I visited Argentina right after the 1955 revolution, which overthrew Peron, and then again in
1962, and I saw a considerable improvement of the conditions for research all over the country. This was, to quite an extent, the result of the activity of the National Research Council."

Dr. Eduvigia Orzechowska, who is serving her residency in Dermatology here at Jefferson, is also from Argentina.

Dr. Orzechowska originally comes from Poland. Her family escaped from there during the Soviet Occupation, settling finally in Buenos Aires, Argentina, where she received her education.

Approximately 99 percent of the universities in Argentina are totally supported by the government, and the schooling is free. The government institutions and teaching hospitals, however, cannot afford to offer salaries to the residents, due to the present economical crisis.

As to why Dr. Orzechowska came to the United States: "Quite frankly I came here since I can complete my postgraduate training without any financial problems, which makes living much more enjoyable." Prior to coming to Jefferson, she served her internship at The Springfield Hospital, Springfield, Mass. "I felt so sorry when I left the hospital there, everyone had been very nice to me, staff and patients alike."

Dr. Orzechowska explains that approximately 400 young doctors come to the United States annually from Argentina, and most of them remain here permanently. While this helps swell the rank of practicing physicians in the United States, it leaves a shortage of young doctors in Argentina.

Dr. Thomas Behrendt, Assistant Professor of Ophthalmology, came to the United States from Porto Alegre, Brazil. His family had migrated there from Germany in 1937, following the advent of Hitler. Dr. Behrendt received his general medical training in Brazil at the State University, Port Alegre, and his special training in Ophthalmology, studying under his father, Dr. Rudolf Behrendt, formerly a prominent German Ophthalmologist. He came to the Department of Ophthalmology at Jefferson because his interests in research closely paralleled those of Dr. Thomas Duane, Professor of Ophthalmology and Head of the Department.

In Brazil a medical student's education consists of a six year training program. Dr. Behrendt believes that medical training in Brazil is less regimented than in United States medical schools, giving brilliant minds a better opportunity for advancement while the average student often suffers.

Dr. Behrendt prefers a career in research and explains that it is not even possible to obtain funds for research in Brazil. "In Brazil, as in the United States, physicians are concentrated in the large metropolitan areas, leaving a deficit of medical care in the outlying districts."

Dr. Luis Garcia-Bunuel, an Associate in Neurology, was born in Madrid, Spain. A graduate of Zaragoza University and Zaragoza Medical School, Dr. Garcia first came to the United States as a resident in Neurology at Georgetown University in Washington, D. C. Following his residency, he received a Postdoctoral Fellowship in Neurochemistry at Washington University in St. Louis. At Jefferson, Dr. Garcia has been active in research and teaching.

Dr. Garcia states that Spain has approximately 20 medical schools and while, in his experience, they are equipped to prepare students with an extensive theoretical background, the schools are too large and overcrowded to offer thorough practical preparation in patient care.

Dr. Garcia believes that, "The value of exchange programs lies in the fact that medical personnel are exposed to new and different solutions to the same problem. Perhaps it will be a combination of these different approaches that will open the door to many problems which plague medical scientists. All countries have a moral obligation to share their medical acumen with each other."
Dr. Salvador Castell, Resident in Pediatrics, is also a native of Spain. He received his medical education at Barcelona University and took his internship at a hospital in Baltimore, Maryland. Dr. Castell, unlike Dr. Garcia, found that students at the University of Barcelona receive a thorough background in clinical training and are allowed more responsibility for patient care, than students at United States medical schools.

Dr. Castell comments, "The title of 'Professor' is held in high esteem and, as a result, Spain does not lack for medical educators." Professors work at the University during the morning and hold office hours for private patients during the afternoon.

He explains that about 50 percent of Spain's medicine is socialized. A large percentage of the hospitals receive funds from the city in which they are located and from the country.

Dr. In Min Young of Seoul, Korea, came to the United States in 1958. He was graduated from the Yonsei University School of Medicine, a school founded by American missionaries. Dr. Young took his internship and residency at the Yonsei Medical College Hospital and served on the staff of the College as an Instructor in Otolaryngology.

Upon arriving in the United States, Dr. Young took an additional internship at Pima County General Hospital, Tucson, Arizona, and a residency at Newark Ear and Eye Infirmary, Newark, New Jersey. Dr. Young hopes to remain permanently in the United States, as his work in Audiology is so specialized that neither the equipment nor the time to continue his research would be available to him should he return to Korea.

Dr. Young in talking of the medical situation in Korea explains, "All staff members at Yonsei Medical School are full time. Over 90 per cent of the staff there have received some medical training in the United States. South Korea has eight medical schools and has between eight and nine thousand practicing physicians to service a population of 20 million."

Dr. Jung-ching Liu came to the United States in 1957 from Taiwan, China. He received his pre-medical and medical schooling at the National Taiwan University, and took his internship and residency at the National Taiwan University Hospital. In the United States, he interned at the Chester County Hospital, West Chester, Pennsylvania, and took a residency at the Boston City Hospital and the University of Wisconsin Hospitals. In addition, for one year he was a Fellow at the Johns Hopkins University School of Medicine. He came to Jefferson in 1961 as a Research Fellow. He was attracted to Jefferson by Dr. Fred Harbert and Dr. John Reddy of the Department of Otolaryngology, and the research in which they are engaged. Currently, Dr. Liu is a Teaching Fellow and Research Associate in Otolaryngology.

In comparing the residency systems in Formosan and American hospitals, Dr. Liu comments: "I enjoyed my residencies both in Formosa and in the United States. In the United States residents have more responsibilities and opportunities to treat the patients, staff doctors are more eager to impress upon residents the important points of patient care during rounds and operations, staff doctors give more lectures to residents, and there are more facilities and funds available for residents to do research work."

On medical education: "The medical training one receives in Formosa is very similar to the medical training one receives in the United States. When I left Formosa there were two medical schools and there are now four. Formosa is fortunate in having enough doctors to care for its population. Medical education in Formosa is not as expensive as it is here. The individual pays for his own education, but can more easily afford it."

Dr. Liu has applied for American citizenship. He feels that research is the key to progress in medicine. He is pleased at having the opportunity to do research at Jefferson. Dr. Liu hopes eventually to combine research, teaching, and a limited practice within the confines of the teaching complex.
Dr. Michael L. Simenhoff, Associate in Medicine, was born in Bloemfontein, South Africa, and received his medical education at the University of Cape Town Medical School. Upon completing his residency, he served as a Research Fellow in the laboratories of Professor Milne, at Postgraduate Medical School and then Westminster Hospital in London. In 1962 he came to the United States as a Research Fellow at Peter Bent Brigham Hospital, Harvard Medical School, coming to Jefferson in 1964.

In discussing the educational systems of America and South Africa, Dr. Simenhoff points out that while the U. S. system has four years of

Dr. Michael L. Simenhoff, Associate in Medicine, was born in Bloemfontein, South Africa, and received his medical education at the University of Cape Town Medical School. Upon completing his residency, he served as a Research Fellow in the laboratories of Professor Milne, at Postgraduate Medical School and then Westminster Hospital in London. In 1962 he came to the United States as a Research Fellow at Peter Bent Brigham Hospital, Harvard Medical School, coming to Jefferson in 1964.

In discussing the educational systems of America and South Africa, Dr. Simenhoff points out that while the U. S. system has four years of
liberal arts preceding medical school (which he thinks is an excellent system), the South Africa system includes basic sciences in the preliminary years at the University followed by three years of clinical medical training at the medical school. Dr. Simenhoff has found though that the actual philosophy of medical education varies within the framework of different schools within a country, making it difficult to draw overall comparisons between systems of education in various countries.

In South Africa in some of the teaching hospital medical centers the major part of the medical school staff is full time and not allowed to do private practice. If members of the full time staff do treat patients, they are not allowed to accept payment for their services. The bulk of the research activities are carried out by full time staff members; the part time physicians play an important part in teaching.

One drawback which Dr. Simenhoff has noticed in some American medical schools is the excessive emphasis on examinations, forcing students to spend most of their time preparing for examinations and not allowing the student enough time to think about concepts in medicine, or to discover new facts for himself and follow them through. Today medicine is so complex that it is possible to teach students the principles and approaches to medicine, but it is impossible to teach them all medicine.

Dr. Simenhoff believes in the importance of exchanging medical knowledge and proposes a plan whereby “Visiting Exchange Professors from other countries and other schools in the United States could be invited to a school to take over their respective department for two weeks to a month, and the Department Head would take over the duties of the Visiting Professor at his respective institution. This plan could also be extended to the student level, whereby students could spend a week of their vacation allotment each year visiting other schools and laboratories. This already occurs in some institutions on a limited scale.”

The above interviews represent but a brief sampling of the many foreign students and doctors presently at Jefferson. Their reasons for coming here are as varied as their attitudes about returning to their native countries. Whether or not they return to their homelands, they are making and will continue to make a very important contribution to world understanding, particularly through the dissemination of the technical knowledge they have acquired in their treatment of patients. They will also forward world understanding in being able to interpret America and Americans to their fellow countrymen, perhaps in some instances dispelling a mistaken image. And whether or not they return to their native lands, it is reasonable to assume that their attitudes will return via correspondence with friends, relatives, and former colleagues. And as they have learned from association with us, so we have learned from them.

Paving the Road to Understanding in Vietnam

Dr. Robert E. McLaughlin, Jeff '61, contributed his own part toward fostering international goodwill recently, while stationed as a Captain with the U.S. Air Force at Tan Son Nhut Airfield in Saigon, South Vietnam. While there he and several others devoted their spare time to improving conditions at the Thanh Mau Refuge, which houses over 100 Vietnamese orphans and several fatherless families.

The hard work involved for the small group of officers and airmen was laced with lots of fun and laughter, which made the job a great deal easier. Imagine lining up a hundred small boys and girls for a turn at a shower, helping scrub them, and running them through the spray. The uniform was a swim suit.

The children were always on hand with welcome grins to greet the weekend convoy of trucks and the luxurious water tanks rolling up to their housing area.

And clean, fresh water was a real luxury at Thanh Mau. After filling the cooking and drinking water tanks, the big tanker from Tan Son Nhut backed up to a battery of 50-gallon drums.
fitted with shower heads. And the small ones wiggled out of their clothes to toss the cakes of soap around with joy and wash away the dirt and dust.

A portable clinic was part of the convoy too, as Dr. McLaughlin together with another doctor and several Air Force and Army volunteer assistants examined and treated dozens of kids every week-end for everything from skin abrasions to hepatitis.

The first major task at Thanh Mau was the digging of a cesspool. Garbage and sewage formerly was collected into a pair of filthy ponds where fish had been feeding on these wastes, and people had been feeding on the fish. This situation was a major cause of the village’s chronic illness. The cesspool was completed and a new and sanitary toilet room was erected above it. These jobs took a lot of pick and shovel work by airmen and soldiers from Tan Son Nhut.

Then the servicemen helped the people of Thanh Mau dig a well and install a hand pump. This was followed by a shower facility that now handles eight children at a time. Next came a sanitary, community kitchen, followed by a small permanent dispensary, which Dr. McLaughlin and another doctor visited on week-ends. The tasks were completed by people who like to help other people. Dr. McLaughlin is no longer stationed there, but there are other doctors and other servicemen who are carrying on the good work.

Dr. McLaughlin is serving the remainder of his two-year tour of duty at Tachikawa Base, Tokyo, Japan. After he is released from active duty in July, he plans to continue his residency in Orthopedic Surgery at the Leahy Clinic in Boston.

Jefferson’s Role in Thailand

by Pyn Noyes Muangman, M.D.

The first institution of higher learning in Thailand (Siam) was established in 1889 through the far-sightedness of that benevolent monarch, King Chulalongkorn, son of King Mongkut of the “Anna and the King of Siam” fame. And it was a medical school, the “Royal Medical College,” which was destined to become the chief nucleus of Chulalongkorn University over two decades later. This medical school has been the ever-important seat of modern medical education up to the present time; for this school all through the years has become the Faculty of Medicine and Siriraj Hospital of Chulalongkorn University, and now the Faculty of Medicine and Siriraj Hospital of the University of Medical Sciences.

It is rather surprising, looking through the history of this medical school, that several Jefferson graduates should have played major parts in the development and progress of modern medical education in Thailand.

Hans Adamsen, M.D. Jefferson ’88

It was in 1888 that Hans Adamsen of Bangkok, Siam, graduated with an M.D. degree from Jefferson Medical College, and after two years of special training, returned home in 1891 to set up private practice in Bangkok. The medical school immediately appointed him Instructor of Obstetrics and Gynecology, his special field of interest. Dr. Hans Adamsen was instrumental in introducing modern methods of child deliveries and treatment of mothers during puerperium. He
was shrewd enough to introduce the new methods among members of the Royal Families and high government officials first. Soon his fame spread far and wide. His teachings in the medical school and the school of midwifery also helped much in introducing the new ideas. He was also the first to introduce an X-ray machine into the country soon after Roentgen's discovery. In 1901 the government sent him to Manila to study methods of small-pox vaccine production and after his return a laboratory for such a purpose was set up in Bangkok. For his long and meritorious service to the country, King Chulalongkorn finally conferred upon him a title of nobility—Phra Bambat Sanparoka (Healer of all Ills). It may be said that Dr. Hans Adamsen directly and indirectly had contributed much to the work of the medical school and to the various health programs of the country.

Aller G. Ellis, M.D. Jefferson '00

The Royal Medical College became the Faculty of Medicine and Siriraj Hospital of the newly formed Chulalongkorn University in 1914. The medical course was extended to six years after high school, with two pre-medical years in the Faculty of Arts and Sciences of the University. A complete reorganization of the medical curriculum soon became imperative. American medical educators were especially sought for this difficult task. Thus, Dr. Aller G. Ellis came into the scene, first as Professor of Pathology in 1920, then Dean of the Medical Faculty and Medical Director of the Siriraj Hospital from 1923 until his retirement almost 15 years later. Working closely with Prince Mahidol of Songkla, Dr. Ellis was responsible for the implementation of the program of assistance from the Rockefeller Foundation in the successful reorganization of the medical school, raising its standards to the degree level. After the expiration of the contract with the Rockefeller Foundation in 1935, Dr. Ellis joined the Thai government service, remaining as Dean of the Medical Faculty and before his retirement he was appointed Rector of Chulalongkorn University as well. This Jefferson graduate had given a major part of his life to the cause of Thai medical education; his past deeds will be long remembered and appreciated by all the Thais.

William Harvey Perkins, M.D. Jefferson '17

During the period of assistance to the medical school by the Rockefeller Foundation, the Foundation acquired the services of several prominent American, British and Australian professors to head all major departments of the school, while the Thai counterparts were sent abroad for special study and training in the various disciplines. Among the foreign professors selected by the Foundation was another illustrious son of Jefferson, William Harvey Perkins, Class of 1917, who had had previous experience as a medical missionary in the northern part of Thailand from 1919 to 1923. He was appointed Professor and Head of the Department of Internal Medicine and later he was also given the job of Assistant Dean. His gentlemanliness, his great teaching skill and his knowledge of the local tongue soon endeared him to all his staff members and students alike. During the fatal illness of Prince Mahidol of Songkla, the King also appointed him one of the two attending physicians. His department in the medical school prospered rapidly and it was with deep regret to all concerned when his four-year contract expired in 1930. He left Thailand to take up a teaching position at Tulane University.

Pyn Noyes Muangman, M.D. Jefferson '26

Pyn Noyes Muangman, M.D. came into the scene in 1928 to organize the first Department of Radiology of the country at the Faculty of Medicine and Siriraj Hospital, Chulalongkorn University. This Jefferson graduate subsequently became the first Professor of Radiology, medical director of the Siriraj Hospital, Dean of the Medical Faculty for 13 years and finally Rector of the University of Medical Sciences, before he was called to the Ministry of Public Health as Under-Secretary of State in the government of Thailand in 1958 after 30 years of service to the medical school.

Thus, for half a century, Jefferson graduates have played distinctive roles in the development of medical education and other phases of medical and public health programs of Thailand. It is to be hoped that Jefferson influence will continue to play a major part in the country's development along health lines for many more years to come.
My Most Unforgettable Character

Dr. Hilton Read, Class of 1923, is a doctor whose philosophy of medicine has made an impact on the far corners of the globe. This article by John Helwig, Jr., M.D., is reprinted from the May 1964 issue of THE READER'S DIGEST.

I FIRST met Hilton Read 12 years ago when, as a senior from the University of Pennsylvania School of Medicine, I arrived in Ventnor City, a suburb of Atlantic City, N. J., to begin a six-week apprenticeship with him. I anticipated that it would be a waste of time. I was going to be a surgeon. Why should my professors send me to study a small-town internist?

It didn't take me long to find out. Doc Read is a bag-toting family physician of 65 who has the look of a genial lion. He seems old-fashioned because his principles are of the old school. But there is nothing old-fashioned about his interests or about his knowledge of medicine. After a warm welcome from him and his wife, Kathryn, I was shown, on the ground floor of their comfortable three-story home, the best equipped one-man diagnostic clinic I've ever seen. I soon learned that Doc Read could make maximum use of it: many times I was to see him detect in their early stages such elusive diseases as congestive heart trouble or emphysema.

But there were things my new teacher considered even more important than science. I found this out when I reported to him on one of my first practice patients, a young divorcee. Her agitated state, wildly fast pulse and respiration made me fear the worst for her, and my highly complicated diagnosis hinted at the possibility of major surgery.

Doc Read fixed me with
probing blue eyes, then grinned and said tolerantly, "Jack, if you can hear hoofbeats around here, you can usually bet they’re made by horses, not zebras. Fortunately, when somebody gets sick, the trouble is usually something common, not one of those exotic diseases they dramatize in medical schools. I talked to your patient for an hour, and I’ll bet her only real problem will prove to be an acute loneliness, complicated by drinking and moping alone in her hotel room. If we can give her ego a boost, make her feel as attractive as she ought to, introduce her to some new, worthwhile friends, I think she’ll be all right in a month or so.” The diagnosis turned out to be right, and the prescription more than adequate.

Understudying Doc Read meant putting in plenty of “leg service,” often from six in the morning, when we set out for the hospital each day, until the small hours of the next morning, when we finished emergency calls. “Sorry,” he’d say to me when the phone rang in the middle of the night, “but I’ve never taught people to get sick at my convenience.”

**listen to your patients**

Three out of four of Doc’s patients, I came to learn, had nothing organically wrong; mostly they were suffering from the psychosomatic effects of worry, tension, anger or fear brought on by crises in their daily lives. Once Doc said to me, “Examine and get to know your patients as people, not just as case histories. Above all, listen to ’em! Usually they can tell you more about what really ails them than all the mechanical gadgets and lab tests in the world.” Doc always took plenty of time to let his patients ventilate their personal troubles, usually in his study, where an open fire glowed comfortably in winter. “A sympathetic ear and a little thoughtful advice,” he said, “are worth a ton of tranquilizers.”

Some of his instructions seemed almost incredibly simple, but they did the job. For example, while consulting with patients sick from worry over some serious situation, perhaps the delinquency of a son or daughter, he would bring out the Bible. “Best book ever written for treating psychosomatic illnesses,” he would say. “A foolish son is a grief to his father, and a bitterness to her that bore him,” he might quote from the Proverbs. Then he would tell the patient gently, “You see, troubles are not new in the world—they’re the common inheritance and burden of us all. It’s only when you try to carry them alone that they become unbearable. You don’t have to do that, because I’m going to help you carry the load.” It was a revelation to me how many aches and pains could be warmed away just by sympathy.

Sometimes Doc would needle or flatter a patient into doing what he ought to. In the case of an elderly lawyer who was on the verge of developing serious respiratory troubles, he did both. “I see,” Doc chided him, “that you’re letting that fine physique you used to have go completely to pot. Let’s get it back.” His only prescription: “Take a 40-block walk every morning. Inhale for four steps, hold your breath for four steps, exhale for four steps.” The patient, now a trim, hale 90, is still taking his daily stroll.

Other times, Doc would kid people into healthier attitudes. For those poisoning themselves with resentment or hate he would say, “Spend five minutes a day for a week jotting down all your ‘enemy’s’ good traits. Then see how silly you are to set your stomach to jitterbugging over making a monster out of him.”

Such non-medical prescriptions are the essence of preventive medicine, to which Hilt Read devotes most of his waking hours. His dedication to this art of spotting and arresting minor ailments before they can grow into major illnesses now goes beyond the world of medicine. It has become a force in the cold war.

Doc Read saw service in both world wars—in the first as a youthful artillery officer, in the second as medical chief of a military general hospital. Seeing shattered young bodies and minds had a profound effect on him. “People who differ must stop fighting each other and start understanding each other,” he frequently said to me. He is equally convinced that everyone can do a lot right at home to speed the understanding process, to “wage peace”.

**at home campaign**

Doc’s personal at-home campaign began in 1951 after he and Kathryn had vacationed in West Germany. An American official there had asked them to talk to some young German doctors who were just back from a State Department-
sponsored visit to the United States. What did they think of America?

Doc’s diagnosis, after chatting with the young doctors, was emphatic. “They don’t think much of America because they really haven’t seen it. They’ve only been wined and dined, and whisked around on a grand tour of super hospitals.”

What was needed was sky-blue clear to him. “We’re spending too much time and money trying to show them how wonderful we are! Let’s let the other fellow feel important, too—by earning his own way, by giving us something in return for what we give him. Then we won’t have ‘charity’ but cooperation.”

The Reads came up with a plan. “We’d like to ‘adopt’ some bright young German medical graduates and bring them to the United States for a year,” they said to the State Department. “Let them make a tough living doing a lot of grubby hard work in some of our community hospitals, just the way our own interns do. That way, they’ll leave America liking it or not liking it, but at least knowing it.”

ventnor foundation

Thus was launched one of today’s most effective schemes for breaking down national barriers in world medical circles. In the last dozen years the Read Plan (also called the Ventnor Foundation, because a few people in Ventnor City and elsewhere put up a little money and a lot of work to smooth its operation) has brought to the United States, and made friends of, more than 750 young doctors from five nations. Most have come from Germany, Austria, and Switzerland; but, recently, there have also been interns from India and Poland.

Like most Read prescriptions, this one is easy to take. The program doesn’t cost any government a cent, and it works to the mutual benefit of everyone concerned. Qualified medical-school graduates who want to come to the United States to intern go straight to the community hospitals where they are to work. These hospitals (eight of them in New Jersey and three of them in nearby states) pay them the same salaries as they pay American interns, even advance them transportation costs. Shortly after their arrival, the newcomers visit Ventnor City to meet the Reads, who hold open house for them one weekend each month, keep in touch with them while they’re in this country, and otherwise treat them like sons and daughters.

The flocks of young doctors who thus alight at “Read’s Roost” on a typical open-house weekend receive from Doc and Kathryn exactly what I was given—plenty of sympathetic advice, serious help with their careers. They learn that somebody in this country cares enough about them to help them personally in hundreds of ways, big and small.

Most newcomers find it hard to believe at first that the “foundation” sponsoring them consists mainly of this one couple in moderate circumstances who do everything from arranging jobs and transportation to seeing that they get an initial break at their hospitals. Doc urges hospital administrators to arrange for these interns to get into all kinds of homes, mix with all kinds of people. And, in the secondhand jalopies that Doc encourages them to buy, most of them manage a trip to the West Coast and back at the end of their 12-month stint here. Tours of 12,000 miles for $250 are not exceptional, because the Reads alert friends throughout the country to show the travelers around and take them into their homes.

Twice a year, Doc and Kathryn Read bring together all their latest protégés, some 75, for a “big weekend”—once in Atlantic City, once in Philadelphia—so that all of them can get to know one another. Hilt Read manages to assemble a remarkable group of co-hosts and speakers on these occasions—eminent physicians, educators, generals, State Department leaders.

“How do you manage to rope in such very high brass?” I once asked him.

“It’s easy,” he said. “I invite only people big enough to share what they’ve got with the human race.”

By the end of their year in the United States, most of the interns have made what is, to them, a startling discovery: that Americans are pretty much the same kind of people as they themselves are. This is such an eye-opener that few leave the country without paying a last call on the Reads and asking, “How can we ever thank you?”

work hard and sing low

“Not by going home and waving the Stars and Stripes,” Doc tells them. “Just work hard and
sing low. Let your work speak for you—and for us.”

The Read program continues to grow from year to year. One reason: it has helped to relieve the U.S. hospital house-staff shortage.

A more important reason for its success is this: most members of the growing Read family are “working hard and singing low” for democracy, not only in their home nations but in some 20 other countries, including Nigeria, Formosa, Iran, Israel, Indonesia, Afghanistan, Pakistan and South Vietnam. Their services as Western-oriented ambassadors are especially valuable in the underdeveloped and politically uncommitted areas. One outstanding Read alumnus, for instance—Dr. Ulrich Krech, of Switzerland—has established programs for treatment of virus infections in many parts of the Congo and other underdeveloped areas. Another alumnus, Dr. Richard Emmerich, has performed thousands of sight-saving operations in India.

Doc Read’s program for international friendship and his warm, personal medical philosophy have impressed many people, but none more than the young medical student who came to him with plans for becoming a surgeon. Long ago I chucked that idea and became, like him, an internist. And today, whenever I see him in action, I return to my patients and students with renewed assurance.

Every doctor is troubled—and humbled—by the widening gap between the enormous amount of new medical knowledge available and, on the other hand, the ability of the human brain to comprehend only a small percentage of it. The profound lesson that Doc teaches is this: no matter how complex science becomes, the timeless human heart and the capacity to care will always remain a doctor’s greatest asset.

---

Dr. John Montgomery Honored

“ON THE OCCASION of your retirement as head of the Department of Obstetrics and Gynecology at Jefferson I want to take this occasion to extend to you the sincere thanks of the Board of Trustees for your years of dedicated service and teaching at Jefferson,” wrote Mr. James M. Large, Chairman of the Board of Trustees, to Dr. John B. Montgomery who retired on February 1.

“We recognize that you have carried on in this Department on the same basis as full time heads without one cent of compensation during all those years. You have added to the prestige and standing of the Department through the years and you have rendered most distinguished leadership throughout the entire period. The Board is most appreciative of the sacrifices that have been involved and of the wonderful leadership you have given to this Department.”

Another tribute was paid Dr. Montgomery on Friday evening, January 29, 1965, in the Mirage Room of the Barclay Hotel, where the Staff, the Jefferson Obstetrics and Gynecology Ex-Residents Society, present residents, and fellows gathered for a dinner in honor of Dr. Montgomery. Seventy-four persons attended the tribute dinner.

Dr. Amos S. Wainer, Assistant Professor of Obstetrics and Gynecology, acted as master of ceremonies. Speakers included Dr. Lewis C. Scheffey, Professor of Obstetrics and Gynecology, Emeritus; Dr. Arthur First, Associate Professor of Obstetrics and Gynecology; Dr. Joseph Stella, President of JOGERS; Dr. John Keefe, resident; Dr. I. C. Lintgen, Clinical Professor of Obstetrics and Gynecology, and Dr. Thaddeus L. Montgomery, Professor of Obstetrics and Gynecology, Emeritus.

Dr. Lintgen, on behalf of the staff and JOGERS presented Dr. Montgomery with a properly inscribed gold watch. Dr. Keefe presented Dr. Montgomery with a desk set from the residents and fellows.

Following his retirement from Jefferson, Dr. Montgomery was appointed Director of the Obstetrical and Gynecological Service and Chief of the Department at Methodist Hospital, Philadelphia.
"Four things a man must learn to do if he would make his record true:
To think without confusion, clearly
To love his fellow man, sincerely
To act from honest motives, purely
To trust in God and heaven, securely"

Thus Dr. George Willauer epitomized the life and work of Dr. John B. Montgomery, Professor of Obstetrics and Gynecology, Emeritus, upon the presentation of Dr. Montgomery’s portrait to the College on February 24, 1965.

Dr. Willauer, a long-time friend of Dr. Montgomery, in tribute to him said, “John B. Montgomery, whom we honor this day is a man who frequently exhorts his students, neighbors and friends to ‘renew the Spirit’. Renewal is part of his daily life, and because of this philosophy he has brought light, hope, health and encouragement to countless numbers of students, patients and friends.

“Dr. Montgomery graduated from Jefferson Medical College in 1926 and has spent his entire professional life within her halls. Excellent training in his early years by the late Professor Brooke Anspach fitted him for the increasing responsibilities of teaching and administration that the College requested of him. In 1952 he was appointed Professor of Obstetrics and Gynecology, Co-chairman of the Department of Obstetrics and Gynecology in 1955 and Chairman in 1961.

“During his busy career he has served on many key committees dealing with affairs of health, welfare and education of six of the top national societies in his specialty. This kind of endeavor also carried over into the activities of the local and state societies. For good measure
the Montgomery name appears on eight of eleven Jefferson College and Hospital committees.

"'J.B.' as he is affectionately known to many of the staff, was born in the heartland of Pennsylvania, graduating from Juniata College in 1921. He was honored by his College with the honorary degree of Doctor of Science in 1952 and in turn has served for many years as a Trustee of Juniata.

"His contributions to the medical literature are numerous and varied. They reflect his interest in the many avenues of research carried out in his Department, and particularly in the field of clinical obstetrics and gynecology relating to diagnosis, treatment and the long-term follow-up of the patients entrusted to his supervision and care. Patients and students have benefited by his attention to details which is an all-important trait of this kindly man.

"Surely", Dr. Willauer concluded, "it is evident that no man could be so involved in daily life without the good fortune of having a devoted and understanding wife. This is so true of Elizabeth Haines Montgomery. Elizabeth Haines and John B. Montgomery were married May 31, 1926. Their son, Bruce B. Montgomery, is senior resident of the Department of Obstetrics and Gynecology."

Mr. Ward L. Jones, President of the Senior Class, when he opened the ceremonies, which were held in the Amphitheatre of the College, said, "Dr. Montgomery is known widely in the medical world as you good friends readily recognize. To the field of Obstetrics and Gynecology he has devoted his life. However, his allegiances cover more than this professional specialty.

"It comes as no surprise that he was the head of his class in his collegiate days, was an honor student at Jefferson and became a tireless, intellectual pursuer of obstetrical and gynecological problems as a practitioner. Yet the Class of 1965 chooses to honor John B. Montgomery the man, as well as John B. Montgomery the scholar."

Mr. Jones reviewed a number of the very worthwhile things that Dr. Montgomery has done at Jefferson—such as procuring better accommodations for students on night call, sponsoring and financing students and residents in connection with national meetings and contributing generously to funds for student loans.

"Somewhere in his busy schedule," Mr. Jones said, "he seems to find time to spend with interested individuals whether problems are related to obstetrics and gynecology or not. He has supervised the curriculum and taken many hours of the lecture schedule himself, always keeping in close association with the medical students. This personal interest is almost his own trademark and is directed to students and patients equally and to Jefferson as a whole. This philosophy of individual consideration exemplifies the human aspect of medicine. His words are 'If you can't help the patient, don't hurt that patient'. This is sound advice for medicine in general.

"I would like to point out that there is more than tradition involved with this presentation, for it is our opportunity to honor Dr. Montgomery and have him remember our gratitude. Furthermore, I would add that this is no eulogy for he is an active man and is continuing his work at another hospital with the same enthusiasm and concern he has always displayed.

"Therefore," Mr. Jones concluded, "to John B. Montgomery, a gentleman with the gift of communication and an abundance of personal integrity, the Class of 1965 proudly presents this portrait, keeping in mind that it is small recompense for such a devoted, loyal son of Jefferson."

Mrs. Amilu Martin, Chairman of the Portrait Committee, unveiled the portrait which was
painted by Mr. Alden Wicks, who also executed the portraits of Doctor Alpers and Doctor Cantarow.

The portrait was accepted on behalf of the College by Dean Sodeman, who congratulated the Seniors for their wisdom in having chosen Dr. Montgomery to honor in this way. He said their selection pleased him personally and pleases the entire faculty as well.

Dean Sodeman spoke of Dr. Montgomery's great devotion to Jefferson. "All know how hard he works," Dr. Sodeman said, "but only those of us who have added burdens to his already heavy duties understand how much he has done for Jefferson. He has performed above and beyond what he needed to do and above and beyond what anyone would ask him to do."

In accepting the portrait, Dr. Sodeman commented that it is a fine addition to Jefferson's already outstanding art collection and its quality is worthy of the other fine portraits of distinguished members of our faculty.

Dr. Montgomery appeared deeply touched by the honor being paid him and said that it is a wonderful thing to have friends.

"Of all relationships that come to an individual," he said, "his friends stand him in best stead and Mr. Jones, Dr. Willauer, Mr. Wicks and the Seniors have shown themselves to be very fine friends. Mr. Wicks has presented me as I should like to be and has not picked up any of my very bad defects of character, disposition and looks.

"To the Class of 1965—I could not put into words my feeling of gratification and appreciation. I accept this fine tribute not only as an expression of affection and appreciation to me, but as an even deeper tribute to the clinical aspects of medicine and to the Department of Obstetrics and Gynecology which has for many years been devoted to serving the patient. This was very true under the direction of Dr. Scheffey and Dr. T. L. Montgomery and I have been simply a recent director who has continued this emphasis of serving the patient and the student. This, it seems to me, is the essence of medical practice."

Mr. Jones closed the ceremonies with brief remarks and stated that the portrait will be on display in the Library.

PROMOTIONS, NEW APPOINTMENTS AND RESIGNATIONS

PROMOTIONS

FRANZ GOLDSTEIN, M.D., from Assistant Professor of Medicine to Associate Professor of Medicine.

JOHN JOSEPH MORAN, B.S., M.D., from Assistant Professor of Pathology to Associate Professor of Pathology.

J. Woodrow Savacool, B.S., M.D., from Assistant Professor of Clinical Medicine to Associate Professor of Clinical Medicine.

PETER A. THEODOS, A.B., M.D., from Assistant Professor of Clinical Medicine to Associate Professor of Clinical Medicine.

JOHN WILLIAM COX, M.D., Ph.D., from Associate in Medicine to Assistant Professor of Medicine.

IRWIN L. STOLOFF, M.D., from Associate in Medicine to Assistant Professor of Medicine.

ALBERT A. BOCKMAN, M.D., from Associate in Medicine to Assistant Professor of Clinical Medicine.

HERBERT E. COHN, B.S., M.D., from Instructor in Surgery to Associate in Surgery.

Laird G. Jackson, B.A., M.D., from Instructor in Medicine to Associate in Medicine.

Edwin U. Keates, B.S., M.A., M.D., from Assistant in Ophthalmology to Associate in Ophthalmology.

Louis Pierucci, Jr., B.S., M.D., from Instructor in Surgery to Associate in Surgery.

Miles H. Sigler, B.A., M.D., from Instructor in Medicine to Associate in Medicine.

Charles Schnall, B.S., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

Randall R. Strawbridge, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

Herbert A. Yantes, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

Stanley N. Cohen, B.S., M.D., from Assistant in Medicine to Instructor in Medicine.

Philip J. Dorman, M.D., from Assistant in Medicine to Instructor in Medicine.

David Flinker, A.B., M.D., from Assistant in Medicine to Instructor in Medicine.

Sol Lubin, B.S., M.D., from Assistant in Medi-
cine to Instructor in Medicine.

Patrick J. McKenna, Jr., B.S., M.D., from Assistant in Medicine to Instructor in Medicine.

Charles F. Milon, B.S., M.S., M.D., from Assistant in Medicine to Instructor in Medicine.

Robert H. Schwab, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

Emanuel Sufrin, M.D., from Assistant in Medicine to Instructor in Medicine.

William S. Tassman, B.S., M.D., from Assistant in Ophthalmology to Instructor in Ophthalmology.

Joe Ed Whetsell, M.D., from Assistant in Medicine to Instructor in Medicine.

James K. Young, A.B., M.D., from Assistant in Medicine to Instructor in Medicine.

**APPOINTMENTS**

Roy G. Holly, B.S., M.D., Ph.D., Professor and Head of the Department of Obstetrics and Gynecology.

Abraham E. Rakoff, B.A., M.D., Professor of Medicine (Endocrinology).

Daniel Lieberman, A.B., M.D., Assistant Professor of Clinical Psychiatry.

Warren J. Muhlfelder, M.D., Assistant Professor of Clinical Psychiatry.

Angelina M. Fabrizio, B.S., M.S., Ph.D., Research Associate in Pathology.

Ruth K. Silver, B.S., M.S., D.Sc., Research Associate in Medicine.

Betty G. Weiss, A.B., M.S., Research Associate in Otolaryngology (Audiology).

William B. Kinlaw, B.S., M.D., Associate in Clinical Medicine.

Irving Nissenbaum, M.D., Associate in Clinical Psychiatry.

Newton C. Birkhead, M.D., M.S., Ph.D., Visiting Lecturer in Physiology.

James R. Cunningham, B.A., M.D., Instructor in Psychiatry (Child Psychiatry).

Max M. Koppel, M.D., Instructor in Urology.

Francis V. Kostelnik, B.S., M.D., Instructor in Pathology.

Marvin M. Lindell, Jr., B.S., M.D., Instructor in Radiology.

James R. Regan, B.S., M.D., Instructor in Medicine.

Leon P. Scicchitano, B.S., M.D., Instructor in Surgery.

Erwin R. Smarr, M.D., Instructor in Psychiatry.

Leonard J. Thompkins, A.B., M.D., Instructor in Pathology.

Seymour J. Viener, B.A.(Chem.), M.D., Instructor in Psychiatry.

Eugene J. Zawoiski, A.B., M.A., Ph.D., Instructor in Physiology.

Peter Amadio, Jr., B.S., M.D., Assistant in Medicine.

Roy H. Hand, B.S., M.D., Assistant in Surgery.

Joseph L. Magrath, Jr., A.B., M.D., Assistant in Surgery.

Bruce Robertson, B.S., M.D., Assistant in Pediatrics.

Louis H. Sweterlitsch, Jr., A.B., M.D., Assistant in Ophthalmology.

Jacques DeCaeestecker, M.D., Nathan L. Hatfield Fellow in Urology.

Kamal Puri, M.B.B.S., Research Fellow in Medicine (Hematology).

Jung-Ching Liu, B.M., Teaching Fellow in Otolaryngology.

**CHANGES OF TITLE**

John H. Hodges, B.S., M.D., from Professor of Clinical Medicine to Ludwig A. Kind Professor of Medicine.

Ralph E. Dwork, B.S., M.P.H., from Visiting Associate Professor of Preventive Medicine to Visiting Professor of Preventive Medicine.

Herman L. Rudolph, B.S., M.D., from Assistant Professor of Medicine (Physical Medicine) to Assistant Professor of Medicine (Physical Medicine and Rehabilitation).

Benjamin Galkin, B.A., M.S., from Associate in Radiology (Radiologic Physics) to Associate in Radiology (Radiation Physics).

**RESIGNATIONS**

Harold F. Chase, B.S., M.D., Professor of Clinical Anesthesiology.

William B. Abrams, B.S., M.D., Associate in Medicine.

Danura Daniec, M.D., Research Associate in Pediatrics.

William M. McFadden, A.B., M.D., Associate in Clinical Pediatrics.

Barry J. Schwartz, A.B., M.D., Instructor in Psychiatry.
Dr. Hodges Named First Ludwig A. Kind Professor of Medicine

THE widow of Ludwig A. Kind, who was the retired president of the Kind and Knox Gelatin Company in Camden, New Jersey, when he died in 1960, has established an endowed Chair of Medicine at Jefferson Medical College in his memory. At Mrs. Kind's request, Dr. John H. Hodges has been named as the first Ludwig A. Kind Professor of Medicine.

Dr. Hodges has treated as patients at Jefferson Medical College Hospital both the late Mr. Kind and Mrs. Kind, who lives in Cherry Hill, N. J.

"Mrs. Kind's benefaction is not only a memorial to her husband but is also an expression of her generosity and a tribute to the staff and personnel of Jefferson," Dr. Hodges commented.

Born in Harpers Ferry, West Virginia, Dr. Hodges is the son and son-in-law of physicians. He was graduated from the College of the Catholic University of America in 1935 and from Jefferson Medical College in 1939 as an honor student.

He interned at Philadelphia General Hospital, and except for that period, and a year (1941-1942) in general practice in Martinsburg, West Virginia, Dr. Hodges has spent his entire medical career—nearly 30 years—at Jefferson, as student, resident, faculty member and attending staff physician.

After a four-year residency at Jefferson, he qualified as an Internist and has since been active in many areas in the field. A popular professor, he was honored by both the 1951 and 1962 Jefferson classes who dedicated their yearbooks to him.

A fellow or member of 15 scientific societies, including the American College of Physicians, the American Society of Tropical Medicine, the American Heart Association, and the International Society of Hematology, Dr. Hodges is also an attending physician at the Veterans Administration Hospital and a consulting physician at Lankenau Hospital. He is the author of Manual for the Laboratory of Clinical Medicine and numerous scientific articles.

He has been active in Alumni affairs as a Vice President of the Association and as a Class Agent. Dr. Hodges is married to the former Elizabeth Wallace, daughter of Dr. and Mrs. William A. Wallace. Dr. Wallace is a 1920 graduate of Jefferson Medical College.

The Kind Chair marks the third endowed professorship in the Department of Medicine. The Magee Professorship of Medicine, founded in 1916, is held by Dr. Robert I. Wise, head of the department, and The Thomas Drake Martinez Cardeza Research Professorship of Research Medicine (Hematology), founded in 1941, is occupied by Dr. Allan J. Erslev, who is also director of the Cardeza Laboratories.

PART-TIME AND FULL-TIME TEACHING

By William A. Sodeman, M.D.
Dean and Vice President for Medical Affairs

I have been asked many times if the concept and plans at Jefferson are to establish a full-time faculty and staff and eliminate the part-time and voluntary group. The answer is an emphatic no!! Both full-time and part-time or voluntary faculty supply vital elements to the teaching and patient care program not supplied by each other. I have therefore entitled these remarks part-time and full-time teaching and not part-time versus full-time. To eliminate one or the other would make undesirable gaps in our program and would expose our students to an incomplete approach to the study and care problems in health and disease.

At the clinical level, a solid core of full-time staff to administer programs, to man special laboratory areas, and to carry through on research is essential. This principle is recognized not only in the medical schools, but even now in community hospitals, many of which have full-time Directors of Education and gradually at present are developing full-time heads of major departments. Many of the full-time staff are oriented in investigation and bring to their departments, the staff generally, and the students concepts of disease and disease mechanisms in depth, knowledge on the research frontiers of medicine, and investigations into unknown areas. Their interest and concern in these areas also involve the techniques and procedures of the basic sciences in their studies. Such activities often give them the title "academic," "ivory tower," or "non-practical," even though they may be fine clinicians and teachers as well.

The part-time or voluntary teacher who is in practice in the community is less likely to participate in administrative and day-long activities at the medical center. He usually does not have a prime interest in basic research and devotes the major segment of his time to taking the newer knowledge, the fruits of science, and applying them inside as well as outside the hospital to the varying problems of patients as they present themselves. Thus, he is "practical," sees particular patients often over longer courses in the natural history of disease, is more likely to see the patient as an individual reacting to his environment and to his disease process, may better understand the individual as a whole. He understands the patient with disease in greater depth rather than merely the disease and its processes basically to chemical and subcellular level. He too should be a fine teacher as well as a good clinician.

Obviously the activities of both types of individual are important, not only to the medical center but to the teaching of house officers and students. To eliminate one or the other produces a gap in the broad spectrum of study essential to the student. Both, in common, are teachers and clinicians, one basically concerned with investigation, the other with more extensive clinical activities. Each contributes to the educational environment, and there should be a happy sharing of the clinical teaching by each. To quote another recent editorial, which appeared in the September 24, 1964, issue of The New England Journal of Medicine: "In many teaching hospitals there continues to be a happy sharing of clinical teaching by the full-time and part-time faculty members. In most cases the two groups have worked amiably and in concert, in large measure because they share the key interests of concern for patient care of the highest order, founded upon compassion for the sick and the application of a scholarly, scientific approach to each clinical problem, enthusiasm for and appreciation of the value of participation in a teaching-learning experience and an interest in taking part in the education of tomorrow's physicians."

All teachers, full-time or part-time, must recognize the responsibilities attending their role as teachers—the willingness to put forth the necessary time and effort to discharge teaching
assignments effectively. All must recognize and accept the responsibilities as well as the privileges of faculty appointments. A good balance in the activities of each group is the proper goal with joint participation in clinical teaching.

In some medical schools faculty is heavily weighted on one side or the other. Criticisms that research and research activities are engulfing some schools indicate the concern in certain quarters that the pendulum has swung too far in those institutions to the research institute side. This depends upon the goals of the institution. At Jefferson we hope to turn out students with a balanced experience permitting them to choose for the future from a well rounded undergraduate exposure. This we can do, and plan to continue to do, through a well balanced faculty and staff, one in which the full-time teacher and full-time investigator interrelates with the fine, skilled practitioner at the forefront in medical practice in the production of graduates knowledgeable in the activities of both groups. This is the goal of our policy-making faculty groups, the administrative officers and our Board of Trustees which has repeatedly reaffirmed and put their stamp of approval on our goal.

State of Israel Pays Tribute to Philadelphia Physicians

Dr. William A. Sodeman, Dean and Vice President for Medical Affairs, and Dr. Samuel Bellet (Jeff '25), Director of the Division of Cardiology of Philadelphia General Hospital, were two of three Philadelphia physicians honored at a State of Israel Tribute Dinner, December 20, for their contribution to Israel's medical education program.

The three local doctors were part of a five-man faculty designated by the American College of Cardiology and the U.S. State Department to present a series of lectures on cardiovascular diseases at the Hebrew University in Jerusalem.

State Senator Israel M. Stiefel directed the tribute dinner, which featured Milton S. Chase of the U.S. Department of the Interior, as keynote speaker.

Photo taken during the State of Israel Dinner shows (from left) Dr. William Likoff, Dr. Sodeman, Dr. Bellet, Milton A. Chase, member of the U.S. Department of Interior and member of the U.S.A.—Israel Desalination Commission, who was the guest speaker, and Benjamin B. Levin, member of the board of governors of the local Israel Bond Committee, who made the presentations.
News of College Departments

ADMINISTRATION

Dr. William A. Sodeman, Dean and Vice President for Medical Affairs, spoke before a session of the Council on Medical Education of the AMA during the 61st Annual Congress on Medical Education in Chicago, February 6-9. The topic of Dr. Sodeman's talk was "The Responsibility of Medicine to the Basic Sciences."

ANATOMY

Dr. James O. Brown, Associate Professor of Anatomy, participated in the program of the 77th Annual Meeting of the American Association of Anatomists held in Denver, Colorado, March 31-April 3. Dr. Brown described a new anatomical finding in a paper titled "Mucosal Reduplications Associated with the Ampullary Portion of the Major Duodenal Papilla in Humans," and related this finding to the problem of reflux pancreatitis. Assisting in this research was senior medical student Robert Echenberg. Dr. Brown has been elected Treasurer of the Sigma Xi Club of Jefferson, and is serving as the appointed chairman of the Sigma Xi Club's Hospitality Committee.

Dr. Albert W. Sedar, Associate Professor of Anatomy, was invited to speak at the meeting of the New York Society of Electron Microscopists on November 18, 1964, held in the New York University Medical Center. Dr. Sedar talked on "Electron Microscopic Studies on the Acid Producing Cells of the Gastric Mucosa."

ANESTHESIOLOGY

Dr. Louis J. Hampton, Professor of Anesthesiology and Head of the Department, and Dr. Donald L. Clark, Associate in Anesthesiology, participated in a symposium on the teaching of anesthesia to medical students at Cornell Medical Center in New York, January 14 and 15, 1965.

BIOCHEMISTRY

Dr. Abraham Cantarow, Professor of Biochemistry and Head of the Department, was one of five physicians honored by the Four Freedoms Lodge of B'nai B'rith during a tribute to the 200th anniversary of medicine in the United States staged by the Four Freedoms Lodge on December 17. A plaque citing the occasion of the Bicentennial of Medical Education in the U.S. was presented to Dr. Cantarow. It cited him "for humanitarian service and unswerving devotion to the medical profession." Dr. Cantarow is serving as Chairman of the Committee on Local Arrangements for the annual meeting of the American Association for Cancer Research, to be held in Philadelphia in April.

DERMATOLOGY

Dr. John F. Wilson, Associate Professor of Dermatology, addressed the Mexican Academy of Dermatology on March 4th in Mexico City on the subject "The Cutaneous Diseases of the Genitals."

Dr. Charles H. Greenbaum, Associate in Dermatology, addressed the Mexican Academy of Dermatology in Mexico City on December 3rd on "The Changing Scene of Dermatologic Therapy."
MEDICINE

Dr. Robert I. Wise, Magee Professor of Medicine and Head of the Department, presented the first Harold Robertson Lecture on January 13, 1965, at Methodist Hospital. His topic was “Concepts of Semmelweis at Mid-Twentieth Century.” He attended a symposium on New Antibiotics sponsored by the San Diego County Medical Society, the San Diego Academy of General Practice, and Lederle Laboratories. Dr. Wise also spoke at the University of Texas on February 18th on “Epidemiology of Staphylococcal Diseases” and participated in a Symposium on Infectious Diseases in Austin, Texas. The Symposium was sponsored by the Travis County Medical Society and Lederle Laboratories.

Dr. C. Wilmer Wirts, Professor of Clinical Medicine, participated in a Postgraduate Seminar on Gastrointestinal Bleeding at the Ohio Valley Hospital in McKees Rocks, Pa., on November 18. On December 15th he participated in a Hahmann Symposium on the stomach and dealt with the topic of “Gastritis.” On December 16 and 17, 1964, he took part in various resident and house staff activities of the Wilkes-Barre Hospital and later addressed the staff on the “Management of Symptoms Following Gastric Surgery.”

Dr. Martin J. Sokoloff, Clinical Professor of Medicine, participated in a television program on January 24th entitled “A Question for the Doctor.” The program, which dealt with “Diseases of the Chest” was coordinated by Dr. Stanley N. Cohen, Instructor in Medicine.

Dr. John H. Killough, Associate Professor of Medicine, and Dr. Robert Schwab, Instructor in Medicine, spoke on “Phonocardiographic Differentiation of Aortic and Pulmonic Insufficiency” at a meeting of The Section on General Medicine of the College of Physicians of Philadelphia on November 23.

Dr. David W. Kramer, Associate Professor of Medicine, Honorary, addressed the Atlantic County (N.J.) Lay Society on Diabetes on October 30, on the topic “Diabetes Past, Present and Future.” Dr. Kramer said that diabetes is on the increase and predicted that there will be more than four million victims of it in the U.S. by 1980.

Dr. Edmund L. Houseal, Assistant Professor of Clinical Medicine, has been voted President-Elect of the Philadelphia County Medical Society.

Dr. Howard C. Leopold, Assistant Professor of Clinical Medicine, attended the Fifth International Congress of Allergology in Madrid, Spain. He presented a paper on “Fluorescent Antibody Studies for Antinuclear Antibodies in Bronchial Asthma.” The co-authors of the paper were Dr. Irwin L. Stoloff, Assistant Professor of Medicine and Dr. Samuel Rynes, Associate in Clinical Medicine.

Dr. Ralph Carabasi, Associate in Medicine, is one of 60 physicians who has been asked by NIH to review data on 4,000 cancer cases treated with Krebiozen. Dr. Carabasi is presently participating in a cooperative study of the Cancer Chemotherapy National Service Center for the evaluation of hormonal treatment of patients with metastatic breast carcinoma.

Dr. John W. Goldschmidt, Associate in Medicine (Physical Medicine) was the principal speaker and panel moderator for Stroke Institute for Nurses on November 18th in Wilkes-Barre. The Institute was sponsored by the Northeastern Pennsylvania Heart Association.

Dr. Miles H. Sigler, Associate in Medicine, was guest speaker at the thirty-third Annual Postgraduate Assembly of the Harrisburg Academy of Medicine. Dr. Sigler spoke on “Recent Advances in Renal Physiology and Renal Function Tests.”

Dr. Patrick J. McKenna, Instructor in Medicine, discussed “Laboratory Diagnosis of Coagulation Defects” at St. Joseph’s Hospital on November 18.

NEUROLOGY

Dr. Ann M. Hirschlhorn, Instructor in Neurology, has been awarded a grant of $20,000 from the Muscular Dystrophy Associations of America.

At the annual meeting of the Philadelphia Neurological Society on January 8, 1965, Dr. Richard G. Berry, Professor of Neurology
(Neuropathology), was elected President of the Society; DR. ELLIOTT L. MANCALL, Associate Professor of Neurology, first Vice-President; DR. JOSEPH C. WHITE, Assistant Professor of Neurology, Secretary; and DR. MARTIN M. MANDEL, Associate in Clinical Neurology, Treasurer. All members of the Department attended the Meetings of the Association for Research in Nervous and Mental Disease in New York, December 2, 3, and 4.

DR. BERNARD J. ALPERS, Professor of Neurology and Head of the Department, participated in a Correlated Clinical Science Course at Bryn Mawr Hospital on January 15. He spoke on “Aspects of Cerebral Vascular Disease.”

DR. ELLIOTT L. MANCALL lectured on “Clinical and Pathologic Features of Cerebral Vascular Disease” at Hunterdon Medical Center in Flemington, New Jersey, on January 30.

DR. JOSEPH C. WHITE attended the Symposium on the Thalamus at the Columbia Medical Center, New York City, November 30-December 1.

DR. MARTIN M. MANDEL addressed the Sixth Annual Symposium on Industrial Nursing on December 3, 1964, at the Bellevue-Stratford Hotel in Philadelphia, on the topic “Headaches: Diagnosis and Management.”

OBSTETRICS AND GYNECOLOGY

DR. WARREN R. LANG, Professor of Obstetrics and Gynecology, presided over a Round Table discussion on “Cytology of Infertility” at the 12th Annual Meeting of the American Society of Cytology in Pittsburgh, November 12-14. Dr. Lang is Secretary-Treasurer of the Society. On November 18th he spoke at Manor Elementary School, Manor, Pa., to a P.T.A. group on “Prevention of Gynecologic Cancer.” December 4-6, Dr. Lang attended the Colposcopy Seminar of the American Society of Colposcopy and Colposcimicroscopy at the Fontainebleau Motel in New Orleans, La. While there he spoke on “False Positive Smears”, “Problems of Cervical Erosion”, and delivered the Presidential Address, “Past, Present and Future of Colposcopy”. He also was moderator of a panel on “Interrelationships of Colposcopy and Colpomicroscopy”. Dr. Lang is President of the American Society of Colposcopy and Colposcimicroscopy. While in Louisiana, Dr. Lang participated in a combined staff conference, Departments of Obstetrics and Gynecology, Louisiana State University and Tulane University. On January 27th he spoke before the Obstetrical and Gynecological Section of the New Jersey Academy of Medicine on “Colposcopy.”

DR. GEORGE A. HAHN, Professor of Clinical Obstetrics and Gynecology, served as Chairman of the Nominating Committee at the annual meeting of the Pennsylvania Cancer Coordinating Committee on November 15, 1964, at the Bellevue-Stratford Hotel in Philadelphia. On December 11th he addressed the senior class and the Tumor Clinic Committee Staff at Woman’s Medical College and Hospital on “Lymphangiography in Gynecology.”

DR. MARIO A. CASTALLO, Clinical Professor of Obstetrics and Gynecology, presented the color and sound moving picture from the American Cancer Society on “The Problems of Early Diagnosis of Pelvic Carcinoma” to the staff and ancillary members of St. Mary’s Franciscan Hospital on January 12. This was followed by a question and answer period on the pertinent facts of this problem.

DR. ALVIN F. GOLDFARB, Assistant Professor of Obstetrics and Gynecology, delivered the following papers during the months of November, December and January: November 15th—Philadelphia Obstetrical Nursing Society—“Recent Advances in the Treatment of Fertility”; November 22nd—Sims Society—“Oral Contraceptives”; December 4th—Hahnemann Medical College—“Induction of Ovulation”; December 14th—Margaret Hague Maternity Hospital Staff Meeting—“Recent Advances in the Induction of Ovulation”; December 22nd—Ed Harvey Show, The Talk of Philadelphia—“The Menopause”; January 16th—Symposium, Cedars of Lebanon Hospital, Los Angeles—“Pituitary-Gonadal Suppression—Its Role in Gynecologic Therapeutics.”

DR. JOSEPH A. RIGGS, Assistant in Obstetrics and Gynecology, spoke on “Newer Hormonal Preparations” before the Louis D. Brandeis
Group of Hadassah on November 16th in Cherry Hill, N. J.

ORTHOPEDIC SURGERY

Dr. John J. Dowling, Assistant Professor of Clinical Orthopedic Surgery, presented a paper on “Joint Injuries of the Extremities” at a general symposium for Industrial Nurses at the Bellevue-Stratford, December 3. Dr. Dowling attended the New York Meeting of the American Academy for Cerebral Palsy, December 8-12.

OTOLARYNGOLOGY

Dr. Fred Harbert, Professor of Otolaryngology and Head of the Department, spoke on “Benign Positional Nystagmus and Vertigo” before the Section on Otolaryngology, College of Physicians of Philadelphia on November 18. He presented a discussion and operative technique on sinus surgery on closed circuit television at the Ear, Nose and Throat Symposium of the West Indies University, Kingston, Jamaica, during the week of January 9-17. The Deafness Research Foundation of New York has awarded Jefferson a $7500 grant for studies to advance scientific understanding of forms of deafness and ear disorders. Dr. Harbert is the principal investigator in the project.

Dr. John J. O'Keefe, Clinical Professor of Otolaryngology, spoke on “The Development of Bronchoscopy at Jefferson” before the Section of Medical History of the College of Physicians of Philadelphia on December 8. Dr. O'Keefe attended the Eastern Section Meeting of the Triological Society in Boston, Mass. on January 7-8, at which time he presented a paper entitled “Adjuvant Tumor Chemotherapy in Advanced Head and Neck Cancer.”

Dr. Joseph Sataloff, Associate Professor of Otolaryngology, spoke on “Examination of the Ear” at the General Electric Missile and Space Division’s sixth annual Symposium on Industrial Nursing on December 3. During the week of January 9-17, he presented a paper and operative technique on stapes surgery on closed circuit television during the Ear, Nose and Throat Symposium of the West Indies University, Kingston, Jamaica.

Dr. William J. Hitschler, Associate in Otolaryngology, spoke on “Perforation of the Temporal Bone with a Bobby Pin Causing Facial Paralysis” before the Section of Otolaryngology, College of Physicians of Philadelphia, November 18.

PATHOLOGY

Dr. Gonzalo E. Aponte, Associate Professor of Pathology, spoke on “Renal Lesions Associated with Electrolyte Imbalance” at the Symposium on Serum Electrolytes held in Washington, D. C., on November 13, 1964, under the auspices of the Association of Clinical Scientists. On November 30 and December 1, he attended the biannual meeting of the Educational Council of Foreign Medical Graduates of the National Board of Medical Examiners. On December 8, 1964, he spoke on “Thomas Eakins” at a meeting of the Section on Medical History of the College of Physicians of Philadelphia.

Dr. George Studzinski, Assistant Professor of Pathology, was interviewed on Radio WTEL on November 22, 1964, about the contribution of men of Polish background to medical teaching and research in the Philadelphia area. The discussion centered on the various members of the Jefferson faculty with Polish antecedents. The progress of students at Jefferson of Polish parentage was also noted.

PEDIATRICS

Dr. Hans G. Keitel, Professor of Pediatrics and Head of the Department, attended the American Academy of Pediatrics’ Institute on Mental Retardation held in New York during October. He also was a keynote speaker for the A.C.O.S., and spoke on “Fluid Balance in the Pediatric Surgical Patient.” Dr. Keitel, together with Dr. Elsie Chu, Assistant in Pediatrics, presented a scientific exhibit, “Vitamin K, Administration to Premature Infants” at the American Academy of Pediatrics. In November, Dr. Keitel delivered the annual Howard Carpenter Lecture at the Bryn Mawr Hospital. He represented the Pennsylvania Chapter of the American Academy of Pediatrics at the Pennsylvania Medical Society’s meeting to discuss the Annual Meeting. Dr. Keitel is to serve as Editor for the next two issues of the Pediatric Clinics of North America. These are to be entitled “Pitfalls in Clinical Pediatrics,” based on numerous conferences.
which were attended by academic and clinical pediatricians.

DR. ROBERT L. BRENT, Professor of Pediatrics and Professor of Radiology (Radiation Biology), participated in the third annual Teaching Conference of The Children's Hospital Education and Research Foundation, Inc., of Santa Rosa Medical Center held in San Antonio, Texas, March 13 and 14. The conference, supported by a grant from Merck, Sharp and Dohme, dealt with the fetus, pre-mature and newborn baby.

DR. E. KEEGH HAMMOND, Assistant Professor of Pediatrics, spoke on "Genetics: Clinical Applications" on December 1st before the District Medical Meeting in Fort Wayne, Indiana.

DR. JAMES V. MACKELL, Assistant Professor of Clinical Pediatrics, appeared as guest instructor for the School District of Philadelphia and the Board of Education on their television program on December 12.

PHARMACOLOGY

DR. JULIUS M. COON, Professor of Pharmacology and Head of the Department, presented a seminar on "The Toxicology of Natural Food Products" at the Medical College of Virginia on November 11. On December 2nd Dr. Coon spoke on "Naturally Occurring Toxins in Foods" at the Annual Joint Meeting of the Food Protection Committee and the Industry Liaison Panel, at the National Academy of Sciences, National Research Council, Washington, D. C. Dr. Coon has also been appointed Chairman of the Chlordane Tolerance Advisory Committee to the Food and Drug Administration.

DR. CHARLES P. KRAATZ, Professor of Pharmacology, attended the meetings of the American Association for the Advancement of Science in Montreal, Canada, December 27-31. In November Dr. Kraatz was appointed Pharmacologist on the Formulary Committee of the Medical Department of the Public Assistance Program of Pennsylvania, a committee which determines the prescription drugs which will be issued to patients under this program.

DR. ROLAND W. MANTHEI, Associate Professor of Pharmacology, took the training courses in infra-red technique given by the Perkin-Elmer Corporation in Norwich, Connecticut, January 11-15.

DR. ANTHONY J. TRIOLO, Instructor in Pharmacology, took the course in gas chromatography offered by the F & M Scientific Laboratories in Avondale, Pa., January 20-21.

PREVENTIVE MEDICINE

DR. E. HAROLD HINMAN, Professor of Preventive Medicine and Head of the Department, attended an Advisory Committee meeting at the National Library of Medicine, Bethesda, Maryland, on January 21, to discuss certain Library Programs in overseas countries having Special Foreign Currency Program (PL 480) support. Dr. Hinman is the new president of the American Society of Tropical Medicine.

DR. C. EARL ALBRECHT, Professor of Preventive Medicine (Public Health), spoke on "Is Pennsylvania Meeting Its Public Health Problems?" at the Fifth Biennial Institute, sponsored by the Council on Volunteers of Philadelphia's Health and Welfare Council, Inc., on October 28. Dr. Albrecht served as a Consultant in American Samoa developing and completing the program for a new 165-bed hospital to be constructed by the U. S. Government, for a five-week period during November and December 1964. Following this duty, Dr. and Mrs. Albrecht visited New Zealand, Australia, Malaysia, Thailand, India, Nepal, and Lebanon. Conferences were held with Public Health Officials working under U.S. AID, WHO, and Ford Foundation sponsorship. Others visited were (Jefferson men) DR. CRAIG WALLACE in Calcutta, presently with the Johns Hopkins group doing cholera research, and DR. ROBERT BERRY in Katmandu, Nepal, where he is Chief of Staff and Surgeon at the General Mission Hospital.

DR. HEINRICH BRIEGER, Professor of Preventive Medicine (Occupational Medicine), addressed the Section on General Medicine of the College of Physicians of Philadelphia on January 25. The topic of his talk was "Present Knowledge of Lung Clearance."

DR. HYMAN MENDUKE, Professor of Preventive Medicine (Biostatistics), attended the Annual Meeting of the American Statistical Association in Chicago, Illinois, December 27-30. He organized and was Chairman of a session on "Training in Statistics in Schools of Medicine."
PSYCHIATRY

DR. FLOYD S. CORNELISON, JR., Professor of Psychiatry and Head of the Department, attended the American Medical Association's 2nd Annual Congress of Mental Health in Chicago during December. He also attended the McDonald Child Study Center to review research programs supported by the Vocational Rehabilitation Administration for Mentally Retarded Children, also in December.

DR. ROBERT WAELDER, Professor of Psychiatry (Psychoanalysis), chaired a discussion group on "Basic Concepts" at the mid-winter meeting of the American Psychoanalytic Association in New York on December 3. On December 6th he participated in a panel on WNEW-TV, New York, on "The Psychoanalyst and the American Scene."

DR. EDWARD GOTTHEIL, Associate Professor of Psychiatry, was a panelist on the radio program "Family Forum" during December. The topic of the program was "Retirement—A Reward or a Problem." He recently presented a paper on "A Note on Undergraduate Psychiatric Education" at the American Psychiatric Association Divisional Meeting in Philadelphia.

DR. IVAN BOSZORMENYI-NAGY, Associate Professor of Psychiatry, has been elected Vice President of the newly formed Family Institute of Philadelphia, a non-profit organization of professionals specializing in the area of family psychiatry. On November 9, 1964, Dr. Nagy presented a paper entitled "Concept of Change in Conjoint Family Therapy" at the Theoretical Seminar on the Family and Sexual Behavior Disorders of Adolescent Girls, at the Philadelphia Psychiatric Center.

DR. ALFONSO PAREDES, Associate Professor of Psychiatry, presented a paper, "Incongruous Sexual Behavior in Patients with Sexual Ambiguities" at a meeting of the Mexican Endocrinological Association December 3-5 in Mexico City.

DR. ABRAHAM FREEDMAN, Associate Professor of Clinical Psychiatry, was reporter on a discussion group on "Psychotic Process" at a meeting of the American Psychoanalytic Association in New York City on December 3. Dr. Freedman is Regional Coordinating Editor of Clinical Survey of Psychoanalysis, now being printed. He is also the Philadelphia County Medical Society representative to the Planning Committee of the Pennsylvania Mental Health Association for the Conference on Mental Health to be held in Philadelphia in May.

DR. SAMUEL A. GUTTMAN, Associate Professor of Clinical Psychiatry, spoke on "Some Aspects of Scientific Theory Construction and Psychoanalysis" before the 483rd Meeting of The New York Psychoanalytic Society on February 9.

DR. GERALD R. CLARK, Assistant Professor of Clinical Psychiatry, attended the meeting of the National Association of Private Psychiatric Hospitals, San Diego, California, January 18-20, and presented a paper entitled "Habilitation of the Retarded." Dr. Clark also attended the Fourth Overseas Conference of Private Psychiatric Hospitals held in Honolulu, Hawaii, January 21-23.

DR. HOWARD L. FIELD, Assistant Professor of Clinical Psychiatry, spoke on "Treating the Emotionally Disturbed Patient in Office Practice" in Lancaster, Pa., during December.

DR. J. CLIFFORD SCOTT, Assistant Professor of Clinical Psychiatry, participated in Ed Harvey's "Talk of the Town" over WCAU radio on January 6. On January 19th he presented a paper entitled "Dynamic Aspects of Education for Adolescents" at the convention of NAPPH in San Diego, California.

DR. SHELDON R. RAPPAPORT, Research Associate in Psychiatry, spoke on "Discussion of Deviations in the Development of Brain-Injured Children" at the Syracuse University Graduate School on January 7-8.

DR. WERNER K. R. WELZ, Associate in Clinical Psychiatry, participated in a Symposium on "Clinical Medicine and the Mentally Ill Patient" at the V.A. Hospital, Coatesville, Pa., October 22-28. Dr. Welz was host to Hans Bochnick, M.D., Deputy Head, Department of Psychiatry and Neurology, University of Hamburg, Germany, and Professor of Psychiatry, on the occasion of Dr. Bochnick's visit to the U.S. in November to study National Board Examinations.

DR. JAMES L. FRAMO, Instructor in Psychiatry, spoke on "Family Therapy" at the National Association of Psychiatric Clinics for Children Regional Meeting, October 30th in Allentown. During December he spoke before the Children's
Unit of EPPI on "Rationale and Techniques of Family Therapy."

Dr. Irwin N. Hassenfeld, Instructor in Psychiatry, has been appointed Consulting Psychiatrist to the National Institute of Mental Health (Schizophrenic Family Therapy Project).

Dr. Merrill I. Lipton, Instructor in Psychiatry, spoke on "Some Everyday Problems in Raising Children" before a PTA group in Broomall, Pa., on October 27.

Dr. Leonard Sattel, Instructor in Psychiatry, joined the staff of Friends Hospital in January as Attending Psychoanalyst. Dr. Sattel is Psychiatric Consultant to Burlington County (N.J.) Memorial Hospital and to Cherry Hill (N.J.) Township Schools.

Dr. Shao-Chi Yu, Instructor in Psychiatry, received a citation from the Advisory Commission on Health and Welfare, State of New Hampshire, for his service as Director of Mental Health, 1963-1964. On December 1st Dr. Yu was appointed Chief of Neuropsychiatry at the V.A. Hospital, Wilmington, Delaware. He has also been appointed Assistant Clinical Professor of Psychiatry at Boston University, School of Medicine. On February 2nd he presented a paper entitled "Psycho-physiological Study of Sexual Deviation" before the Research Committee of the V.A. Hospital in Wilmington.

RADIOLOGY

Dr. Philip J. Hodes, Professor of Radiology and Head of the Department, has been re-appointed Chairman of the Medical and Scientific Committee, American Cancer Society, Philadelphia Division. On November 10th, Dr. Hodes addressed the Harry Bock Charities on new research into prenatal detection and diagnosis of birth defects.

Dr. Gerald Dodd, Clinical Professor of Radiology, spoke on "Cineradiography—A Diagnostic and Prognostic Tool" before mid-state physicians on December 3rd at York Hospital.

Dr. Sidney Wallace, Instructor in Radiology, participated in the ninth annual Clinical Conference of the University of Texas M.D. Anderson Hospital and Tumor Institute. Dr. Wallace presented a paper which was co-authored by Dr. Dodd, Dr. Laird Jackson, Associate in Medicine, and Dr. Roy Greening, Professor of Radiology.

SURGERY

Dr. Thomas F. Nealon, Professor of Surgery, discussed "The Management of Cancer of the Lung" before a meeting of the Lackawanna Medical Society on January 26.

Dr. Nicholas T. Zervas, Associate in Surgery (Neurosurgery), discussed the surgery of Parkinson's Disease and related disorders before the Dauphin County Medical Society and the Harrisburg Academy of Medicine on February 2.

Dr. Aaron Finkelman, Associate in Clinical Surgery (Oral Surgery), gave an address at the National Hemophilic Meeting Luncheon in Washington, D.C., December 4th, with Dr. Luther Terry and Senator Keating. Dr. Finkelman also gave a lecture in Oral Surgery on Hemophiliacs at the same meeting.

Dr. Edward D. Weiss, Associate in Clinical Surgery (Proctology), was recently elected to Fellowship in the American Proctologic Society and the Pennsylvania Proctologic Society.

UROLOGY

Dr. Theodore R. Fetter, The Nathan Lewis Hatfield Professor of Urology and Head of the Department, attended the meeting of the Societe International D'Urologie in London and the meeting of the British Association of Urological Surgeons, Sheffield, England, early in September. At the Sheffield meeting lantern slides demonstrating the work on urodynamics now in progress in the Research Laboratory of the Department of Urology at Jefferson, were shown.

Dr. David M. Davis, Professor of Urology, Emeritus, participated in a discussion on Urinary Tract Infections at the meeting of the British Urological Surgeons, Sheffield, England. Dr. Davis is Vice President of the Societe International D'Urologie and actively participated in the annual meeting of the Societe in London.

Dr. Paul D. Zimskind, Assistant Professor of Urology, presented a paper, "Effect of Renal Vascular Occlusion on Pelvic and Ureteral Pressures in Dogs" at the Forum on Fundamental Surgical Problems during the American College of Surgeons Annual Clinical Meeting in Chicago, October 1964. He presented a film "Kine-urom-
try: Simultaneous Recording of Intraluminal Pressure and Cine-fluoroscopic Images in the Urinary Tract” at the Mid-Atlantic Section meeting of the American Urological Association, Williamsburg, Va., November 5. This film was produced through the joint efforts of Drs. Zimskind, Dr. Roy R. Greening, Professor of Radiology, Dr. Davis and Dr. Fetter. On November 19th he presented a paper, “Studies in Urodynamics” at the Annual Clinic Day Meeting at Trenton Mercer Hospital, November 19.

Dr. Eugene S. Felderman, Instructor in Urology, was awarded “First Prize” for one of his cases at the Pyelogram Conference of the Mid-Atlantic Section Meeting of the American Urological Association in Williamsburg. The case was presented by Dr. Jules H. Bogaev, Assistant Professor of Urology, in Dr. Felderman’s absence.

Dr. Jean-Pierre Paquet, Senior resident in Urology, presented a paper, “Abdominal Masses in the Newborn” at the Mid-Atlantic Section meeting of the American Urological Association at Williamsburg, Va. The paper was co-authored with Drs. Fetter and Bogaev.

Symposium on the Stomach and Its Sphincters Attracts World Authorities

THE Symposium on The Stomach and Its Sphincters held February 14-16 at the Warwick Hotel under the sponsorship of Jefferson Medical and The Pennsylvania State University brought together authorities in all facets of the health sciences that relate to the gastrointestinal tract, particularly the stomach. Program chairman for the Symposium was Dr. Philip J. Hodes, Professor of Radiology and Head of the Department.

Research in the gastrointestinal tract has been going on for years. Very careful biochemical and physiological responses of the stomach and its sphincters have been measured in the past leading to conclusions that seemed justified. Recent advances in electronic disciplines have added a much greater degree of precision to these measurements. Of extreme importance are the microsecond responses to events in the intestinal tract that can be recorded today which just a few years ago escaped detection. This type of recording when added to modern X-ray techniques utilizing moving picture, television, and videotape equipment has made mandatory the re-evaluation of previous concepts.

In addition to a consideration of normal and abnormal dynamics of the stomach and its sphincters, the conference dwelt at length on the earliest manifestations of cancer of the stomach. Participants Dr. Albert Jutras (Professor of Radiology, University of Montreal, Canada) and Dr. Roger Gareau (Associate Professor of Pathology, University of Montreal) have recently been reviewing very early cancers of the stomach and have found changes in physiological responses in the stomach which they believe precede the time-tested appearances of the tumor itself. Whereas in the past radiologists had to be able to demonstrate the presence of a growth in the wall of the stomach before suspecting the presence of cancer, there is good evidence now that before the visible presence of these tumors there occurs an alteration in the motor activity of the stomach (peristalsis). If their evidence bears the test of time and wider experience, this will be an extremely important break-through in the early diagnosis of gastrointestinal malignancy. In this regard, too, from Montreal, Dr. Harry S. Morton (Associate Professor of Surgery, McGill University) has developed “Electrogastrography” for the detection of cancer and other ailments of the stomach. The technique is not unlike the techniques used in electrocardiography by means of which estimates of cardiac function and cardiac diseases are commonly recorded.

Other speakers included Dr. Wolfgang Frik (Associate Professor of Clinical Radiology, University of Erlangen-Nurnberg, Germany). Dr. Frik, who is Head of the X-ray Department of the famous Henning Gastrointestinal Clinic at the University of Erlangen-Nurnberg, has collaborated in the study of thousands of stomachs in which X-ray findings have been correlated with biopsies obtained by special techniques from the wall of the stomach. Nowhere in the world has this type of experience been as great as that attained by Dr. Frik.
Also presented were the extremely important basic electron microscopic observations of Dr. Albert W. Sedar (Associate Professor of Anatomy, Jefferson Medical College) whose findings have received world-wide recognition. The Symposium also considered the observations of gastric blood flow, cinegastroscopy, microscopic examination of secretions from the stomach, and the use of miniature geiger counter probes in the intestinal tract. Dr. Robert S. Nelson (Internist and Chief of the Gastroenterology Section of the University of Texas) has made important observations on the latter and discussed these findings at the conference.

Dr. Owen H. Wangensteen (Professor and Chairman, Department of Surgery, University of Minnesota Hospital) reported on the progress now being made in gastric cooling in the treatment of gastric ulcers, particularly bleeding ulcers. Drs. Charles F. Code and Harley C. Carlson (both of the Mayo Clinic, Rochester, Minnesota) have been interested in fundamental physiological concepts which often are associated with internal symptoms and related their findings using the latest recording techniques combined with coincident X-ray recording.

Dr. Frank T. Brooks (Associate Professor of Physiology, and Associate Professor of Medicine, School of Medicine, University of Pennsylvania) and his clinical associate Dr. Gerard P. Smith discussed the type of instrumentation now available for use not only in basic research in the laboratory but which can be used with ease and little or no discomfort in patients for extending knowledge so very important in understanding the innumerable illnesses to which the stomach and its sphincters are host.

Extremely important throughout this scientific meeting were the numerous opportunities for free discussions between the essayists and the audience. These discussions enjoyed the leadership of Dr. Henry Bockus (Professor of Medicine, Emeritus, University of Pennsylvania) and Dr. Ross Golden (Visiting Professor of Radiology, University of California, Los Angeles Medical Center).

Recent Advances In Surgery

The Continuing Education Program of Pennsylvania State University and Jefferson Medical College will conduct a symposium on Recent Advances in Surgery at Pocono Manor on May 6, 7, and 8, 1965.

The program will cover Trauma, Carcinoma of the Breast, Gastroduodenal Ulceration, Infections, and Cardiovascular Disease. Each topic will be covered in depth by both formal presentations and panel discussion with audience participation.

The faculty will be made up of Jefferson Hospital Staff members supplemented by outstanding experts in the topics covered from the United States and abroad. Among these are Mr. Philip Allison, Nuffield Professor of Surgery, Radcliffe Infirmary, Oxford; Professeur Charles Dubost, Professeur De Clinique Chirurgicale, Cardio-Vasculaire, Chirurgien De L'Hospital Broussais, Paris; Dr. William Altemeier, Christian R. Holmes Professor of Surgery, University of Cincinnati; Dr. Michael DeBakey, Professor of Surgery and Chairman of the Department of Surgery, Baylor University College of Medicine; Dr. Edwin H. Ellison, Professor and Chairman of the Department of Surgery, Marquette University; and Dr. Hugh Montgomery, Professor of Medicine, University of Pennsylvania Medical School.

The scientific program has been arranged to allow participants to take advantage of the recreational activities available at Pocono Manor.
Dr. Gibbon Awarded Honorary Degree

Dr. John H. Gibbon, Jr., was one of six recipients of honorary degrees during the University of Pennsylvania's Founder's Day Convocation, January 23. From left: Dr. Gaylord P. Harnwell, President of the University, conferred the degrees upon Dr. George P. Berry, Dean of Harvard University School of Medicine; Dr. Rene J. Dubos, Professor at the Rockefeller Institute for Medical Research; Dr. Gibbon; Senator Lister Hill (D-Ala.), co-author of the Hill-Burton Act; Dr. Seymour S. Kety, Chief of the Laboratory of Clinical Science at the National Institute of Mental Health; and Dr. Carl F. Schmidt of the U. S. Naval Air Development Center at Johnsville, Pa.

First Rehfuss Lecture Presented

The first Martin Emil Rehfuss Memorial Lecture was presented by Dr. Franz J. Ingelfinger, Professor of Medicine at Boston University, on December 14, 1964.

The Lectureship in Internal Medicine was established and endowed by the Percival E. and Ethel Brown Foerderer Foundation as a memorial to the late Dr. Rehfuss, who was Professor of Clinical Medicine, Emeritus, at Jefferson. Mr. Foerderer, who became a Jefferson Trustee in 1928, was attracted to the institution as one of Dr. Rehfuss' patients.

Dr. Rehfuss, who died on July 29, 1964, left a major portion of his estate for Fellowships for the study of Internal Medicine at Jefferson. He had served on the staff of Jefferson Medical College from 1914 until his retirement in 1952. He is widely known for his invention of the Rehfuss stomach tube and the fractional method of gastric analysis. He was also active in the project which produced the first complete studies on food digestion in the normal, undamaged stomach.

Jefferson Receives Grant

The Richard King Mellon Charitable Trusts has awarded a grant of $200,000. to The Jefferson Medical College and Medical Center. The grant, payable in four annual installments, will be used to augment the salaries of the Basic Science faculty. The findings of the Trusts indicate that there are relatively more funds available today for medical research and physical facilities than there are for adequate salaries for competent teachers on the permanent faculty staffs. President William W. Bodine, Jr., states that the grant will also be of direct help in implementing the cooperative programs in which Jefferson has engaged with both Pennsylvania State University and Drexel Institute of Technology.
Needed—$84,000

WE NEED $84,000 between now and June if we are to reach our goal of $200,000 and supply Jefferson with the funds she so badly needs to provide the finest medical education in the country.

This goal is not out of the range of possibility. Indeed, with as large and loyal an Alumni group as ours, it should be reached rather easily. Please help us prove that this is so.

To date only 2,450 of you have responded to your Class Agent’s appeals. This represents only 35% of our Alumni and non-Alumni faculty groups. This is much below our records for prior years but we are confident that many more of you will “answer the call” during the next three months.

We need large gifts—and small gifts—if we are to maintain our place among the leaders in Annual Giving in the Professional School category—a place we have held proudly for four successive years.

You, as a contributor in the past, have a right to be proud of our record.

To those of you who have not participated in prior years, we say, please join us and share the pleasant glow of achievement we enjoy when our Alumni Giving Fund check is presented to the College each year.

At the luncheon given for fathers of our second year class on February 25, 1965, Dean Sodeman gave some figures which I am sure you will find interesting even though you have been aware of the situation in a general way for a long time.

The gap between tuition plus State appropriations and the cost of educating a medical student at Jefferson now amounts to $1,700 per student per year. This amounts to a total of more than $1,000,000 for which the College has to depend on Alumni Giving, endowment income, grants (other than research), the National Fund for Medical Education and on AMA-ERF.

The importance to JEFFERSON of your Annual Giving contribution increases each year and you should become increasingly aware of the gravity of the situation at your Alma Mater. If Jefferson is to stay in the forefront in medical education, we must be prepared to offer the best to our students—the finest faculty and the best in laboratory and physical facilities.

No one these days who cares about the future of independent medical education and the welfare of his own school can remain aloof from the very real problems that exist. No longer can any Alumnus conscientiously say “Let John do it—he has more money and fewer demands on his purse than I”. All of us have demands and, while our incomes may vary, each of us can give a little if we can’t give a lot.

We ask only that you give to the utmost of your financial ability and we feel no compunction in asking you to do this. The need is very great and our College should be able to turn first to her own Alumni for financial support before looking to outside sources.

Your College and your fellow Alumni are depending on you—please don’t let us down.

J. WALLACE DAVIS, M.D.
Chairman
Annual Giving Fund Committee

A, B, C: Indicate leading classes in three categories.

*Inclusion in Class Total of gifts given by Widows and Friends of Jefferson. The complete list will be published in the Annual Report in the August Alumni Bulletin.

†Deceased
Dr. Hamilton Feted
at Testimonial Dinner

DOCTOR Lloyd A. Hamilton, Class of 1920, was saluted by 300 friends and admirers on December 12th at the Playhouse Inn in Lambertville, New Jersey. The occasion also marked Dr. Hamilton's 40th year of practicing medicine in Lambertville. The mayor of the town proclaimed December 12th as "Dr. Lloyd A. Hamilton Day" in honor of the doctor.

Dr. Hamilton's old friend, New Jersey Governor Richard J. Hughes, was stranded in Europe that night by fog and was unable to act as toastmaster. So, in a last-minute arrangement, the Governor sent his car to Washington, D.C., to pick up Congressman Frank Thompson to act in his place.

Following the dinner, 15 organizations paid their respects to the doctor, presenting him with scrolls, citations, and gifts. The fire department gave him an honorary chief's hat. Mr. Thompson praised the doctor in saying, "If the type of service Dr. Hamilton gives his community were typical, perhaps we wouldn't need some of the medical legislation now in the offing." Dr. Samuel J. Conly, Jr., Assistant Dean of Jefferson Medical College, spoke of the doctor's three years of internship following graduation from Jefferson. "He only needed one year, but he went to the trouble of working three."

Dr. Hamilton is known as a country doctor of the old school. He still makes house calls at any time of the day or night. Mrs. Hamilton described one of the days earlier that week and referred to it as one of the doctor's typical working days. "He managed dinner at midnight, got to bed at 2 a.m. and was called at 3 a.m. When he got to bed again, it was 4:30 a.m. and he was up—beginning a new day's work—at 6 a.m."

Dr. Hamilton is on the State Board of Medical Examiners, trustee of the New Jersey State Medical Society, a past president (four times) of the Hunterdon County Medical Society, and a past president of the Association of Physicians and Surgeons of the Pennsylvania Railroad. He has been on the staff at Hunterdon Medical Center in Flemington since its inception and on the courtesy staff of St. Francis Hospital in Trenton since 1928.
Chapter Note

Tucson Alumni Group Meet

On February 11, 1965, the Jefferson Alumni Group of Tucson, Arizona, met at the Brau House to Welcome Dr. Mario A. Castallo to Tucson. They enjoyed a German meal and an old fashioned gab fest in which questions were answered by Dr. Castallo. It proved an enjoyable and informative evening for all. Photo shows (from left) Dr. and Mrs. Lewis G. Shellenberger, Dr. and Mrs. T. E. A. von Dedenroth, Dr. and Mrs. Castallo, Dr. Philip G. Derickson, Dr. and Mrs. Blair W. Saylor, Dr. John S. Sampscl, Dr. Frederick M. Kenan, Dr. and Mrs. James L. Bevan, and Dr. and Mrs. Merrin R. Chappel.

Jeff Alumni Named Staff Officers

THE medical staff of Fitzgerald Mercy Hospital has elected among its staff officers for 1965-1966 Dr. Gerald E. Callery (Jeff ’43) as Vice President and Dr. Joseph I. Maguire (Jeff ’55) as Treasurer.

Named to the Executive Committee were Dr. John B. Atkinson (Jeff ’48), Dr. John L. McCormack (Jeff ’48) and Dr. Joseph P. McGee, Jr. (Jeff ’47). Simultaneously, the Board of Directors announced the reappointment of Department Heads Dr. Patrick J. Devers (Jeff ’36), Medical Director, and Dr. Daniel J. Hilferty (Jeff ’43), Director of Medicine.

Faculty Wives Club Holds Luncheon

THE Jefferson Medical College Faculty Wives Club held their January luncheon in McClellan Hall on January 13th. Mrs. John J. O’Keefe, president, called on Mrs. Frank J. Sweeney, program chairman, to introduce the speaker, Miss Sally McCarten.

Miss McCarten is a graduate of Rosemont College and is now the only woman faculty member in the Leadership Institute, teaching Personality Development in the Dale Carnegie Course in Media, Pa. Miss McCarten presented an interesting program, illustrating that a relaxed, smiling approach enhances your charm.
50th Reunion—Class of 1915

Edward I. Salisbury, M.D.
539 Manhasset Woods Road
Plandome, L. I., New York

Joseph Aspel, M.D.
5002 Spruce Street
Philadelphia, Pennsylvania

Plans are underway for a luncheon for members of the Class of 1915, probably to be held on Thursday, June 10.

45th Reunion—Class of 1920

Henry B. Decker, M.D.
527 Penn Street
Camden, New Jersey

Plans are now being formulated for reunion activities for the Class of 1920.

40th Reunion—Class of 1925

Clyde M. Spangler, M.D.
255 South 17th Street
Philadelphia, Pennsylvania, 19103

There will be a luncheon held at the Union League on Wednesday, June 9.

35th Reunion—Class of 1930

Patrick J. Kennedy, M.D.
32 Hampden Road
Upper Darby, Pennsylvania

Reunion plans for the Class of 1930 include a scientific meeting at Jefferson, June 9, at 9 a.m. Following the meeting there will be a class meeting and stag luncheon in the Regency Room of the Barclay Hotel at 1:00 p.m., and that evening the Mirage Room of the Barclay Hotel will be the scene of a dinner dance which is scheduled to get underway at 6:30 p.m. There will also be a class reception before the Alumni Banquet on June 10th.

30th Reunion—Class of 1935

John A. McCormick, M.D.
38 Hampden Road
Upper Darby, Pennsylvania

A luncheon will be held on June 9th at the Union League where we had so much fun in the past. That evening, our good wives may join us in a Supper Dance at Williamson’s Restaurant, atop the Barclay Building. Further details will be furnished in the near future.

25th Reunion—Class of 1940

Thomas B. Mervine, M.D.
1120 Wyndwood Road
Haddonfield, New Jersey

There will be a cocktail party followed by a dinner dance on the night of June 9. The affair will probably be held at the Marriott Motor Hotel, which will be Class headquarters. Tenta-
tive plans also have been made for a cocktail party preceding the Alumni Banquet.

20th Reunion—Class of 1945

Oram R. Kline, Jr., M.D.
406 Cooper Street
Camden, New Jersey

Plans are underway for a function to be held for the 20th reunion of this Class on Wednesday evening, June 9. Notices will be sent to all members within a short time.

17th Reunion—Class of 1948

Norman James Quinn, M.D.
1218 Valley Road
Villanova, Pennsylvania

The 17th Class Reunion of the Class of 1948 will be held at the Greenbrier, White Sulphur Springs, West Virginia, July 16, 17, 18, 1965. Additional details will be forwarded to classmates as well as appearing in the Bulletin.

15th Reunion—Class of 1950

William D. McNamee, M.D.
146 Long Lane
Upper Darby, Pennsylvania

A questionnaire is being forwarded to class members to determine what sort of function they want the committee to arrange for their 15th reunion.

10th Reunion—Class of 1955

Leon A. Peris, M.D.
2023 Mather Way
Elkins Park, Pennsylvania

Richard H. Schwarz, M.D.
106 Dulles Building
3400 Spruce Street
Philadelphia, Pennsylvania

Robert J. Senior, M.D.
Doctors Building
Willow Drive
Chapel Hill, North Carolina

The Class of 1955 will hold its 10th reunion at the Holiday Inn, 1305 Walnut Street, on Wednesday evening, June 9. Dr. Bob Senior, Class President, has announced that Drs. Richard Schwarz and Leon Peris are making the local arrangements. A floor of the Holiday Inn will be turned over to the out-of-town classmates and their wives, complete with a Hospitality Room. A “black-tie” banquet, with social hour preceding, will be held at 7 p.m. with dancing to a combo until midnight. Thursday evening, June 10, will be the Annual Alumni Banquet with graduation exercises the following morning.

5th Reunion—Class of 1960

Marvin E. Jaffe, M.D.
9114 Springview Road
Philadelphia, Pennsylvania

Reunion plans for the Class of 1960 include a cocktail hour and filet mignon dinner with wine on the evening of Wednesday, June 9, at the C R Club in Philadelphia. Dinner will be followed by a floor show and dancing. Those members of the Class still in training may obtain Pool Tickets for the Annual Alumni Banquet, provided through the generosity of Jefferson graduates who are now firmly established in practice.
Alumni are invited to present names

of candidates

for

The Alumni Achievement Award — 1965

Your proposal should include the suggested candidate's name, year of graduation from Jefferson, past accomplishments, present activities, titles and positions held. You may state the personal qualifications of the Alumnus and the reason, or reasons, you believe he should receive the Achievement Award for 1965.

All proposals must be received no later than April 26, 1965.

Address all correspondence to:

JOHN H. HODGES, M.D.
c/o Alumni Office
Jefferson Medical College
Philadelphia, Pennsylvania 19107

Presentation of the Award will be made June 10, 1965, at the Annual Alumni Banquet.

Past recipients: Dr. Louis H. Clerf
Dr. Henry L. Bockus
LOST ALUMNI

We are very proud that out of our total Alumni body of 6,634, we have current addresses for all but 32. We would like very much, however, to have addresses for all of our Alumni and for that reason we are listing our “lost” members below in the hope that some of the classmates and friends may know of their whereabouts. If you do, and will drop us a line at the Alumni Office, 1025 Walnut Street, Philadelphia, 19107, we will be very grateful.

Returning Alumni Preliminary Registrations
for Complete Physical Examinations
Accepted Now

Physical examinations will be conducted on June 8, 1965, in the Curtis Clinic.
Send reservation care of:
DR. JOHN M. LINDQUIST, Alumni Office
1893

Dr. Edward I. Rich, 2624 Taylor Avenue, Ogden, Utah, recently received two checks from the New York Life Insurance Company for the death benefits in his insurance policies even though he is still alive. The reason: The mortality tables stop at age 96, meaning beyond that point you're not supposed to be alive, but Dr. Rich is very much alive. The general manager of New York Life says that to his knowledge Dr. Rich is the first of their policyholders in Northern Utah to outlive the mortality table. Dr. Rich purchased the first policy in 1896, not long after he settled in Ogden.

1896

Dr. Maurice J. Karpeles, 5740 Wissahickon Ave., Philadelphia, Pa., received tribute in the Germantown Courier on January 21st on the occasion of his 90th birthday. The article reads:

"The grand old man of Germantown has been practicing physician here since he was graduated from Jefferson Medical School two years before the Spanish-American War.

"When he first arrived here he called upon his patients by pedalling a bicycle; then he used a horse and buggy. Sixty-eight years later, remarkably hale and hearty, he is still caring for the ailing and holds regular office hours."

1897

Dr. S. Ira McDowell, 137 E. Market St., York, Pa., the dean of York doctors, celebrated his 94th birthday on November 21. He has practiced in York since 1910 and retired a little less than a year ago. Dr. McDowell was born in Dallastown in 1870. He went to grammar school there, but never to high school. "We didn't know what high school was like," he said. Following Jefferson, he interned at the Royal Ophthalmic Hospital in London and at another hospital in Vienna. He says that he is in good health, can read and write without glasses and will "try to make 100."

1903

Dr. William M. Edwards, 97 Marina Court Drive, San Rafael, Calif., reports, "Everything here around the San Francisco Bay area goes on as usual. My eyes and general physical condition go on in the same routine."

1906

Dr. Addison D. Davis, 119 S. Edisto Ave., Columbia, S.C., writes, "I am, as you well know, well past three score and ten and suffer the usual ailments of my age."

1910

Dr. Fred P. Simpson, 1203-14th Ave., Altoona, Pa., writes "Since August 1, 1963, I have been on the medical staff of Hollidaysburg State Hospital in addition to carrying on my own private practice."

1912

Dr. R. Grant Barry, 908 W. State St., Trenton, N.J., reports, "I am still in active private practice. I was doing some work for the N.J. State Troopers at West Trenton but have given it up as it was too tiring. I had to go to the hospital recently, but am better than ever now."

Dr. Walter P. Hardee, 128 W. Main St., Durham, N.C., reports that he continues to keep regular office hours and never missed a day in '64. The Hardees spent Christmas visiting their children and seven grandchildren in Connecticut and Baltimore.

Dr. George L. Laverty, 212 Vineyard Rd., Harrisburg, Pa., was remarried on July 18, 1964, to Ethel W. Crocker of Elmira, New York.
DR. GEORGE A. BROWN, Water Valley, Mississippi, writes, "I am still working every day doing surgery at the Yalobusha General Hospital here at Water Valley. I appreciated very much the fifty-year certificate sent me by the Alumni Association. I had hoped to be in Philadelphia to receive it in person, but could not make it. I recently received a forty-year lifetime pass on the Illinois Central Railroad as District Surgeon. My wife was the former Dorothy Warren, RN Jefferson Hospital, and we have three married daughters and one son who is with Boeing Aircraft."

DR. VAN S. LAUGHLIN, 56 So. Portage St., Westfield, N.Y., writes, "I am glad I attended the 50th reunion and happy to be back again and see all the progress at Jeff. I am in limited general practice and still keep busy." Dr. Laughlin spent January and February vacationing in Florida.

DR. JESSE G. WEBSTER, 45 Main St., Wellsboro, Pa., writes, "I have a small office practice at the same location which I have occupied for 46 years. Occasionally I find that I am treating a member of a third generation of a former patient, which makes me truly thankful for the blessings of good health and the physical ability to continue in the practice of Medicine."

DR. GILBERT I. WINSTON, 344 North 5th St., Reading, Pa., reports that he is still practicing medicine to a limited degree and that he has two sons who are doing well in the field of Radiology.

1918

DR. WILLIAM R. COOPER, 304 Broadway, Reynoldsville, Pa., retired five years ago and moved from Pittsburgh on January 25th to Reynoldsville. Dr. Cooper writes, "We hope to be able to get away to warmer climates during the winter months. Both boys are married and have three children each. One lives in New York state and one in California."

1919

DR. RONALD C. MOORE, 1929 Spruce St., Philadelphia, Pa., a 16-year AAA member, won a second prize with his Bentley at the International Meet of the Rolls-Royce Owners' Club at Kennedy International Airport, August 27-29. More than 300 Rolls and about 50 Bentleys were entered in the Meet. Nine museums were represented as well as several overseas visitors. The Rolls, all operational, included models from 1904 to 1964. Dr. Moore received his award, a handsome plaque, at the banquet in the International Hotel. A Bentley owner since March, 1963, Dr. Moore's car is a 1956 Bentley Salon.

1920

DR. STANLEY M. WINTER, Tilbury Terrace, West Nanticoke, Pa., writes, "I was incapacitated for General Practice in '41. I went back to Philadelphia for a postgraduate course in Ophthalmology, which I practiced in Williamsport. I retired in 1959 and am now vegetating at Tilbury Terrace, a mile or so from my birthplace in Nanticoke."

1921

DR. GILBERT I. WINSTON, 344 North 5th St., Reading, Pa., reports that he is still practicing medicine to a limited degree and that he has two sons who are doing well in the field of Radiology.

1915

DR. FRANKLYN C. HILL, 655-29th Avenue, San Mateo, Calif., writes to Class Agent Dr. Salisbury, "Pleased to hear of 'young' Ed's continued progress and proud to report that F. C. Jr., '50, is now Board certified in Neurology, while David I., '57, has just received similar credit in Pathology."

DR. STANLEY M. WINTER, Tilbury Terrace, West Nanticoke, Pa., writes, "I was incapacitated for General Practice in '41. I went back to Philadelphia for a postgraduate course in Ophthalmology, which I practiced in Williamsport. I retired in 1959 and am now vegetating at Tilbury Terrace, a mile or so from my birthplace in Nanticoke."

1920

DR. SIMON L. VICTOR, 6 Buckingham Road, Nanuet, N. Y., writes, "I am looking forward to our 45th class reunion in June, as well as reminiscing over the merry events of yesteryear with my classmates. We are still active and alert professionally and community wise."

DR. ELLWOOD C. WEISE, 144 Golden Hill St., Bridgeport, Conn., writes, "As a past President of the Connecticut State Medical Society, I am still active in its Council and House of Delegates. I am also a delegate from the Connecticut State Medical Society to the AMA. As Chairman of the Connecticut State Medical Society's Committee on National Legislation, numerous other State committees, and a member of the Board of Directors of the Connecticut Medical Political Action Committee, I find myself kept quite busy—all of this in addition to my partnership with my son, ELLWOOD C. WEISE, JR. (Jeff '47). For reasons unknown to me, I seem to

Dr. Moore displays the plaque he won with his 1956 Bentley.
have become involved in political matters and on occasion do a little speaking in behalf of organized medicine. My biggest job is to stir up the apathetic lethargic M.D. from his rest on a somewhat adipose pair of buttocks. The total and complete lethargy and somnolence of encephalitis seems to have overtaken him in the gracious living of this 'Great Society.' Of course, some day, there may be a rude awakening! By the way, while attending the AMA and the House of Delegates Meeting in Miami, I had an opportunity of visiting with Dr. CESAR DOMINGUEZ-CONTE."

1921
DR. LOUIS M. LIDE, 690 Verdin St., Clarksburg, W. Va., is presently at the Veterans Administration Hospital in Clarksburg as Chief of the Out Patient Services.

1922
DR. RAYMOND D. TICE, Corner 3rd and Juniper Sts., Quakertown, Pa., retired July 2, 1963, following illness. His son, WALTER R. TICE, Jeff '53, is carrying on his father's work in the Tice Clinic at Quakertown.

1923
DR. HENRY V. GRAHN, 5132 Chester Ave., Philadelphia, Pa., writes, "Time gradually matures judgment; advancing age should emancipate us from our bigotry!"

DR. HOMER L. NELMS, 399 State St., Albany, N.Y., writes that he is beginning his 14th year of retirement. "It is still a pleasure to continue my yearly contribution to the Alumni Giving Fund."

1924
DR. THOMAS F. COOPER, Vice Adm., USN Ret., 303 Country Rd., Berwyn, Pa., writes, "After serving 35 years in the Medical Corps of the U.S. Navy, I retired in the rank of Vice Admiral in 1959. Subsequently, I accepted a position as District Medical Officer for the Pennsylvania Railroad in Philadelphia. I retired from the railroad in June 1964, and I am now enjoying my retirement. My wife and I have a son and a daughter and seven grandchildren."

DR. HAROLD R. WARNER, Kulpsville, Pa., hopes to go with the Alumni group on the trip to Vienna in April. Dr. Warner writes, "Enjoyed the 40th reunion 'get-together' and seeing the 'gang' that attended. Everyone seemed to be glad we had the occasion to see each other once again."

1925
DR. ROBERT L. DICKSON, 1405 Harrison St., Philadelphia, Pa., reports that he is enjoying the practice of Otolaryngology and the relaxation of golf.

Dr. Pegau

DR. PAUL M. PEGAU, Underwood Hospital, 509 N. Broad St., Woodbury, N.J., is being honored by Underwood Hospital. The hospital is naming the first wing in its $3,000,000 expansion program the Paul M. Pegau Pavilion. Dr. Pegau joined the staff in 1926 and was one of the first three doctors at Underwood. He has been Chief of Pediatrics and Allergy since the Pediatrics Department was organized many years ago and is also one of the original members of the hospital's Board of Trustees.

When he first joined the staff at Underwood, he worked directly with Dr. Underwood and made regular house calls in the area. Many of those he treated at that time are still patients of his, and every summer the Pegau's home is well stocked with fruit and produce brought by the farmers in the area who have remained loyal to the doctor.

In 1932 he was in an automobile accident and sustained a severe back injury which left him unable to continue his obstetrical practice. It was at this point that he decided to specialize in allergies—particularly those of children. He pursued further study in this field at Columbia University and in 1939 joined the staff at Jefferson where he taught for eighteen years while continuing his practice at Underwood.

Dr. Pegau has been for many years an ardent golfer and recently received a golf trophy while playing at Mount Dora in Florida where the Pegaus have vacationed for several years. He also reads widely and is particularly interested in history in addition to regular medical literature. For relaxation he enjoys suspense and mystery stories.

The new air-conditioned wing which will bear Dr. Pegau's name is scheduled for completion in the Spring of 1965 and will contain modern and expanded emergency, x-ray, surgical and recovery, and administrative facilities. It will accommodate 78 patient beds, 55 of which will replace beds now housed in non-fireproof buildings.

1926
DR. PHILIP BIBB DAVIS, 442 W. Wrenn St., High Point, N.C., writes, "I am doing Surgery, but I only have office hours three afternoons a week. This gives me time for my hobbies—farming, fishing, golf, and cards. I take about two months each year traveling with my wife. I have three children—a married daughter with two children, a married son with two children, and a son who is a junior at the University of North Carolina."

DR. BERNARD A. HIRSCHFIELD, 375 W. State St., Trenton, N.J., was recently elected Vice President of the medical staff of St. Francis Hospital. He is Clinical Head in Psychiatry at the hospital.
Dr. Charles Hyman, 6900 Atlantic Ave., Ventnor, N.J., has been named Director of Medical Education for Atlantic City Hospital. Dr. Hyman is presently Chief of Medicine and Medical Director. As Director of Medical Education, Dr. Hyman will organize and supervise an expanded teaching program for the Atlantic City Hospital resident and intern staff.

Dr. Neal R. Moore, 704 N. Jackson St., Bay City, Michigan, reports, "I have 'retired' from private practice and am now the local County Health Director and the Medical Director of the new 100-plus-bed Chronic Disease Hospital. Am having more fun at it and am much more active physically than before. Am saddened to learn of the deaths in our class. I have taken on the self-appointed job of historian and have entered their names and dates in our class book."

Dr. Charles A. Rankin, Ludlow and Heather Rd., Upper Darby, Pa., was recently re-elected President of the Delaware County Memorial Hospital.

Dr. Arthur J. Redland, 1229 Jack Drive, Kerrville, Texas, is still employed by the state of Texas in the Legion Annex of Kerrville State Hospital (Mental Geriatric).

Dr. James H. Tate, 2911 Peach St., Erie, Pa., writes, "Pete Mainzer and I are still holding the fort in Erie. I am working harder than ever as my partner of 17 years retired last April."

1927

Dr. Dirk C. Bloemendaal, 351 W. Main St., Zeeland, Mich., has taken a position with the staff of Penn State University to work with the medical staff at the University until June 1965. He will return to Zeeland to resume his practice in June.

Dr. Ferdinand C. Dinges, 299 S. Harrison St., East Orange, N.J., writes to Class Agent Dr. Gifford, "I have just retired. The Lord willing I will continue my annual contribution. I have been very much blessed and thank God for it."

Dr. William T. Hunt, Jr., 6 Penn Center, Room 546, Philadelphia, Pa., and Mrs. Hunt spent Christmas and New Year's in Geneva, Switzerland, where their married daughter, Penelope, lives.

Dr. Edward S. King, 214 W. Marion St., Shelby, N.C., reports, "I'm doing fine, practicing Pediatrics and Bacteriology."

Dr. Joseph P. Michelson, 4901 Avenue "K," Brooklyn, N.Y., writes, "Our daughter, Anne Michelson Hirschborn, M.D., has been appointed as an Assistant in Neurology on the staff of Dr. Alpers at Jefferson. She went to Harvard Medical School, Class of 1959. Her husband, Richard C. Hirschborn, M.D., is full-time Urologist at the Hahnemann Hospital and Medical School. They live half-way between the two schools and I am looking forward to more frequent visits to Philadelphia and Jefferson."

1928

Dr. Ernest Brock, 200 South Imperial Avenue, Imperial, Calif., writes, "My wife and I vacationed in Tucson, Arizona, for five weeks this fall. I quit O.B. at the beginning of 1964, but seem to be just as busy as ever. We had a lot of acute URI during the first part of this summer."

Dr. David L. Ellrich, 125 E. State St., Westport, Conn., writes, "I saw William Cashman at the AMA Convention in San Francisco last June. We had a long talk on retirement. We both feel we'll never retire unless St. Peter makes us. I go off the active staff in September, at age 65. I've had enough of service. The most difficult thing, I find, is to cut down on work. It seems to be 'all or nothing.' The younger men have made big inroads, and it is good that it is so. I have three children and eight grandchildren. A son is in Florida, another in Seattle and my daughter is married to a physician in Sacramento."

Dr. Theodore H. Grundfast, 455 Ocean Ave., Brooklyn 26, N.Y., was in the hospital several times earlier this year but reports that he is feeling fine now.

Dr. Philip J. Morgan, 35 Gershom Place, Kingston, Pa., writes, "Betty and I expect to move to Tunkhannock, Pa., in the spring. A new 50-bed hospital is currently under construction there. I expect to retain my office in Kingston for a time, also."

Dr. C. Kenneth Schloss, 5065 Valley Pike, Dayton, Ohio, writes, "Dave finished his residency in Radiology at Ohio State in August and staying on the Faculty at present."

1929

Dr. John H. Bissing, Berks County Tuberculosis Sanatorium, Reading, Pa., wrote a note to Class Agent Dr. Castallo congratulating him on the Class's achievement for the past year and commented, "I am particularly interested to know that there is so much support from those of our Class who are laid up or from their widows. It speaks well for their loyalty."

Dr. Yen Pui Chang, 2235 Seaview Ave., Honolulu, Hawaii, writes, "Had an interesting reunion here in Honolulu with my classmate Leo Hymovich (whom I haven't seen since we graduated from Jefferson) toward the latter part of September. Lester Bartlett wrote and said that he was coming to Honolulu about that time also and I was looking forward to seeing him, but I never heard from him after that, so I presume he must have changed his plans. It would have been wonderful if the three of us could have gotten together."

Dr. Andrew M. Gehret, 1007 Park Place, Wilmington, Del., took office as President of The Federation of State Medical Boards during the 61st annual congress on Medical Education at the Palmer House, Chicago, February 6-9. Dr. Gehret also delivered the Presidential Address at a meeting of the section of The Federation of State Medical Boards of the United States on February 9.

Dr. Donald L. Kegaries, Dawley-Kegaries Clinic, Box 1832, 615 Kansas City St., Rapid City, South
Dakota, writes, “Our daughter, Sally, was married on August 21, and is living in Scottsdale, Arizona, where she is employed at the Tucson Medical Center as a technician while her husband attends Law School. Our youngest, David, graduated from high school in June. He entered the University of Denver last fall where he is enrolled in the School of Business and Accounting, which he enjoys very much. I still find time to golf and hunt. We have had some marvelous goose hunting east of Pierre this fall on a location near the Missouri River. I was recently appointed to the Governor’s Hospital Advisory Board, which is a very interesting assignment and takes about four to six days a year of my time.”

DR. LEWIS A. SMITH, R. D. #2, Easton, Pa., retired in December 1962, from Hunlock Creek (Pa.) State Hospital where he was Chief Resident for nearly seven years. He is now living outside of Easton in the family homestead.

1930

DR. FRANCIS J. BRACELAND, The Institute of Living, 400 Washington St., Hartford, Conn., has been appointed as Editor of The American Journal of Psychiatry. The President of the American Psychiatric Association said of the appointment, “Dr. Braceland falls naturally into the tradition of his seven distinguished predecessors. One of psychiatry’s preeminent scholars, he will bring to his assignment an elegance of style, an economy of diction, a perspicacity of judgment, and a dedication to meeting the needs of a changing profession that does no violence to the proven values of the past.”

DR. SAMUEL CANDLIN, 189 Ocean Ave., Brooklyn, N.Y., writes, “I am Commanding Officer of the U.S. Naval Base Training Co. 3-5. My oldest daughter is a teaching fellow in the Department of English Education at New York University. My youngest daughter is a junior at Barnard College and was married on December 20. My grandson, Mark, has just taken his first step on the road which, I hope, will lead to Jeff.”

DR. DON BRIGHT WEEKS, 105 E. Mantua Ave., Wenonah, N.J., was elected Coroner of Gloucester (N.J.) County in the November 1964 elections. He is the first Democratic coroner in the history of the county and won by over 5,000 votes.

1931

DR. CLAUDE H. BUTLER, 309 Towne Pl., Apt. A, Kingswood, King of Prussia, Pa., resigned as superintendent of Retreat State Hospital, following nine years of service to the institution. He originally planned to retire, but was persuaded to take a temporary position as Assistant Superintendent at Norristown State Hospital. Testimonial dinners were given him by Retreat personnel on January 16, and by the Nanticoke Rotary Club on January 26.

1932

DR. JOHN B. CLAFFEY, 6306 Woodbine Ave., Philadelphia, Pa., was re-elected President of the Medical Staff of Misericordia Hospital at the annual meeting of the Medical Staff on January 5.

DR. SAMUEL R. DEICH, 170 Passaic Ave., Passaic, N.J., has been elected President of the medical staff of St. Mary’s Hospital. He is Director of the Department of General Practice at St. Mary’s and was Vice President of the Medical Board last year. He is an Associate Director of the Passaic Tri-Hospital Home Care Program, a Director of the Daughters of Miriam Home for the Aged and a past President of the New Jersey Academy of General Practice. He was named a corresponding member of the Israel Medical Association last August, in ceremonies he attended at the sixth international congress of the organization in Tel Aviv, for “devoted activity and outstanding contributions on behalf of the association.”

DR. F. FREDERICK FORTIN, 20 Maple St., Springfield, Mass., was elected President of the New England Obstetrical and Gynecological Society for 1964-65 this past November during a meeting of the Society in Boston.

DR. WILLIAM B. WEST, 909 Mifflin St., Huntingdon, Pa., writes, “As President-Elect of the Pennsylvania Medical Society, much of my time will be used in the next two years in forwarding the work of organized medicine at the state and national levels. Our greatest problem is still that of attempting to activate the approximately 50 per cent of physician membership who seem to be content with doing nothing except making a living. Modern day medicine demands more of a physician than this if we wish to maintain the high standards we now enjoy.”

1933

DR. CLARENCE P. CLEAVER, 250 Main St., Catawissa, Pa., writes, “No news except that I am still alive and kicking. I am a part-time physician working at the Danville State Hospital several hours a week, examining patients and helping cover the hospital on week-ends.”

DR. THOMAS J. LEICHLER, 2211 N. Hancock St., Philadelphia, Pa., reports that he became a grandfather for the first time in August. A son, Thomas Joseph Leichner, 3rd, was born to Dr. Leichner’s son, Thomas, Jr., and wife Dawn, Thomas, Jr., is a senior medical student at Jefferson.

DR. EDWIN N. MURRAY, 130 N. Broadway, Camden, N.J., has been named Heart Sunday co-chairman for the Camden County Heart Association’s 1965 fund drive.

DR. LEON N. PRINCE, 2025 Spruce St., Philadelphia, Pa., reports, “My son, Bob, graduated from Jefferson, interned at Washington Hospital Center and now is with Frank Braceland’s Institute of Living in Hartford. Pat, my middle child, received her Bachelor’s at Goucher and the first half of her Master’s at Columbia’s School of Social Work and now is working in one of the psychiatric endeavors. My younger daughter decided not to go to school and is working until she makes up her mind what she wants to do.

“Several of our classmates have
had sons graduate from Jefferson and at the present time Jim Wong's and Sam Stein's sons are sophomores and Leichner's and Elkin's boys are seniors.

"Raymond Smith, who lives in Garden City, L.I., is sailing a schooner and during last June he participated in the Bermuda Race with his sloop 'Shalom'. Dick Doff is also a sailor and ties his boat up in Chesapeake Bay. On several occasions he has sailed from this area of the country to Maine and back."

1934

Dr. Roscoe P. Kandle, 92 Wilburtha Rd., Trenton, N.J., spoke on "Health in a Changing Community" at a Sussex County Service Council meeting on November 24.

Dr. Albert D. Wallen, S.W. Cor. 9th and Ruscomb Sts., Philadelphia, Pa., won the A Class golf championship for 1934 at the Cedarbrook Hills Country Club of Wyncote, Pa.

1935

Mrs. Benjamin Fenichel, widow of Dr. Fenichel, writes that their son, Dr. I. Robert Fenichel, is doing research at the Einstein Medical Center, Northern Division.

Dr. S. Sprigg Jacob, III, 1456 Meadowbrook Lane, East Lansing, Mich., writes, "This past year was a busy one for me heading up our local Oral Polio Clinics campaign as Chairman of our county Medical Society Public Health Committee. I am glad to say it was a successful undertaking and helped to improve our local 'doctor image'."

Dr. Joseph S. Mansker, 133 E. 58th St., Suite 305, New York 22, New York, is serving as President of the West Virginia University (New York, New Jersey, Connecticut) Alumni Association during 1965.

1936

Dr. J. Leland Fox, Pennsylvania Ave., Seaford, Delaware, is still doing General Practice in Seaford. He is serving as Secretary-Treasurer of the Nanticoke Memorial Hospital and Chairman of its Medical Division for the Building Program Fund Drive.

Dr. Leo L. Goldman, 325 Market St., Trenton 10, N.J., is on the medical staff of Mercer Hospital and is active in the Mercer County Chapter of the A.A.G.P.

Dr. John L. Gompertz, 3232 Elm St., Oakland, Calif., reports that he and his wife, Margaret, are collecting granddaughters; they now have three.

1937

Dr. Robert S. Garber, Medical Director, The Carrier Clinic, Belle Mead, N.J., has been elected Secretary of the American Psychiatric Association.

1938

Dr. Walter A. Boquist, 719 Hillcrest Blvd., Philadelphia, N.J., team physician for athletic teams at Phillipsburg High School for the last 13 years, was presented with the Citizenship Award of the Lehigh Valley Chapter, National Football Foundation. The plaque was awarded during the halftime feature of Coaches Night on November 17.

Dr. Eugene S. Gladstone, 1722 Eye St., Washington, D.C., has been promoted to Associate Clinical Professor of Medicine at the George Washington University School of Medicine.

Dr. William I. Heine, 1103 Curtis Drive, Wyncote, Pa., has been promoted to the position of Attending Physician at Philadelphia's Albert Einstein Medical Center. In addition to his post at Einstein, Dr. Heine also is an Associate in Medicine at the Temple University School of Medicine.

Dr. Paul H. Morton, 1117 Tenth St., Coronado, Calif., is currently serving as President of the California Society of Internal Medicine and Chief of Staff of Coronado Hospital. He is immediate past-President of the San Diego County Heart Association and member, Executive Committee and Board of Directors. Dr. Morton has a new grandson, Thomas Fincher Harry Morton (the fourth), born to son Tom and his wife, Jane. Dr. Morton's youngest son, John, graduated from Stanford and is planning to study medicine eventually.

Dr. Edward S. Phillips, 61 14th St., Wheeling, West Va., reports that his son, Edward Bayne, is now in his junior year at Jefferson.

Dr. Luke K. Remley, 1300 E. Market St., York, Pa., marked the beginning of his fourth year of active teaching at the University of Maryland in January.

Dr. Leonard K. Supple, Park Medical Center, 50 Fishkill Ave., Beacon, N.Y., was appointed Health Officer for the city of Beacon on December 1. Dr. Supple participated in the annual meeting of the American Society of Clinical Hypnosis in Philadelphia where he gave a paper on hypnosis in general practice and moderated a panel on Group Therapy and Hypnosis.

1940

Dr. David K. Webster, Box 31, Route 1, Swoope, Va., writes, "I have been practicing Orthopedic Surgery here in Staunton, Va., since 1957. I passed my Boards in 1958. I have bought a farm and raise horses and Herefords."

1941

Dr. Abol H. Fotouhi, 130 Riverside Drive, Binghamton, N.Y., was elected Chief of Surgery for 1964 at Our Lady of Lourdes Hospital in Binghamton, N.Y.

Dr. Arthur F. Hoffman, 3619 Harris Road, Fort Wayne, Ind., writes, "Life in Fort Wayne is going on much the same; we now have five anesthesiologists in our office and plan to add another next July. It makes night calls come around
less frequently. Mary and the nine children are fine. No doctors in sight yet.”

DR. GROVER C. POWELL, 1060 High St., Waynesburg, Pa., is the newly-elected President of the Greene County Medical Society.

DR. HENRY V. RATKE, 831 Hepburn St., Williamsport, Pa., writes, “Our twin daughters, Mimi and Ceci, have finished college and are now engaged in their respective fields of dietetics and nursing. Our next eldest, Anne, is a college freshman with her eyes on a major in Secretarial Science. I’m still in General Surgery in the home city of the ‘Little League’.”

1942

DR. CHARLES R. MOOG, 222 North Van Dien Ave., Ridgewood, N.J., spoke on “Endometriosis” before a meeting of the Graduate Nurses Guild on November 10.

DR. ALEX POHOWSKY, JR., 6849 Pineneedle Lane, Cincinnati 43, Ohio, writes, “I met EDMOND K. YANTES while attending the International Medical Assembly sponsored by the Interstate Postgraduate Medical Association of North America in Pittsburgh, November 9-12. Our distinguished Professor of Medicine, Dr. ROBERT WISE, was on the program.”

1943

DR. LOUIS G. BUSH, American Embassy, APO 152, San Francisco, Calif., is the Medical Attaché at the American Embassy, Vientiane, Laos. Dr. Bush has been there for two years and plans to leave in about six months.

DR. DAVIS G. DURHAM, Professional Building, Augustine Cut Off, Wilmington 3, Del., just returned from a month’s service in Ophthalmology on the SS HOPE in Guinea, Africa. Dr. Durham presented a paper entitled “A Pneumatic Applanation Tonometer” and a scientific exhibit at the American Academy of Ophthalmology and Otolaryngology meeting in Chicago, October 1964.

1944-J

DR. JOHN F. MCINTYRE, 46 Amesbury St., Lawrence, Mass., is presently serving as Chief of Staff of Bon Secours Hospital in Methuen, Mass.

DR. PAUL CUTLER, 39 S. Tallahassee Ave., Atlantic City, N.J., recently returned from a six-week tour of duty at Avicenna Hospital in Kabul, Afghanistan, where he participated in a teaching program for Afghan medical students and interns. He was there under the auspices of CARE-MEDICO. In December, 1962, Dr. Cutler was in Algeria on a similar mission.

DR. GEORGE H. JONES, JR., Box 8, Danville, Pa., writes, “I am still Associate Urologist at Geisinger Medical Center in Danville, but am looking forward to early retirement in Scottsdale, Arizona, since my M.I. last year.”

DR. EDWARD B. MCCABE, 2795 Coleridge Rd., Cleveland 18, Ohio, writes, “Missed the 20th Reunion as Mary and I spent a second honeymoon in Hawaii on our 20th Wedding Anniversary. The children (three boys and three girls) stayed at home with Grandma. Ed, Jr., is a sophomore at St. Louis University, and Bill, No. two son, enters Xavier University this year. I hope to stop in for a visit this spring.”

1944-S

DR. HERBERT LIPSHUTZ, 255 S. 17th St., Philadelphia 3, Pa., has been appointed director of the new section of plastic and reconstructive surgery at Pennsylvania Hospital and Clinical Assistant Professor of Surgery for the University of Pennsylvania School of Medicine. Dr. Lipshutz is establishing a training and research program in plastic surgery and is in charge of hand service and the hand clinic at the hospital.

1945

DR. STEPHEN F. BALSHI, 506 Orchard Lane, Bethlehem, Pa., writes, “Is it 20 years? See you in June (a bigger crowd than the 15th, I hope). All’s fine, oldest son is in Villanova and the youngest in kindergarten.”

DR. ROBERT W. ELWELL, 215 Center St., Delanco, N.J., suffered a heart attack in August. He is now back at work, taking things a little easier.

DR. ROY T. FORSBERG, 4 Breeze Knoll Dr., Westfield, N.J., is a member of the Cancer Control Committee of the New Jersey State Medical Society, the medical committee of the State Chapter of the American Cancer Society, and a member of the Board of Managers of the Union County Chapter, American Cancer Society.

DR. WILLIAM C. GAVENTA, 317 Crescent Court, Louisville, Ky., writes, “We returned to the States from Nigeria in July, 1963, and have remained in Louisville to allow our older son to finish high school here. I had a year’s residency in Internal Medicine at the V.A. hospital here and am now a regular staff member. I passed part one of the American Board of Internal Medicine exams in October, and am now awaiting part two in March.”

DR. H. BLAKE HAYMAN, 81 Crabtree Dr., Levittown, Pa., was presented with the first President’s Medal by La Salle College during ceremonies on December 8. The medal, which will be given annually to “the person who has done the most for La Salle College” was presented to Dr. Hayman by Brother Daniel Bernian, F.S.C., President of La Salle College, at a reception honoring Century Club contributors to the college’s annual giving program.

DR. WILLIAM T. LINEBERRY, JR., U.S.N. Hosp., Box 44, Navy 3923,
F.P.O., San Francisco, Calif., writes, "I have been Chief of Surgery here at the U.S. Naval Hospital, Yokosuka, Japan, since March 1963 and to date Pat and I have been sightseeing to Nikko, Nara and Kyoto as well as Hong Kong and Taiwan. My daughters, Libby, age 7, and Laura, age 5, can sing a number of Japanese songs and like Japan very much. This past week-end we stayed at an inn on the shores of Lake Kawaguchi and drove around two days in perfect weather viewing and photographing Mt. Fuji. Pat and I are proud to say we climbed to the top of Mt. Fuji last summer. We expect to be stationed here another year and a half."

DR. EDWARD H. MCGEHEE, 15 E. Highland Ave., Philadelphia 18, Pa., delivered a paper on latest advances in the diagnosis and treatment of leukemia at the annual meeting of the Delaware Academy of General Practice in Wilmington, Del., on December 5.

DR. JAMES F. OLLIE, 25 Linden Ave., N.E., Atlanta 3, Ga., was recently appointed Director of Laboratories at Crawford W. Long Memorial Hospital of Emory University. My family of five children enjoy Atlanta very much and so we should, since we have been here for 13 years. Jeff graduates here are as rare as hen's teeth, the closest to my knowledge being PHIL WARGA in Augusta. I am in desperate need of an associate and would give preference to a Jefferson man."

DR. HENRY P. Pechstein, 230 Hilton Ave., Hempstead, N.Y., is President-elect of the Nassau District Branch, American Psychiatric Association.

DR. JOHN C. SANNER, 146 S. Main Ave., Scranton 4, Pa., is Associate Project Director of the first regional clinic for comprehensive diagnosis, evaluation and management of children and adults with neurological and sensory impairments set up by Allied Services for the Handicapped and made possible through a grant from the U.S. Public Health Service. The Clinic is located in Moses Taylor Hospital, and will remain there until the $1.5 million rehabilitation center, now under construction, is completed. Then the Clinic will become part of the center activities. Ultimately patients with neurological and sensory impairments in 11 regional counties will be served by the Clinic.

1946

DR. WILLIAM D. BRANDON, Bethpage Medical Building, 4277 Hempstead Turnpike, Bethpage, L.I., N.Y., writes to Class Agent Dr. Mackell: "You certainly deserve a gold medal for effort. Am enclosing a check to save you writing another letter. Have given up my Obstetric and Gynecology practice in New York City and now work exclusively on Long Island in the Bethpage-Plainview-Massapequa area."

DR. WILLIAM S. CARTER, JR., 1404 Wheatsheaf Lane, Abington, Pa., writes, "I spend my total professional time at Abington Hospital where Dr. Kalman Frankel (Jeff '43) is Chief of Neuropsychiatry. Recently have been a founder of the Jenkintown Branch, Academy of Religion and Mental Health. I have been Director of Psychiatric Education and, since July 1964, have been Director of Adult Services at Abington Hospital's Mental Health Clinic. Ann and I live three blocks from the hospital and have four children ranging in age from nine through 15."

1947

DR. WILLIAM B. ABRAMS, Assistant Medical Director, Hoffman-La Roche, Inc., Nutley 10, N.J., was recently appointed Research Associate Professor of Medicine at Hahnemann Medical College.

DR. RICHARD A. HASTINGS, 125 E. Pennsylvania Ave., Ottumwa, Iowa, writes, "Our group of Radiologists, Drs. Singer, Hastings, and Ireland, have a new associate, Dr. John A. Dotterer, who originated in Philadelphia, but who decided to stay in the midwest after four years in the Air Force in this area."

DR. JOHN R. HELFF, Middle Brook Road, Bound Brook, N. J., is Chairman of the Department of Radiology and Nuclear Medicine at Middlesex General Hospital, New Brunswick, N. J. Dr. and Mrs. Helff have four children, aged 11, 6, 5, and 3.

DR. ROBERT I. JASLOW, Plymouth State Home and Training School, Northville, Mich., writes, "I am doing some teaching as Lecturer in Maternal and Child Health, Department of Health Development, School of Public Health, Univ. of Michigan and as Clinical Assistant Professor, Department of Pediatrics, School of Medicine, Wayne State University, in addition to my regular position as Medical Superintendent of the Plymouth State Home and Training School."

DR. GAIL G. L. LI, 1523 Kalakau Avenue, Suite 3, Honolulu, Hawaii, writes, "In October I was pleasantly surprised by a visit from JAMES T. HESPER '47, who was in Hawaii for a two week Active Duty tour with the U.S. Navy. Jim is with the Pasadena Tumor Institute, Pasadena, California. And in November, I spent some time with CURTIS SWARTZ '48, who was visiting Hawaii with his wife. Curt is still doing Anesthesiology in San Diego. All is fine here and am still busy delivering babies."

DR. ROBERT S. McCURDY, 2750 Broadway, Boulder, Colo., is leaving private practice in July '65 to serve as Pediatric Consultant to the Colorado State Health Department. Dr. McCurdy writes that he will continue to live in Boulder and would be glad to see any Jeff friends who happen to be in the vicinity.

DR. LAURENCE A. MOSIER, 10510 Chapman Ave., Garden Grove, Calif., writes to Class Agent Dr. Mandel, "We have just moved into a new home that we built. As far as the practice is concerned, the nine years in Garden Grove since leaving Jeff have been very interesting ones and enjoyable. I have been elected President of Boys Club Board of Directors for Garden
Grove and President-elect of the Orange County Medical Association for 1965. The next couple of years will prove to be busy and even more exciting. The growth of this area has been phenomenal. Our medical association will soon be the fourth in size in California.”

DR. LEONARD P. ROSEN, #5 Arthur Circle, Chester, Pa., was elected President of the Staff of Crozer-Chester Medical Center in July 1964.

DR. DONALD R. WATKINS, 11 Sanford St., Bradford, Pa., is completing 11 years of practice in Bradford where he does General and Thoracic Surgery in association with two other General Surgeons. Dr. Watkins is President of the Bradford City School Board and a member of the Citizens Advisory Committee on Urban Renewal. The Watkins have four children—Donald, 16, Douglas, 12, Gail, 9, and David, 3.

1948
Attention Class of '48

“As soon as there is proper storage space for Archives, I intend to donate to Jefferson Medical College the entire original supply of photographs of the 1948 Clinic, some three albums, These would always be available to members of our Class for duplication, etc. As editor of the original, I would agree to duplication by the school photographer, and personal use of the material. The book was not copyrighted, so that the Class as a whole really own the original and materials. If anyone has additional material, they might wish to forward it to Dr. FRANK J. SWEENEY, Jr. (’51), Chairman of the Archives Committee.”

JOHN B. ATKINSON, M.D.

DR. JOHN B. ATKINSON, Suburban Medical Building, 410 Township Line, Havertown, Pa., writes, “With reluctance and much nostalgia, I resigned from the Jefferson faculty to take an appointment at Hahnemann as Associate Professor in the Department of Medicine. I am Director of Hematology Clinics at Lankenau, Fitzgerald Mercy and Misericordia.”

DR. JOHN D. BEALER, 3639 Emerson Circle, Bethlehem, Pa., writes to Class Agent Dr. Quinn, “Congratulations on a wonderful job of revitalizing spirit in our Class. After being so far away for the past ten years in Hawaii, Illinois, and California, I hope to be more active now that I’ve returned home. It’s taken me 15 years, but we’re back East where I am Assistant to the Medical Director of the Bethlehem Steel Corp. I’ve had a pleasant reunion with many of my classmates in the few weeks since I’ve been back, and Jan and I are hoping we can attend the 17th at the Greenbriar.”

DR. LEONARD F. BENDER, 480 Huntingdon Drive, Ann Arbor, Mich., is President of the Michigan Academy of Physical Medicine and Rehabilitation for 1964-65. He was formerly Secretary-Treasurer.

DR. BENT G. BOVING, 1001 Overbrook Rd., Baltimore, Md., is with the Department of Embryology, Carnegie Institution of Washington, in Baltimore.

DR. JAMES H. EVANS, 1715 Sunshine Ave., Johnstown, Pa., spoke on “Benefits of the Nuclear Age” at the November 10th meeting of the Blair County Branch, American Association of University Women. Dr. Evans is in the full-time practice of nuclear medicine in the radiology department of the Mercy Hospital of Johnstown.

DR. ALBERT FINGO, 1814 Spera Lane, Norristown, Pa., has an 18-year-old son who is a pre-med student at Franklin and Marshall.

DR. WILLIAM F. HUGHES, 48 Cross Highway, Westport, Conn., writes, “I turned the corner of age 40. Am doing Surgery here in Westport—no major contributions—just working. I have a new house, new office building, six children, and am very happily married.”

DR. JAMES S. KESSEL, Ripley, West Virginia, writes, “Betty Mae and I are anxiously awaiting next July at which time we will rejoin ‘our’ Class of ’48 at the fabulous Greenbriar for the 17th Reunion. Of course, there is a risk involved—once you see West Virginia, you may not want to return home!”

DR. J. ED MCKINNEY, 205 Spears Avenue, Chattanooga, Tenn., writes, “I have been in practice here for 12 years now, doing General Practice in partnership with two other doctors. We operate a 39-bed hospital, doing our own medicine, Obstetrics, some surgery, and having consultants in for specialty work. The hours are long, but very interesting with a lot of Pathology. I came to New York this past summer with my children, but no time to stop in and see Jefferson, will try next time.”

DR. RICHARD J. POTTER, R.D. 3, Dallas, Pa., is the newly appointed Baltimore County Health Officer and Deputy State Health Officer.

DR. NELSON H. SCHIMMEL, 196 Rensselaer Rd., Essex Fells, N. J., has been elected Vice President for Medical Research of the Warner-Lambert Research Institute. In the newly created position Dr. Schimmel will direct all the medical activities of the institute, including maintenance of liaison with governmental agencies.

1949

DR. RICHARD L. BRYSON, 120 Bank St., Landisville, Pa., and Mrs. Bryson have four children, three in school and one pre-school.

DR. EDWARD J. CHMELEWSKI, 22 E. Pine St., Millville, N. J., has been doing General Surgery in Millville since getting out of the Navy in 1957. Dr. Chmelewski reports that his family is growing; he now has six girls and two boys.

DR. ROY DECK, JR., 433 Atkins Ave., Lancaster, Pa., is Director of the X-ray Department at St. Joseph’s Hospital in Lancaster. The Decks have three sons, aged 13, 9, and 5.
Dr. Joseph M. Hopen, 3419 John¬
son St., Hollywood, Fla., writes,
"I always look forward to hear¬
ing about my fellow Alumni. At
present I am practicing Ophthal¬
mology in the sunshine state. I
obtained my specialty boards sev¬
eral years ago and am Chief of
Ophthalmology at Memorial Hos¬
ital and the South Florida State
Hospital, both in Hollywood. We
have a fine family, three sons (ages
11, 10, and 5) and I have already
signed them up for Jeff. I hope to
be at the A.M.A. in New York
City and would like to renew old
acquaintances."

Dr. Richard Kidder, 155 Vassar
Drive, Lake Worth, Fla., writes
that he took in a new associ¬
ate in the practice of Internal Medi¬
cine and that they are quite busy. His
wife, Dottie, is singing in Carmen
in the Civic Opera Group.

Dr. Thomas D. Michael, Medical
Center, Frederick, Md., spoke on
"A Survey of the Maya Culture"
at the banquet of the Frederick
Travel Club held on November 11.
Dr. Michael has been interested in
archeology and anthropology since
his early teens. He shifted from his
principal original interest in the
Near East to the Maya area be¬
cause of the accessibility of Middle
America, as well as the many mys¬
teries still surrounding this most advanced of aboriginal American
Cultures, but foremost because the
knowledgeable amateur can still
make meaningful contributions to¬
ward the understanding of Maya.

Dr. Michael has submitted re¬
ports on ruin sites mostly notable
in Quintana Territory, Yucatan,
Mexico, to the National Institution
of Archeology, Mexico City. He has
a permit pending to begin a more
detailed study of "Coba," a site
which may afford some much
needed answers regarding the re¬
lationship between the "classical"
ruins of Guatemala and the so-

called "post classical" ruins of
Mexico.

Dr. Robert E. Schulz, R-1, Bur¬
bank, Ohio, and his family moved
to Burbank on September 2, 1964,
and are enjoying country living.

Dr. Schulz is a Pathologist in Ash¬
land and Wooster, Ohio. He oper¬
ates a HAM radio, call letters—
WAS1TT.

Dr. Burgess A. Smith, 803 Wash¬
ington St., Huntingdon, Pa., has
been elected President of the Hunt¬
ingdon County Medical Society.

Dr. George B. Voigt, 512 Murray
Hill Rd., Binghamton, N. Y., writes,
"I'm still at the same ole grind—
replacing arteries and stripping
veins, etc. I even play an occasional
dance job to help make ends meet.
Have same wife and same two
children—wife now the shortest
one in the family."

1950

Dr. David J. Lieberman, 915 E.
Cliveden St., Philadelphia, Pa., was
named to a post in the State Health
Department’s Bureau of Field Ser¬
vices. Dr. Lieberman will work in
the residency training program in
the Philadelphia regional office. He
was team physician for the Harlem
Globetrotters basketball team in
1956, an Instructor in Surgery at
Temple University School of Medi¬
cine and Chief of Surgery for three
years at Warren State Hospital.

Due to the large influx of Class
News Notes, we are holding news
items about members of Classes ’51
through ’64 for the May issue of
the Bulletin.

ENGAGEMENTS

1957

Dr. Robert A. Schwab to
Mary Ellen Satin.

1962

Dr. Alan Bruce Rubens to
Donna Jill Daitzman.

1963

Dr. Irv Phillip Ratner to
Lynn Carole Olen.

Dr. Donald Rothfeld to
Harriet Weill.

1964

Dr. Henry I. Babitt to
Janice Ruth Laub.

WEDDINGS

1928

Dr. Jo Ono to Mrs. Kimi

1954

Dr. Thomas A. Hodge to
Lois Francis, August 31, 1963.

1956

Dr. James B. Lee to Audrey
M. Gustavson, December 26,
1964.

1957

Dr. Morton J. Robinson to
Jane Alexander, December 6,
1964.

1959

Dr. Murray Feingold to
Lorinda Jane Bluemer, Decem¬
ber 13, 1964.

1960

Dr. Lester G. Bixler, Jr., to
Suellyn Kuntzelman, January

1961

Dr. Maury Hoberman to
Joyce Lyn Bleier, November

1964

Dr. Aaron M. Longacre to
Martha Ann Townsend, No¬
vember 16, 1964.

DR. AARON M. LONGACRE to
Martha Ann Townsend, No¬
vember 16, 1964.

1964

Dr. James John Pepper to
Judith Ann Copp, January 9,
1965.

BIRTHS

1954

A son, Benjamin Adam, to
Dr. and Mrs. Edward Tober,
April 12, 1964.
1955
A son, to Dr. and Mrs. James A. Murray, August 12, 1964.
A son, William John, to Dr. and Mrs. Charles T. H. Storm, May 18, 1964.

1956
A daughter, Elizabeth Anne, to Dr. and Mrs. John Davies, April 8, 1964.
A son, Jeffrey Roy, to Dr. and Mrs. Irwin R. Fisch, August 17, 1964.
A daughter, Camelot Ann, to Dr. and Mrs. Theodore J. Marshall, May 19, 1964.
A son, Eugene Girard, to Dr. and Mrs. Rodney D. Moyer, September 16, 1964.

1957
A daughter, Lorraine, to Dr. and Mrs. John R. Prehanty, September 1, 1964.
A son, Scott Christopher, to Dr. and Mrs. Penn P. Shelley, November 7, 1964.

1958
A daughter, Karen Rae, to Dr. and Mrs. Donald N. Dubrow, November 6, 1964.

1960
A daughter, to Dr. and Mrs. Robert M. Larkin, November 7, 1964.
A daughter, to Dr. and Mrs. Edward B. Lipp, Jr., November 7, 1964.
A daughter, Nancy Lynn, to Dr. and Mrs. John T. Murray, April 23, 1964.
A son, Peter Andrew, to Dr. and Mrs. Luke G. Tedischi, October 29, 1964.

1961
A son, Michael Gerald, to Dr. and Mrs. Harris Forman, October 6, 1964.
A son, Todd Lawrence, to Dr. and Mrs. Arnold I. Hollander, November 17, 1964.
A daughter, Claire B., to Dr. and Mrs. Herbert C. Perlmutter, October 21, 1964.
A daughter to Dr. and Mrs. Frank M. Quinn, December 31, 1964.
A daughter, Sheila Margaret, to Dr. and Mrs. Joseph W. Sokolowski, Jr., August 23, 1964.

1963
A daughter, Nancy Lee, to Dr. and Mrs. William W. Atkinson, November 28, 1964.

1964
A daughter, Joan Phyllis, to Dr. and Mrs. David M. Capuzzi, November 8, 1964.
A daughter, Jill Beth, to Dr. and Mrs. Ronald H. Cohen, December 17, 1964.
A son, James William, to Dr. and Mrs. William A. Freeman, August 24, 1964.
A daughter, Andrea Lyn, to Dr. and Mrs. Richard D. Shapiro, July 14, 1964.

Alumni Placement Bureau

Positions Available

A GENERAL practitioner is wanted to assist two physicians in practice starting in late spring or early summer, 1965. Hospital privileges in new 200-bed hospital. Practice is located in southern New Jersey community near Philadelphia.

A GENERAL practitioner needed to replace recently deceased physician in the small community of Catawissa (Columbia County), Pennsylvania. Excellent hospital facilities nearby. Opportunities for hunting, fishing, and swimming.

THERE is an opening in suburban Philadelphia (Montgomery County) for a general practitioner.

JEFFERSON graduate in Northeast Philadelphia has an extremely active general practice including office, laboratory, equipment, and attractive ranch home, which he wishes to rent or sell. He is leaving for federal employment.
Some Interesting Jefferson Alumni

The following is the eighth in a series of portraits of “Some Interesting Jefferson Alumni” which was introduced in the August, 1963, issue and will continue to be presented in future issues of the Alumni Bulletin. This material was compiled and written by Dr. Edward C. Britt, Class of 1933 and appeared in the 1940 Clinic. That same year it was also published in “The Medical Searchlight”. We are deeply indebted to Dr. Britt for his keen interest in Jefferson’s historical heritage and for bringing this material to our attention. This month’s portrait is of Dr. Greensville Dowell.

Greensville Dowell, M. D.

Our narrative now swings from Syria back to the state of Texas, where we first visited in company with Anson Jones (1798-1858), the last President of the Republic of Texas. Greensville Dowell (1822-1881), M.D., 1847, was born in Virginia. He settled in Galveston where, in 1870, he published the Galveston Medical Journal, the first medical periodical published in Texas. From 1865-1877, he was Professor of Surgery in the Texas Medical College. In 1873 he published “Radical Cure of Hernia,” in which he described a method of repair which became known as “Dowell’s Operation.” In 1874, he first performed Nephorrhaphy, seven years before it was introduced by Hahn. In 1876 he published Yellow Fever and Malarial Disease, a copy of which is in possession of the College of Physicians.

In discussing the etiology of yellow fever, permit me to quote a passage from his book, “Hence there must be some cause, specific and sui generis which produces it. This cause I have assumed is animalicular or fungotic (microscopic) and partakes of the nature of the grasshoppers of Egypt and the western prairies, or the smut in cereal; but these are too small to be observed with any instruments we now have, and have so far eluded demonstration; but if we compare the effects of heat and cold on gnats and mosquitoes, it will not be difficult to believe it is of the same nature, since it is controlled by the same natural laws.”

There is a portrait in possession of Dr. Dowell’s family showing him wearing two gold medals, presented by the cities of Memphis and New Orleans, in appreciation of the work he did during the yellow fever epidemics. Following Dr. Dowell’s (a widower) second marriage to a beautiful young lady, a group of friends decided to serenade the honeymooners and gathered beneath the window of the hotel room where the bride and groom had gone. This effort was not appreciated by the groom, who in attempting to disperse them, fell to the ground, suffering a severe fracture of the left arm. (A tough break, ed.)
CALENDAR OF FUTURE EVENTS

April 16th-30th, 1965
THIRD EUROPEAN POSTGRADUATE MEDICAL SEMINAR
   Vienna, Austria

June 9, 1965
REUNION DAY CLINICS
DEAN'S LUNCHEON
