The Jefferson School of Population Health is establishing exciting new partnerships to enhance professional development and CME opportunities that are directly relevant to clinical practice in this changing healthcare landscape. A recent collaboration, The Johns Hopkins University Practice Improvement Strategies in Cardiometabolic Disease Therapies, presents a complimentary PI-CME activity that provides primary care physicians, endocrinologists, cardiologists, NPs and PAs with the tools to measure quality of care and to identify opportunities to improve the outcomes for their patients with cardiometabolic disease.

All practicing clinicians can earn 20 CME/CE credits without the need to attend a live or online program. After collecting some basic data on their patients, participants will be provided with benchmarking reports that satisfy American Board of Internal Medicine (ABIM) MOC Part IV requirements. Participants will also receive detailed clinical reports analyzing care delivered to patients with cardiometabolic disease against individual peers (anonymously) and national trends. The program will also provide exclusive access to a secure and moderated “mentor program,” an online Q&A forum with nationally-recognized experts in the field.

Clinicians are invited to share the benefits of the educational grant funding that supports this program. Each participating practice is eligible to receive $500 to support the collection of data on 25 patients with diabetes, hypertension, dyslipidemia and/or obesity. Funds are limited and will be awarded on a “first come, first served” basis. Interested practices are encouraged to complete a brief registration online at http://jhucardio.imedicaldecisions.com, or to contact us by email at PIsupport@imedicaldecisions.com, or to call (610) 891-1640.

The Johns Hopkins University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Johns Hopkins University School of Medicine designates this PI CME activity for a maximum of 20.0 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
